Examiner commentary

This sample effectively explores and subverts female role models in the form of Barbie Dolls. The candidate playfully engages with the idea of 'being the doll' with some irony, and then progresses to explore distortion and destruction of form to create new images. These are made with imaginative use of photographic language. The candidate references the work of photographers with some perception, fashion photographers help them to understand how to use a model effectively, Lucas Simones' burning of photographs inspires a development of the core idea, as do Hockney's joiners. We can see that these references inspire creativity and help the ideas to evolve. This submission straddles Performance Levels 4 and 5, with consistent idea development and purposeful direction, and though there is a sustained and inventive use of visual language, the candidate's work does not reach the level of insight to fully achieve Performance level 5 in all objectives.

AO1: Effective and purposeful ideas are developed with competent and at times skilful use of studio and fashion photography. Some perception is evident as the concept of the Barbie Doll is developed with reference to the work of contemporary photographers, and there is coherence in the way ideas progress.

AO2: The use of self-portraits as a doll are effective, and cliché is avoided by a willingness to explore the subject imaginatively. There are diverse photographic processes used, which are not solely reliant on digital software, and these are refined as the work progresses with extensive annotations describing the review of progress.

Examiner commentary continued

AO3: The candidate has a skilful use of photographic processes. They skilfully record their observations with a level of control that moves this objective into Confident and Assured, Performance Level 5, but critical analysis of meaning and sources, showing only some perception, keeps the mark at the lower end of this level.

AO4: There is a Confident and Assured realisation of the idea, which demonstrates some personal insight in the way female stereotyping is challenged by the work, and the candidate is able to move beyond obvious solutions to produce a refined and independent outcome. The commentary confirms that there has been a genuine creative journey, and the step to Performance Level 5, Confident and Assured, has been achieved for this objective.

Personal Study: The study informs the practical work with some perception of the ideas of their chosen artists, particularly Margaux Lange, and the candidate demonstrates a consistent use of written language, but analytical skills are still emerging in the way artists and concepts are understood, which places this study at the lower end of the Competent and Consistent, Performance Level 4.

REFLECTION

LINSAY ADLER

Lindsay Adler is an American portrait and fashion photographer in New York. She is a photographic educator and is one of the most sought after speakers internationally, teaching on the industry's largest platforms and prestigious events and being named one of the top 10 best fashion photographers in the world. Her editorials have appeared in Bulet Magazine, Zink Magazine and Fault. She has also worked with some of the top brands in photographic related industries such as Canon, Adobe and Microsoft. As well as this, she became the first woman to win the Rangefinder Icon of the year award, in 2020.

I really like this artist as she is known for her creativity and collaboration with designers and stylists, creating fresh and bold looks. Her graphic style has become the trademark of her work, whether that be campaigns, jewelry, hair or athletes.

MARIO TESTINO

Mario Testino has become one of the world's best-known and most celebrated fashion photographer along side portrait photography. His work has featured internationally in magazines such as Vogue, V magazine, Vanity Fair and GQ. He has also created images for brands such as Gucci, Burberry, Versace, Michael Kors and Chanel. He has documented subjects from A-list stars, musicians, supermodels and artists as well as subjects he has encountered throughout his travels. His work muted the 'supermodel' trend as he preferred working with lesser-known models like Kate Moss. Testino has captured many iconic moments, the main ones being the Royal family and their engagements/christenings.

I really like this photographer as he goes into so much detail and creativity when considering the view points, the location and the variety of colours/patterns on his models. His bright and sharp style of photography is different from normal bland and murky fashion photography in the 1990s.

PABLO THECUARDO

Pablo Thecuardo is a Madrid based photographer who creates abstract photo collages with a surreal touch. He said, "The collages I make express the duality in the human being, who we want to be versus who we really are and what part of us we show others." He chose collages as a form of communication because it's a never ending process. You can overlap, cut and stick over and over again. One of his biggest inspirations is the internet. All his thought and creativity is pulled apart from various forms of social media and websites to create these beautiful collages.

I think this photographer's form of art and the collection of images he uses is elegant, yet deep and is a different way to present photography. A collage allows him to use his images and combine them in any way he wants as well as interpret and present them in a way that creates a story, which in this case is exploring the duality in a human being.

TIM TADDER

Tim Tadder is an international photographic artist. He is most recognised for his inventive conceptual advertising photography and has been ranked top 200 worldwide photographers. He said he prefers capturing still images as he likes the less is more approach. Tadder finds inspiration from imagery on TV, movies and Instagram. He visualises what he sees but also what he doesn't see. He tries to find the void and concepts hidden within the image.

This artist explores various of different concepts and ideas, from America to behind a mask. He also incorporates paints and bold colours as well as water and smoke. I really find this photographer fascinating and unique as his images take you through a journey and try to tell a story.

EXPERIMENT SHOOT

DAYLIGHT

LOW KEY

PROJECTION

REFLECTION

DISTORTION

PABLO THECUARDRO

Pablo Thecuadro loves to explore the **simple** side of photography, while using **strong images**, creating a **minimalistic** kind of **collage**. They are **powerful** but **straightforward** when put together. He uses a variety of **techniques** to craft his **abstract art**, from **cutting** and **shaping** the images by hand to **overlapping** and **combining** them digitally. Thecuadro breaks away from viewing habits in the fashion and advertising industry by playing with the **social norms** and stopping the usual high end fashion from defining the modeling world as well as **expressing** the uncertainty and **mystery of mankind**.

When asked about why he chose to express the **quality** of the human being through collages, he said it's because in collages we see many faces and we see how we really are. The way he views humans, is through change and growth. He recognises how we change everyday but still remain the same person.

ANALYSE:

This photographer primarily uses **block colour** or **plain white** **backgrounds** to keep the subject as the focus of the **collage** and not to distract the viewer using **patterns**, making it very chaotic. I like how he does a range of different **manipulations** using **full body** and **facial features** as well as **black and white** images **overlapping** color images creating a **contrast** of **mood** in the subjects.

When it comes to creating my own collage, I could eventually add in **two models**, **combining** them together and try to show two **personalities** using **color/objects** and **fashion**.

SHOOT PLAN

SHOOT#: 1

DATE: 14/11/2020

THEME: Distortion in Portraiture

EQUIPMENT:

- Tripod for my camera
- Reflector for shooting in the sun

LIGHTING:

- Studio lighting (black and white/color)
- Natural lighting (day/night/sunset)
- Simple lighting with no patterns
- Some shadows (highlight/lowlight)

LOCATION:

- Studio
- In natural lighting, I could use the nature and surroundings for a interesting background.
- Possibly a windy location

MODELS/WARDROBE:

- Female and male models
- Simple make up
- Messy hair / hair tied up
- Some images with basic/plain clothing
- Some with baggy / flowing type clothing

TECHNICAL APPROACH:

- In natural lighting, I need a high shutter speed and low aperture to allow less light into the camera and to get a still image when there is wind in my location.

CREATIVE APPROACH:

- Face forward / side profile images
- A well balanced shoot with my model in the center of the image
- Capturing different facial expressions
- Birds/worm eye view

PAINT
SHAPES
DISTORTION
COLLAGE

I love the way this inverted image turned out as it further emphasizes the color on the original image. I also like the effect the invert had on the pattern in the background as the lines are one of the first things you notice.

Using images from my photoshoot, I experimented with different manipulations through Photoshop. Each image is using a different technique, showing inverted images, collages and distortion. The manipulation on the right is a collage, using three different images of my own along with three pattern images. Although I am not distorting the facial features, by separating them it creates a chaotic nature and more fun/interesting to look at.

LIGHTROOM EDITS

I experimented with colour in this image as I felt the one I had taken was simple and boring. Next time I need to make it brighter and a more interesting image to look at.

CONTRAST
SHADOW
HIGHLIGHT
BRIGHTNESS
EXPOSURE

I emphasised the warmer colours in this image, where the sun hits my model, as well as the shadows created by her hand.

The image below was slightly overexposed so I experimented with changing the exposure and contrast to emphasise the color of her clothes/sky!

Scanned with CamScanner

SEPHORA VENITES

This photographer has inspired me through her colourful and chaotic natured collages, made by both free hand and digital. She overlaps and layers images of her own, while also adding bold block colours into her backgrounds and the shapes surrounding. Her colour combinations are mainly a mixture of warm colours and she uses very minimal patterns, which takes some attention away from the background and places more on the subject/model. The models used in her images, usually have some form of distorted or exaggerated makeup on, using bright colours and enlargement to emphasise the facial features and the finer details.

When creating my own collages based on this photographer, I will keep in mind the different colour combinations as well as the use of shapes and the placement of facial features within. My portrait images will be overlapped and cropped to fit the theme of each collage and I will try to add some patterns around my page to create that chaotic nature, like Sephora Venites's work.

- Enlarged eyes
- Enlarged lips
- Exaggerated makeup
- Hand overlapping the face
- Scissors randomly placed

- Mixture of both warm and cool colours
- Use of shapes (circle, triangle)
- Facial features overlapping
- Different layers
- Bold / bright colours

DIGITAL PROCESS:

My first stage involved, figuring out a background / colour scheme as well as my first layer which could have been patterns or shapes.

Alone the three triangles looked basic and boring so I added some circular lines under those layers.

I next decided to add in a pop of bright colour (instead of patterns) to bring more chaos to the image.

My next step was to add in my subject/model. I decided to go with facial features. (eye, nose, mouth).

FINAL OUTCOME:
I like the positioning and the shapes I used in this collage. I could add more colour/pattern into it next time.

Scanned with CamScanner

Scanned with CamScanner

PHYSICAL PROCESS:

The images I will use to create my physical collage.

I cut them up so I could join and layer the colours

The outcome after layering them all together.

Adding on facial features with crazy make up to make it visually more interesting.

The final piece I added to my collage.

CS

Scanned with CamScanner

JOE CRUZ

Joe Cruz is a visual artist and also does graphic design. In his work, the main theme is portraiture, expressionism and form, using ready made photographs. The colour he regularly uses symbolises love, youth, acceptance and equality; a mixture of mainly yellow, pink, blue and green. He focuses on the use of lines; outlining and separating facial features/objects. The subject/model in his work is usually in black and white on a plain, coloured background. Rarely any pattern is used in his work as he keeps it simple and follows a less is better approach.

As I go into my process and create my own interpretation of Joe Cruz's work, I will attempt two different methods, digital and physical. I will keep in mind his colour scheme and using those colours to show the mood of my image.

- Black and white model image
- Plain coloured background
- Outlining the body

- Warm colours
- Black and white image

EVALUATION!

• FAVORITE: SEPHORA VENITES

LAYER 1

LAYER 2

LAYER 3

LAYER 4

FINAL OUTCOME

changes mood ← background change of image!

This piece is my favorite as I feel like it captures and represents my artist's sense of work the best, in terms of layering and placement. By using photoshop to cut out the hands from another image, I managed to keep the shadows and highlights giving them more depth and a 3D look on my page. The shadows also help to create a texture of roughness and dirtiness around the arms. I used a gradient, blue and white, for my background, trying to keep it simple, while adding colorful and crazy features, for example the bright pink eyeshadow and green eyebrows over the top of my model. My composition and layering consisted of 4 images, with each exaggerating colour and distortion, enlargement and shapes. The images were each cropped into different shapes and layering them added more depth and were key to making this collage look effective as without them it would be a basic and boring portrait image. Next time, I could add more pattern to my collage / background, or use a bright and bold colour for the background. I also need to brighten up some of my layers and strengthen the sharpness to make it less grainy. In terms of linking with my other images, they all have the same process of adding cut out features from faces and layering them over each other as well as a simple and basic background colour. I found it easy to make following a step by step process and keeping my layers organised. However, getting the right lines and cutting the images precisely was harder to do and really time consuming compared to creating a physical collage.

MORE SEPHORA VENITES MANIPULATIONS:

DIGITAL

DIGITAL

DIGITAL

PHYSICAL

FURTHER EVALUATION...

I chose Joe Cruz as my second artist as I like the way he uses the theme, expressionism through portraiture and colour. The colours he uses are specific to symbolize

OVERALL:

Over the course of this topic I have learnt many skills including how to use photoshop and lightroom. These were two new softwares for me but I love using them as well as seeing the final outcomes that I can make within these. In photoshop I learnt it was best to keep layers organised and follow a step by step process. I can include many layers, shapes and colours to bring my final piece together using photoshop.

I gradually came to my idea of collage manipulation by exploring and experimenting with different techniques. I looked at inverting my images, changing them into black and white and adding brush strokes / lines and objects around the face.

My mood allowed me time to experiment with physical and digital techniques. However, I found my digital manipulations took the longest to make and therefore took up most my time. I felt like both were equally effective but physical manipulation was the easiest and quickest when it came to cutting, placing and moving stuff around to fit it all together.

FINAL OUTCOME

MORE SEPHORA VENITES MANIP

DIGITAL

DIGITAL

This piece is my favorite as I feel like it captures and represents my entire sense of who I am. The layering and shadows of 3D look on texture of a gradient, but it's simple, with an example of the top consisted of distortion, cropped into depth and without the **Next time**, I need to bring sharpness to my other image cut out features as well as a easy to make layers organic images precisely compared to

FURTHER EVALUATION...

I chose **Joe Cruz** as my second artist as I like the way he uses the **theme**, expressionism through portraiture and colour. The **colours** he uses are specific to **symbolize** love, youth, acceptance and equality. The different forms of **lines** he uses create a figure and shape around the **face/features**. By keeping the **background** and the model (image) in black and white the colour used over the top is emphasized and makes the color combinations more visible and interesting.

In my image, I used a combination of red, yellow and purple, creating lines and shapes through out the face. **However**, because my image was not in black and white, I feel like the colour does not stand out as much and the yellow blends in too much with the **tone** of the skin. Some of the shapes and outlines I created seem pointless, so I could have left them out or potentially added something else. This piece was not my favorite as it felt very rushed and could have been more creative if I had thought it through longer.

ANIMALS

OBJECTS

FOOD

DECEPTION

FEATURES

COLOUR

MODELS

KELSEY MCCLELLAN

Kelsey McClellan uses daily **objects** and **situations** and **captures** these in a very **aesthetic** way. McClellan is able to **capture** the most **obvious** things in a **classy** way. Along with photographing **food**, she **colour coordinates** daily **situations** in ways you've never seen before. She **props** her images so we have a **close-up** of the **hands** with their colour coordinated food. This leads to viewers thinking about the **significance** of this **colour** and the **mood** it gives off. The **food** gives a **focus** and a **story** to the image as well as something to **admire** as it is placed perfectly and precise.

This artist has a **creative** and **unique** approach when capturing the **aesthetic** of **food** and **colour**. The **various** **foods** and the use of different **tones**, **warm** and **cool** **colours** creates a range of images to **compare** and allows McClellan to create **moods** related to the type of **food**.

MICHELLE BISAILLON

Michelle Bisailon is a **conceptual** artist who is famous for her **distorted reality** **selfie photos** using **meticulously** arranged **mirrors**. She **incorporates** everyday props, like **cats** and **flowers**, and says she is trying to play with the notion that **nothing is quite what it seems**. She creates **original** and **organic** photographs going against the **media** and their tendency to **manipulate** and alter images they are releasing online. Her goal is to remind people that there is always **something missing from a picture**, **another side to the story**. Part of her work is encouraging **natural** and **basic** **lightening**, not over doing the **pattern** and the **colour**. Her work catches your eye with its **simple** and **natural**, **creative viewpoints**.

I like how this photographer creates her images **naturally** without **manipulation**.

ANETA IVANOVA

Aneta Ivanova, a 23 year old Bulgarian photographer, who after **focusing** her work and **portraits**, she also began **experimenting** with different **techniques** to give a new meaning to her photographs. She began with **long** **exposures**, then **double** and **multiple exposures**, **combining** a number of **portraits** and then she focused on portraits with **landscape** and **nature elements**. Her **experimental** work **combines** **portraits** with **landscapes**, which results in a **dreamlike**, **surreal** experience. She says she can find **inspiration** in almost everything around her. Besides reading **books**, listening to **music** and enjoying the **arts**, the sea and **seemingly** untouched **landscapes** have always been a great source of **inspiration**.

I like how Ivanova has made some of her images **black and white**, making them more **subtle** and **expressive**, while also making the photographs blend **seamlessly** together.

MARC VICENS

Marc Vicens is a Spanish photographer who wanted to **capture** the **stress** and **pain** of the ongoing **economic crisis**, so he found a bunch of **unemployed** people and asked them to **hang upside-down** for **right-side-up** portraits. His goal of the series, titled **"Hanging"**, was to **creatively** portray the feeling of **anxiety** that dominates the **daily life** of these individuals.

This photographer has a special way of **reflecting** on the **expression** of a person in a desperate situation. The **angles** created by Vicens puts **emphasis** on that **desperation** and **anxiety** as well as the **dark** and **depressing background** further showing the **mood** of these people.

KELSEY MCCLELLAN

SHOOT PLAN

Kelsey McClellan draws her inspiration from people she sees out in the world, just going about their business. The way they talk, and walk, and interact with one another while performing routine errands and transactions. Kelsey started by the desire to re-create and explore these small moments she had observed, her idea was to just play around with colour and texture, to create a series of casual, monochromatic 'sets'.

