Dear Danielle

Letter of support for the Pearson BTEC Level 2 Technical Certificate in Fish Husbandry

The Institute of Fisheries Management is an international organisation, dedicated to the advancement of sustainable fisheries management. Our members are fisheries managers from research bodies, fishing and angling organisations, water companies, fish farms and educational institutions.

As a professional body in the sector that operates across the UK including Wales, we recognise the following qualifications as being fit for purpose:

- BTEC Level 2 Technical Certificate in Fish Husbandry

The qualification will support learners to progress to employment or within employment in a range of job roles across the industry.

For such roles, we believe that these qualifications provide an appropriate level of knowledge and skills, meeting the needs of the business and the individual, ensuring employees are appropriately skilled for the job and able to deliver to the standard that the sector expects.

The qualification will also support the individual, should they choose to progress in to further training.

The qualification will also support the individuals aged 16 and over in Wales, should they choose to progress into further training, via a level 3 qualification or an apprenticeship, and is a good preparation for either progression route.

We are happy for Pearson to use this letter in support of its work with government and its agencies, to ensure that this invaluable qualification can continue to be recognised for college performance tables and 19+ funding.

Yours sincerely

Iain Turner
