

# **Edexcel BTEC Entry Level Award in Health and Social Care (Entry 3) (QCF)**

# **Edexcel BTEC Level 1 Award/Certificate/ Diploma in Health and Social Care (QCF)**

## **Specification**

Issue 4

First teaching September 2010

Pearson Education Limited is one of the UK's largest awarding organisations, offering academic and vocational qualifications and testing to schools, colleges, employers and other places of learning, both in the UK and internationally. Qualifications offered include GCSE, AS and A Level, NVQ and our BTEC suite of vocational qualifications, ranging from Entry Level to BTEC Higher National Diplomas. Pearson Education Limited administers BTEC qualifications.

Through initiatives such as onscreen marking and administration, Pearson is leading the way in using technology to modernise educational assessment, and to support teachers and learners.

This specification is Issue 4. We will inform centres of any changes to this issue. The latest issue can be found on the Edexcel website: [www.edexcel.com](http://www.edexcel.com)

## Purpose of this specification

The purpose of a specification as defined by Ofqual is to set out:

- the qualification's objective
  - any other qualification which a learner must have completed before taking the qualification
  - any prior knowledge, skills or understanding which the learner is required to have before taking the qualification
  - units that a learner must have completed before the qualification will be awarded and any optional routes
  - any other requirements which a learner must have satisfied before the learner will be assessed or before the qualification will be awarded
  - the knowledge, skills and understanding which will be assessed as part of the qualification (giving a clear indication of their coverage and depth)
  - the method of any assessment and any associated requirements relating to it
  - the criteria against which learners' level of attainment will be measured (such as assessment criteria)
  - any specimen materials
  - any specified levels of attainment.
-

# 1 Introducing BTEC Specialist qualifications

For more than 25 years, BTECs have earned their reputation as well-established, enduringly effective qualifications. They have a proven track record of improving motivation and achievement. BTECs also provide progression routes to the next stage of education or to employment.

## What are BTEC Specialist qualifications?

---

BTEC Specialist qualifications are qualifications from Entry to level 3 on the Qualifications and Credit Framework (QCF). They are work-related qualifications and are available in a range of sectors. They give learners the knowledge, understanding and skills they need to prepare for employment. They also provide career development opportunities for those already in work. These qualifications may be full time or part time courses in schools or colleges. Training centres and employers may also offer these qualifications.

Some BTEC Specialist qualifications are knowledge components in Apprenticeship Frameworks ie Technical Certificates.

There are three sizes of BTEC specialist qualification in the QCF:

- Award (1 to 12 credits)
- Certificate (13 to 36 credits)
- Diploma (37 credits and above).

Every unit and qualification in the QCF has a credit value.

The credit value of a unit is based on:

- one credit for every 10 hours of learning time
- learning time – defined as the time taken by learners at the level of the unit, on average, to complete the learning outcomes to the standard determined by the assessment criteria.

## 2 Qualification summary and key information

Qualification title	Edexcel BTEC Entry Level Award in Health and Social Care (Entry 3) (QCF)
QCF Qualification Number (QN)	500/5601/3
Qualification framework	Qualifications and Credit Framework (QCF)
Date registrations can be made	1 <sup>st</sup> October 2008
Age range that the qualification is approved for	14-16 16-18 19+
Credit value	6
Assessment	Centre-devised assessment (internal assessment)
Guided learning hours	60
Grading information	The qualification and units are at pass grade.
Entry requirements	No prior knowledge, understanding, skills or qualifications are required before learners register for this qualification. However, centres must follow the Edexcel Access and Recruitment policy (see Section 10, Access and recruitment)

Qualification title	Edexcel BTEC Level 1 Award in Health and Social Care (QCF)
QCF Qualification Number (QN)	500/5487/9
Qualification framework	Qualifications and Credit Framework (QCF)
Date registrations can be made	1 <sup>st</sup> October 2008
Age range that the qualification is approved for	14-16 16-18 19+
Credit value	7
Assessment	Centre-devised assessment (internal assessment)
Guided learning hours	60
Grading information	The qualification and units are at pass grade.
Entry requirements	No prior knowledge, understanding, skills or qualifications are required before learners register for this qualification. However, centres must follow the Edexcel Access and Recruitment policy (see Section 10, Access and recruitment)

<b>Qualification title</b>	<b>Edexcel BTEC Level 1 Certificate in Health and Social Care (QCF)</b>
QCF Qualification Number (QN)	500/5458/2
Qualification framework	Qualifications and Credit Framework (QCF)
Date registrations can be made	1 <sup>st</sup> October 2008
Age range that the qualification is approved for	14-16 16-18 19+
Credit value	13
Assessment	Centre-devised assessment (internal assessment)
Guided learning hours	100-110
Grading information	The qualification and units are at pass grade.
Entry requirements	No prior knowledge, understanding, skills or qualifications are required before learners register for this qualification. However, centres must follow the Edexcel Access and Recruitment policy (see Section 10, Access and recruitment)

<b>Qualification title</b>	<b>Edexcel BTEC Level 1 Diploma in Health and Social Care (QCF)</b>
QCF Qualification Number (QN)	500/6642/0
Qualification framework	Qualifications and Credit Framework (QCF)
Date registrations can be made	1 <sup>st</sup> September 2009
Age range that the qualification is approved for	14-16 16-18 19+
Credit value	37
Assessment	Centre-devised assessment (internal assessment)
Guided learning hours	280-310
Grading information	The qualification and units are at pass grade.
Entry requirements	No prior knowledge, understanding, skills or qualifications are required before learners register for this qualification. However, centres must follow the Edexcel Access and Recruitment policy (see Section 10, Access and recruitment)

## QCF qualification title and Qualification Number

---

Centres will need to use the QCF Qualification Number (QN) when they seek public funding for their learners. As well as a QN, each unit within a qualification has a QCF unit reference number (URN).

The qualification title, units and QN will appear on each learner's final certificate. You should tell your learners this when your centre recruits them and registers them with us. Further information about certification is in the *Edexcel Information Manual* on our website at [www.edexcel.com](http://www.edexcel.com)

## Objective of the qualifications

---

The Edexcel BTEC Entry Award (Entry 3) (QCF) and Edexcel BTEC Level 1 Award/Certificate/Diploma (QCF) in Health and Social Care have been developed to give learners the opportunity to:

- engage in learning which is relevant to them and will provide opportunities to develop a range of skills and techniques, personal skills and attributes essential for successful performance in working life
- achieve a nationally recognised Entry or Level 1 vocationally related qualification
- progress to employment in the health and social care sector
- progress to related general and/or vocational qualifications.
- develop their own personal growth and engagement in learning.

The 6-credit Edexcel BTEC Entry Level Award (Entry 3) (QCF) offers a 'taster' qualification that focuses on the personal qualities and work skills that are required for a particular vocational sector.

The 7-credit Edexcel BTEC Level 1 Award (QCF) provides an introduction to the skills, qualities and knowledge that may be required for employment in a particular vocational sector.

The 13-credit Edexcel BTEC Level 1 Certificate (QCF) extends the work-related focus from the Edexcel BTEC Level 1 Award (QCF) and covers some of the knowledge and practical skills required for a particular vocational sector.

The Edexcel BTEC Level 1 Certificate (QCF) offers an engaging programme for those who are clear about the vocational area that they wish to learn more about. These learners may wish to extend their programme through the study of a related GCSE, a complementary NVQ or other related vocational or personal and social development qualification. These learning programmes can be developed to allow learners to study complementary qualifications without duplication of content. For adult learners the Edexcel BTEC Level 1 Certificate (QCF) can extend their knowledge and understanding of work in a particular sector. It is a suitable qualification for those wishing to change career or move into a particular area of employment following a career break.

The 37-credit Edexcel BTEC Level 1 Diploma (QCF) extends the work-related focus from the Edexcel BTEC Level 1 Certificate (QCF). There is potential for the qualification to prepare learners for employment in a particular vocational sector and it is suitable for those who have decided that they wish to enter a specific area of work.

## **Progression opportunities through Edexcel qualifications**

---

The intended destinations for learners successfully achieving these qualifications include:

- GCSEs and/or A Levels
- Diplomas
- apprenticeships
- supported employment
- independent living.

### 3 Centre resource requirements

As part of the approval process, centres must make sure that the resources requirements below are in place before offering the qualification.

#### General resource requirements

---

- Centres must have appropriate physical resources (for example, equipment, IT, learning materials, teaching rooms) to support the delivery and assessment of the qualifications.
- Staff involved in the assessment process must have relevant expertise and occupational experience.
- There must be systems in place to make sure continuing professional development for staff delivering the qualifications.
- Centres must have appropriate health and safety policies in place relating to the use of equipment by learners.
- Centres must deliver the qualifications in accordance with current equality legislation.

#### Specific resource requirements

---

As well as the general requirements above, there are specific resource requirements that centres must meet:

##### Unit

##### Resources required

Unit 2: Managing your Health at Work

Learners will require access to appropriate information about how to keep healthy at work.

Unit 3: Preparing for Work Placement

In order to make this unit relevant, the learner must be preparing to go on a suitable work placement. Employers must also be prepared for the upcoming work placement and support the learner in gathering relevant information.

Unit 4: Learning from Work Placement

The learner must attend a work placement prior to undertaking this unit.

Unit 6: Introduction to Creative and Leisure Activities for Children and Adults

A range of different resources are required for this unit, for example painting materials, materials for modelling, different types of table-top games. If equipment is not available the learners may be able to complete this unit in a practical work setting. Alternatively, learners may visit settings to observe the different types of equipment being used with children and adults.

**Unit****Resources required**

Unit 9: Managing your Health at Work

Learners will require access to appropriate information about health requirements and potential health risks for specific types of work

Unit 10: Preparing for Work Placement

In order to make this unit relevant, the learner must be preparing to go on a suitable work placement. Employers must also be prepared for the learner arriving and support them in gathering relevant information.

Unit 11: Learning from Work Placement

Learners will need to have undertaken a period of work placement prior to undertaking this unit.

Unit 14: Creative Activities for Children

A range of different types of materials and tools will be necessary for the unit, for example different types of paint and paintbrushes, clay, textiles, modelling materials etc.

Unit 15: Learning Experiences for Children and Young People

A range of different resources are required for this unit, for example access to musical instruments, different types of table-top games, outdoor equipment. If equipment is not available, learners may be able to complete this unit in a practical work setting. Alternatively, learners may visit settings to observe the different types of equipment being used with children and young people of different ages.

Unit 16: Creative and Leisure Activities for Adults in Health and Social Care

A range of different resources are required for this unit, for example access to painting and drawing materials, modelling material, digital cameras, games. If equipment is not available learners may be able to complete this unit in a practical work setting. Alternatively, learners may visit settings to observe the different types of equipment being used with different groups of adults.

Unit 17: Promoting Healthy Eating in Care

Learners will need appropriate resources to make drinks and snacks. If resources are not available learners may be able to complete some of this unit in a practical work setting.

**Unit****Resources required**

Unit 21: Investigating Rights and Responsibilities at Work

Learners will require access to appropriate sources of information about rights and responsibilities in the workplace.

Unit 22: Managing your Health at Work

Learners will require access to appropriate sources of information about maintaining good health at work.