I really like this photographer and her unique idea for photographing food while also combining colour, creating a clean and almost minimalist aesthetic. She hasn't limited herself to one colour and instead experiments with all tones and shades giving her images texture along with shadows and highlights. She uses artificial lighting, keeping the background in the theme of the models clothes and the food they are holding.

SHOOT #: 1

DATE: 28/12/20

THEME: Portrait
unusual viewpoints

EQUIPMENT:

- Coloured backgrounds
- Coloured clothes
- Food
- Positioning use objects (bags, shoes)
- Reflector

LIGHTING:

- I will experiment with both natural and artificial lighting (studio)
- However, my main focus will be natural lighting.

MODELS/WARDROBE:

- Female, and male models
- Colour co-ordinated clothes
- One seat, domestic clothing
- Bold colours and possibly some pattern.

LOCATION:

- Most of my photos will be taken outside with natural lighting.
- Repaint walls with plain backgrounds, maybe experiment with abstract / dark backgrounds.

TECHNICAL APPROACH:

- If I am outside taking my photos in the sun, I will need a high shutter speed to allow less light into my camera.
- If I am inside and I am not using a bright light, I will need a low shutter speed.
- A reflector can be used outside to help the with shadows and changing the light.

CREATIVE APPROACH:

- My images will be taken from the waist up and below the neck.
- The colour of the food will match the colour of the clothes.
- I will experiment with angles, what food is used, where my model is standing / sitting and the parts of the body shown.

IDEA:

I want to experiment with different foods and colours like this photographer and try to connect the colour and food with the parts of the body and what they are doing.

COLOUR ANALYSIS

In my photoshoot, I experimented with different colours as well as going further and looking at different tones, shades and lighting I can incorporate into my images.

Colours used if I did a physical edit

COOL COLOURS

WARM COLOURS

Colours used if I did a physical edit

Tertiary Colors

Primary Colors

Secondary Colors

MY IMAGES

NATURE

I really like the quirky and aesthetic look as the objects/ food are similar in shade to the rest of the image (clothes).

I wanted to look at analysing the meaning of colour used for my images and see if there are any links and if not possibly think about that in my next photoshoot.

For example, pink linked to sweetness so I used chocolates.

In terms of my colour combinations, instead of making them the same colours I could to 'opposing colours', like cool and warm (red and blue).

POWER

HAPPINESS

EXCITING

MEANING OF COLORS			
RED PASSION, LOVE, ENERGY	ORANGE CREATIVITY, ENTHUSIASM	YELLOW HAPPINESS, OPTIMISM	GREEN NATURE, GROWTH, HOPE
BLUE CALMNESS, TRUST, LOYALTY	PURPLE ROYALTY, PROSPERITY	WHITE CLEANLINESS, PURITY	BLACK ELEGANCE, POWER, GROWTH

SWEETNESS

STRENGTH

INNOCENCE

PHOTOSHOP EDITS

LIGHTROOM EDITS

PHOTOSHOP 1.
PHOTOSHOP 2.

In this edit, I played around with the brightness of the background image and the brush strokes to make those colours pop and stand out.

PHOTOSHOP 3.

I kept the focus on the center of my image and used green as the main colour in the piece, showing different shades by making the image darker in the middle and progressively making lighter.

Images used in my edit

I really like this edit and the way my two images are combined. The two opposing colours complement each other very well as they are both classic and sophisticated. I could change the saturation/brightness more on one image to make it stand out more.

In this image I wanted to put the focus on the sweets in the hand, so I zoomed in on that area and distorted it. I then changed only the look of the sweets using the brush and increased the white areas and the highlights to give them a bright and glowing effect. I changed the contrast to make them a warmer pink and also increased the texture and clarity to get rid of any blur and emphasize the detail.

The image I had taken looks underexposed, so I increased the exposure as well as the contrast to give the image a warmer and brighter look. I also increased the clarity to bring out the detail in the face and on the towel/clothing.

CHANGES ON THE SWEETS

ANTHONY GERACE

Anthony Gerace is a London-based photographer who focuses on the visual history of contemporary arts. Gerace's collages recall the avant-garde movements of the 30s and 40s, and his photograph series American homes. The contents and focus are researched and represented through his aesthetically fulfilling photographs and collages, producing a sort of abstract-figurative art. He began to think of collages in terms of typology, trying to see how plant a rigid system can become through repetition. He explored using the same technique, doing the same thing over and over again, using different sources. The title of his project is, "There must be more to life than this," began as a way of him trying to approach collages on a more minimal framework based on a figurative image. I really like this photographers approach to manipulation. It is simple but effective and fits well with his selected photos.

TEMPLATES:

4x4

6x6

I didn't change much about the lighting in this image because I used the saturation and the shadows/highlights on the face. I used the 6x6 grid to show all the different shades against each other.

MANIPULATION 1

I really like this way of manipulating an image, giving it a puzzle like affect. It requires a minimal framework and with my images being focused on the colour combinations and using different shades, this manipulation is perfect to compare them and experiment with highlights/shadow.

I also want to experiment with a full image manipulation instead of just sections and also play around with the individual squares and separate them.

MANIPULATION 2

In this manipulation I used a 4x4 grid as I only wanted to manipulate a small section. I increased the brightness and contrast of the images in the grid to make them stand

CS Scanned with CamScanner

Scanned with CamScanner

CLAIRE LUXTON

Claire Luxton is a British contemporary multidisciplinary artist who exhibits internationally. She works with photography, painting, poetry and installation. Claire is drawn to the **concept** of the truth and how people weave **beautiful** lies around their lives. In her work she presents **femininity**, **vulnerability**, luring the viewer with intrigue and uncertainty. It draws on both the modern anxiety of **society** and the **environment**; each piece of her work becoming an **exploration** of **isolation**, **desire** and **uncertainty**. She taps into parts of the **world** and herself that nobody sees.

I like how this artist uses different **materials / props** in her images, e.g. flowers, match sticks, plasters. She uses natural settings / people presenting **minimalist** pieces of work but also shows **creativity** and **uniqueness** within the details.

KIRSTEN HATGI SINK

Kirsten Hatgi Sink is a visual artist and photographer, working in digital, film and sculpture. Kirsten loves **beautiful** minds, faces, bodies and often shows these of in her pictures by covering them with flowers and glitter. She **combined** two of the biggest art **genres/portraits** and **floral still lives**. The series 'flower face' meshes together the two genres to create a very **unique** and **beautiful** images which can sometimes be **disturbing**. To prepare for her images, she **arranges** her flowers by **gluing**, **pinning** and **tying** them around her **subjects**.

I really like this artist and her **creative**, **chaotic** approach to **presenting** flowers and beauty on her **subjects**. In her images she keeps the same **combination** in each. For example, purple and blue or yellow and orange. Showing **interesting** ways of presenting colour, keeping it very **natural** looking in some images and in others creating a **fantasy**, **magical** feel.

SHOOT PLAN

SHOOT #: 2

DATE: /01/2021

THEME: unusual viewpoints

EQUIPMENT:

- Coloured flowers / objects
- Coloured clothes
- Reflector

LIGHTING:

- Natural lighting

MODELS/WARDROBE:

- Female and male models
- Coloured clothes
- Bold colours
- Flowers
- Hats
- Socks
- Bags

LOCATION:

- Most of my photos will be taken outside
- I want natural lighting so under the sun / midday will be best for my photos.

TECHNICAL APPROACH:

- If I am in a bright light I will need to use a high shutter speed to allow less light into the camera.
- I will need a reflector in case I need help directing the light onto certain parts of the body, creating shadows.

CREATIVE APPROACH:

- I will be focusing on different parts of the body rather than the figure as a whole (legs / face / hands)
- I will try to keep warm / cool colours together but I will experiment with opposing colours.

PHOTOSHOP EDITS

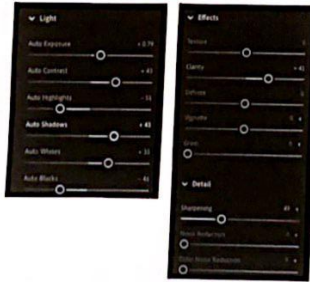

I took a basic portrait from my Photoshop and tried to stick with my theme of flowers and colours. I used both cool and warm colours for the flowers to create this manipulation.

In the two manipulations on the left, I brightened up the images and increased the saturation slightly on both, to give more color to the roses at the front. For parts of both images, their features were cut out and overlapped to create a collage like image.
 Top = Inverted
 Bottom = Black and white

CS LIGHTROOM EDITS

MARC VICENS

The Spanish photographer, Marc Vicens, wanted to capture the stress and pain of the ongoing economic crisis. He found a group of unemployed people and asked them if they would take part in his project and hang upside-down for right-side-up portraits. His project, a collection of portraits, was named, "Hanging - The faces of unemployment". Vicens has a special and creative way of looking at unemployment and has tried to reflect the "new expression" that occurs when someone is in this desperate situation.

ANALYSIS :

I love Marc Vicens way of adding humor to a stressful and depressing situation. He recognises the unemployed and puts emphasis on their desperation, and anxiety. The upside-down concept is different and I like how the facial expressions, along with the dark, depressing background further emphasises the mood of these people.

- When I take my photoshoot, I will experiment with different coloured backgrounds and different lightings (natural / studio).

SHOOT PLAN

SHOOT #: 3

DATE: 21/02/2021

THEME: Unusual Viewpoints

EQUIPMENT:

- Coloured clothes
- camera
- Reflector

LIGHTING:

- Natural lighting

MODELS/WARDROBE:

- Female or male model
- Coloured clothes
- Coloured make-up (possibly)

LOCATION:

- Outside location
- Somewhere with Plain / Pattern backgrounds

TECHNICAL APPROACH:

CREATIVE APPROACH:

- My focus will be on the head and will involve my model hanging upside-down for a right-side-up portrait.
- I will capture different expressions and experiment with different coloured / pattern backgrounds.

INSPIRATION :

— ORIGINALS —

Scanned with CamScanner

EVALUATION

This photoshoot was not my favourite and did not come out the way I wanted it to. I felt I had no effective shadows or highlights on my model, making my lighting appear very basic and the photo coming out dimmer than I would have liked. This shoot would have been more effective, done in a studio with correct studio lighting. This way, I could have directed my light and changed the mood of the image.

As I used a male as my model, I did not get the same effect with the hair as I would if I used a long haired female. Although there is a slight lift in the hair, I wanted the chaos and flow of long hair to represent the feelings of distress and uncertainty.

However, I did like the background of the images (different tones of blue) but unfortunately, my lighting did not reflect the true brightness of the colors. I like the contrast between the dark blues and my model, a blonde light skinned male. This colour combinations is something I will consider when re-doing this shoot.

PHYSICAL EDIT

MANIPULATION 1:

I tried to create a physical edit that relates to my chosen style, light trail. These two images did not come out as I would have liked. I experimented with different forms of line to see which is more effective, as well as try different colours to see which works best with the different backgrounds.

MANIPULATION 2:

These two edits are my favourite physical edits and are similar to the digital manipulations on the previous page. I really like how the pink stands out against the black background and the design itself, emphasises the anxiety and distress my photographer Marc Vicens tries to show that I also tried to recreate.

INITIAL IDEAS

Best scanned with CamScanner

-IDEA 1-

I could explore the shadows and highlights that can be created by experimenting with light on my model/object. This could be natural or artificial lighting. Experimenting with these will add further detail to my images and allow me to focus on certain areas.

-IDEA 2-

I can experiment with the human figure to create images showing movement and emotion. The human figure could also be a way for me to present clothes and create images with a ghost like figure in an unusual setting.

-IDEA 3-

Through exploring the theme of still life, I could create different viewpoints of food/objects, and looking into positioning, and advertisement as well as colour to inspire me for my photoshoot.

ARTIST LINK

PATRICK ROCHON

I like the way this artist uses light trails to create shapes/patterns across his subjects. He experiments with different colours as well as different technology to be the source for his light.

MEG COWELL

This artist has an interesting take on the human figure as she creates a ghost like figure through the use of a dress submerged in water. The motion of the dress is emphasized by the water and helps utilize the space.

HENRY HARGREAVES

I like how creative this artist is in terms of presentation and colour. These images of still life have a plain background with a series of similar food as the focus of the piece. The positioning allows the detail to come through and utilizes space.

RICHARD AVEDON

Richard Avedon is an American fashion and portrait photographer who reinvented fashion photography by creating dynamic images of women in motion. He extravagantly staged his photo shoots and captured moments when women felt most beautiful. The projects he worked on focused on producing images of fashion, movement and dance, helping to define America's style, beauty and culture.

He didn't follow the standard technique of taking photos, where models stood emotionless and seemingly indifferent to the camera. Instead, he showed models full of emotion, smiling, laughing as well as in action in outdoor settings. However, towards the end of the 1950s he became dissatisfied with daylight photography and open air locations and so turned to studio photography using strobe photography. He has always been interested in how portraiture captures the personality of the models so he experimented with this a lot with many famous people, such as Marilyn Monroe.

I am going to link to the artist by keeping a minimalist style but also focusing on positioning and clothing to help shape my model to show their movement. Richard Avedon puts his model in a range of different settings so that his experiment with personality and emotion can be seen. This also helps exaggerate their movement and emphasizes their expressions. The images are kept in black and white, using only the lighting to show light and dark tones, focusing on certain points of the model. I will experiment mainly with studio lighting to create focus points, keeping the background plain and smooth.

ANALYSIS!

This photograph was taken by Richard Avedon and was constructed in 1967. The model was wearing a plain black dress with black fishnets and it was her first shoot with this photographer, she was only 17!

TEXTURE:

The background texture of this image appears smooth but the main area of texture in this image is created through the ruffling and creased lines on the dress, which is mainly shown where the model is moving her body.

Texture is also shown in the hair as we see

pieces of it falling out of place removing the smooth look to the hairstyle.

LINE / SHAPE:

The model is using her body to create an unusual shape, as it looks like her legs are running one way but she has turned her body to extend and face the other way. One of her arms is extended, holding her hair extension, to utilize the space and appear bigger.

SPACE:

In this image, the space is very open, so there is more room to be utilized by the model, allowing her to exaggerate the movement created.

LIGHT:

The photographer uses studio lighting to create this piece, creating shadows and highlights. The harsh lighting emphasises the lines and texture where the model is turning her body. It is a monochrome image with a range of tones from very light to very dark on the sides of the body.

COMPOSITION:

The composition of this image is made up of movement as the model turns her body. As a viewer we seem to be eye level with the models hips, suggesting the photographer is crouched or sitting. This allows for the models pose to become more angular and exaggerated.

EVALUATION

Overall, I am happy with the way my photoshoot has turned out as I managed to replicate similar movements and poses as the photographer, Richard Avedon, who inspired this shoot.

I will experiment with different ways of editing my lighting, for example increasing the exposure and changing the colour, to see if it will effect my image. I will have to edit the background of my images as there are areas that showed a dirty floor and areas with ripped places ruining the aesthetic of that smooth background.

However, I did follow Richard Avedon by keeping my background plain and simple as well as using similar clothing, plain black dress, to one of the models he used in his photoshoots

MARK EXAM

SEBASTIAN KIM

is a Brooklyn based photographer, born and raised in Brooklyn, he travelled and saw a lot as a child, when he was 10 he saw the war. He first got into photography at 12 when his mother bought him a camera. He studied photography in high school and pursued it in college at the University of Pennsylvania. He then worked for Richard Avedon (renowned fashion photographer) in 1996. Sebastian Kim goes to names for big establishments like Vanity Fair, Vogue and Harpers Bazaar. He works in fashion and portraiture because he likes to balance each other out. Fashion is very collaborative, it allows him to work with models in different places. Whereas portraiture is more personal, capturing models more closely and emotion. Sebastian said to get the best portrait you have to establish trust and build a connection.

For my mark to Sebastian Kim, I am going to explore different poses with the possible use of lighting, full body and close ups, keeping the background plain. My final step will be to convert my sketches and write.

SEBASTIAN KIM

Sebastian Kim is a Brooklyn based photographer, born in Vietnam. He travelled and saw a lot as a child, when he was fleeing from the war. He first got into photography at 15, when his mother bought him a camera. He studied photography in high school and pursued it in college at, Brook's Institute of Photography. He then worked for Richard Avedon (well-known fashion photographer) in 1996. Sebastian Kim is now one of the go to names for big establishments like Vanity Fair, American Vogue and Harpers Bazaar.

He chose to pursue fashion and portraiture because he feels as if they balance each other out. Fashion is very aspirational and collaborative, it allows him to work with different people in different places. Where as portraiture is more intimate and personal, capturing models more closely with intensified emotion. Sebastian said to get the best portrait you need to establish trust and build a connection.

To link my work to Sebastian Kim, I am going to have my models in different poses with the possible use of props. I will capture full body and close ups keeping my background plain. My final step will be to convert my images to black and white.

LINDSAY ADLER

PHOTOSHOOT INSPIRATION!

American portrait and fashion photographer, Lindsay Adler, is a photographic educator and is one of the most well known speakers across the world. She teaches on the industry's largest platforms and is being named one of the Top 10 fashion photographers in the world. Her edits have featured in 100 magazines and she has worked with some of the biggest brands in the industry; Canon, Adobe, Microsoft.

