

GCE 2008 - Geography

Further Guidance for Unit 1 subsection 6 'World Cities'

The 'suggested teaching and learning' column of the above subsection (on page 30 of the specification) includes the following indicative example:

- Researching and appreciating the diversity of two megacities (cycle of urbanization of one European and one Asian City)

This guidance is not as broad as it could be. To provide clearer guidance it is suggested that an alternative indicative example for this section is:

- Researching and appreciating the diversity of two megacities (the cycle of urbanization in one developed world megacity, e.g. London, Los Angeles and one developing world megacity, e.g. Shanghai, Lagos)