Unit 23: Preparing for Work Placement

In order to make this unit relevant, the learner must be preparing to go on a suitable work placement. Employers must also be prepared for the upcoming work placement and support the learner in gathering relevant information.

Unit 24: Learning from Work Placement

Learners will need to have undertaken a period of work experience.

## 4 Qualification structures

### Edexcel BTEC Entry Level Award in Health and Social Care (Entry 3) (QCF)

The learner will need to meet the requirements outlined in the table below before Edexcel can award the qualification.

Minimum number of credits that must be achieved	6
Minimum number of credits that must be achieved at qualification level or above	4

Learners are strongly advised to take units 5,6 or 7 as part of the Entry Award.

Unit	Unique Reference Number	Optional	Level	Credit	Guided Learning Hours
1	J/501/6333	Investigating Rights and Responsibilities at Work*	Entry 3	1	10
2	M/501/6360	Managing Your Health at Work*	Entry 3	1	10
3	F/501/6363	Preparing for Work Placement*	Entry 3	1	10
4	J/501/6364	Learning from Work Placement*	Entry 3	2	10
5	T/501/7218	Health Needs	Entry 3	3	30
6	A/501/7219	Introduction to Creative and Leisure Activities for Children and Adults	Entry 3	3	30
7	M/501/7220	The Role of the Carer at Mealtimes	Entry 3	3	30
8	L/501/6382	Investigating Rights and Responsibilities at Work*	1	1	10
9	T/501/6389	Managing Your Health at Work*	1	1	10
10	M/501/6391	Preparing for Work Placement*	1	1	10
11	J/501/6395	Learning from Work Placement*	1	2	10
12	T/501/7221	Health and Social Care Needs	1	4	30
13	A/501/7222	Personal Care in Health and Social Care	1	4	30
14	F/501/7223	Creative Activities for Children	1	4	30
15	J/501/7224	Learning Experiences for Children and Young People	1	4	30

Unit	Unique Reference Number	Optional	Level	Credit	Guided Learning Hours
16	L/501/7225	Creative and Leisure Activities for Adults in Health and Social Care	1	4	30
17	R/501/7226	Promoting Healthy Eating in Care	1	4	30
18	Y/501/7227	Communication with Adults and Children in Health and Social Care	1	4	30
19	D/501/7228	Job Opportunities in Health and Social Care	1	4	30
20	H/501/7229	Health and Social Care Group Project	1	4	30
21	J/501/6414	Investigating Rights and Responsibilities at Work*	2	1	10
22	J/501/6137	Managing your Health at Work*	2	1	10
23	T/501/6148	Preparing for Work Placement*	2	1	10
24	L/501/6186	Learning from Work Placement*	2	2	10

\* Learners may take these units at one level only.

## Edexcel BTEC Level 1 Award in Health and Social Care (QCF)

Minimum number of credits that must be achieved	7
Minimum number of credits that must be achieved at qualification level or above	4

24	L/501/6186	Learning from Work Placement*	2	2	10

\* Learners may take these units at one level only.

## 5 Assessment

The table below gives a summary of the assessment methods used in the qualifications.

Units	Assessment methods
All units	Centre-devised assessment

### Centre-devised assessment (internal assessment)

Each unit has specified learning outcomes and assessment criteria. To pass an internally assessed unit, learners must meet all the assessment criteria. Centres may find it helpful if learners index and reference their evidence to the relevant learning outcomes and assessment criteria.

Centres need to write assignment briefs for the learners to show what evidence is required. Assignment briefs should indicate clearly, which assessment criteria are being targeted.

Assignment briefs and evidence produced by learners must also meet any additional requirements in the *Information for tutors* section of the unit.

Unless otherwise indicated in *Information for tutors*, the centre can decide the form of assessment evidence (eg performance observation, presentations, projects, tests, extended writing) as long as the methods chosen allow learners to produce valid, sufficient and reliable evidence of meeting the assessment criteria.

Centres are encouraged to provide learners with realistic scenarios and maximise the use of practical activities in delivery and assessment.

To avoid over assessment centres are encouraged to link delivery and assessment across units.

There is more guidance about internal assessment on our website. See *Section 13*. Further information and useful publications.

## 6 Recognising prior learning and achievement

### Recognition of Prior Learning

---

Recognition of Prior Learning (RPL) is a method of assessment (leading to the award of credit) that considers whether a learner can demonstrate that they can meet the assessment requirements for a unit through knowledge, understanding or skills they already possess and so do not need to develop through a course of learning.

Edexcel encourages centres to recognise learners' previous achievements and experiences in and outside the workplace, as well as in the classroom. RPL provides a route for the recognition of the achievements resulting from continuous learning.

RPL enables recognition of achievement from a range of activities using any valid assessment methodology. If the assessment requirements of a given unit or qualification have been met, the use of RPL is acceptable for accrediting a unit, units or a whole qualification. Evidence of learning must be sufficient, reliable and valid.

Further guidance is available in the policy document *Recognition of Prior Learning Policy*, which is on the Edexcel website.

### Credit transfer

---

Credit transfer describes the process of using a credit or credits awarded in the context of a different qualification or awarded by a different awarding organisation towards the achievement requirements of another qualification. All awarding organisations recognise the credits awarded by all other awarding organisations that operate within the QCF.

If learners achieve units with other awarding organisations, they do not need to retake any assessment for the same units. The centre must keep evidence of unit achievement.

## 7 Centre recognition and approval

Centres that have not previously offered Edexcel qualifications need to apply for, and be granted, centre recognition as part of the process for approval to offer individual qualifications. New centres must complete an *Edexcel Vocational Centre & Qualification Approval Form (VCQA)*.

Existing centres get 'automatic approval' for a new qualification if they are already approved for a qualification that is being replaced by the new qualification and the conditions for automatic approval are met. Centres that already hold Edexcel Centre approval are able to apply for qualification approval for a different level or different sector via Edexcel Online, up to and including level 3 only.

In some circumstances, qualification approval using Edexcel Online may not be possible. In such cases, guidance is available as to how an approval application may be made.

### Approvals agreement

---

All centres are required to enter into an approval agreement that is a formal commitment by the head or principal of a centre to meet all the requirements of the specification and any associated codes, conditions or regulations. Edexcel will act to protect the integrity of the awarding of qualifications. If centres do not comply with the agreement, this could result in the suspension of certification or withdrawal of approval.

## 8 Quality assurance of centres

Quality assurance is at the heart of vocational qualifications. The centre assesses Edexcel BTEC qualifications. The centre will use quality assurance to make sure that their managers, internal verifiers and assessors are standardised and supported. Edexcel use quality assurance to check that all centres are working to national standards. It gives us the opportunity to identify and provide support, if needed, to safeguard certification. It also allows us to recognise and support good practice.

For the qualifications in this specification, the Edexcel quality assurance model will follow one of the processes listed below.

- 1 Delivery of the qualification as part of a BTEC apprenticeship ('single click' registration):
  - an annual visit by a Standards Verifier to review centre-wide quality assurance systems and sampling of internal verification and assessor decisions
- 2 Delivery of the qualification outside the apprenticeship:
  - an annual visit to the centre by a Centre Quality Reviewer to review centre-wide quality assurance systems
  - Lead Internal Verifier accreditation. This involves online training and standardisation of Lead Internal Verifiers using our OSCA platform, accessed via Edexcel Online. Please note that not all qualifications will include Lead Internal Verifier accreditation. Where this is the case, we will annually allocate annually a Standards Verifier to conduct postal sampling of internal verification and assessor decisions for the Principal Subject Area.

For further details, go to the *UK BTEC Quality Assurance Handbook* on our website.

## 9 Programme delivery

Centres are free to offer the qualifications using any mode of delivery (for example full time, part time, evening only, distance learning) that meets their learners' needs. Whichever mode of delivery is used, centres must make sure that learners have access to the resources identified in the specification and to the subject specialists delivering the units.

Those planning the programme should aim to enhance the vocational nature of the qualification by:

- liaising with employers to make sure a course is relevant to learners' specific needs
- accessing and using non-confidential data and documents from learners' workplaces
- developing up-to-date and relevant teaching materials that make use of scenarios that are relevant to the sector
- giving learners the opportunity to apply their learning in practical activities
- including sponsoring employers in the delivery of the programme and, where appropriate, in the assessment
- making full use of the variety of experience of work and life that learners bring to the programme.

Centres must make sure that any legislation is up to date and current.

## 10 Access and recruitment

Edexcel's policy regarding access to our qualifications is that:

- they should be available to everyone who is capable of reaching the required standards
- they should be free from any barriers that restrict access and progression
- there should be equal opportunities for all those wishing to access the qualifications.

Centres are required to recruit learners to BTEC specialist qualifications with integrity.

Applicants will need relevant information and advice about the qualification to make sure it meets their needs.

Centres should review the applicant's prior qualifications and/or experience, considering whether this profile shows that they have the potential to achieve the qualification.

For learners with disabilities and specific needs, this review will need to take account of the support available to the learner during teaching and assessment of the qualification. The review must take account of the information and guidance in *Section 11 Access to qualifications for learners with disabilities or specific needs*.

Learners may be aged between 14 and 16 and therefore potentially vulnerable. Where learners are required to spend time and be assessed in work settings, it is the centre's responsibility to ensure that the work environment they go into is safe.

## 11 Access to qualifications for learners with disabilities or specific needs

Equality and fairness are central to our work. Edexcel's Equality Policy requires all learners to have equal opportunity to access our qualifications and assessments. It also requires our qualifications to be awarded in a way that is fair to every learner.

We are committed to making sure that:

- learners with a protected characteristic (as defined by the Equality Act 2010) are not, when they are undertaking one of our qualifications, disadvantaged in comparison to learners who do not share that characteristic
- all learners achieve the recognition they deserve from undertaking a qualification and that this achievement can be compared fairly to the achievement of their peers.

Learners taking a qualification may be assessed in British sign language or Irish sign language where it is permitted for the purpose of reasonable adjustments.

Details on how to make adjustments for learners with protected characteristics are given in the policy documents *Application of Reasonable Adjustment for BTEC and Edexcel NVQ Qualifications* and *Application for Special Consideration: BTEC and Edexcel NVQ Qualifications*.

The documents are on our website at [www.edexcel.com/policies](http://www.edexcel.com/policies)

## 12 Units

Units have the following sections.

### Unit title

The unit title is on the QCF and this form of words will appear on the learner's Notification of Performance (NOP).

### Unit reference number

Each unit is assigned a unit reference number that appears with the unit title on the Register of Regulated Qualifications.

### QCF level

All units and qualifications within the QCF have a level assigned to them. There are nine levels of achievement, from Entry to level 8. The QCF Level Descriptors inform the allocation of the level.

### Credit value

When a learner achieves a unit, they gain the specified number of credits.

### Guided learning hours

Guided learning hours are the times when a tutor, trainer or facilitator is present to give specific guidance towards the learning aim for a programme. This definition covers lectures, tutorials and supervised study in for example open learning centres and learning workshops. It also includes assessment by staff where learners are present. It does not include time spent by staff marking assignments or homework where the learner is not present.