Lindsay Adler loves to play with colour and lighting when taking photos. I am going to experiment with colour gels and try to control the lighting, like Adler, to show light/colour in certain areas more than others. My background will be plain.

MIKE MONAGHAN

INSPIRATION FOR MY MANIPULATION!

Monaghan is a Seattle-based fashion, portrait and travel photographer. After high school he quit graphic design to pursue a degree in photography at the Art Institute in 2010. He studied there for 3 years before he took on a full time career as a photographer. He loves to experiment with vibrant colours and lighting when taking his photos. This can be seen through overlapping, flashing lights and the projection of colours and patterns across the models face.

I am going to use studio lighting to create my images based on this photographer and will try to control the direction of the light, creating areas of highlight and shadows, like Monaghan. I will use colour gels in front of my lights to show a range of vibrant colours across my models faces.

Lauren PY C1

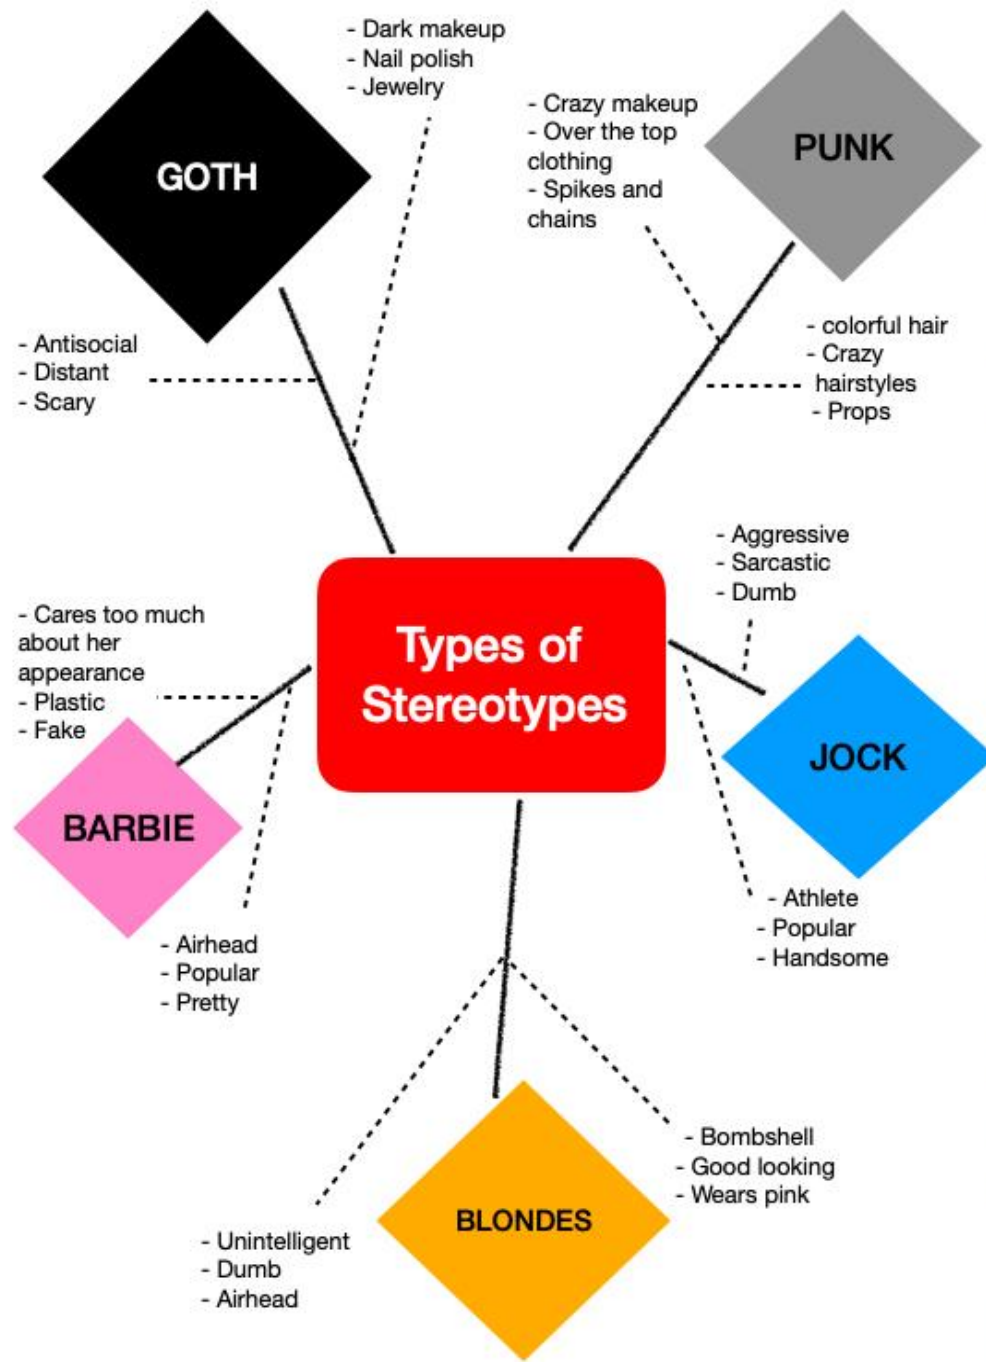

A Level Photography (9PY0 01)

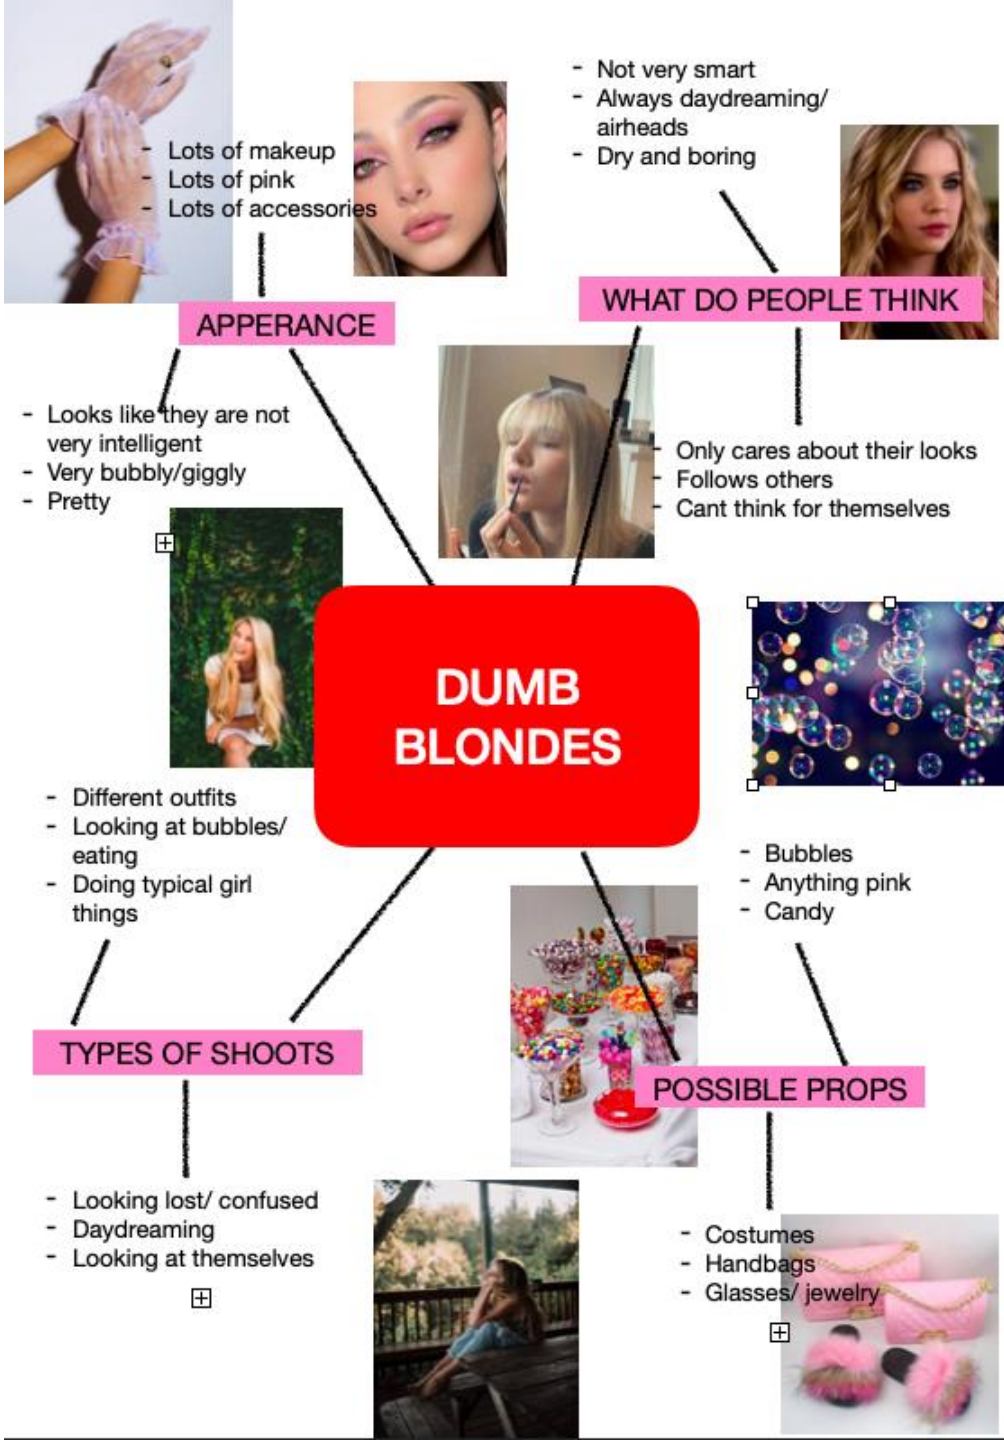

Year 13: Personal Investigation

PERSONAL INVESTIGATION

As I begin my personal exploration, I have chosen to explore the topic of stereotypes. This is a personal interest to me because I am curious to know why specific groups of people are categorized into these stereotypes and what features/characteristics make them fit into this. This has lead me to focus on my project, choosing the sub-theme of 'Dumb Blondes.' To initiate my research, I will study the work of Enrico Pescantini because I wish to explore the style/technique that he uses to portray Barbie having a perfect life and the perfect look.

STEREOTYPES

WHAT IS A STEREOTYPE?

A **stereotype** is an **oversimplified** belief of a group of people. For example, **how they look, how they act, how they sound and their gender or race.**

WHY DO WE CREATE STEREOTYPES?

We think in terms of **categories** that we make up from our **experiences**. By creating these categories **we are trying to clarify and understand the world around us**, however our brain **oversimplifies** it and it leads to **stereotypes**. As we can't think without categories, it often becomes **difficult to differentiate** between making sense of things and these categories stopping us from clarifying what and who we see.

EMOTIONAL EFFECT:

- When someone you have associated with a stereotype walks past you, emotionally you could get very **anxious and scared** if it is a **negative belief** or you could feel **happy and safe** if it was a **positive belief**.
- You might try to **avoid** that person or become **obsessed** with trying to be around them.
- It could make you think there is **something wrong** with you if you think very highly of them.

For example, in school there is a group of people stereotyped as 'popular' making other students perceive them as mean or scary to talk to.

In **Western-cultures**, people tend to **over-estimate** the extent to which people do **what they want to do** and **under-estimate** the extent to which people do **what they do due to their social roles**.

When we see people in a particular role we **assume** they are made or better suited for that **role** rather than others. For example, we assume because women are always looking after children that they naturally have a more nurturing mature and are better at childcare than men.

Characteristics of a person like their race, gender, appearance, language and even jobs can determine what role people have in their country and what category they fit into.

DUMB BLONDES

A conspicuously attractive but stupid blonde woman

"Woman who relies on her looks rather than on intelligence."

"I've never forgotten a date in 2016 when, after an evening of what I believed to be pleasant chatter with a man, he uttered the immortal words: 'Well, you don't look clever.' -A Blonde white woman

Blonde hair has been considered **attractive** for long periods of time in various **European cultures**, particularly when coupled with **blue eyes**. Guys assume they will have more **fun** and be more **entertained**, as the saying "**Blondes have more fun,**" which has been portrayed in many **advertising commercials** and **movies**.

The idea that blondes as attractive and like to have fun, makes people think they have **no interest in being intelligent** and are seen as **airheads** who have no clue what is going on.

CONTRADICTING EVIDENCE:

NLS's IQ data with the hair color information from the same group of teenagers provides an answer to: are blondes actually dumb?

The surprising answer is that among white women, those reporting having blonde hair have the highest average IQ and the second-highest median, or midpoint, IQ. Plus both the mean and median are above 100, which is the value given to a person who has exactly average intelligence.

THE OTHERS

GOTH =

Nomadic Germanic people who fought against Roman rule in the late 300s and early 400s A.D.
- Often dressed in all black, very dull and plain clothing.

JOCK =

An athlete, or someone who is primarily interested in sports and sports culture, and does not take much interest in intellectual activity. Always wearing varsity sports jacket or are walking around flexing their muscles.

PUNK =

Politicized and full of vital energy beneath a sarcastic, hostile facade, punk spread as an ideology and an aesthetic approach. Promote freedom and DIY. Often found wearing colorful clothing with crazy hair.

BARBIE =

A fashion doll manufactured by an American toy company and launched in 1959. The unrealistic form and look of the doll has caused many people to transform their bodies to look like her.

ENRICO PESCANTINI

TITLED: BARBIE AROUND THE WORLD

This shoot was inspired by Enrico and his long distance relationship with his girlfriend. This was when he was living in India and she was living in Italy, and they were planning to meet halfway in Israel. They wanted to have a different kind of photo memories, so they had the idea of using alter egos as protagonists of their trip, Barbie and Ken; the perfect couple.

He travelled to over 66 countries and took all kinds of different photography with Barbie. He used a polaroid for some of his image to give them that old vintage, memory look.

With original dolls and accessories from the '70s, all the photos were shot with an original Polaroid camera, replicating in photography the vintage look of Cuba, from the American vintage cars in the streets of Havana to the Che Guevara graffiti all around the country.

My shoot is going to represent the poses of a typical 'blonde barbie doll'. The poses will be based off this photographer and I will be recreating them with my own barbie, however my background will be plain and the outfit will be pink with some possible accessories as I want to focus on how a blonde barbie would look in real-life. This will help me progress my investigation as it will lead me into looking at real blonde people in these poses looking, plastic, perfect and confused.

SHOOT PLAN

DATE: 25/09/2021

SHOOT NUMBER: #1

THEME: Stereotypes-
Dumb Blondes

EQUIPMENT:

- Camera (Canon camera)
- Tri-pod
- Studio lighting

LOCATION:

- I will be doing this in the studio that is provided to me.
- This is close and available to me so I will have access to spotlights and colored lighting.

MODEL/ CLOTHING/ PROPS:

- No model
- Barbie doll
- Possible different backgrounds (colors)
- Preferably pink clothing and some accessories

LIGHTING:

- I will be using studio lighting so that I have a clear, plain background allowing me to see the shape and the positioning of the barbie. This will be easier when it comes to re-creating the shape the barbie is in.

TECHNICAL APPROACH:

- I will be using a small aperture as I will be using very bright spotlights and I don't want to allow too much light into my camera. I also want to make sure my image isn't over exposed as the light can reflect off the face of the doll.

CREATIVE APPROACH:

- I am going to have a barbie doll in different poses that can be recreated by a real life model so they look and act like that typical 'blonde barbie'

INSPIRATION:

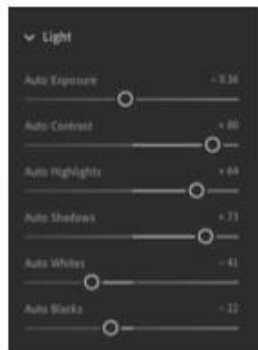

ORIGINALS

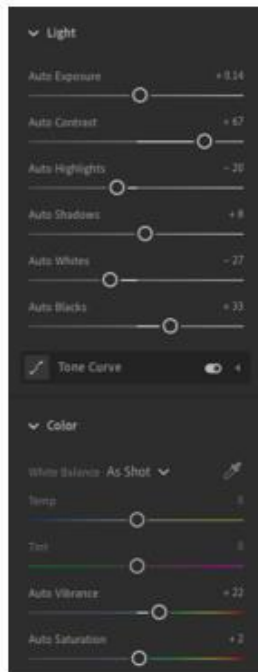

LIGHT EXPERIMENT

ORIGINAL 1

I first used the brush tool to highlight the background around the doll and increase the exposure. This got rid of any imperfections in the background and unwanted shadows. Next I increased the contrast and highlights on the doll to remove any dullness and lack of color of the skin.

ORIGINAL 2

I used the same process for as above but in this image I also increased the vibrance and saturation of the doll. This was because the image was very dull and needed more color.

DIGITAL EXPERIMENT

STEP 1

STEP 2

STEP 3

STEP 4

STEP 5

STEP 6

STEP 7

STEP 8

Collected from the internet

I will also experiment with other body parts and put an x-ray over the top to show the difference in size and how unrealistic the Barbie doll is compared to real life.

