

8.

**Figure 2**

Figure 2 shows the design for a triangular garden  $ABC$  where  $AB = 7\text{ m}$ ,  $AC = 13\text{ m}$  and  $BC = 10\text{ m}$ .

Given that angle  $BAC = \theta$  radians,

- (a) show that, to 3 decimal places,  $\theta = 0.865$  (3)

The point  $D$  lies on  $AC$  such that  $BD$  is an arc of the circle centre  $A$ , radius  $7\text{ m}$ .

The shaded region  $S$  is bounded by the arc  $BD$  and the lines  $BC$  and  $DC$ . The shaded region  $S$  will be sown with grass seed, to make a lawned area.

Given that  $50\text{ g}$  of grass seed are needed for each square metre of lawn,

- (b) find the amount of grass seed needed, giving your answer to the nearest  $10\text{ g}$ . (7)