### Unit aim

This gives a summary of what the unit aims to do.

### Essential resources

This section lists any specialist resources needed to deliver the unit. The centre will be asked to make sure that these resources are in place when it seeks approval from Edexcel to offer the qualification.

### Learning outcomes

Learning outcomes of a unit set out what a learner knows, understands or is able to do as the result of a process of learning.

## Assessment criteria

Assessment criteria specify the standard required by the learner to achieve each learning outcome.

## Unit amplification

This section clarifies what a learner needs to know to achieve a learning outcome.

## Information for tutors

This section gives tutors information on delivery and assessment. It contains the following subsections.

- *Delivery* – explains the content’s relationship to the learning outcomes and offers guidance on possible approaches to delivery.
- *Assessment* – gives information about the evidence that learners must produce, together with any additional guidance if appropriate. This section should be read in conjunction with the assessment criteria.
- *Indicative resource materials* – lists resource materials that can be used to support the teaching of the unit, for example books, journals and websites.

# **Unit 1: Investigating Rights and Responsibilities at Work**

**Unit code:** J/501/6333

**QCF Level:** BTEC Entry 3

**Credit value:** 1

**Guided learning hours:** 10

---

## **Unit aim**

All employees have rights and responsibilities. This unit will introduce the learner to the concept of having rights at work and what their responsibilities are as an employee. The learner will explore what is meant by having rights, for example, being safe at work, being healthy at work, the right to a minimum amount of pay and the right to be treated fairly. They will also consider the importance of respecting others in the workplace. Practical examples such as appropriate use of language and respecting people's cultures and beliefs will be discussed.

The unit goes on to explore the responsibilities that the learner has when they are employed or participating in work experience. Learning will focus around their responsibility to arrive on time, dress appropriately and complete tasks efficiently and effectively within agreed timelines.

It is very important to know who to go to for support if difficulties arise at work. Learners will research different sources of support that is available to them, both within the workplace and from external sources such as the Citizens Advice Bureau.

## Learning outcomes, assessment criteria and unit amplification

To pass this unit, the learner needs to demonstrate that they can meet all the learning outcomes for the unit. The assessment criteria determine the standard required to achieve the unit.

Learning outcomes		Assessment criteria		Unit amplification
1	Understand that they have rights in the workplace	1.1	identify aspects of working life where they have rights	<ul style="list-style-type: none"> <li>□ <i>Workplace rights:</i> eg salary or wages, contract for employment, termination of employment, discrimination and harassment, dealing with trouble at work, health and safety, working hours, holiday entitlement, breaks, leave entitlement, privacy of personal information (Data Protection Act)</li> </ul>
2	Understand that they should respect the rights of others in the workplace	2.1	describe how the rights of others can be respected	<ul style="list-style-type: none"> <li>□ <i>Respecting the rights of others:</i> eg right to express opinions and ideas, respect other cultures, religions and views, appropriate use of language, knowledge of what could offend, privacy of others' personal information.</li> </ul>
3	Understand that they have responsibilities in the workplace	3.1	identify aspects of working life where they must fulfil certain responsibilities	<ul style="list-style-type: none"> <li>□ <i>Workplace responsibilities:</i> health and safety; understand what the employee is expected to do at work</li> </ul>
4	Know where to get help for problems that arise at work	4.1	identify sources of help within the workplace	<ul style="list-style-type: none"> <li>□ <i>Sources of help and advice:</i> advisers eg line manager, human resources department, occupational health, health and safety adviser; documents eg policies, staff handbook, intranet</li> </ul>

## Information for tutors

---

### Delivery

The focus of this unit is on the rights and responsibilities of the individual as an employee in the workplace. Reference to corresponding employer rights and responsibilities is likely to be made in any discussion of the issues but it does not form part of the assessment for the unit.

Although learners do not need to have access to the workplace, it would be helpful if they could relate the learning to an actual workplace, either through past experience, a current job or work placement. They should have the opportunity to talk to others who have direct experience of the workplace in order to relate the theory to a real situation. They could also use role play and other simulations to increase their understanding.

Learners should be able to identify a range of areas where they have rights at work (for example, right to a clean and safe workplace, to be treated fairly, to be paid a fair wage on time, not to be discriminated against on grounds of gender, sexual orientation, age, race, disability, religious beliefs). A knowledge of legislation is not required for this unit. Learners may be encouraged to gather information from a range of sources on their rights, for example Job Centre Plus, Library, internet.

Learners should be able to demonstrate an understanding that their own behaviour has an effect on the rights of others. Either within a workplace setting (eg at work for those already employed or on work placement) or through simulation, learners should show that they are respecting the rights of others. This might be through speaking in a way that does not cause offence, not distracting others, respecting other people's property, not putting other people in danger, or not discriminating unfairly against people. Learners could be encouraged to find the rights and responsibilities policy for their own setting. The discussion could focus on the appropriateness of the document, for example whether it is clear, easy to read and contains appropriate images which show respect for the rights of others.

In addition to the behaviours identified above, learners should be able to identify their responsibilities to an employer (for example, to follow instructions, to work to the best of their ability, to be honest, to be punctual, not to waste the employer's time, to follow company or organisation procedures such as phoning when they are ill to come in to work or to present themselves neatly and cleanly in the workplace). Learners with access to the workplace could supplement their evidence with a witness statement to the effect that they are behaving as a responsible employee. The statement should make clear what behaviours have been observed.

Learners only need to identify sources of support for rights and responsibilities within the workplace (for example, their supervisor, the Human Resources department, a staff handbook). They do not need to raise actual issues or problems, only to know where they could turn should such issues arise. Speakers may be invited to share their experiences of seeking advice in the workplace.

## Assessment

In order to achieve 1.1, the learner must be able to identify at least three different aspects of working life to which they have rights as an employee. This evidence could be presented using a range of different formats, for example as a poster or leaflet, recorded discussion with the tutor or presented as a list of aspects identified.

To achieve 2.1, the learner must describe how the rights of others can be respected. In order to achieve this, the learner could be provided with a number of different scenarios or clips from a film or television programme. The clips or scenarios should highlight different situations, for example an employee dominating the conversation in a meeting or someone using offensive language. The learner could then demonstrate how the situation could be changed to respect the rights of others.

To achieve 3.1, the learner is required to identify aspects of working life where they must fulfil certain responsibilities. The learner needs to identify at least three different aspects.

For 4.1, the learner must identify three different sources of help if a problem arises at work.

If any of the above evidence is provided as a result of discussions with the tutor, written evidence must be available for internal and external verification.

## Unit 2:

# Managing Your Health at Work

**Unit code:** M/501/6360

**QCF Level:** BTEC Entry 3

**Credit value:** 1

**Guided learning hours:** 10

---

### Unit aim

Much of our time is spent at work. Our work and how we work can have a huge impact on physical and mental wellbeing. During time spent at work, workers can suffer from everyday ailments and aches and pains including headaches, back problems and stress. It is important that people know how to look after themselves whilst they are at work so that they can stay healthy and work effectively.

The aim of this unit is to help learners understand why it is important to be healthy at work and how to keep well at work. Learners will explore different types of health issues that could arise in different working environments.

### Essential resources

Learners will require access to appropriate information about how to keep healthy at work.

## Learning outcomes, assessment criteria and unit amplification

To pass this unit, the learner needs to demonstrate that they can meet all the learning outcomes for the unit. The assessment criteria determine the standard required to achieve the unit.

Learning outcomes		Assessment criteria		Unit amplification
1	Know why it is important to be healthy at work	1.1	describe why it is important to be healthy at work	<ul style="list-style-type: none"> <li>□ <i>Importance of being healthy at work: eg work more efficiently, increased self-esteem, increased enjoyment of work, quality of work could suffer if worker is unhealthy, effects of unemployment on your health, the longer out of work the harder it is to get back</i></li> </ul>
2	Know how to keep healthy at work	2.1	identify ways of keeping healthy at work	<ul style="list-style-type: none"> <li>□ <i>Keeping healthy: appropriate equipment eg suitable chair, keyboard arm rests, foot rests, lifting equipment, protective clothing; taking regular breaks; exercise; diet; adequate sleep, dealing effectively with stress</i></li> </ul>
		2.2	identify different types of working environments and their possible health issues	<ul style="list-style-type: none"> <li>□ <i>Health factors to consider in different work environment: different needs for different environments eg working in hospital, office, outdoors; different types of illnesses and injuries eg repetitive strain injury, colds, flu and other illnesses; temperature in work environment eg summer heat, cold, air-conditioning, heating</i></li> </ul>

## Information for tutors

---

### Delivery

During the delivery of this unit, learners should be given as much practical experience as possible. Delivery methods could include learner-centred tasks such as group work and research tasks or learner-led presentations.

Group discussions could be used to identify the benefits of being healthy at work. Personal experience could be referred to (for example, a learner may be able to share how they felt when they experienced unemployment due to ill health).

Speakers from different areas of work may be invited to talk to the group on the importance of keeping healthy at work. This may include references to the benefits that a healthy workforce has for a company or organisation.

When discussing illnesses and injuries at work, it is important to make this as relevant as possible for the learner. If they have already been in work, the learner will be able to refer to experiences that they have encountered. However, this will be difficult for learners who have not had any previous work experience. One way to overcome this would be to make reference to their classroom experiences or perhaps where they do work at home. Topics such as repetitive strain injury, posture, colds and flu could then be discussed in this context.

Websites may also be a good source of information. Learners could be encouraged to find out what is meant by repetitive strain injury, for example [www.patient.co.uk/](http://www.patient.co.uk/). The learner may be asked to extract information, for example 'What causes RSI?' 'How could it be prevented?' Learners would not be expected to give detailed or lengthy answers to this type of question.

Learners should also be encouraged to think about how they can manage their health in different types of workplace environments, for example infection control is particularly important when working in a hospital, whilst wearing personal protective equipment (PPE) is essential when working on a building site. Learners could visit different work environments to find out about managing health in specific work areas or speakers could be invited to talk to the group.

Learners could ask friends or colleagues how they keep healthy. A simple questionnaire could be designed and the information gathered could be presented to the rest of the group. Alternatively, posters may be designed on how to manage health at work. The posters could then be displayed in the class or place of learning. This task could provide practice for functional skills if the learners ensured that the information given was grammatically accurate and spelt correctly.

## Assessment

In order to achieve 1.1, the learner must describe why it is important to be healthy at work. They should be able to give at least three reasons which benefit themselves and the employer. This could be assessed through a one-to-one discussion with the tutor, recorded by the tutor for verification purposes. Alternatively, the learner could produce a poster or leaflet to display their ideas.

To achieve 2.1, the learner must be able to identify three different ways of keeping healthy at work. The learner could produce a leaflet or poster showing different ways of keeping healthy at work. Alternatively they may participate in a discussion which highlights how to keep healthy at work.

For 2.2, the learner must identify at least two different types of working environments and at least one associated health risk or issue for each type of working environment.

