

Leave blank

Question 1 continued

A series of horizontal lines for writing the answer to Question 1.

(Total 5 marks)

Q1

Question 2 continued

A series of horizontal lines for writing, starting from the top left and extending across the page.

(Total 7 marks)

Q2

4.

Figure 1

Figure 1 shows a sketch of part of the curve with equation $y = \frac{x}{1 + \sqrt{x}}$. The finite region R , shown shaded in Figure 1, is bounded by the curve, the x -axis, the line with equation $x = 1$ and the line with equation $x = 4$.

(a) Complete the table with the value of y corresponding to $x = 3$, giving your answer to 4 decimal places.

(1)

x	1	2	3	4
y	0.5	0.8284		1.3333

(b) Use the trapezium rule, with all the values of y in the completed table, to obtain an estimate of the area of the region R , giving your answer to 3 decimal places.

(3)

(c) Use the substitution $u = 1 + \sqrt{x}$, to find, by integrating, the exact area of R .

(8)

Question 6 continued

Blank lined area for writing the answer to Question 6.

(Total 9 marks)

Q6

8. A bottle of water is put into a refrigerator. The temperature inside the refrigerator remains constant at $3\text{ }^\circ\text{C}$ and t minutes after the bottle is placed in the refrigerator the temperature of the water in the bottle is $\theta\text{ }^\circ\text{C}$.

The rate of change of the temperature of the water in the bottle is modelled by the differential equation,

$$\frac{d\theta}{dt} = \frac{(3 - \theta)}{125}$$

- (a) By solving the differential equation, show that,

$$\theta = Ae^{-0.008t} + 3$$

where A is a constant.

(4)

Given that the temperature of the water in the bottle when it was put in the refrigerator was $16\text{ }^\circ\text{C}$,

- (b) find the time taken for the temperature of the water in the bottle to fall to $10\text{ }^\circ\text{C}$, giving your answer to the nearest minute.

(5)

Question 8 continued

Lined area for writing the answer to Question 8.

(Total 9 marks)
