Section A

When we consider the French Resistance, we often think its members spent their time committing spectacular acts. Although this impression is true to some extent, in reality, life for these people was less exciting. However, it was certainly dangerous. For example, a young person who had simply written a slogan on a wall was always severely punished. To make the movement more effective, it was necessary to communicate with the Allies. If every group had had good radio equipment, they would have been able to coordinate their efforts more successfully. Radio operators ran the greatest risk. To avoid being captured, they had constantly to move around.