## **Unit 3: Preparing for Work Placement**

**Unit code:** F/501/6363

**QCF Level:** BTEC Entry 3

**Credit value:** 1

**Guided learning hours:** 10

---

### **Unit aim**

Learners undertaking work placement have the opportunity to learn and develop the skills they need for the world of work. They need to be enthusiastic, hardworking and highly motivated. It is therefore essential that before undertaking any form of work placement, the learner is well prepared. This unit introduces the learner to the importance of knowing what will be expected of them during their work placement and knowing what they hope to achieve as a result of this experience.

Starting a work placement, particularly if it is a learner's first experience of the workplace, should be an exciting time for a learner. It could however also be an anxious time. The unit helps the learner identify possible factors that may cause anxiety or uncertainty and where to gain support.

Although the term 'company or organisation' has been used throughout this unit, it can refer to any type of work placement for which the learner may be preparing.

### **Essential resources**

In order to make this unit relevant, the learner must be preparing to go on a suitable work placement. Employers must also be prepared for the upcoming work placement and support the learner in gathering relevant information.

## Learning outcomes, assessment criteria and unit amplification

To pass this unit, the learner needs to demonstrate that they can meet all the learning outcomes for the unit. The assessment criteria determine the standard required to achieve the unit.

Learning outcomes		Assessment criteria		Unit amplification
1	Know where they plan to do work placement	1.1	identify key information about where they plan to do their work placement	<ul style="list-style-type: none"> <li>□ <i>Key information about work placement:</i> name of company or organisation; type of business or service; location; details of relevant contact person at company or organisation</li> </ul>
	Know what is expected of them during the work placement	2.1	identify different tasks they are likely to perform as part of the work placement	<ul style="list-style-type: none"> <li>□ <i>Work placement tasks:</i> tasks eg administrative, customer service, logistics</li> </ul>
2	Know what is expected of them during the work placement	2.2	identify appropriate behaviours and attitudes for the work placement	<ul style="list-style-type: none"> <li>□ <i>Appropriate behaviours:</i> behaviours, eg being punctual, being reliable in carrying out tasks, showing tolerance and respect for others</li> <li>□ <i>Appropriate attitudes:</i> attitudes eg motivated, enthusiastic, willing to learn, flexible, accommodating, cheerful</li> </ul>
		3.1	identify factors which may cause anxiety or uncertainty during a work placement	<ul style="list-style-type: none"> <li>□ <i>Factors:</i> personal eg transport arrangements, financial issues, childcare arrangements; work-related eg strained relationships with colleagues, asked to complete inappropriate or confusing tasks, unclear instructions given</li> </ul>
3	Know appropriate sources of support for dealing with anxiety or uncertainty during the work placement	3.2	identify appropriate sources of support they could use in situations of anxiety or uncertainty during the work placement	<ul style="list-style-type: none"> <li>□ <i>Appropriate sources of support in situations of anxiety or uncertainty:</i> eg work placement supervisor or personal mentor assigned for the work placement, team leader, work placement co-ordinator, work placement notes, training guide, instruction manual</li> </ul>
		4.1	set appropriate goals for the work placement	<ul style="list-style-type: none"> <li>□ <i>Appropriate goals:</i> personal targets eg arrive on time, attend each day, dress appropriately; work-related targets eg learn a new skill, follow instructions, find out about the job role, ask appropriate questions if something is unclear</li> </ul>
4	Know what they might achieve from the work placement			

## Information for tutors

---

### Delivery

Although each learner will be attending a different work setting, the principles behind preparing for the work placement will be the same. Learners need to find out information about where they are planning to do their work placement. Where possible, learners should be encouraged to do this on their own. It may, however, be necessary for the tutor to support the learner in this. Documents provided by the company or organisation, their website or arranging for a representative from the organisation to speak with the learner could all be valuable sources of information. The information gathered by the learner should be relevant and straightforward in nature, for example What is the name of the company or organisation? What does the company or organisation do? Who will the learner be reporting to? What is the physical location of the work placement?

To help the learner understand the types of tasks they may be involved in, it may be useful to invite learners who have already completed a work placement with the same company or organisation (or with a similar type of company or organisation) to speak to the current group of learners. Alternatively, a past or present employee may be able to provide appropriate information. If neither of these sources are available, the tutor may provide simple job descriptions for similar positions to help the learner identify the types of tasks he/she may undertake.

Learners need to be aware that their dress and body language during a work placement can communicate positive and negative attitudes. This could be illustrated through role-play situations. Appropriate attitudes and behaviours for the workplace could be discussed in small groups. Workplace scenes from television programmes, movies or other video clips could be used as a starter for discussions.

Tutors could also provide lists of the possible attitudes and behaviours needed to satisfy the requirements of the work placement; employers could be invited as guest speakers to discuss expectations. Learners should be given the opportunity to discuss these attitudes and behaviours so that they can identify a range of possible goals to aim for in order to get the most out of their time on work placement.

Learners going into a work placement might feel nervous and concerned that they will appear incompetent or will not be able to carry out what they are instructed to do. It would therefore be beneficial for learners to discuss possible causes of concern and to know the appropriate sources of support to help deal with any feelings of stress or confusion during the work placement. For example, learners could watch a TV or movie clip that depicts a stressful scene in the workplace, identify the possible problem, discuss what caused the problem and who the people in the clip could approach to help resolve the stress, difficulty or confusion in that situation or what other sources of help might be available. This could help address learners' fears and concerns about who to approach for help if they encounter difficult or confusing situations during their work placement. Alternatively, learners could discuss relevant situations that they have experienced, such as during previous work placements, part-time work roles or voluntary work. The discussion could include how the situation was resolved.

Learners might perceive setting goals as a complex task. If this is the case, it could be useful to introduce this topic by providing practical, familiar examples, for example they could be asked to make a list of what they want to do today. They could then return to their list the following day and find out if they managed to

achieve it and if not, why not. This could be used as an introduction to setting realistic, appropriate goals for their work placement.

Learners may wish to discuss possible work placement goals in group situations and/or individually with tutors or careers advisers.

## Assessment

In order to achieve 1.1, the learner must be able to identify basic information about the work placement to which they are going. The source of the information may be, for example from documents provided by the tutor, information gained from an informal interview with the work placement provider or information gained from leaflets supplied by the work placement provider. Information identified by the learner should include the name of the organisation, what the organisation does, its location and who the learner's point of contact will be.

To achieve 2.1, the learner must identify at least three different tasks that they may be expected to carry out when they are on work placement. They should be given information about the work placement from which they can identify the relevant tasks.

In order to achieve 2.2, the learner must identify two different behaviours and two different attitudes that would be expected for the work placement. A video clip or DVD of people in a work environment could be used as a source of evidence to allow learners to identify appropriate behaviours and attitudes. Alternatively, the learner could produce a leaflet or poster to describe the behaviours and attitudes.

For 3.1, the learner needs to identify two different factors that may cause anxiety or uncertainty during the work placement. The factors chosen identified then be used as the starting point for 3.2, where the learner identifies a source of help for each factor. Alternatively, for 3.3, the learner should be able to identify at least two appropriate sources of help or support they could use if they found themselves in a situation of stress, uncertainty or difficulty during the work placement.

4.1 requires the learner to set two personal goals and one work-related goal. The goals must be appropriate and in keeping with the overall aims of the work placement. If this is carried out as part of a tutorial, evidence must be available for internal and external verification.

# **Unit 4: Learning from Work Placement**

<b>Unit code:</b>	<b>J/501/6364</b>
<b>QCF Level:</b>	<b>BTEC Entry 3</b>
<b>Credit value:</b>	<b>2</b>
<b>Guided learning hours:</b>	<b>10</b>

---

## **Unit aim**

Spending time in a work placement can be an extremely valuable experience. Learners have the opportunity to observe others at work, experience different job roles first hand, develop personal skills and work- related skills and gain an understanding of their own strengths and weaknesses. This unit has been designed to help the learner reflect on the experience that they have gained in the work placement and identify what they have learned. They will be encouraged to make basic judgements about their own performance and relate it to the goals that they will set for their future.

Before starting this unit, the learner must have experienced a work placement and know that the information gathered from that experience will be used as a basis for this unit.

## **Essential resources**

The learner must attend a work placement prior to undertaking this unit.

## Learning outcomes, assessment criteria and unit amplification

To pass this unit, the learner needs to demonstrate that they can meet all the learning outcomes for the unit. The assessment criteria determine the standard required to achieve the unit.

Learning outcomes		Assessment criteria		Unit amplification
1	Be able to reflect on the experience of the work placement	1.1	identify what they did well and/or what they could have done better during the work placement	<ul style="list-style-type: none"> <li>□ <i>Reflect</i>: sources of feedback eg tutor, supervisor or line manager, colleagues; gathering information eg listing tasks undertaken, checklist of skills needed to do tasks</li> </ul>
2	Know what they have learned from the work placement	2.1	identify what they learned about the job role and their work placement	<ul style="list-style-type: none"> <li>□ <i>Job role</i>: specific tasks; working with others</li> <li>□ <i>The work placement</i>: purpose; size of company or organisation; organisational structure; their own role during the work placement</li> </ul>
		2.2	identify what they learned about themselves during the work placement	<ul style="list-style-type: none"> <li>□ <i>Personal learning</i>: self-management eg flexibility, time-keeping, enthusiasm, punctuality; effectiveness in working with other people; skills to do a particular task; interests or talents eg good at working with animals, interest in working with computers, enjoys talking to people on the telephone</li> </ul>
3	Be able to use learning from the work placement to set goals	3.1	with guidance, set realistic goals which build on their learning from the work placement	<ul style="list-style-type: none"> <li>□ <i>Goals</i>: short term; achievable; measurable; career plans; qualifications or study plans</li> </ul>

## Information for tutors

---

### Delivery

In order to achieve this unit, the learner must have had experience in a work placement. The length of time spent in the work placement is not defined. However sufficient time must be given to allow the learner to achieve the assessment criteria.

It may be beneficial for this unit to be delivered alongside a tutorial programme. This would ensure that prior to experiencing a work placement, the learner would know and understand what evidence they should gather. Ongoing one to one discussions throughout the work placement will also help learners understand the learning process and the importance of feedback. Learners may find it helpful to discuss their expectations of their work placement prior to attending. They could then use this information to discuss what they learned or perhaps did not learn.

As the majority of the evidence gained for this unit will be via a work placement and one-to-one discussions with the learner's tutor and/or line manager, it is unlikely that much time will be spent in a formal teaching situation. Learners should however be given guidance on how to gather information needed for the work placement evidence and on how to reflect on their work placement experience. Initially this could be done using very familiar situations, for example reflecting on how easily they got their child ready for bed, how successful a shopping trip was. Simple questions could be asked, for example was it successful, what went well, how do they know, what would they do differently next time, why did it not go so well. Developing a simple checklist may also be a useful tool. The learner would then assess their own abilities as they complete tasks.

Throughout their work experience, the learner could be encouraged to gather information about their job role and their work placement. Evidence could include their induction pack, job descriptions, marketing leaflets about the work placement and descriptions of organisation structures. It is very important that the learner understands the concept of confidentiality and ensures that any information used is approved by their supervisor or line manager.

### Assessment

In order to achieve this unit, the learner must take part in work experience to gather the relevant information and demonstrate that they have achieved all the assessment criteria. The learner may demonstrate their competence by collating a portfolio containing evidence for each assessment requirement. The learner could keep a record of activities at the placement which will help them in the review process with a tutor or careers adviser when they return to school or college.