For this edit I went through a process of cutting and rearranging the bone structure of a hand. This x-ray is of a left hand, however to fit it directly onto of the Barbie image I had distort, resize and flip the direction of the bones. The proportions of the hand in the image are comparatively different to a real hand and shows the unrealistic expectations of having small hands as a girl.

ORIGINAL

Collected from the internet

My **intension** of this edit was to fit the ribcage in the Barbie dolls body but the **waist** was too **snatched** and an **unrealistic** shape for the x-ray to fit in. I had to **cut and erase** the parts around the x-ray to get its **shape** and then place it and **position** it in line with the **limbs** on the **body**.

EXPERIMENT 2

STEP 1

STEP 4

STEP 2

STEP 5

STEP 3

STEP 6

The size of a normal persons ribcage is too big and does not look right/cannot be placed correctly on top of the Barbie doll. This is a realistic size of what our body shape should look lie. Instead the doll has a snatched waist and the ribcage does not support her body size.

REAL OR PLASTIC

PLASTIC

The skin on a Barbie doll is made to look clear, smooth and shiny. I am going to experiment with the use of oils and photoshop to make the skin very smooth and give that brand new and perfect effect.

The waist and overall body proportions of the Barbie doll are very thin and very skinny. I will use photoshop to slim down the model's body to an unrealistic size and replicate the doll's body in real life.

The Barbie doll's face is very clear and smooth, with over-exaggerated eye makeup (bright pink eyeshadow and long eyelashes) and perfect narrow eyebrows. She also has big eyes and a small nose and smile. For this I will use an app called BeautyPlus that will allow me to edit these face features and make it smooth.

The hair is also perfectly pulled back into a half up half down hairstyle. I will experiment with the use of hair gels and hairstyles keeping it pulled back so the face shape can be seen.

EXAMPLE ON A MODEL

SHOOT PLAN

DATE: 02/11/2021

SHOOT NUMBER: #2

THEME: Stereotypes-
Dumb Blondes

EQUIPMENT:

- Camera (Canon camera)
- Tri-pod

LOCATION:

- I will be using the studio again.

MODEL/ CLOTHING/ PROPS:

- Female (preferably blonde)
- Pink clothing
- Basic but bold makeup (like a Barbie)
- Simple accessories (glasses, bags, hair clips)

LIGHTING:

- I am using studio lighting for my shoot.
- This will be similar lighting to my previous shoot as I want to replicate what the Barbie doll looks like in real life.

TECHNICAL APPROACH:

- I will be in the studio so I will have to use a small aperture so my model isn't too over exposed.

CREATIVE APPROACH:

- For this photoshoot, my model will be wearing pink clothing and typical girly accessories. They will also be positioned in a plastic, fake way similar to the Barbie doll shoot.

INSPIRATION: My first shoot

ORIGINALS

REAL OR PLASTIC

PINK CLOTHING

STIFF/ FAKE SMILE

STRAIGHT BODY

All the **images** on the Left (Fake Barbie) were my **inspiration** for my **shoot** with a real life person. I tried to create **movements/poses** with my **model** that **mimicked** the Barbie doll and represented the look of **stiffness, plastic and unnatural**.

I think my **model** looks awkward, and uncomfortable in the **images** with the fake smile. That is what I tried to **capture** and felt it was successful and I **captured** real life Barbie poses.

TIGHT DRESS

AWKWARD HAND MOVEMENT

CURVED/ CLOSED HANDS

EXPERIMENTATION

OIL + HIGHLIGHTER ON THE SKIN

This should help create that fake, plastic like skin as light reflects off it.

FAKE HAIR/ WIG

This will give my model the blonde, waterfall hair effect like Barbie.

DRAW ON EYELASHES

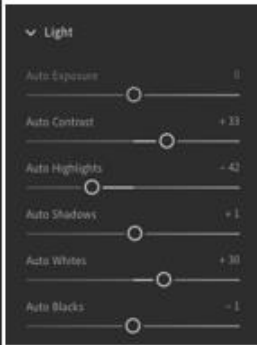

This give the effect of the big eyes and lashes.

LIGHT EXPERIMENT

This first images was taken from shoot 1, where my aim was to photograph Barbie I'm different positions.

ORIGINAL 1

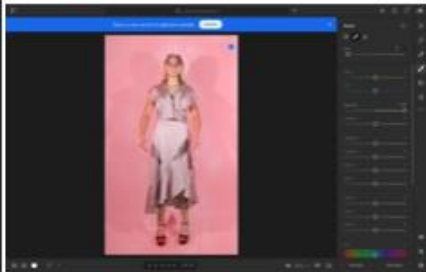

To create this edit, I used Lightroom and planned to increase the exposure of the background. I used the brush tool and covered the background of the doll and increased the exposure and decreased the shadows/ black areas.

SHOOT 1

This image if from shoot 2 and the idea behind it was to mimic the same pose as the Barbie doll. I did the same process as the image above and increased the exposure to make the contrast between my model and the background greater.

ORIGINAL 2

I had to use the eraser tool for this image as the dress had a lot more texture and ruffles on it.

SHOOT 2

DIGITAL EXPERIMENT

For this edit I used two similar images, one of the Barbie doll and the real person mimicking the position. These two images had already been edited in Lightroom so the lighting was perfect and they both had a bright, overexposed, white background. This made it easier when combining the two. I wanted to show the comparison in the skin color and the shape and size.

STEP 1

STEP 2

STEP 3

STEP 4

STEP 5

STEP 6

ORIGINAL 1

ORIGINAL 2

BLACK & WHITE

I used a tool on photoshop to cut out areas of my top layer (real person) and have the bottom layer show through. This allowed me to combine two images and see the difference.

I then experimented with lines to split up the two images as I felt they were hard to separate in the image due to the clash of all the pink. I used black lines, on two areas of the image and it created a more of a divide, emphasizing the difference between the two. I then wanted to experiment with color to show that the Barbie doll isn't real. So I used the black and white tool to edit my bottom layer leaving the realistic image in color.

EDIT 1

EDIT 2

EDIT 3

BODY RECONSTRUCTION

BEAUTYPLUS APP

With the use of this app, I am going to **slim** my **models** body and make her look more like a **Barbie** and an **unrealistic size**. I will also **smooth** out her skin and make her **features smaller**. However, I will keep her **eyes wide** as when the **makeup** is added it will make them **stand out**.

STEP 1

STEP 2

STEP 3

STEP 4

STEP 5

STEP 6

STEP 7

STEP 8

FACE RECONSTRUCTION

YOUCAMMAKEUP APP

This time instead of changing the way her **body** looks, I tried to change her **face** look through **makeup**. A Barbie usually has **striking eyes** with **big lashes** and **small features** and that is what I have tried to **mimic** through this app.

STEP 1

Highlights on the face makes her look more shiny and plastic

STEP 2

Eyeliner as the base of the eye makeup to make it look more dramatic

STEP 3

STEP 4

Pink eye makeup and long dark eyelashes to mimic the picture of the Barbie that I used for my first shoot

STEP 5

Adding Blue contacts to my model and making th pupils wider

STEP 6

DIGITAL EXPERIMENT

For this edit I used the same image; one in **Black and White** and one from the previous edit (reconstruction). I **layered** them together and **cut** out one half of the **top layer** to **over lap** the two **colors** and have them **contrasting** against each other. I then **experimented** with three different types of **lines** and chose one to separate the two, along the line where the **images** join.

STEP 1

STEP 5

STEP 2

STEP 6

LAYER 2

STEP 3

STEP 7

STEP 4

STEP 8

Layers for the lines

EVALUATION OF RECENT EDITS

EDIT 1

The idea of this edit was to show the **comparison** between the 'fake Barbie' and a real life model **posing** as Barbie. This shows the **difference** between the **proportions**, the **coloring** and the **quality**.

A **problem** with these edits is the point at which the two **images** join. I made the lines too **harsh**, and too **random**. I wanted to show the **comparison** of body parts on both images but the way I split it up was not **effective**.

If I were to do this again, I would use more **subtle** and **simple** lines to separate the two and do it straight down the middle rather than in random places. I would also not go over it with **black lines** as a Barbie is meant to look very **elegant** and **perfect**.

The **black and white** in this image was meant to show that the 'perfect' Barbie doll wasn't always the better one and that its better to be **natural** as 'perfect' is **boring**. However, that wasn't the **message** that came across to other viewers. Therefore, I need to be more **specific** and try to do this a different way.

POSSIBLE NEW IDEAS:

- Using a creative way to split and combine the two images. E.g. Using a physical manipulation/ going straight down the middle/ Blending the two images together
- Using the same image but splitting it into two
- Increasing the saturation/ smoothness of one side of the image.

EDIT 2

RECONSTRUCTION EDIT 1

I **manipulated** my real **model**, who **mimicked** Barbie **movements** and **expressions**, to look more like Barbie.

I **edited** the **proportions** and the **size** of the **features** to be more like the Barbie doll. This involved making the waist look more **snatched** and **thinner**, **narrowing** and **shaping** the **face**, **decreasing** the **size** of the **facial features** and **slimming** down the **arms**.

To make this more like **Barbie**, I need to **resize** the **eyes** and make them **wider** as well as make the **eye makeup** (eyelashes/eyeshadow) more **exaggerated** and **princess** like.

EDIT 2

Close up of the face and makeup

In this **edit**, I **split** the **model** down the middle rather than in **random** places and I found this made the **comparison** easier. However, my **line** was still too **harsh** and too **dark** for it to be used on a **Barbie/ princess** image so I need to either **blend** together the two **images** or **join** them together without the use of **lines**.

21/11/2021

MOCK EXAM

YOUCAMMAKEUP APP

I am now going to add makeup to my models face. This app allows me to choose very bright and pixelated colors which is ideal when trying to follow a certain color scheme. I am also able to change the shape of some features and add color to the eyes.

STEP 1

STEP 2

STEP 3

STEP 4

STEP 5

STEP 6

STEP 7

STEP 8

CHANGES NEXT TIME:

- Elongated neck
- Bigger eyes
- Contoured nose
- Lighter hair
- Longer eyelashes

FINALISING MAKEOVER

STEP 1

STEP 2

STEP 3

STEP 4

STEP 5

STEP 6

STEP 7

I used the [lasso tool](#) to cut around the [eye](#) so that I could [enlarge](#) it. I had to use the [eraser](#) to remove any part of the [layer](#) that overlapped with the [hair](#) and I then used the [blur tool](#) to [blend](#) the [new layer](#) (the eyes) into the old one, making it look more

Following the changes I wanted to make to my [model](#), I used the app [Youcammakeup](#) to change the [appearance](#) of the [face](#). I added more and longer [eyelashes](#) to the [model](#) to [enhance](#) the [eyes](#) and make the [bolder](#) and [fuller](#). Also used [contour](#) to [emphasis](#) the [narrowness](#) of the [nose](#) as well as using [highlight](#) to make my [model](#) look more [shiny](#) and [plastic](#) like.

TORN APART - PART 1

IMAGE 1

IMAGE 2

STEP 1

STEP 4

STEP 2

STEP 5

STEP 3

This was my first attempt at **combining** two images and **contrasting** them against one another. Instead of using **harsh lines** to separate the two images, I used a **torn piece of paper** to make it look more **childish** and **fun**.

The **left image** was the **unedited** version, **unsaturated** and **dull**. The **right** was the **edited** version with **high contrast** and **increased exposure**.

TORN APART - PART 2

STEP 1

Overlapping the two images to tare them the same.

STEP 2

STEP 3

This is a **physical version** of the edit above. I prefer the **digital version** as it comes out a lot **cleaner** and I can make the tear look more random. **Tearing a piece of paper** does not create the **shapes** and **lines** that i want instead it is more **symmetrical** and **straight**.

OTHER COMPOSITIONS

I played around with different **compositions** and **curving** the paper as I tore it. This meant one side was **bigger** than the other and I didn't like it as much as i do when it is **split** down the middle.

TORN APART - PART 3

IMAGE 1

IMAGE 2

IMAGE 3

This is a **simple comparison edit**. I will show these **three images** (edited model, Barbie and unedited model) side by side with a **tear** at the point the images meet. I will use an **image** from the internet to make the **tear**.

STEP 1

STEP 3

STEP 2

STEP 4

I like how this **image** turned out. You can see from the **unedited version** on the **left**, that the **real Barbie** and my **edited model** is far from **realistic** or **natural**. Their **skin** has been **smoothed** out and their **facial features** slimmed to meet an **idealistic, perfect face**.

TORN APART

I started by **editing** the look of my **model**. For example, the **skin tone**, the **size** of her features and the **makeup**. I do this using two **apps** that allow me to **pinpoint** areas on the body to **manipulate**.

STEP 1

STEP 2

STEP 3

STEP 4

STEP 5

STEP 6

STEP 7

STEP 8

IMAGE 1

IMAGE 2

STEP 1

STEP 2

STEP 3

STEP 4

STEP 5

STEP 6

After **slimming** down my **model** and doing her **makeup** like a Barbie doll, I used **photoshop** to combine my **unedited** version with my **manipulated** version. I used the **tear** on the right to show the **real person** underneath **covered** by the **'perfect'** version.

EVALUATION

First edit of face

When I first did this **edit** of my **models face**, I only change the shape of the **chin and cheeks**. I used an app to **slim** her face down and **elongate** it. I realized that it still didn't look like a Barbie face, so I used my app again and made the **eyes bigger and wider**, I made the **nose smaller** and the **neck longer**.

Final edit of face

Favorite 'torn apart' image

Least favorite 'torn apart' image

This was the **best final edit**. It showed someone hiding away, pretending to be something and someone that they're not. I used the same **editing skills** to change the shape of my model, however this time I used **photoshop** to add in the **torn** piece of **paper**. I **layered** the **images** and used the **eraser tool** to get rid of any unwanted areas of the **image** underneath and the **top layer**. I really like how this edit turned out.

THE BARBIE BOX

SHOOT 1 IMAGES

EXAMPLES OF BARBIE DOLLS IN BOXES

SHOOT PLAN

DATE: 16/11/2021

SHOOT NUMBER: #3

THEME: Stereotypes-
Dumb Blondes

EQUIPMENT:

- Camera (Canon camera)
- Tri-pod
- Possible use of a reflector

LOCATION:

- I will be using the studio again.

MODEL / CLOTHING / PROPS:

- Female (preferably blonde)
- Pink clothing
- Basic but bold makeup (like a Barbie)
- Simple accessories (glasses, bags, hair clips)

LIGHTING:

- I am using studio lighting for my shoot.
- This will be similar lighting to my previous shoot as I want to replicate what the Barbie doll looks like in real life.

TECHNICAL APPROACH:

- I will be in the studio so I will have to use a small aperture so my model isn't too over exposed.

CREATIVE APPROACH:

- For this photoshoot, my model will be wearing pink clothing and typical girly accessories. She will be mimicking a Barbie movement and I will focus on the positions she would be in if she were stuck in a box and trying to get out.

INSPIRATION: My first shoot

ORIGINALS:

BOXED

STEP 1

STEP 2

For this edit, I imagined Barbie trapped in the box with her blonde hair and pink clothes, stuck in a stiff and unnatural position. I edited one of my images as normal, including the reconstruction of the body and face and then used photoshop to place her in the box behind the screen.

STEP 3

STEP 4

STEP 5

I had to decrease the opacity of the original screen and put another one over the top when the doll was placed in the box.

MASS PRODUCE

ORIGINAL

ORIGINAL

STEP 1

STEP 2

STEP 3

STEP 4

STEP 5

To create my first 'mass produce' piece, I used the same box edit from the previous page and duplicated it multiple times. I then found a shelf of the internet and copied that three times.

By placing one above the other it gave the effect of shelves in a store. It reminded me of when a little girl would be walking down the aisles and see the endless boxes of perfect pink Barbie dolls. Next time, I want to add more shelves and more boxes of Barbie Dolls to emphasize the fantasy and the love people have for the doll.

MASS PRODUCE

ORIGINAL

ORIGINAL

I tried to recreate a store like scene where a girl is looking at shelves full of this 'perfect' pink Barbie doll.

STEP 1

STEP 2

STEP 3

This was my original Barbie doll in a box. I had to erase the background from the image.

I continued duplicating my Barbie doll until I filled each shelf.

STEP 4

STEP 5

STEP 6

Duplicating the box until it covers every shelf.

For the last step of the edit, I erased all of the areas of the box that covered the bar on the shelf and that sat onto of the girl.

ESCAPE PLAN

I used the same two apps that I used for the reconstruction part of my project.

- BeautyPlus
- Youcammakeup app

STEP 1

I first started by changing the skin color of my model. A Barbie doll has a much paler skin tone so I decreased the bronze and darkest color of the skin.

STEP 2

STEP 3

STEP 4

STEP 5

I then used the **slimming tool** to **manipulate** the **size** of my **model**. I tried to make the **waist** look more **snatched** and the **face** **thinner** and **longer**.

Next, making the **eyelashes** of my **model** look **bigger and boulder**, giving them more **volume**.

Changing the **eye color** to a **light and bright blue** to link to the **Barbie dolls** beautiful and stand out **facial features**.

Lastly, **editing** the **size/color** of the **eyebrows**, trying to make them look **fake and plastic**.

