Text for Question 1

It may seem difficult to believe, but 96 percent of all internet users in Turkey also use social networking sites. The fact that Turks are huge fans of these is further proven as nearly three out of five of them access their accounts every single day. Social media usage in Turkey, whether logging in with desktops, laptops or mobile devices has become nearly universal. This has noticeably changed the culture of the nation over just a few years. Since sport is one of our great passions, it came as no surprise that a recent survey showed that the two people with most followers were players for Fenerbahce and Galatasaray.