The learner could complete a record of activities undertaken at the work placement. This could take the form of short answers to straightforward questions about the placement.

At a review meeting with a teacher or tutor on return from work placement, the learner should be able to identify what aspects of the work placement they did well and what they could have done better, giving examples in each instance. They may need some encouragement and prompting to do this in a positive attempt to recognise the benefits of the experience gained. This would provide evidence for 1.1.

In order to achieve 2.1 and 2.2, the learner must be able to identify what they have learned about themselves, the company or organisation and the role they undertook at the placement, (giving at least one example in each case). This could include identifying a talent, personal quality or interest recognised as a result of the placement, knowledge gained about the function of the company or organisation, learning a new skill by doing a task successfully or learning to use a particular tool or machine.

In order to achieve 3.1, learners must discuss with a tutor, teacher or careers adviser, possible options in respect of future career plans following their learning experience at the placement, and with support, set realistic goals in respect of areas such as courses, training programmes and further experience. The method used to evidence the learner's goals may take the form of a log, presentation, poster, written statement provided by the learner (with supporting notes from the tutor) or other appropriate format.

## **Unit 5: Health Needs**

<b>Unit code:</b>	<b>T/501/7218</b>
<b>QCF Level:</b>	<b>BTEC Entry 3</b>
<b>Credit value:</b>	<b>3</b>
<b>Guided learning hours:</b>	<b>30</b>

---

### **Unit aim**

Those working in health and social care must understand health needs in order to meet the health needs of individuals. In this unit learners will consider their own health needs and will learn about factors that affect health. They will learn that being healthy is about more than not being ill. They will explore the health needs of different individuals and will find out about the social care provision to meet these needs.

## Learning outcomes, assessment criteria and unit amplification

To pass this unit, the learner needs to demonstrate that they can meet all the learning outcomes for the unit. The assessment criteria determine the standard required to achieve the unit.

Learning outcomes		Assessment criteria		Unit amplification
1	Know about own health needs	1.1	outline own physical, emotional and social health needs	<ul style="list-style-type: none"> <li>□ <i>Physical health needs:</i> food; water; fresh air; exercise; medical care; safe environment; warmth; shelter; hygiene</li> <li>□ <i>Emotional and social health needs:</i> love/emotional support; independence; stimulation; self-esteem; social interaction</li> </ul>
2	Know factors that affect health	2.1	describe factors that affect health	<ul style="list-style-type: none"> <li>□ <i>Factors:</i> illness; disability; housing; poverty; unemployment; pollution; smoking; drug use; alcohol use; being overweight; exercise; diet</li> </ul>
3	Know that individuals have different health needs	3.1	discuss different health needs of individuals	<ul style="list-style-type: none"> <li>□ <i>Life stages:</i> children; young people; older people</li> <li>□ <i>Individuals:</i> physical disabilities; learning disabilities; physical illness; mental illness; disease eg degenerative, congenital, infectious</li> </ul>
4	Know what social care is	4.1	list social care available for individuals	<ul style="list-style-type: none"> <li>□ <i>Social care:</i> home care; day care; adult residential care eg for elderly, those with disabilities; respite care; community care eg for those with physical disabilities, those with learning disabilities, those with mental health problems; children's residential care</li> </ul>

## Information for tutors

---

### Delivery

As many practical activities should be included as possible to help learners relate to the unit content.

Tutors could start delivery of this unit by discussing what is meant by health so that learners understand the concept of overall health. Tutors could hold question and answer sessions with learners to determine physical, emotional and social health needs and why they are important to health. Key words could be written on the board/flipchart. Learners could complete posters which could be displayed in the classroom to refer to throughout the unit. Learners could design and complete a checklist to consider their own health needs which may be used as evidence for assessment criterion 1.1.

To gain an understanding of the different factors that affect health for learning outcome 2, a mixture of tutor-led input and learner research is required.

Learners could work in groups to find out about the different factors, for example, using internet sites. Each group could share their findings with other learners.

To introduce learning outcome 3 tutors could consider the health needs of characters in soap operas.

Case studies of individuals with different health needs could be discussed by learners in groups. Learners could answer questions on a worksheet. Whole group discussion will help to consolidate learning. Evidence for this could be used for 3.1.

Learners could visit day care centres, sheltered housing and residential care homes to observe some of the provision available for individuals. On return to the centre learners could discuss how the provision met the needs of individuals.

Using the internet and visiting social care settings, learners could find out about local social care provision suitable to meet the needs of the individuals in the case studies used in learning outcome 3. Guest speakers from settings could be invited to talk to learners about their provision.

## Outline learning plan

The outline learning plan has been included in this unit as guidance.

Topic and suggested assignments/activities
<p>Introduction to unit and structure of the programme of learning.</p> <p>Group discussion – ‘What is health?’</p> <ul style="list-style-type: none"><li>• identification of individual health needs</li><li>• physical/social/emotional health needs</li><li>• practical – posters of health needs</li><li>• practical – checklist of health needs.</li></ul> <p>Assessment – learners record own health needs on checklist. (Learning outcome 1)</p>
<p>Learners watch Video/TV programme – discuss lifestyle factors of individuals which contribute to their health.</p> <p>Research – learners find images which illustrate factors in health issues eg smoking; eating fatty foods; binge drinking; anorexia.</p> <p>Tutor led feedback – discuss images and how they relate to health.</p> <p>Assessment – learners design individual poster to show factors that affect health. (Learning outcome 2)</p>
<p>Case studies – individuals at three different life stages to identify different health needs.</p> <p>Guest Speakers/learner interview with friends/family.</p> <p>Paired research or visits – social care available for individuals in each of the three life stages.</p> <p>Paired presentation of information gathered.</p> <p>Assessment – using case studies and personal interviews ask and respond to straightforward questions about the health needs of the individuals and social care available. (Learning outcome 3; Learning outcome 4) [Functional Skills, Entry 2: Speaking and Listening]</p>
<p>Assessment feedback, review and evaluation of unit.</p>

## Assessment

For 1.1, learners will need to outline their own physical, emotional and social health needs. Learners could design a checklist to complete or they could use a proforma. For example, if the learner identifies self-esteem as a need, they could write ‘I need praise when I have done something well as it makes me feel good about myself’.

Learners will need to give clear information about different factors that affect health for 2.1. This may be produced as a leaflet or as a poster.

3.1 and 4.1 may be combined into one assignment task in response to different case studies of individuals with different health needs.

Learners will need to identify the particular health needs of the individuals described in each case study and suggest appropriate social care provision that may meet their needs. The evidence may be presented on one sheet of A4 paper for each case study.

# **Unit 6: Introduction to Creative and Leisure Activities for Children and Adults**

**Unit code:** A/501/7219

**QCF Level:** BTEC Entry 3

**Credit value:** 3

**Guided learning hours:** 30

---

## **Unit aim**

This unit may be delivered in class or in a work setting. However, it is essential that the learner has significant practical experience of the different types of activities available to children and adults. In this unit learners will develop the skills required for working with children and adults. Learners will have the opportunity to find out about different types of creative and leisure activities children and adults may experience in health and social care settings.

The learner will be introduced to a range of activities and experiences suitable for children and adults. Throughout the unit the learner will be given the opportunity to develop the work-related skills essential for working with children and adults including self-management, communication skills and working safely.

## **Essential resources**

A range of different resources are required for this unit, for example painting materials, materials for modelling, different types of table-top games. If equipment is not available the learners may be able to complete this unit in a practical work setting. Alternatively, learners may visit settings to observe the different types of equipment being used with children and adults.

## Learning outcomes, assessment criteria and unit amplification

To pass this unit, the learner needs to demonstrate that they can meet all the learning outcomes for the unit. The assessment criteria determine the standard required to achieve the unit.

Learning outcomes		Assessment criteria		Unit amplification
1	Know about creative, play and leisure activities for children and adults	1.1	list creative and play activities for children	<ul style="list-style-type: none"> <li>□ <i>Creative activities for children 3-11 years:</i> painting eg bubble painting, splatter painting; printing; modelling eg junk, play dough; collage; drama</li> <li>□ <i>Play activities for children 3-11 years:</i> language activities eg books, rhymes; music eg singing, dancing; indoor games, eg board, computer; role play; sand; water; outdoor play; climbing; ball games; outings</li> </ul>
		1.2	list creative and leisure activities for adults	<ul style="list-style-type: none"> <li>□ <i>Creative activities for adults:</i> painting, eg oil, water colour; drawing eg charcoal, pastel, inks; photography; drama; pottery/clay modelling</li> <li>□ <i>Leisure activities for adults:</i> reading, eg books, newspapers, large print books and newspapers, hearing books; exercise, eg exercise classes, walking; gardening/growing; outings, eg to museums, galleries, gardens; games, eg word games, puzzles, quizzes, computer</li> </ul>
2	Be able to use work-related skills required to provide children's and adults' creative, play and leisure activities	2.1	participate in an activity appropriate for creative play or leisure and demonstrate: <ul style="list-style-type: none"> <li>• self-management</li> <li>• communication skills</li> <li>• the ability to work safely</li> </ul>	<ul style="list-style-type: none"> <li>□ <i>Self-management skills:</i> accepting responsibility, eg agreeing own tasks, following instructions; assertiveness, eg asking for help; self-starting, eg do not need to be reminded to start tasks; time management, eg complete tasks on time</li> <li>□ <i>Communication skills:</i> eg listening; asking questions; reading to, talking to children/adults</li> <li>□ <i>Working safely:</i> personal safety, safety of others</li> </ul>

## Information for tutors

---

### Delivery

This unit is a practical unit. By combining the learning outcomes, centres should be able to cover all the learning outcomes through practical activities.

Learners should experience creative and leisure activities and also set up different activities for adults and children.

Throughout the unit learners should also be assessed on their work-related skills. Where possible, each session should give learners the opportunity to demonstrate their self-management and communication skills. Health and safety is a key element in health and social care and learners should be fully aware of health and safety when discussing suitable activities for adults and children. Learners could complete a checklist at the end of each session to record the work-related skills they demonstrated.

Painting and printing for children could be covered in the first session by encouraging learners to make up different types of paints and mix colours. Learners should be encouraged to set up, experience and clear away different painting and printing materials ie bubble painting, splatter painting, potato printing, leaf printing. Collage and modelling activities could be covered in the second session.

Story reading is an activity which children enjoy. Learners could be given the opportunity to visit the local library and choose a suitable book for a child. They should then read a story to the other learners. Group feedback following this activity could contribute to the assessment of work-related skills.

Learners could experience a range of different types of games for children. They may be able to bring in games that children they know have at home to share with the other learners.

Learners may be able to visit early years settings or watch videos to observe children playing outdoors and in sand and water activities.

Painting and drawing for adults could be covered by learners preparing, experiencing and completing oil and water colour painting, charcoal and pastel drawing.

Modelling with clay is an activity enjoyed by many adults. Before learners can experience clay modelling they will need to plan the activity carefully as clay is very messy. Protective clothing and covering for tables will be required. Tools suitable for sculpting the clay could be made available.