BARBIE BOX

MODEL DOLL

TORN PAPER

EVALUATION

BOXED

This was my **initial edit** for this section of the **phase**. I **experimented** with putting my **Model**, dressed up as **Barbie**, in a box. I tried to **mimic** the look and movement of a **Barbie doll** by making her look **stiff** and the **skin** looking **smooth** and **plastic**.

MASS PRODUCE

This next part of the process was me **experimenting** with the idea of little girls, looking up at **Barbie** and wanting one. Shelves full of them and them being very **popular**. I used **photoshop** to put my **original image**, of **Barbie** in a box, onto shelves in a store.

23/11/2021

ESCAPE PLAN

This is leading onto the next stage of my project and people **rebellng** against the **stereotype** of a **dumb Blonde Barbie**. I got my **model** to **pose** in positions that look like she's **escaping** and then used **photoshop** to **manipulate** them and place them into a **Barbie box**. I love how this turned out but next time need to make more **shadows**.

END OF MOCK

CHANGING OF THE DOLLS

LINK: TOY STORY

How people envision a Barbie doll:

- Long legs
- Skinny
- Snatched Waist
- Sculpted face
- Big blue eyes
- Blonde hair

1959

2020

The idea that a **Barbie** doll has to be thin and **sculptured** is slowly going out of **fashion** and this **evolution** of the **dolls** is shown through different **brands** and more **diverse** looks and characters. For example, the **Original Barbie** doll was the **typical Blonde hair, Blue eyes, covered head to toe in pink.** These days **Barbie** has entered a world full of different **professions** that **encourage** and give **hope** to young girls who want to be part of that **industry.**

Barbie dolls are also becoming more **diverse.** Different **nationalities, races** and **cultures** is becoming more and more **popular** and accepted in the toy world. These days you can find **Barbie** with every **skin tone** and different **colored hair/ hairstyles** to express where you're from.

The Toy Story franchise is a series of animated comedy movies created by Pixar Animation and released by Walt Disney.

It is about a group of living toys, who assume lifelessness around humans. They live with their owner Andy (A little boy) before he grows older and moves away to college. The toys go through a series of events which they have to overcome and return home safely to their owner. One challenge they encountered is Sids room. Sid is a little boy who destroys toys and attempts to put them back together, creating some disturbing outcomes.

SIDS ROOM!

The event in Toy Story that took place in Sids room, is a good link to my next theme of 'rebellion.'

Sid dismantles the toys he collects and turns them into something disturbing. He goes against what they stand for and their purpose and decides to do his own thing with them. For example, he tries to blow up Buzz Lightyear. He doesn't play with the toys, he instead destroys them and has a very aggressive attitude/ behavior when around them. This could be due to his intensions with the toys and what they stand for themselves.

How do toys impact children's development?

Toys impact the **cognitive, social, emotional and language development** of children. They can affect how they act and certain **personality traits** they get. Depending on the **toy** and how they look, it can effect their **perception** of the **world** and affect their behavior. For example, a more **aggressive** toy can make the child have a more **aggressive attitude.**

INTRODUCTION OF BARBIE PROFESSIONS

EVOLVEMENT OF DOLLS

MARGAUX LANGE

Margaux Lange is a New York born jewelry designer. She created "The Plastic Body" Series jewelry collection. This is her way of repurposing mass produced materials into handmade, wearable art. She said it's her way to examine and celebrate her own relationship with the icon, Barbie.

Her childhood obsession with the doll led her to use these plastic pieces in her jewelry as an attempt to bring out the fantasy she had imagined when playing with Barbie as a child.

While her relationship with Barbie has led her to creating beautiful pieces of jewelry, I want to represent the relationship between Barbie and society, which is not so beautiful. To do this I will have to experiment with different techniques and viewpoints.

HOW HAS SHE INFLUENCED ME?

The idea behind her jewelry has influenced me to create a phase of work where I can experiment with different ways to show the relationship between society and Barbie.

The way she has photographed individual features of both Barbie and Ken has inspired me to experiment with different techniques and create similar images but in a less positive and in more of a disturbing way.

These are more of Margaux Langes work and she has captured individual features of the doll, showing it has been destroyed and ripped apart.

This single image represents the way Barbie is viewed in society these days. This is what I need to evidence in my work by capturing Barbie in a unique and creative way, removing the 'perfect' image she portrays.

POSSIBLE TITLES FOR A NEW PHASE:

- "Perfect no more"
- "Destruction"
- "Rebelling"
- "Childs play"

Lucas Simones

WHAT HE DID

Lucas Simones uses his passion for portraiture to capture images of girls and layer it with orange after burning it. With these burnt images, he wanted to work on sensations and how to make them feel more abstract.

He experimented with dissolving, boiling, cutting but in the end the burning edits looked the best.

MATERIALS

Simones aims to push the limits of the materials he uses. Concrete, Paper, Steel and Foam are the most recent materials in his work. In the past he has used Maps, books and photographs which was what sparked the interest of these images.

For my edits, I will experiment with burning the Barbie doll and the images to see which gives me the most desirable look when burnt

SHOOT PLAN

DATE: 21/01/2022

SHOOT NUMBER: #4

THEME: Stereotypes-
Rebellious

EQUIPMENT:

- My camera (Canon camera)
- Barbie doll
- Light box
- Ring light

LOCATION:

- Studio shoots for pictures of the Barbie
- Outside/sidewalk for Barbie getting destroyed

MODEL/ CLOTHING/ PROPS:

- For this shoot I will not be using a model, I will be using a different Barbie doll.

LIGHTING:

- I will possibly use a Lightbox for some images of the Barbie doll getting destroyed
- I will need natural lighting when setting my Barbie on fire

TECHNICAL APPROACH:

- I may have to use the flash
- Blur out the background/ foreground
- Need to make sure my images aren't too overexposed

CREATIVE APPROACH:

- For this shoot, I will be destroying and burning a Barbie doll. This will represent a rebellious attitude and the lead up to my next phase. I will take close ups of the Barbie dolls and full body images to show her melting/ getting destroyed.

INSPIRATION:

ORIGINALS:

BARBIES FUNERAL:

HEATED UP:

UNDER WATER:

ENRICO PESCANTINI PT2

TITLED: BARRIE AROUND THE WORLD

This shoot was inspired by Enrico and his long distance relationship with his girlfriend. This was when he was living in India and she was living in Italy, and they were planning to meet halfway in Israel. They wanted to have a different kind of photo memories, so they had the idea of using alter egos as protagonists of their trip, Barbie and Ken; the perfect couple.

Enrico Pescantini's photography is based upon a **fantasy** and a **life** he wishes to have. He uses one of the most **popular couples** in the doll world and creates an **unrealistic viewpoint** of life and relationships.

The **fakeness** of this relationship is emphasized by the **lighting** and the **angles** the images are taken at. He **oversaturated** all of his images to emphasize the **color** and the **contrast** between them but this just further shows how **fake** and

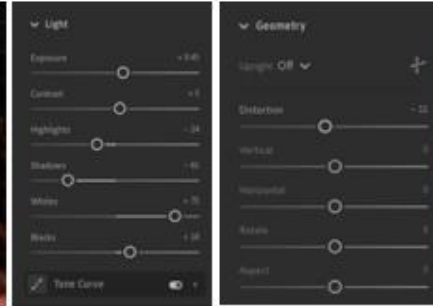

Undersaturated:

Oversaturated:

OVERSATURATED FLAME 1

ORIGINAL:

STEP 1:

PROCESS:

Here I created two simple Lightroom edits. My first edit was in color and involved me increasing the saturation and vibrance of the colors within the flame and in my object (Barbie doll). The second edit, I created in black and white. I decreased the saturation and the contrast of the colors.

STEP 2:

I will merge both of these in my next edit.

B & W PROCESS:

B & W:

STEP 1:

STEP 2:

STEP 3:

STEP 4:

THE ORIGINAL:

THE BACKGROUND:

THE FLAME:

In this **edit**, I **combined** both of the **images** above (the **color edit** and the **black and white edit**). I used the **black and white image** for the **background** and the **color image** for the **foreground**.

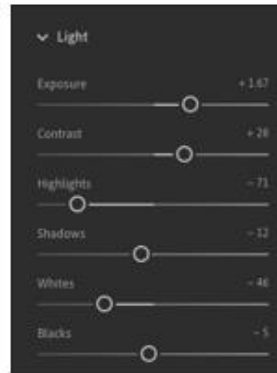

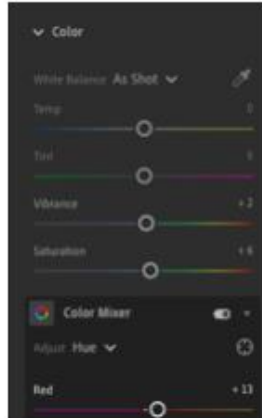

I **increased** the **saturation** and slightly **increased** the **exposure** on the **flame** to **brighten** it and to **emphasize** the **color**. To aid this, I also **decreased** the **shadows**.

With the **background**, I **increased** the **contrast** so that there is a **clearer difference** between the **light and dark** areas. I also **increased** the **texture** so the **pieces of dirt** and **smaller-sized objects** were **emphasized**.

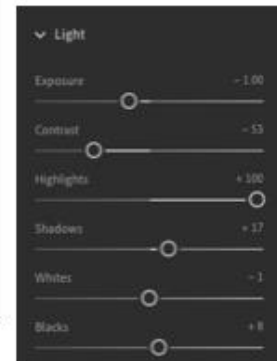

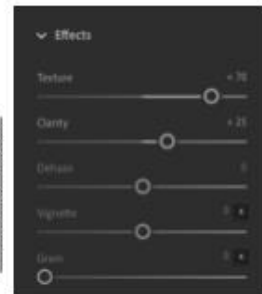

OVERSATURATED FLAME 2

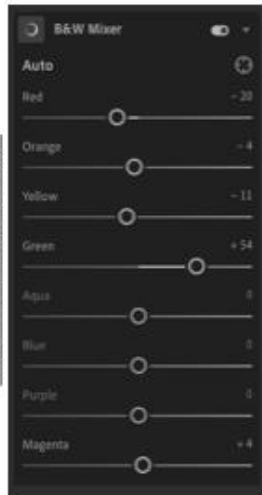

ORIGINAL:

PROCESS:

B & W PROCESS:

For my **color edit**, I wanted to **emphasize the colors** of red, yellow and orange however, I didn't want the **Barbie doll** to look too saturated so I **increased the saturation slightly** and **increased the exposure** to **lighten the dolls face**. I also **decreased the white areas** within the **flame**.

STEP 1:

STEP 2:

STEP 3:

STEP 4:

THE ORIGINAL:

THE FLAME:

THE BACKGROUND:

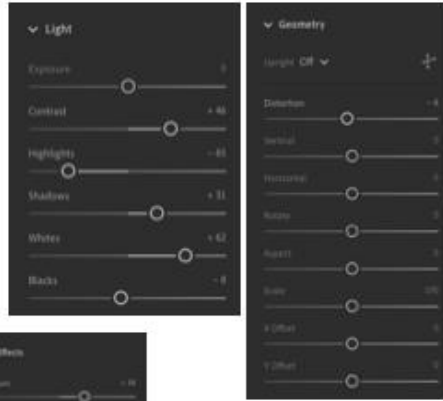

For this **edit**, I kept the **focus (color)** on the **flame** and the **Barbie doll** buried in it. For the **flame**, I wanted to **emphasize** the **yellow, orange and red** outline to **build an image** of **heat and anger**. To do this, I **increased** the **saturation** and the **contrast** to created a **greater difference** between the **lighter and darker areas of the color**. The **background** I wanted to keep relatively **dark** so I **decreased** the **highlights** and the **exposure**.

OVERSATURATED FLAME 3

ORIGINAL:

PROCESS:

This image was **under saturated** and the **colors** seemed very **dull**, so I **increased** the **contrast** between the **light and dark** areas while also **increasing** the **saturation** and **sharpening** the **flames** so the **stand out** and are more **defined**.

For **black and white** image, I also **increased** the **contrast** to show the difference between the **colors** and I **decreased** the **highlights** to remove any **overexposed** areas.

B & W PROCESS:

STEP 1:

STEP 2:

STEP 3:

STEP 4:

THE ORIGINAL:

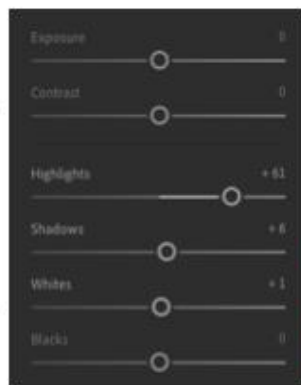

THE FLAME:

THE BACKGROUND:

THE HEAD:

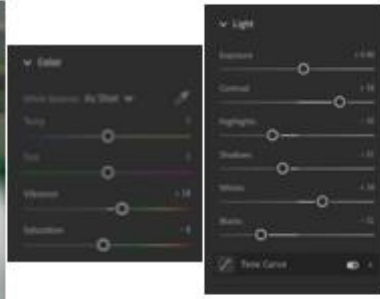

Similar to my other edit, I wanted the focus on the flame and the dolls head. For the head and the flame I increased the saturation and the highlights to emphasizes the brightness and the colors on it. The background was the opposite and I wanted to darken it and decreased the saturation.

OVERSATURATED WATER 1

ORIGINAL:

STEP 1:

PROCESS:

STEP 2:

STEP 3:

Emphasizing the color of the eyes and the lips.

Before this edit, my image was underexposed and the color on the Barbies clothes and face appeared very dull. To fix this, I slightly increased the exposure to add some light to the image and also increased the contrast to create a clear difference between the light and dark areas of the image. I wanted more of a cooler toned image so I decreased the saturation slightly and increased the vibrance so the viewer could become more aware of the blues and greens in the image.

OVERSATURATED WATER 2

ORIGINAL:

This image was originally **overexposed** and had **highlights** over the **face and body** of the doll. The **colors** weren't very **bright** and there wasn't a clear **contrast** between the **colors** in the **water**. By **increasing** the **saturation** and **contrast** as well as **decreasing** the **highlights**, I am putting **emphasis** on those different **colors**.

STEP 1:

STEP 2:

STEP 3:

EYE COLOR

STEP 4:

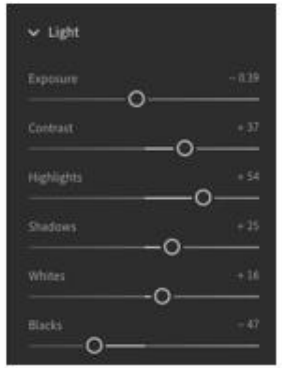

OVERSATURATED WATER 3

ORIGINAL:

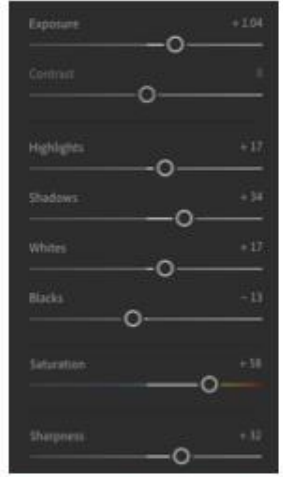

INITIAL LIGHTING CHANGE:

STEP 1:

STEP 2:

STEP 3:

STEP 4:

EYE COLOR:

I increased the saturation of this image by a lot as my original image was a pale skinned Barbie and didn't reflect the intensions of Enrico Pescantini and his oversaturated images. I also increased the exposure and the highlight on my image to emphasis the fakeness of her skin.

POSSIBLE IMAGES FOR EDIT

For my next edits, I am going to use the same images from my photoshoot to carry on the theme of rebellion and Barbie being destroyed. I will layer the images together, for example the face over the fire, and decrease the opacity to merge the images more effectively.

DAN MOUNTFORD

Dan Mountford is a British photographer who studied Graphic design at the University of Brighton. His work experience varies across brands like Urban Outfitters, Le Monde and Capital Records. His main project, shown by the pictures provided, involves him experimenting with the use of double exposure, changing the tone and adding vectors to an image.

The double exposure technique creates a surreal feeling as the merging of two images together can convey symbolism or a deep meaning. He does all his work in-camera with little bits of post production to give a filter effect (the camera has a double exposure mode which allows the layering of two images in the camera). While he plays around with the lighting and coloring off the images, he also experiments with the composition and finds different ways to layer them. While most of them are embedded within an image, for example a head, he also shows the blending of the two and how one merges into the other, representing some sort of connection between the two.

For my experimentation, I will be merging my images using double exposure to represent the ideas and importance of Barbie in 2022; lit on fire, distorted and broken apart.

REBELLIOUS MERGE 1

ORIGINAL 1:

ORIGINAL 2:

For my first **double exposure edit**, I extracted the **face** of my **Barbie** from an **image** and **layered** it onto of the **fire**. I **played** around with the **composition** to make sure the **fire** was **effective** and **creating** the look of **hair** and the **Barbie** being lit on **fire**. I **layered** the **fire** back over the face again to create the **flames** on top of the **Barbie** and have the **orange tones** throughout the whole **image**.

