

AS and A level Business

Evaluate questions

In early 2015, our GCE Business qualification was accredited. Our Sample Assessment Materials (SAMs) set out how we will approach different command words in our assessments. We've been testing our SAMs and found that a number of learners are not making recommendations as part of their responses to the 20 mark questions. To ensure learners have clear guidance in all our questions, we're making some small changes to how we phrase the 20 mark 'evaluate' questions in our AS and A level papers. This does not change the way these questions are marked or the skills we are assessing, and we are not making any changes to the command word 'evaluate'.

To see an example of how these questions will be phrased, please see the Specimen Papers for A level Business. We'll make these same small changes to the 20 mark questions in our AS Business papers and some examples of these can be found in our AS exam-style practice questions.