Learners could experience a range of different types of games for adults. They may be able to bring in games that they have at home to share with other learners. A session may also be spent researching computer games. Several websites have quizzes and word games.

Learners could work in groups to research exercise activities for different groups of adults and provide a handout for reference for other learners.

Learners could work in groups to plan an outing for a group of adults whose needs and interests are outlined in a case study.

Throughout this unit the learner may keep a record of the different types of activities they have experienced or observed. This record may be used to provide evidence for 1.1 and 1.2.

## Outline learning plan

The outline learning plan has been included in this unit as guidance.

Topic and suggested assignment/activities
<p>Introduction to unit and structure of the programme of learning.</p> <p>Practical – sessions to experience a range of creative and play activities suitable for children aged 3-11.</p> <p>Assessment – Record practical sessions undertaken, for example scrap book of completed activities with notes.</p> <p>Tutor Led discussion – identify work skills needed for participation in practical sessions.</p> <p>Practical – checklist of work skills.</p> <p>Activity – individual recording of own work skills used in practical sessions against checklist. (Learning outcome 1; Learning outcome 2)</p>
<p>Practical – sessions to experience a range of creative and leisure activities suitable for adults.</p> <p>Assessment – Record practical sessions undertaken, for example scrap book of completed activities with notes.</p> <p>Tutor Led discussion – identify work skills needed for participation in practical sessions.</p> <p>Practical – checklist of work skills.</p> <p>Activity – individual recording of own work skills used in practical sessions; against checklist. (Learning outcome 1; Learning outcome 2)</p>
<p>Assessment – evidence of work related skills identified in assessment criteria 2.1 demonstrated throughout delivery of unit.</p>
<p>Assessment feedback, review and evaluation of unit.</p>

## Assessment

For 1.1, learners will need to list different creative activities for children and three different play experiences for children.

For 1.2, learners will need to list different creative activities for adults and three different leisure activities for adults.

2.1, may be evidenced through witness testimonies, peer group assessment, self-assessment checklists and/or one-to-one discussions with the tutor/line manager. The learner must be able to demonstrate that by the end of the unit they have developed each of the work-related skills stated in the content. It may be helpful for the learner to complete a checklist of their progress in the development of their work related skills at the end of each session.

## **Unit 7: The Role of the Carer at Mealtimes**

**Unit code:** M/501/7220

**QCF Level:** BTEC Entry 3

**Credit value:** 3

**Guided learning hours:** 30

---

### **Unit aim**

Mealtimes are very important in health and social care settings as they provide the opportunity for individuals to be independent as well as to receive vital nourishment. This unit aims to help learners understand the responsibilities of carers in ensuring mealtimes enable individuals to be independent and enjoy their food. Learners will be introduced to the range of equipment that supports independence at mealtimes and they will learn about ways to support individuals in health and social care settings.

## Learning outcomes, assessment criteria and unit amplification

To pass this unit, the learner needs to demonstrate that they can meet all the learning outcomes for the unit. The assessment criteria determine the standard required to achieve the unit.

Learning outcomes		Assessment criteria		Unit amplification
1	Know the responsibilities of the carer at mealtimes	1.1	describe the responsibilities of the carer at mealtimes	<ul style="list-style-type: none"> <li>□ <i>Food</i>: menu choice; personal preferences; correct food for individuals eg special diets; maintaining the dignity of the service user, eg giving appropriate attention; promoting choice</li> <li>□ <i>Preparation for mealtimes</i>: comfort; position; hygiene, eg hand washing, aprons; correct seating; table height; utensils; presentation of food; temperature of food; ambience; special needs, eg cutting up food, liquidising</li> <li>□ <i>Mealtimes</i>: encouragement to eat; independence; observation, eg recognising difficulties encountered by individuals, amounts consumed</li> <li>□ <i>After mealtimes</i>: clearing away; recording; reporting</li> </ul>
2	Be able to choose equipment which encourages independence at mealtimes for children and adults	2.1	select appropriate equipment to encourage independence at mealtimes for children	<ul style="list-style-type: none"> <li>□ <i>Equipment for children</i>: easy to clean; plates eg non-slip/stay-put base, unbreakable; cutlery, eg angled spoons and forks, small size, easy grip; furniture, eg high chairs with safety straps, booster cushions/seats, low chair and tables; protection, eg splash mats, bib, aprons</li> </ul>
		2.2	select appropriate equipment to encourage independence at mealtimes for adults	<ul style="list-style-type: none"> <li>□ <i>Equipment for adults</i>: cutlery, eg good grip, angled handles; plates, eg with deep rims, with gripped bases, stay warm; cups/mugs, eg insulated, two handled; lap tray; height adjustable tables; napkins</li> </ul>
3	Know how to support individuals at mealtimes	3.1	outline ways to support adults and children at mealtimes	<ul style="list-style-type: none"> <li>□ <i>Client groups</i>: young children; adults</li> <li>□ <i>Support</i>: awareness of individual needs; providing individual support; encouraging independence; using appropriate language; giving individuals time to eat/drink</li> </ul>

## Information for tutors

---

### Delivery

The unit should be practical wherever possible. As many practical activities should be included as possible to help learners relate to the unit content. In addition, a wide range of other delivery methods can be used, including tutorials, presentations, videos, worksheets and internet sources. It is important to emphasise health and safety throughout the teaching of this unit.

The responsibilities of the carer at mealtimes could be introduced by inviting guest speakers from different settings to speak about how mealtimes are organised in their settings. Learners could prepare questions to ask speakers about aspects of the routine. A visit from an occupational therapist could enhance delivery of this unit.

Understanding the roles and responsibilities of carers during mealtimes could be covered by using different case studies. A question and answer session could determine the key points which could be collated on the board/flipchart.

For learning outcome 2, learners could work in groups to research the range of equipment available to encourage independence for children and adults at mealtimes. Research may be carried out using internet sites or by visiting shops. Information collected may be used for 2.1 and 2.2.

Learners could visit an occupational therapy department to observe the range of equipment and see demonstrations of how the equipment may be used to encourage independence at mealtimes. Learners may have the opportunity to use the equipment which would help to consolidate their learning.

Learners should be able to cover learning outcome 3 through practical activities. Tutors could give learners case studies describing adults and children in different settings. Learners answer questions on a worksheet related to mealtimes for the individuals in the case studies, followed by a discussion led by the tutor. Learners could produce posters for the classroom highlighting the key points about supporting individuals at mealtimes.

Learners could practise their skills on each other. Role-play exercises where learners practise feeding each other with drinks and food such as jelly or yogurt would be a useful activity for them to appreciate how it feels to be fed by someone else. Learners can offer examples of what they experienced when being fed during the role-play exercise and how it affected them. Peer assessment of the skills used by the 'carer' would help learners to develop their caring skills.

To understand how equipment can encourage independence, and how to provide support for individuals, learners could visit settings to observe mealtimes or watch video recordings of mealtimes in different health and social care settings. On returning learners could discuss their observations with the group. Learners will need to be reminded about issues of confidentiality.

If appropriate, learners could visit settings at mealtimes and help individuals. Witness statements completed by the tutor or supervisor could be used for 3.1.

## Outline learning plan

The outline learning plan has been included in this unit as guidance.

Topic and suggested assignment/activities
<p>Introduction to unit and structure of the programme of learning.</p> <p>Tutor led discussion – learners experiences of mealtimes; importance of mealtimes; what would learners want if they were dependent on carers.</p> <p>Guest speakers – to speak about role and responsibilities of carer ie food, preparation for mealtimes, mealtimes, after mealtimes.</p> <p>Role play – carer at mealtimes to illustrate their responsibilities.</p> <p>Assessment – ask and respond to straightforward questions about the responsibilities of the carer at mealtimes. (Learning outcome 1) [Functional Skills, Entry 2: Speaking and Listening]</p>
<p>Video – children at mealtimes – discuss how the equipment used helped to promote independence at mealtimes.</p> <p>Group research/visits – using tutor devised checklist visit shops to identify available equipment.</p> <p>Case studies – identify help different adults might need to help promote independence at mealtimes.</p> <p>Group research – equipment available to support adults in case studies.</p> <p>Assessment – individual presentation of equipment to promote independence for children and adults at mealtimes, for example oral, poster, display, file, scrap-book. (Learning outcome 2)</p>
<p>Demonstration – of a mealtime with limited interaction or understanding of individual needs.</p> <p>Group discussion – ‘What could be improved, why and how?’</p> <p>Practical – pairs/small groups with peer observation role play feeding.</p> <p>Group discussion – debrief and feedback.</p> <p>Assessment – role plays of carer at mealtimes, with both children and adults, and tutor assessment. (Learning outcome 3)</p>
<p>Assessment feedback, review and evaluation of unit.</p>

## Assessment

In order to achieve 1.1 the learner must describe the responsibilities of the carer at mealtimes. They should consider the carer's tasks when preparing for, during and after mealtimes. This could be assessed through a one-to-one discussion with the tutor. The tutor could record the responses for verification purposes through completing a witness statement. An alternative method of assessment could be a poster which displays the information.

For 2.1 and 2.2, learners will need to give some details about how different pieces of equipment for adults and different pieces of equipment for children could be used to encourage independence at mealtimes. Images collected by learners from websites, journals, magazines etc could be presented as a leaflet or loose-leaf file supported with a brief explanation about how the equipment may help individuals to self-feed.

3.1 may be assessed through role play or through using models. Where appropriate it can be assessed in the workplace. Witness statements completed by the tutor or supervisor confirming that the learner has demonstrated appropriate support for an adult and a young child during mealtimes would be sufficient to meet this criterion.

Alternatively, learners can discuss case studies on how to support children and adults at mealtimes. The tutor could record these discussions for verification purposes by completing a witness statement.

# **Unit 8: Investigating Rights and Responsibilities at Work**

**Unit code:** L/501/6382

**QCF:** BTEC Level 1

**Credit value:** 1

**Guided learning hours:** 10

---

## **Unit aim**

Everyone has the right to be able to work in a healthy and safe environment, the right to be treated fairly and the right to be respected. The area of rights and responsibilities at work and how it affects the people you work with is an extensive subject. This unit provides an introduction to the concept by discussing basic rights at work and how these rights can be enforced through guidelines, company policies and legislation.

This unit also challenges individual's perceptions of others and how employers and employees should respect the rights of others. The laws that have been introduced to support employees will be considered. However it is not anticipated that these laws will be considered in depth. The learner will know about the law and how to find more information on the content of the law if ever they needed to refer to it.

## Learning outcomes, assessment criteria and unit amplification

To pass this unit, the learner needs to demonstrate that they can meet all the learning outcomes for the unit. The assessment criteria determine the standard required to achieve the unit.