STEP 1:

STEP 2:

STEP 3:

STEP 4:

STEP 5:

STEP 6:

STEP 7:

STEP 8:

STEP 9:

REBELLIOUS MERGE 2

ORIGINAL 1:

ORIGINAL 2:

I experimented with the double exposure technique again to create this edit. While still following the idea of the fire representing the hair and the doll being destroyed, I tried to create it from a different viewpoint. I used different Barbie image, where the face is being captured from a different viewpoint.

STEP 1:

STEP 2:

STEP 3:

STEP 4:

STEP 5:

STEP 6:

STEP 7:

STEP 8:

STEP 9:

POSSIBLE IMAGES FOR EDIT

My next edits will involve me completely **distorting** the **images** and **breaking** it down into **sections**.

DAVID HOCKNEY

David Hockney is an English painter, draftsman, printmaker, stage designer, and photographer. As an important contributor to the pop art movement of the 1960s, he is considered one of the most influential British artists of the 20th century.

From 1982, Hockney used his camera to explore different ways to capture and present his work. He made composite images of polaroid photographs and arranged them in a rectangular grid. He later went on to using 35 millimeter prints to create collages and a series of individually detailed photographs.

The idea behind the use of the square grids was to make him images more cubist. He wanted to remove the the single perspective of an image and create multiple reference points. I think he succeeded at this and gave his image more detail and more for the viewer to think about.

I am going to link my work with David Hockney's by using a square grid to rearrange the composition and make up of my image. The idea behind this is that I am distorting my Barbie and turning something that was once perfect into something that no longer is an image of perfection.

REBELLIOUS MIX 1

ORIGINAL 1:

This grid was sourced from the internet to create the divisions of my image. I made this smaller and instead used a 6 by 9 grid as I wanted to see more detail which meant having bigger areas to manipulate.

STEP 1:

STEP 2:

STEP 3:

STEP 4:

STEP 5:

STEP 6:

STEP 7:

The next set of edits I completed involved a square grid that I collected from the internet. I layered the square grid over my original edit of the image (the lighting edit) and made sure it fit in the lines (6x9). I then cut out and copied individual areas (squares) and layered it back onto the image but in a different place. I continued to do this until multiple areas of the image were in a different square on the grid.

REBELLIOUS MIX 2

ORIGINAL 1:

This experiment followed the same steps as my previous edit, however I used a water image instead of a 'Barbie in the ground' image. I used the same square grid and manipulated it to a 6 by 9.

STEP 1:

My first layer and my original image.

STEP 2:

My second layer. I made the square grid smaller to fit my image (6x9).

STEP 3:

I used the square lasso tool to cut out a square of my first layer (my image).

STEP 4:

I cut out squares of my first layer, multiple times, and placed them in different areas in the square grid.

STEP 5:

This was the result after I had manipulated all the areas I chose and placed them back onto the grid.

STEP 6:

This was the final result after making my original image visible.

POSSIBLE IMAGES FOR EDIT

For these edits, I will be blocking out areas of the images in white, while also distorting them and mixing up sections of the broken Barbie doll.

DAVID HOCKNEY

Not only does David Hockney link to the edits above but it also links to the puzzle edits I will be making. Hockney's work can be linked to a child's toy when they have to put pieces together and make an image, like a puzzle.

Instead of filling in the whole thing and creating a full image, I am going to leave areas blank. The puzzle links to a child's toy, which links to Barbie as this is specifically aimed at young children.

STEP 7:

STEP 8:

'Rebellious' edits - Evaluation

EDIT 1

The aim of these edits was to use the fire as a mean of destruction and the fading out of Barbie.

Through the use of the technique, double exposure, I was able to layer two of my own images (Barbie face and fire image) over one another.

For this first edit, I wanted the blue eyes and part of the dolls facial features to be present and very visible, so I increased the brightness and the vibrance of those areas. The flames of the top of the head was perfect for the effect of hair and the Barbie slowly fading away as I merged the two together.

If I were to recreate this edit, I would try to lose more of the shape of the face and try to use the fire as the outline.

I really like the way this edit turned out. It's almost as if the flames are moving the with doll as it passes through time and is slowly getting destroyed as the world evolves.

I approached this edit from a different angle and used two different images. I again merged the two images and used the fire to act as hair coming off the top of the head.

EDIT 2

EVALUATION 2

EDIT 1

EDIT 2

These edits took a while to complete as I had to move around pieces to create a composition that was distorted and unnatural. This shows Barbie as delicate and plastic as she can easily be broken apart and rearranged.

Next time, I would change the coloring in these images and bring back in more pink to link to my original idea.

While these edits represent my idea of distortion and tearing Barbie apart, the edit technique itself has no link to my work. I think the best approach to my edits is the burning of the material with the doll on (paper, acetate) to create a scene of destruction.

If I wanted to link these to Barbie, I could say they are both toys and represent pulling something apart.

These edits took a while to complete as I had to follow the outline of the puzzle piece but the edit turned out how I wanted. You can see the idea behind Barbie having missing pieces and linking it to her not fitting in anymore or being what society deems as 'perfect'.

EDIT 1

EDIT 2

IN FLAMES - ACETATE

STEP 1:

- I first picked out my **images** and **printed** them onto **sheets of acetate**. My **images** were all from my **garden shoot** when I lit the **Barbie** on fire and dug the **doll** into the **ground**.

ACETATE SHEETS WITH IMAGES:
THE IMAGES I USED

STEP 2:

- After **printing** out all my **images** onto **acetate**. I used a **mini blow torch** to **melt** the **sheets** and create a **crippled/ burnt look**. Holding the **flame** further away from the **acetate** allows me to get the **paper** to **shrivele up** and closer created a **ooeev/ uneven burnt hole**.

EXAMPLES OF THE SHRIVELED/ BURNT AREAS:

^^Original acetate sheets after burning them.

Scanned images of the acetate sheets

After taking photos of each acetate sheet, burnt with my image on, I then scanned the images and sent them to myself to see what textures I could pick up.

ACETATE SHEET:

SCAN OF ACETATE SHEET:

ACETATE SHEET:

SCAN OF ACETATE SHEET:

LIGHTING

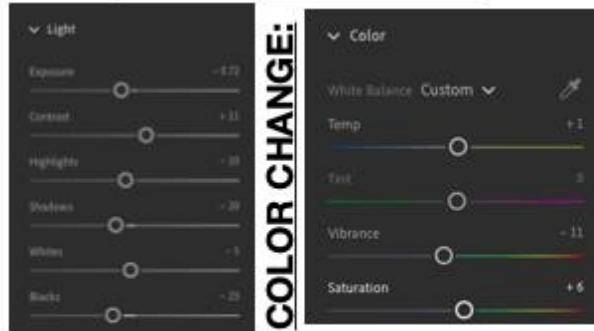

ORIGINAL:

CROPPING:

LIGHTING CHANGES:

BLACK AND WHITE:

By choosing to [melt](#) the bottom of the [acetate](#), I am [creating](#) the first step of destruction. It shows [Barbie](#) slowly [fading](#) away and getting [destroyed](#).

For the [lighting](#), I [increased](#) the [sharpness](#) to make the [shriveled sheet](#) appear more [detailed](#) and [decreased](#) the [exposure](#) to make the [contrast](#) between the [highlights](#) and the [darkness](#) greater.

LIGHTING PART 2

ORIGINAL:

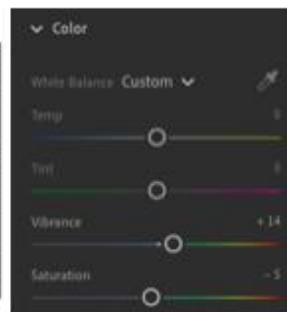

CROPPING:

LIGHTING CHANGES:

COLOR CHANGE:

BLACK AND WHITE:

This image consisted of Barbie buried in the ground creating a funeral type scene. I melted and shriveled all the brown/ ground areas around the Barbie doll to create some distortion across the image. Increased the whites to emphasize the shriveled areas across the acetate sheet which was effective against the darker background.

LIGHTING PART 3

ORIGINAL:

CROPPING:

For this image, I melted the corner of the acetate sheet and created more shrivelled areas going up into the center of the image. This image was very vibrant with emphasis put on the orange in the flame, so I decreased the vibrance and increased the contrast so that the dark areas became more visible.

PACKAGING

KEY POINTS TO PACKAGING THAT ARE IMPORTANT:

1. The color of the packaging
2. The size of the box/ object
3. The price
4. What slogans are used to promote it
5. Whats the first thing that catches your eye

EXAMPLE

By looking at the packaging of the Barbie doll, I can experiment with my images and acetate to create the look of plastic covering the doll and acting as a seal, keeping them trapped inside the box.

I am going to create a new photoshoot and have a collection of images that involve my model acting as Barbie when she is in a perfect state. i will then capture my model acting as the Barbie doll when ruined a d destroyed. For example, mascara running down the face, tangled hair or messy clothes.

Clear plastic covering the center of the frame.

Preferably a pink frame to represent Barbie

BARBIE PACKAGING BOXES

Another idea, is to have perfect Barbie next to or seeing the reflection of destroyed Barbie. Showing the difference and how the doll no longer represents what girls want or look like.

KEEP CALM AND LOOK LIKE Barbie

Barbie has many different slogans to represent the different dolls. There are also a lot of online, controversial quotes that represent Barbie as a toxic and unrealistic role model. This is part of the packaging and can be used when creating my final piece or within my next shoot. These are some of the online ones that I came across and I feel as though they show how society views Barbie these days.

looking for a perfect girl? go buy a barbie doll

IF I EVER GO MISSING BE SURE TO USE MY SELFIE WITH THE MOST LIKES

CHANEL

The first 10 years of a girls life is spent playing with Barbies& the next 10 years are spent trying to look like one.

NOTHING SAYS 'BEAUTY' LIKE TOXIC HAIR AND MAKEUP PRODUCTS

Oh Darling

Despite all your efforts you will never be on my level, & I respect you so much more for realizing it.

DIFFERENT SHOOTS

SHOOT IDEA 1:

My first idea for the shoot is to capture my model, who looks like Barbie, in a state where she no longer looks perfect. I will smudge her lipstick and make her mascara run to create a broken, destroyed look.

This links to Barbie in the 21st century. She is no longer the image of the 'perfect girl' as this idea of the skinny and unrealistic body and has gone out of fashion has evolved into something more natural and believable.

SHOOT IDEA 2:

My second idea for a shoot, is to have my model lay down in a pool/ bath and take pictures of them looking depressed/ destroyed. I can use clothes that Barbie wouldn't usually wear, for example blue colors, and this will also show how Barbie has evolved and that the original version is no longer acceptable.

SHOOT IDEA 3:

My final idea for the shoot is to include some mug shots. This creates an image of Barbie being punished for the way she is making girls feel and for presenting them with an unrealistic image of beauty and life. I will continue to make the Barbie look like she has been destroyed and will possibly use her original pink clothing but ruin it completely.

SHOOT PLAN

DATE: 17/03/2022

SHOOT NUMBER: #5

THEME: Stereotypes-
Rebellious

EQUIPMENT:

- My camera (Canon camera)
- Makeup
- Ring light

LOCATION:

- Studio shoots for pictures of my model

MODEL/ CLOTHING/ PROPS:

- I will be using a model
- She will be wearing pink clothing with heels
- No props
- Makeup

LIGHTING:

- I will need to use the studio lighting
- Normal bright lighting

TECHNICAL APPROACH:

- As I am using studio lighting, I will need to use a small aperture so my model isn't too over exposed.

CREATIVE APPROACH:

- I am going to have my model mess up her hair and smudge all her makeup
- This follows the idea that Barbie isn't perfect and she is getting destroyed

INSPIRATION:

ORIGINALS

MAKEUP DISASTER 1

ORIGINAL:

STEP 1: BACKGROUND

STEP 2:

EYES

Changing the eyes to blue.

STEP 3: LIPSTICK

For the lips, I only increased the saturation to get a brighter and warmer shade.

STEP 4: DARK UNDER EYE/ MAKEUP

The next step is to use photoshop to make my model look **slimmer**, like a **Barbie doll** and to change some **features** on the face.

STEP 5:

STEP 6:

STEP 7:

These were the final steps for editing my model. I used "BeautyPlus" to edit the size of the eyes, the nose and slim down the body. I then used "YouCamMakeup" to make my models eyelashes bigger and add more pink to the eyelids.

STEP 8:

STEP 9:

STEP 10:

EXPERIMENT

I had to [edit](#) this to fit with my [Barbie](#) theme and make up a crime [linked](#) to the [project](#).

STEP 1:

STEP 2:

STEP 3:

STEP 4:

STEP 5:

STEP 6:

STEP 7:

I really like how this [edit](#) turned out and think it is [effective](#) when trying to [destroy](#) Barbies 'perfect' reputation. The editing of the face and the original [makeup](#) on the face works well in making my [model](#) look [defeated](#) and caught in the act.

MAKEUP DISASTER 2

ORIGINAL:

STEP 1: BACKGROUND

STEP 2: EYES

Changing the eyes to blue.

STEP 3: LIPSTICK

STEP 4: DARK UNDER EYE/

The next step is to use [photoshop](#) to make my model look [slimmer](#), like a [Barbie doll](#), and to change some [features](#) on the face.

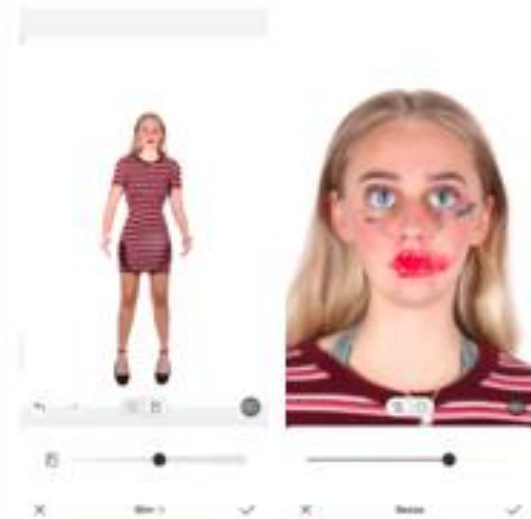

STEP 1:

STEP 2:

STEP 3:

EVALUATION

The idea behind these edits was the beginning phase of the rebellion. This shows Barbie being photographed as a criminal with the crime 'being fake'.

Her makeup and hair is all messed up and is showing her in a new light as she is no longer looking beautiful.

This piece was successful and I found it worked well when put in order with the rest of my images.

While this image has the same intentions as the one above, I feel as though she doesn't look as much of a mess as I would have liked.

If I were to do this shoot again, I would have taken more images like this but made the face and makeup more like the first image to show more of the destruction to the doll.

I really like this image, but it doesn't show the stiff movements of Barbie.

EXHIBITION BOARD

EXHIBITION BOARD PLANNING

WHAT I WILL NEED:

1. 2 boards
2. Corner plot
3. 2 Plinths
4. Projector
5. Access to a power source
6. Shelf

PROJECTOR:

The projector will show a video I took while destroying my Barbie doll. It involves the Barbie burning and collapsing to the floor.

PLINTHS:

The first plinth will be used as a stand for my projector.

The second plinth will be used to either:

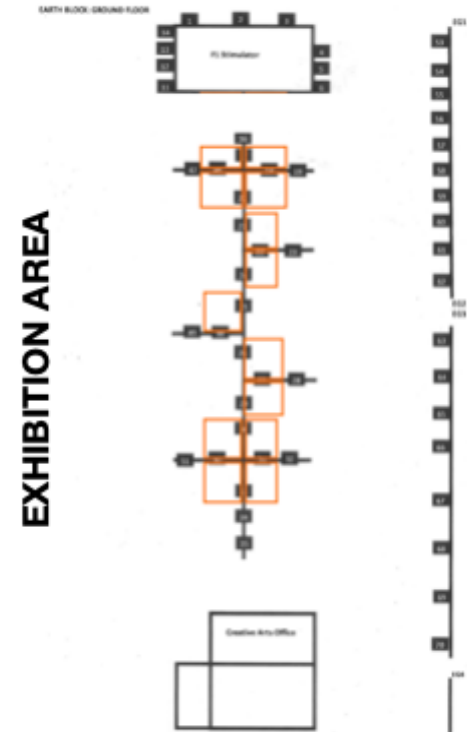

- Hold a Barbie doll box or
- To hold pieces of a Barbie doll

BOARD NUMBER 1:

- The projection video is completed
- For this board I will show multiple edits where my Barbie has been buried and burned.
- Acetate images hanging from a string at the top of the board
- Following my theme of rebelling against the doll and destroying the stereotype.

CONSIDERING:

- Do I want to wrap the board in black paper or possibly burn areas/ destroy areas?

BOARD NUMBER 2:

- Around the main piece I will have Barbie images (my model) before she was destroyed

CONSIDERING:

- Do I want to wrap the board in pink paper, to show the contrast between the pretty and ugly?

BOARD 2 - PHYSICAL DESIGN

Do I have the house on the floor or hanging from the board?

I will include slogans on my Barbie box and will add some accessories to the outside.

For example:

"Looking for a perfect girl, go buy a Barbie doll."

"I wish I could be like Barbie."

"Keep calm and look like Barbie."

While this idea showed the difference in the beautiful and destructive side of Barbie, I felt that it had no link to some of the edits I had done previously in my project. Therefore, I decided to change the layout of my boards and come up with a new idea for my composition and physical creation. This will allow me to be more effective when getting my point across to potential viewers.