Learning outcomes		Assessment criteria		Unit amplification
1	Understand what 'rights' and 'responsibilities' are	1.1	explain what 'rights' are	<ul style="list-style-type: none"> <li>□ <i>Rights</i>: basic human rights, eg right to life, freedom, education, respect and dignity, to own property, equality before the law; rights at work, eg healthy and safe environment, working conditions, respect, privacy of personal information, fair pay/wages, paid holiday time, right to join and form trade unions</li> </ul>
		1.2	explain what 'responsibilities' are	<ul style="list-style-type: none"> <li>□ <i>Responsibilities</i>: responsibility to protect, improve and not infringe other's rights; work responsibilities, eg contractual obligations, health and safety requirements</li> </ul>
2	Understand how to respect the rights of individuals	2.1	explain the factors that may affect the rights of individuals	<ul style="list-style-type: none"> <li>□ <i>Factors affecting rights of individuals</i>: positive images; perceptions, eg stereotyping, labelling; unfair discrimination and injustice; cultural background; ignorance or lack of human rights</li> </ul>
		2.2	explain how to respect the rights of individuals	<ul style="list-style-type: none"> <li>□ <i>How to respect others</i>: appropriate behaviour, eg use of appropriate language, politeness in communicating with others, not putting others in danger or at risk through inappropriate behaviour in the workplace, showing tolerance and respect for differences and diversity, avoiding unfair discrimination against others, challenging own perceptions to ensure fairness of thought and action</li> </ul>
3	Know laws that can protect the rights of employees	3.1	identify laws that can protect employee rights	<ul style="list-style-type: none"> <li>□ <i>Laws</i>: laws relating to employee rights, eg health and safety, working conditions, salary, equality of opportunity, discrimination, privacy of personal information (Data Protection Act)</li> </ul>

Learning outcomes	Assessment criteria		Unit amplification
4 Know that employers have certain responsibilities	4.1	identify employer responsibilities in regard to <ul style="list-style-type: none"> <li>• fulfilling a contract</li> <li>• health and safety</li> <li>• equal opportunities and prevention of discrimination</li> </ul>	<ul style="list-style-type: none"> <li>□ <i>Employee's responsibilities:</i> health and safety; working conditions; contractual; equality of opportunity, confidentiality of company or organisational information</li> </ul>

## Information for tutors

---

### Delivery

Tutors will need to be creative in their approach to this unit which is largely based on knowledge and understanding rather than skills. Active learning, however, can still be achieved, for example through learners going into the workplace to interview employers and employees or through role-playing scenarios. Debate and discussion should also be encouraged, particularly when defining the terms and considering rights and responsibilities beyond those enshrined in law.

Learners should be introduced briefly to the concept of rights and responsibilities in general before they focus on those that relate to the workplace. Discussion might include human rights, rights and responsibilities set out in legislation and those that are less formal such as those relating to particular groups or settings (for example within a school, college, society or club).

Learners would benefit from the opportunity to discuss terms associated with respecting the rights of others, for example stereotyping, labelling, prejudice, positive images, discrimination, ageism, racism, sexism, diversity, cultural background. Simple tasks may be used to help the learner understand these concepts, for example they could make a list of the things they believe in and value. They could then consider how this might affect their work. Learners could also be encouraged to discuss how television or radio or magazine advertisements influence the way people think of others, for example through gender stereotyping or generalised perceptions of various cultures, nationalities or age groups. Discussions could then follow on how this could affect work, for example women are often seen taking on a domestic role at home and a much smaller percentage of women receive high-paid jobs.

Scenarios could be used as a basis for research on what laws have been put in place to protect the rights of individuals at work, for example a colleague or partner has become pregnant. What are colleague's rights and what rights does the partner have? What laws are in place to support this? This learning outcome could also be linked with learning outcome 4. Learners could find out where they could get help and advice both within the workplace and outside.

Learners will probably find it useful to relate employers' responsibilities to the particular aspects of rights and responsibilities that they have covered when looking at them from an employee's perspective. They should be able to explain how the employer, through meeting their responsibilities, allows employees to exercise their rights (for example, an employer's responsibility to maintain a healthy and safe workplace is put in place to ensure that the employees' right to work in a healthy and safe environment is observed).

### Assessment

In order to achieve 1.1 and 1.2, the learner must be able to explain what rights and responsibilities are. Practical examples may help to support the learner's response to these criteria.

In order to achieve 2.1, the learner should be able to identify three different factors that may affect the rights of an individual. They should then be able to explain how each factor may affect the rights of the individual.

The evidence provided for 3.2 could be in the form of an information leaflet or booklet which explains how we should respect our colleagues at work. Alternatively a written explanation may be given or an oral presentation could be an effective method of assessment.

To achieve 3.1, the learner must identify three different laws relating to the rights of individuals at work. The learner should name the law and provide a brief, basic outline of the purpose of the law.

4.1 focuses on the employer's responsibilities. The learner must be able to describe the employer's responsibilities at work in regard to fulfilling a contract, health and safety and equal opportunities/prevention of discrimination. Practical examples should be given to support each of these areas. (At least one example is required for each area.)

# **Unit 9: Managing Your Health at Work**

**Unit code:** T/501/6389

**QCF Level:** BTEC Level 1

**Credit value:** 1

**Guided learning hours:** 10

---

## **Unit aim**

Where you work may have an influence on your health. For example, there is a risk of repetitive strain injury if a worker spends much of the working day using a keyboard and mouse, while those working with the public may be at risk of physical or verbal abuse. This unit helps the learner to understand that different areas of work have different health requirements. It also considers how good personal health can be maintained in different areas of work by reducing health risks in the workplace.

## **Essential resources**

Learners will require access to appropriate information about health requirements and potential health risks for specific types of work.

## Learning outcomes, assessment criteria and unit amplification

To pass this unit, the learner needs to demonstrate that they can meet all the learning outcomes for the unit. The assessment criteria determine the standard required to achieve the unit.

Learning outcomes	Assessment criteria	Unit amplification
1	Understand that different areas of work have different health requirements	<ul style="list-style-type: none"> <li>□ Areas of work: office-based; service industry eg hospitals, care homes, childcare; outdoor eg construction industry, gardening, farming, logistics; retail; public services eg fire service, police; sport and leisure sector</li> <li>□ Health requirements: hygiene, lifting weights, infection control, protective clothing, influence of weather and the outdoor elements, concentration span, shift work, high adrenaline jobs</li> </ul>
2	Know how to maintain good health in different areas of work	<ul style="list-style-type: none"> <li>□ Health risks: physical and verbal abuse, bullying, use of specialist equipment eg transporting chemicals, back injury, manual handling, minor injuries eg slips, falls, trips, spread of infection, stress</li> </ul>
	<p>2.1 describe health risks for a chosen area of work</p> <p>2.2 explain how to reduce health risks in a chosen area of work</p>	<ul style="list-style-type: none"> <li>□ Reducing health risks: appropriate equipment eg supportive chair, keyboard rests; appropriate clothing eg personal protective equipment (PPE); training and knowledge of procedures and rules eg food and safety rules; vaccination of staff eg annual flu vaccination</li> </ul>

## Information for tutors

---

### Delivery

If a learner knows the vocational area that they are would like to work in or are already working in, they may focus their learning on that vocational area.

A wide range of delivery methods may be used to teach this unit, including tutorials, presentations, videos, worksheets and internet sources. As many practical activities should be included as possible to help learners relate to the content of the unit.

Small group discussions could be used to help identify the different areas of work that learners may be interested in working in. As far as possible, a range of vocational areas should be identified, including indoor and outdoor environments. Learners could then select one or more vocational areas and carry out research to identify specific health requirements. For example, those working in a care home may be required to use lifting equipment whilst those working in the sport and leisure industry may be working outdoor for significant periods of time and therefore be exposed to the sun.

Learners may be encouraged to access information from relevant websites, for example [www.hse.gov.uk/index.htm](http://www.hse.gov.uk/index.htm)

Learning outcome 2 may be delivered through learner research. Small group work could focus on specific vocational areas and information gathered on potential health risks and ways in which to reduce those risks. Each group could present their findings to the other learners. Information could be presented using PowerPoint or paper based materials. Learners could compile their information into a 'checklist' style document which could be designed as a reference for other learners.

Speakers from appropriate vocational areas could be invited to talk about the way in which their vocational area helps their employees to manage their health at work.

### Assessment

In order to achieve this unit, the learner must choose a specific vocational area. All the evidence that they present for assessment should be related to the chosen area of work. The learner should clearly identify the chosen vocational area on any work presented for assessment.

In order to achieve 1.1, the learner must explain three different health requirements for their chosen area of work. They should provide details of each health requirement and give examples for each health requirement to support the information provided.

To achieve 2.1 and 2.2, the learner must describe three health risks associated with their chosen vocational area and explain how each health risk may be reduced. The learner could produce a leaflet or poster to evidence this. Alternatively they may participate in a discussion which highlights health risks in their chosen vocational area, with the tutor recording the required descriptions and explanations provided by the learner.

# **Unit 10: Preparing for Work Placement**

**Unit code:** M/501/6391

**QCF:** BTEC Level 1

**Credit value:** 1

**Guided learning hours:** 10

---

## **Unit aim**

Before a learner begins a work placement, it is important that they understand the function of the company or organisation in which they are going to work. This unit will help the learner to find out more about the company or organisation providing the work placement, the specific requirements for the work placement, including tasks and responsibilities, appropriate behaviours and sources of support. The learner will also set goals that will enhance their work placement experience.

Although the term 'company or organisation' has been used throughout this unit, it can refer to any type of work placement for which the learner may be preparing.

## **Essential resource**

In order to make this unit relevant, the learner must be preparing to go on a suitable work placement. Employers must also be prepared for the learner arriving and support them in gathering relevant information.

## Learning outcomes, assessment criteria and unit amplification

To pass this unit, the learner needs to demonstrate that they can meet all the learning outcomes for the unit. The assessment criteria determine the standard required to achieve the unit.

Learning outcomes		Assessment criteria		Unit amplification
1	Know about the company or organisation where they plan to do the work placement	1.1	describe the company or organisation where they plan to do the work placement	<ul style="list-style-type: none"> <li>□ <i>Information about the company/organisation: type of company or organisation; function, eg service provision, retail, construction, administrative, logistics; location; size, eg small, large, branches throughout country, number of employees</i></li> </ul>

Learning outcomes	Assessment criteria	Unit amplification
2	<p>2.1 Know what is expected of them during the work placement</p> <p>2.2 identify the requirements for the placement, and why the requirements are necessary</p> <p>2.3 describe tasks they are likely to undertake in the work placement</p> <p>2.4 describe appropriate attitudes and behaviours for the work placement and why they are important in the workplace</p> <p>2.5 describe appropriate steps they could take in situations of emotional stress, difficulty or confusion during the work placement</p> <p>2.6 set appropriate goals for the work placement</p>	<ul style="list-style-type: none"> <li>□ <i>Work placement requirements:</i> hours of work; absence procedures; dress code; line manager or supervisor; health and safety responsibilities, eg evacuation procedures, first aid procedures, reporting hazards; refreshment facilities</li> <li>□ <i>Why requirements are necessary:</i> comply with health and safety rules, hygiene reasons, efficiency of working, promote good working relationships with colleagues and customers</li> <li>□ <i>Expected tasks:</i> daily duties eg opening post, taking messages, checking emails, filing documents, checking equipment for health and safety purposes, setting up equipment, liaising with line manager, project work</li> <li>□ <i>Attitudes and behaviours:</i> positive attitudes, eg follow instructions, prepared to take on different or new tasks, dependable, confident but willing to learn, co-operative; behaviours eg polite, on time, reliable, thorough</li> <li>□ <i>Why appropriate attitudes and behaviours are important:</i> eg creates positive impression of learner, helps learner get on with other people in the company or organisation, improves chances of successful and enjoyable work placement</li> <li>□ <i>Taking appropriate steps in situations of emotional stress, difficulty or confusion:</i> using appropriate sources of support and guidance if an aspect of the work placement is causing emotional stress; asking questions if instructions are unclear or confusing; asking for help or guidance in carrying out a task if it is difficult or unclear</li> <li>□ <i>Goals:</i> personal targets eg attend each day, arrive on time, be enthusiastic; work-related targets eg learn new skills, improve knowledge of specific sector or career, build confidence in asking for help if something is difficult or unclear; achievable and realistic goals, eg specific, within a set timescale, reasonable, within learner's abilities</li> </ul>
3	3.1 Be able to set goals to help them get the most out of the work placement	