BARBIE HOUSE - EXPERIMENTATION

Can I create a Barbie house and have rooms sectioned off?

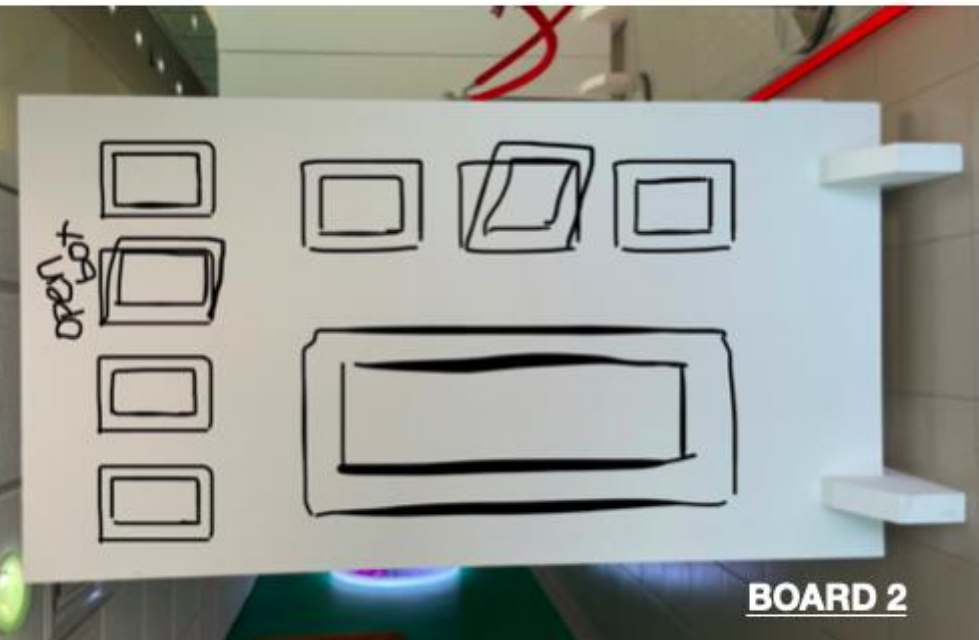

- The idea of this design is to allow viewers to look inside the box.
- I want the outside of the box to be pretty and pink to represent the stereotypical Barbie doll.
- When the box is opened I want the inside to show edits/ images from my rebellious shoot. This where viewers will see how the doll has influenced the world in a bad way and is now not seen as 'perfect' but unrealistic.
- I could either buy a Barbie doll house or create one out of cardboard and either attach it to the board or have it on the floor.

BOARD 1

LAYOUT - SIDE BY SIDE, 1 PLINTH, 4 IPADS

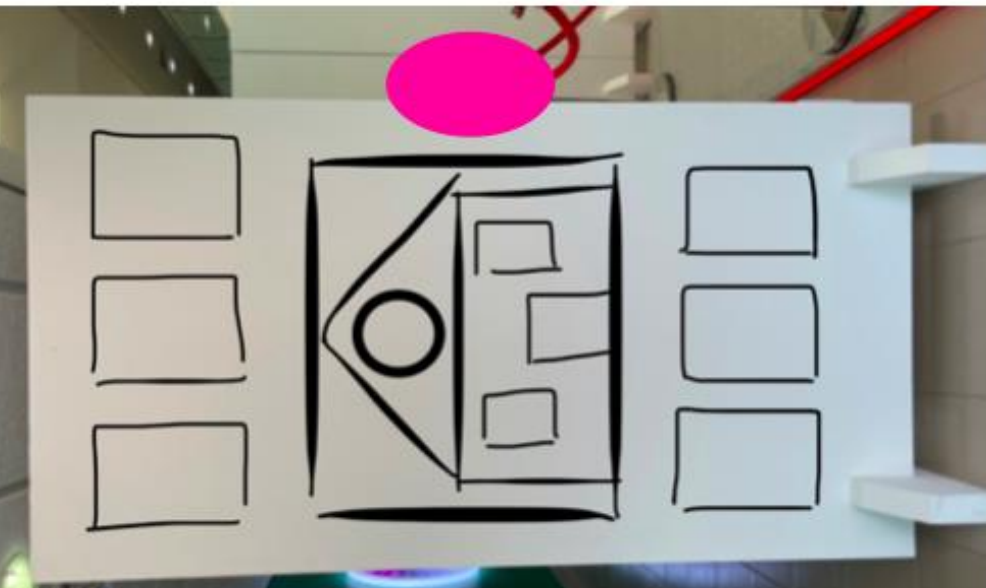

BOARD 2

POSSIBLE EXHIBITION LAYOUT

BOARD 1

POSSIBLE LAYOUT OF MY EXHIBITION BOARD

BOARD 2

BOARD 2 - PHYSICAL DESIGN

THE DESIGN
FOR THE
BARBIE BOX

I will make the Barbie boxes out of cartridge paper to give them some stability and will then use acetate sheets to act as the plastic on top of the box.

How the Barbie boxes will work:

Underneath the box (the image):

OR

In some of the Barbie boxes I will use an iPad to show a video of a Barbie being lit on fire (from one of my previous shoots). Some of these will look like glitches and some on a loop. Other boxes will have one of my images in them. I will attempt to leave some open and some damaged.

23/03/2022

FINAL EXAM

BARBIE BOX PROTOTYPE

STEP 1:

STEP 2:

STEP 3:

STEP 4:

STEP 5:

STEP 6:

STEP 7:

STEP 8:

STEP 9:

POSSIBLE ADD
ONS TO THE
BARBIE BOX

This is a [Barbie inspired box](#) and will be used to show my [edits](#) of [Barbie](#) and the [videos](#) of her [burning](#).

The [middle](#) of the box will be [cut out](#). The [outside frame](#) will be [folded](#) to create the [3D dimensions](#) of the box to make it look as though it is on a [shelf](#).

3D BARBIE BOX

My original Barbie box, was too complex and had too many details around the frame, causing the focus to be taken away from my photography. To take the focus of the frame, I chose a baby pink color instead of a dark pink, I removed the gradient circles at the bottom and removed some of the extra pieces around the frame.

BOX PROCESS - LAMINATE

After attempting to make the box out of just cartridge paper, I realized that it wasn't sturdy enough and kept collapsing.

I decided to try and laminate my cartridge paper to make it stronger and also give it that shiny, finished look that a Barbie box would actually have.

I printed my A3 sized box onto cartridge paper.

To make the box I had to cut out the middle and through the corners so that I could fold the sides. When assembling it, the lamination sheet started peeling off the paper and forming bubbles, which made it difficult to fold and correctly cut. Therefore, I had to change my material again. This time I am going to try normal paper and use card to make it stable.

BOX PROCESS - CARD

To start with I had my box printed on normal A3 paper. As this wasn't sturdy enough, I glued it to cardboard (card would not go through the middle and scored the sides to fold it, sticking the corners together with double sided tape.

The boxes turned out good and were strong enough to hold together and stand up.

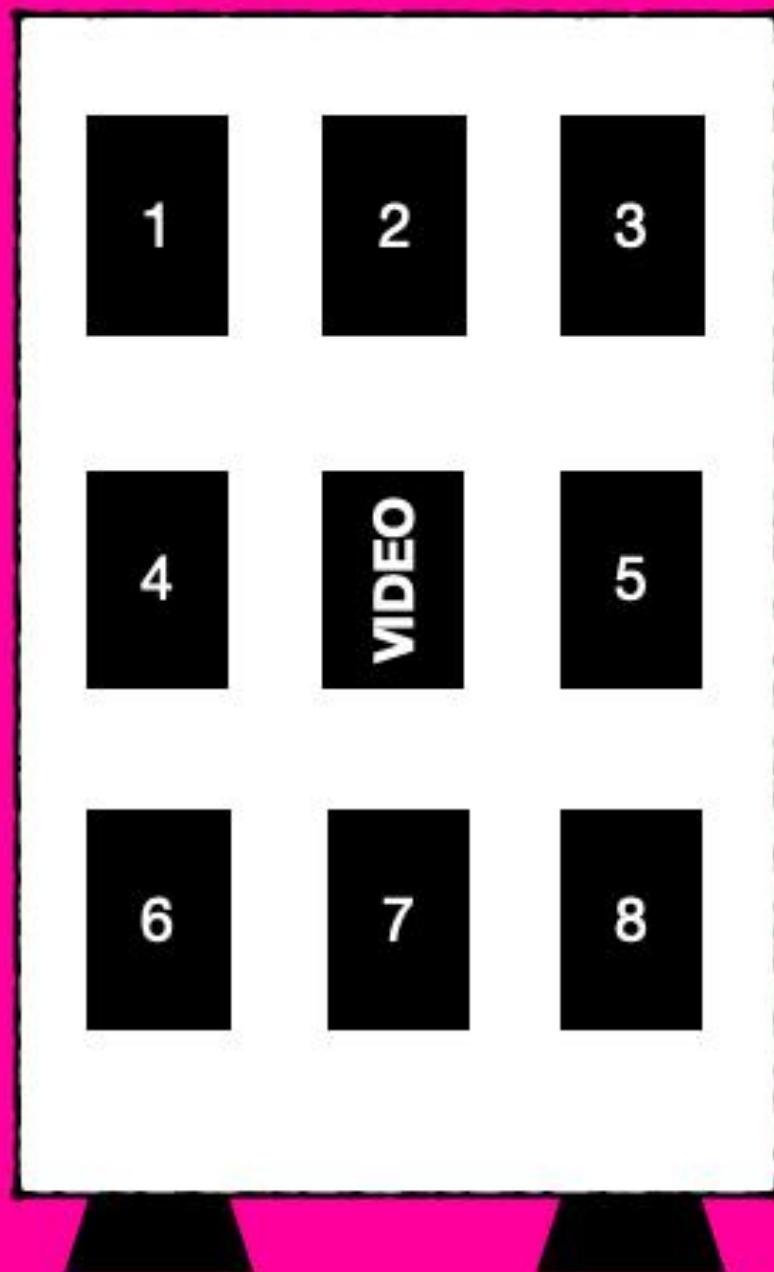

To hang them on my board I will use wood or card as a tab to connect it to the wall.

I made 9 boxes.

The next step is to burn the acetate and possibly a couple of the boxes. I also need to choose images, to go behind my box. These images will be based on my rebellious shoot and also my most recent one, with Barbies makeup disaster.

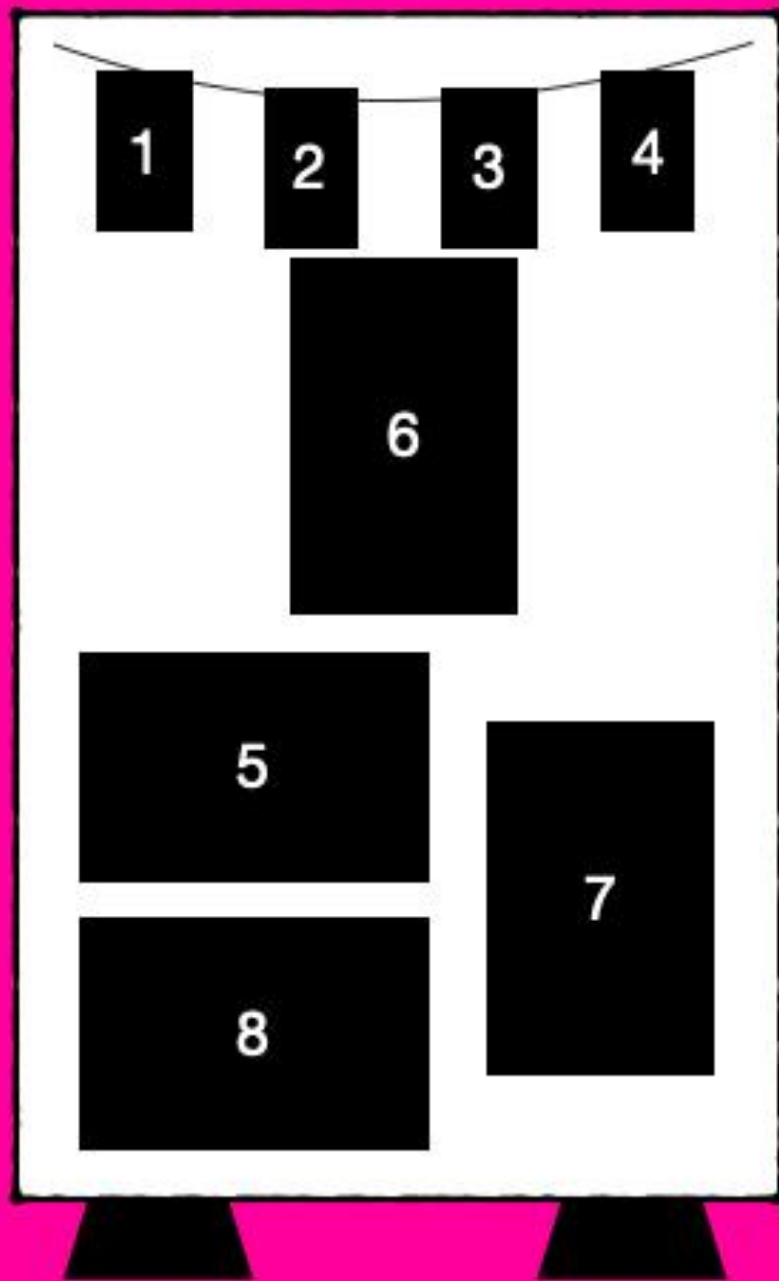

BOARD 1 INTENSIONS

POSSIBLE BOARD IMAGES

BOARD 2 INTENSIONS

POSSIBLE BOARD IMAGES

BOX BURNING

To burn the acetate I used a lighter and did two different techniques.

To burn holes in the acetate, I held the lighter closer and in the same area for a longer period of time.

The second technique allowed me to create the creasing and lines on the acetate. To do this I had to move the lighter around slowly, to allow the heat to reach the acetate but not enough to burn it.

This piece of acetate was not very successful as I created too many lines and it was distracting, taking the attention away from the rest of the box/ image.

I also attempted to burn areas of one of the boxes to add the destruction. I found that the box caught fire and burned very quickly so I decided less was more when burning it.

I only did this on one of the boxes as I want the main focus to be my images rather than the look and the detail of what's around them.

BOX DISPLAYING

ORIGINAL- TOO MUCH

After burning the acetate this is what they looked like when placed with a Barbie box.

I found that when putting an image behind the acetate, some of the detail and attention was drawn away from the image itself and instead drawn to the acetate. Too much was happening and the acetate was becoming the focus point. Therefore, I had to tone down the burning and the melting of the acetate and instead create areas that didn't get in the way but were still effective.

CLEARER VIEW OF IMAGE BEHIND

The final board will look like this with an image placed behind each box. The space will either be for a stand or another box.

In this image, I was playing around with the composition and positioning of the boxes. One box is slightly tilted to the side and this might be something I consider doing for the final outcome. CONSIDER: Does it follow the theme? What am I trying to say?

FINAL EXHIBITION

EXHIBITION BOARD 2

EXHIBITION BOARD 1

EXHIBITION BOARD PROCESS

STEP 1:

STEP 2:

STEP 3:

STEP 4:

Before I started **sticking** anything onto my **exhibition boards**, I used **masking tape** and **normal paper** to **figure out** where I was going to **place** my **images**. I had to make sure they were all in **line** with each other and in the **center** of the **board**. I also had to make sure they were **level** and **straight** before **placing** them.

STEP 5:

STEP 6:

STEP 7:

STEP 8:

The **last step** to **completing** my **first board** was to add the **iPad** to the **middle Barbie box**. To **attach** the **boxes** to the **boards**, I created **two little tabs** at the **top** of each **box** and then use **velcro** to **attach** the **tabs** to the **board**. The **velcro** kept the **boxes** strongly **attached** and held up.

STEP 9:

STEP 10:

STEP 11:

STEP 12:

This was the [process](#) of [Board 2](#). I used [velcro](#) to [attach](#) each [image](#) to the [board](#) and also used a [level](#) to make sure the [images](#) were [placed](#) correctly and all in [line](#). I [attempted](#) to use my [best images](#), [unedited](#).

BOARD NUMBER 1 VIDEO

This is the video that will be used to go in the middle box. It follows the rebellious theme and makes the board itself more effective.

<https://youtube.com/shorts/1Bh0ql-YT9k>

EVALUATION OF BOARDS

1.

This board was used to display my best images. I had originally planned for 5 images but after moving the one to the other board, it made it easier to display the 4 that were left.

My images were printed A2 on boards but I would have liked certain images, like the fire one, to be slightly bigger. However, when printing the images A1, they came out very grainy and looked like they weren't in focus. This could have partly been because the images had been edited and copied so many times. To make sure I got the best images, I used the original ones and printed them A2.

I really like the final look of this board. While I was worried that the boxes would look tacky and not very put together, I actually found that they fit with my theme of rebellion and not looking perfect.

The video in the middle adds to the dramatics of the burning Barbie doll and it was the perfect way to finalize this board.

I decided to add the image of Barbie going to jail at the bottom of this board as it adds an explanation to the idea behind the boxes. It shows that Barbie is being arrested and has then been put in these boxes where she is getting destroyed. It acts as the beginning of a story.

2.

EXHIBITION BOARD

EVALUATION

What is my theme and why did I choose it?

- My theme is the stereotypes that society has created. However, my main focus for the project was the Dumb Blonde stereotype, which lead me into looking at Barbie.
- I chose to focus on this theme as I was curious as to what makes someone fit into a certain stereotype and what characteristic make them unique.

Did my theme develop over the course of the project?

- My project started of with a broad theme of 'stereotypes.' I realized that I needed to zoom in on a specific stereotype to make my project more effective so, I chose Dumb Blondes. After thoroughly researching the topic and gaining a better understanding, I needed to chose a model/ subject to focus on and I found that Barbie linked best to the theme as she was stereotyped as looking perfect and having the perfect life.
- I progressed the project by looking at ways I can make a real person look more like Barbie. This involved manipulating the face and the body. This was evidence of the 'perfect' look Barbie has as it required a lot of editing.
- Moving on, I started to look at Barbie trying to escape this stereotype and the way people perceived her. I used the Barbie box to act as a prison and show her being trapped.
- This led me on to my final phase, the 'Rebellion.' This was a very successful phase as it was what led me to create my exhibition board. I focused on how people react to the doll itself and showed society trying to destroy the idea of stereotypes, specifically ones that are unrealistic and fake.

What was the most pivotal point of your project?

- The most pivotal point of my project was the 'Rebellious' phase. After starting to research and create some edits, I started to see the story and progression of my project come together. I could link this to each phase of my project. For example, the manipulating of the barbie and her being trapped.

How did the artists I chose inspire my project?

- I found that Margaux Lange was a perfect link to the last phase of my project. She dismantles Barbie dolls and tries to put them back together. This inspired me to dismantle the dolls myself and see what images I could capture throughout this process.
- Another artist that I found helped me progress my work was Lucas Simones. This was another artist I used to inspire my rebellious phase. She burnt and removed areas off the image to distort the look of the models face. This led me to burning the physical Barbie doll and distorting her image.

What concept have I achieved as part of my final outcome?

- My final outcome shows the Barbie doll (the stereotype) being imprisoned in the boxes and being destroyed as a result of the image she portrays and her fakeness. The boxes and destruction of Barbie represent society going against the stereotype and trying to destroy the expectations.

What did I learn about my theme through this investigation?

- During the course of my project, I learnt that people are perceived to be a part of certain groups based on their characteristics and what they look like. These are created by society.
- I also learnt that when toys, such as Barbie, portray a certain image or expectation, it can effect those children who play with them and can effect their development.

Is there anything I would have done differently?

- If I were to re-do this project, I would do more experimentation and editing of the Barbie doll. I felt that I didn't spend enough time on this and I could have gone a lot further with the experimentation process.
- In terms of my images and photography, I could have done some more unique and exciting photoshoots as they were mostly done in a studio with basic lighting. This could have possibly limited my experimentation.

An exploration of the female form through fantasy and reality

BIBLIOGRAPHY 14

INTRODUCTION

In this personal investigation of the representation of the female form, I will be investigating the history and concept behind Barbie as well as the progression of the doll and how artists have used it to create conceptual comments on social norms. I will then be exploring the works of Meg Cowell and her vision of the female garments with the use of magical and fairy-tale dresses. This topic of the female form has sparked my interest as it could be argued that the message being projected across the world about the 'perfect' female body is toxic and disheartening to all the young girls who do not look like this. It is the leading cause to many eating disorders and is providing them with unrealistic expectations of what a girl should look like.

The Barbie doll was created in the late 1950s and too this day the same figure is still sold and portrayed as 'perfect'. The idea that perfect is wrongfully projected as skinny and pretty is becoming less important and people are looking more for a realistic and authentic look. I am trying to explore how fantasy and reality can present the body in different ways and create a sense of what's desirable but also how things can be interpreted.

MEG COWELL

Meg Cowell is a large-scale Photographer, who captures feminine garments in a way that gives the viewer a sense of fantasy. When asked about her work, Victoria Hammond stated, "The dancing light, caressed, confection of a gown in a Sweet House is the stuff of fantasy or fairy-tale" (Hammond, 2022).

Her love for photography was on going through her childhood and College, as she graduates with an Honours Degree in Photography, at the University of Tasmania in 2007. Her work was inspired by her photo-artist partner during a mentorship programme in South Australia and is what lead her onto her current interest on the feminine garments.

FIGURE 1 (Meg Cowell, undated)

Figure 1 is ghostly in appearance, with the missing body yet old fashioned garment, showing a sense of life, is a strong visual created by Meg Cowell. I was drawn to the lighting and composition within the image, showing a purposeful arrangement. The emerald green on this dress creates a sense of royalty and importance while also elegance and innocence. It layers the top, while the underneath is white with touches of champagne pink on the sleeves and the lace of the neck. She uses the texture of the ruffles to elevate the dress and put emphasis on the size suggesting the wearer of this dress was important. It is brought to life through the

texture as it leads the design of the dress to create shadows within to again show its bulk. The white underneath the dress, is illuminated by the light and is juxtaposed against the black background. A line of symmetry, proposing organization and manual alignment of composition, is shown down the middle of the dress, as you see the ruffles carefully positioned and placed to show the detail and effort put into this female garment suggesting movement and fullness to a figure that we assume must be there. Cowell uses soft lighting to create a subtle and gentle shadow leading away from the ends of the dress, leaving the light in the middle of the dress as the central focal point.

FIGURE 2 (Meg Cowell, undated)

Meg Cowell said, “I think an image is successful when it shows metamorphosis. Good images require an imaginative collaboration from the viewer to interpret what they are seeing” (Cowell, 2022), and in figure 2 the viewer interprets the dress as fairy-tale like, creating a sense of joy and magic through its fluidity in the

arrangement, making the viewer sense the wearer is magical and full of life. The soft floating textures of the dress contrast to the harsh background to create some depth,

which gives the illusion that the dress is disappearing into an imaginative state. The color of this dress is very pleasing to the eye, with the base colour being white and subtle areas of light pink coming through, which is perceived as very feminine and delicate. This leaves an interpretation of fantasy and princesses, suggesting it could be for a young female going to a formal gathering. This satin material is frozen in a fluid movement yet looks as if it is alive and dancing. By decreasing the opacity and blending the ends of the dress with the background, a graceful motion is shown and can be interpreted as magical and hopeful. There are no rigid/sharp edges shown from the ruffling of the layers or the ends, as well as no organised structure to the layers. The layers and folds in the dress are displayed through the different colours (pink and white) and emphasised through the lines on the torso, through to the bottom of the dress. It is perceived as a ballroom dress with its large and thick skirt, which can emphasize that elegance and fantasy ballroom event. Soft lighting is used, as the transition between the small shadow at the very ends of the dress is fading out into the background in a subtle and fluid motion.

FIGURE 3 (Meg Cowell, undated)

Figure 3 gives a sense of innocence, as the ghostly wearer is presented by Meg Cowell through a basic composition utilizing two elementary colours, blue and pink. By keeping the arrangement simple, it puts more emphasis on the wearer and who they are. She uses this image to give the impression of youth as it consists of noticeably light and calm colours juxtaposing against a dark, depressing background. While it is a basic style and design, the volume created from its position and the glossy fabric, gives the impression of a princess dress and joy. Again, we look at this image initially as a figure, to only realise that it is a garment of clothing. The suspended dress is portrayed as still movement, yet the smoke effect edited post-production allows transparency to the bottom of the dress adding to the idea of movement and the ghostly outcome.

Cowell uses a 1000-litre pool, filled with water, as symbolism of re-birth and to show the movement in the dress as well as to hold and suspend it in an open space, separating it from the wearer. One of her key inspirations is the idea of ‘Princesses’ in fairy tales, where the female garments operate as a form of metamorphosis. This is seen in Disney, as the downtrodden character becomes a princess through wearing a big, beautiful dress. From an early stage in life, the idea of being a princess is projected onto young girls through dress up and idolisation from their parents. They are automatically put into the world of fantasy where the learnt behaviour of believing in a fairy-tale and dressing perfect like a princess develops. Cowell tries to show, that young women think we need to include this in our identity for the future and eventually hold the hope of growing out of this into wearing a white wedding dress.

THE BARBIE DOLL

“The first 10 years of a girl’s life is spent playing with Barbies and the next 10 are spent trying to look like one.”- Anonymous

FIGURE 4

FIGURE 5

Bild Lilli – German Barbie doll

Barbie– First American Barbie doll

The first ever American Barbie doll was called ‘Barbara Millicent Roberts’ and was put on display in 1959, New York City. She was the first ever mass-produced toy in the USA with adult features. The Barbie doll was created by a woman called Ruth Handler and the company Mattel and was inspired by ‘Bild Lilli’ a German doll in 1956.

‘Bild Lilli’ the German doll was originally a comic strip character marketed as a racy gag gift to adult men in taco shops, the doll later became more popular with children.

Ruth created this idealistic form of a Barbie doll following on from 'Bild Lilli,' after seeing her own daughter ignore her baby dolls and play make-believe with paper dolls of adult women. It was then she realised that there was room in the market for these dolls giving little girls hope and imagination for the future. The extreme demand for the doll led to the creation of Barbie's boyfriend, Ken, a best friend named Midge and a little sister called Skipper.

The original doll measured 11-inches tall, with blonde waterfall hair. If Barbie was a real woman, she would be 5'9" tall, have a 39" bust, an 18" waist, 33" hips and a size 3 shoe. Her weight would be 110lbs and at 5'9" this would be considered anorexic. The physical proportions and expectations of looking like Barbie is impossible to reach.

Although the aim of the doll was to entertain children and empower girls to do what they want, the doll's look had some backlash and went through many controversial conversations about the immensely unrealistic image it portrays, and the female form it is presenting. Her fantasy body proportions were projected around the world and targeted towards little girls, giving them unrealistic expectations and hopes for their future selves. A real-life study of these dolls and how it harms girls' body image, concluded: "The ubiquitous Barbie doll was examined in the present study as a cause for young girls' body dissatisfaction. Girls exposed to Barbie were reported to have lower body esteem and a greater desire for a thinner body." This follows the idea that promoting skinny and unhealthy body images is having a lasting effect on young girls and can affect their perception of their own bodies.

ENRICO PESCONTINI - TRAVEL

Enrico Pescantini is a photographer who captured the idealistic world and lifestyle of Barbie and her boyfriend Ken in a project called 'Barbie Around the World.' The project was born out from his long-distance relationship with his girlfriend. They were living at different ends of the world and as a way of coping and feeling close to her, Enrico used alter egos as protagonists to mimic the 'perfect' couple, an icon of POP culture and

documented their lifestyle as he travelled around the world with the plastic dolls. He documented Barbie in beautiful and luxurious locations, sitting in vintage cars, travelling to different countries, relaxing at the beach, and lying in the Dead Sea.

FIGURE 6 (*Tel Aviv life is a beach, undated*)

FIGURE 7 (*Malecon de Havana, undated*)

FIGURE 8 (*Floating together on the Dead sea, undated*)

These images all have an increased saturation creating the feel of vividness of the scene in the attempt to make it more life like and feel real to represent Pescantini and his long-distance girlfriend. The angle of the photography is taken from a low viewpoint making them seem more grounded. A low viewpoint can also elevate the figure which can be interpreted as someone looking up to them or seeing them as heroic, which relates back to Barbie and Ken being seen as 'the idealized and perfect couple.'

Seeing them from this perspective allows the photographer to capture more of the surroundings and emphasize the extravagant environment and them on holiday travelling the world.

These images can be seen as a method of escapism. Barbie and Ken are being put in real life everyday settings, with an unrealistic harsh contrast and an unrealistic

appearance. The dolls are naturally stiff and unnatural making them look out of place and fake. This emphasises the fact that they are not real, and this is not real life, showing that the visions the artist is trying to create about his long-distance relationship, is nothing more than his own idea of a fantasy.

LINKING MY WORK - Enrico Pescantini

FIGURE 9 (My own work)

To link my work to Enrico Pescantini, I used my edit of my real model in the Barbie box.

Enrico Pescantini's work is based on an idealistic life where him and his long-distance girlfriend go travelling around the world, his idea of a fantasy. He puts emphasis on this idea of fantasy when he oversaturates his images and tries to force this sense of perfection. This relates to my work as I aimed to make my piece question the difference between fantasy and reality as I place my model, edited to look like Barbie, within a Barbie box. This shows a strong contrast between materials as I had to heavily edit my model. I used Photoshop to recreate her look and this involved changing everything from the face shape to her body size and even asking my model to wear a wig. Real vs plastic comes into question when it is clear my model no longer looks like her real self but instead looks plastic and fake.

MARGAUX LANGE - ART

Margaux Lange is a New York designer who uses plastic body parts from dolls as part of her jewellery collection. She utilizes the Barbie doll parts with sterling-silver to create these pieces. Her work featured arms, legs, and parts of faces all joined together. Her series of work has been on-going for fifteen years and has been published in many books,

international press, fashion, design, and some of the World's top art magazines. Her work is known both local and internationally shown in boutiques and galleries.

Her creativity behind her project 'The Plastic Body Series,' came from her obsession of Barbie and her miniature world at an early age. Her project involved her dissected parts of the Barbie doll and then piecing them back together. Through piecing together segments of 'perfection,' Lange is creating the unusual and something disturbing to a viewer.

The creation of sculptures from limbs has a sinister connotation of society rebelling against the Barbie doll and idealized look. Lange had a desire to repurpose mass produced materials into handmade jewellery emphasizing the plastic and fakeness of the doll. She is destroying and pulling apart something that was once seen as perfect and creating something more modern and wearable.

FIGURE 10 (Margaux Lange, 2011)

FIGURE 11 (Margaux Lange, Barbie bracelet)

Within the bracelet there are multiple variations of doll hands, for example, distinct colors. This brings to light the idea

of diversity, but due to the formatted proportions and the lack of identification with different sizes and shapes, we assume that all nationalities have very similar features and have no uniqueness to them.

HOW HAS THE PROGRESSION OF BARBIE CHANGED OVER TIME?

Barbie has always been presented with the idealized body and perfect look but today the idea of the 'perfect body' is overlooked and there is a more diverse idea of what women should look like.

FIGURE 12

In 2005, the Bratz Dolls popularity grew and took 90% of the Mattel doll market while Barbie Doll sales declined. Several young African American girls were interviewed for a book called "Growing Up with Girl Power" and a 9-year-old girl said, "I buy Bratz dolls because they're all treated right." The Barbie dolls are casted in such a negative light with the clothes they wear and the way they are perceived whereas Bratz dolls are not perceived with the perfect body with the perfect life. From when they were first introduced, they provided diversity in terms of colour, culture, and clothing.

Barbie sales declined from 2012 to 2014, after the typical blonde hair, blue eyes and perfect body look began to go out of fashion. This was a wake-up call to the creators and encouraged them to change their leadership and their approach to sell these dolls to the wider population of young children. Mattel launched their most recent Barbie doll 'Fashionista' in 2016. This came in three varied sizes - "tall," "Curvy" and "petite" - and was made more diverse with the different skin tones, face structures and hair styles.

FIGURE 13 and FIGURE 14 ((The new Barbie series has 'tall, petite and curvy' dolls | DW | 28.01.2016, 2022)

Following on from the new and improved versions of Barbie being released to the world, this now means younger and new

generations are less inclined to buy the original Barbie doll. This lead me on to the idea of the 'rebellion'. This involved shoots of Barbie being destroyed and ...

LINKING MY WORK - MARGAUX LANGE

FIGURE 15

(My own work)

FIGURE 16

(My own work)

Margaux Lange is a good link to my rebellious themed shoot, during which I destroyed a Barbie doll, breaking them into body parts and positioning them for the camera in different scenes.

Langes creativity, links to the idea of being vulnerable and realistic.

This identifies with the idea behind my shoot and societys expectations being destroyed. The idea of Barbie being 'perfect' and what young girls look up to is being changed and is now seen as unhealthy. The seperation of the body parts shows the vulnerability and how the doll is just plastic, linking back to Margaux Langes work and how the destruction of the doll is more realistic. She uses beautiful images of the doll and turns them into a foreign object that is disturbing to viewers, especially a child who would usually find joy playing with the original doll.

Both of our pieces represent the realistic view that Barbie is just plastic and how the porportions of the dolls and their looks are all similar and show no uniqueness. Figure 1 and figure 2 both have similar porportions and body type, showing no diversity or link to a difference in culture. Having some diversity within an object is massively important in this day and age as people feel more secure and recognised when they can identify with something and believe they are being noticed and valued.

Linking back to my question about the female form, I think the influence of Margaux Lange has given me a way to represent how Barbie was key to creating the idealistic views of the female body and the way females want to look. Her work also allowed me to create pieces that challenge these expectations and create a new look for Barbie in 2022.

CONCLUSION

These artists all link nicely to my final exhibition as they represent the fantasy and reality side of my project. My exhibition will display my images during the 'rebellious' phase of my project, which will further emphasize the idea that Barbie is not perfect and is plastic and fake. I have gone against what the doll stands for and instead of making something pretty and put together, I am evidencing the reality side of Barbie, the side that isn't so perfect.