## Information for tutors

---

### Delivery

Although each learner will be attending a different work setting, the principles behind preparing for the work placement will be the same. Before going out on work placement, the learner needs to find relevant information about the company or organisation to which they are going. They also need to know the types of information that they need to investigate. In order to do this, learners could work in small groups to identify the type of information they want to gather about the company or organisation. They could use the results of this discussion to compile a checklist or series of questions. Individual learners would then be able to base their research on these questions. Checklist items could include, for example size of company or organisation, function of company or organisation, its location or locations. Learners could gather this information by undertaking internet searches to find information on the company or organisation providing the work experience. Other sources of information could include the company or organisation's own website, promotional leaflets or brochures, resources such as Job Centre Plus, discussions with learners who have previously been on work placement at the same (or similar) company or organisation or conversations with staff from the company or organisation.

Before learners attend the work placement, they should find out key facts relating to their placement, for example what the company or organisation does, where they will be located, their expected hours of work, the main tasks they will undertake and the dress code. This information could be gained as a result of an interview with the employer or talking with someone who has previously worked in the organisation. If this is not possible, the learner should identify the 'high priority' information they need before their first day and telephone or email the employer to obtain the information. Information that is not 'high priority' could be gained on the first day of the work placement.

Leaflets or information sheets issued to the learners, videos and tutor-led group discussions could all be used to help the learners find out about the main tasks relating to the job role or main areas of learning at the company or organisation. The information provided to the learner should be straightforward and clearly presented so that they can extract the relevant details independently. Learners who have previously participated in work experience could be asked to speak to learners in small groups.

Tutors should emphasise the importance of workplace values and rules and, where possible, provide lists of the possible attitudes and behaviours needed to satisfy the requirements of the placement. Learners will need to be able to articulate why certain attitudes and behaviours are necessary for their work placement. Employers could be invited as guest speakers to discuss expectations or learners could discuss possible qualities and expectations in small groups or via role-play situations. Workplace scenes from television programmes, movies or other video clips could be used as a starter for discussions.

Learners going into a work placement might feel nervous and concerned that they will appear incompetent or will not be able to do what they are instructed to do. It would be beneficial therefore for learners to be prepared to deal effectively with any potential feelings of stress or confusion. For example, a group discussion or role play activity could be used to help learners think about appropriate ways to solve situations of stress, anxiety or confusion and how to ask others for help and guidance during the work placement. Alternatively, learners could watch a TV or movie clip that depicts a stressful or difficult situation in the workplace and then hold a group discussion about what could be done to resolve the stress, difficulty or confusion in that workplace scenario. This could help address learners' fears and concerns about handling confusing or difficult situations they may encounter.

Learners may discuss possible goals and examples of goals in group situations and/or individually with tutors or careers advisors, but will need to come up with their own final list of personal goals for the work placement.

## Assessment

In order to achieve 1.1, the learner must be able to describe the company or organisation where they plan to do the work placement. Information should include aspects such as the size, type of business, location or locations and business function. Although information may be gathered from the company or organisation website or from documentation provided by the company or organisation, the description provided must be in the learner's own words and demonstrate a clear understanding of the organisation to which they are going.

To achieve 2.1, the learner may complete a checklist which identifies the requirements of the company or organisation for the work placement, for example hours of work, dress code and absence procedures. Alternatively, the learner may wish to record the description in a different format. At least three different requirements must be identified and a reason given why each one is necessary. The learner could give verbal descriptions (noted by the tutor) of why the requirements are necessary or record the reasons as notes on the checklist or other means of evidence.

In order to achieve 2.2, the learner must describe at least four different tasks that they will undertake in the work placement. These could be recorded in any suitable format such as a written document, leaflet or poster. Other means of evidence (eg discussion with the tutor accompanied by a tutor statement) could also be used.

To achieve 2.3, the learner will need to identify at least two attitudes and two behaviours that they should demonstrate in the workplace. For each attitude and behaviour, they need to explain why they are important. These could be recorded in any suitable format such as a written document, leaflet or poster. Other means of evidence (eg discussion with the tutor accompanied by a tutor statement) could also be used.

For 2.4, the learner must describe two different examples of a positive step they could take if they found themselves in a situation of emotional stress, difficulty or confusion during the work placement. The positive steps described by the learner can be brief and straightforward but should be articulated in the learner's own words.

3.1 must relate directly to the learner's work placement. They will need to set at least four appropriate goals, some of which may be personal, for example get to work ten minutes early every day or work-related, for example learn how to use the photocopier confidently by the end of the second day. The goals should be presented in an appropriate format such as a presentation, chart, poster, written

statement provided by the learner, with supporting notes from the tutor, evidence from tutorials or taped discussions verified by the tutor.

# **Unit 11: Learning from Work Placement**

**Unit code: J/501/6395**

**QCF Level: BTEC Level 1**

**Credit value: 2**

**Guided learning hours: 10**

---

## **Unit aim**

Work placement can be a valuable experience for all learners. It provides an opportunity to practise skills already gained, acquire new skills and develop a knowledge of the working environment. In order to maximise the experience, learners will be required to identify learning gained from the work placement and then be able to use that learning to set short-term goals.

Before starting this unit, the learner must have experienced a work placement and be aware that the information gathered from that experience will be used as a basis for this unit. The learner will need to have gathered evidence of tasks undertaken during work placement.

## **Essential resources**

Learners will need to have undertaken a period of work placement prior to undertaking this unit.

## Learning outcomes, assessment criteria and unit amplification

To pass this unit, the learner needs to demonstrate that they can meet all the learning outcomes for the unit. The assessment criteria determine the standard required to achieve the unit.

Learning outcomes		Assessment criteria		Unit amplification
1	Be able to show evidence of tasks undertaken during the work placement	1.1	produce evidence of tasks undertaken during work placement	<ul style="list-style-type: none"> <li>□ Evidence of tasks undertaken: eg employer reference, tutor report, description of tasks undertaken, video log, reports, minutes of meetings attended</li> <li>□ Record keeping: methods of recording information eg portfolio, CD ROM, video, handwritten, electronic, word-processed; oral and written presentation</li> </ul>
2	Understand what they learned from the work placement	2.1	using evidence from the tasks undertaken during the work placement, describe what they learned from the tasks	<ul style="list-style-type: none"> <li>□ What was learned from work placement tasks: skills, eg self-management, communication, teamwork, business and customer awareness, problem-solving, how to work accurately with numbers, IT skills, technical skills, use of equipment</li> </ul>
		2.2	using evidence from the tasks undertaken during the work placement, describe what they would change if they were to do the task again	<ul style="list-style-type: none"> <li>□ What would be changed: eg complete task more thoroughly or quickly, involve another colleague in assisting or overseeing, use different equipment or method, ask for help when needed, clarify instructions, ask questions, investigate all options before acting</li> </ul>
3	Be able to use learning from the tasks undertaken in the work placement to set short-term goals	3.1	set short-term goals which build on their learning from carrying out tasks in the work placement	<ul style="list-style-type: none"> <li>□ Short term goals building on learning from tasks: eg skills and knowledge development, eg further study, investigate specific career options or work areas; apply for full-time employment, seek voluntary work in a particular area</li> </ul>

## Information for tutors

---

### Delivery

In order to achieve this unit, the learner must have had experience in a work placement. The length of time spent in the work placement is not defined, however sufficient time must be given to allow the learner to achieve the assessment criteria.

The learner will be expected to have gathered evidence of the tasks or activities that they are involved in during their work placement. They will then be able to use the evidence gathered from the work placement to demonstrate competence for each assessment criterion. Prior to starting the work placement, a group discussion may be used to identify different forms of evidence. This could include employer or tutor reports, evidence of work completed, descriptions of tasks or activities undertaken-perhaps in the form of a diary or minutes of meetings that the learner attended or facilitated. The learner must adhere to the company policy on confidentiality and intellectual property.

Different methods of record-keeping should be discussed. Examples of previous learner work could be shown. Paper-based and/or electronic record keeping methods may be used.

At a review meeting with a teacher or tutor on return from work placement, learners will need to describe what they have learned by undertaking different tasks, giving examples in each instance. They may need some encouragement and prompting to help identify what was learned.

Small group discussions, class presentations or one-to-one tutorials may be used to allow the learners to explain what they could have done differently. Examples could include prioritising time better, asking additional questions, clarifying the task, or learning a new skill that would have made the task easier.

Learners could discuss with a tutor, teacher or careers adviser, possible options in respect of future career plans that build on their learning experience from the placement, and set realistic goals in respect of courses, training programmes, employment opportunities or further investigation of careers and industry types.

### Assessment

The assessment for this unit may be a single task which provides evidence of all the assessment criteria or smaller tasks which relate to individual criteria.

In order to achieve 1.1, the learner must produce evidence of tasks undertaken in the work placement. This evidence can then be used as a basis for the remaining assessment criteria. This may take the form of a diary which outlines what has been achieved during the day. Alternatively the learner may gather evidence of work undertaken, including reports or references from employers and colleagues, video logs or witness statements. The evidence produced could include information about what the learner was asked to do, what the time scale was for completion, if they achieved the timescale, what skills were needed to complete the task and who they had to work with to complete the task.

For 2.1, the learner needs to choose two tasks from 1.1 and describe what they learned as a result of completing the task. The learner may draw upon the insights gained through the review meeting with the tutor on return from work placement but needs to independently choose the two tasks and decide what was learned from them. The learner could make reference to what they learned about themselves in terms of personal skills and attributes or to what they learned about the practical aspects of the task. This could include acquiring a new skill or learning new terminology.

For 2.2, the learner may require some support from the tutor in considering what they could have done differently in carrying out a specific task from the work placement. However, the learner must be able to independently choose two different tasks from the evidence gathered in P1 and describe how they would do the task differently if asked to do the task again.

In order to achieve 3.1, the learner is required to set and produce evidence of at least three short-term goals which build on the learning that they gained from completing tasks in the work placement. The method used to evidence the learner's goals may take the form of a log, presentation, poster, written statement provided by the learner (with supporting notes from the tutor) or other appropriate format.

## **Unit 12: Health and Social Care Needs**

**Unit code:** T/501/7221

**QCF:** BTEC Level 1

**Credit value:** 4

**Guided learning units:** 30

---

### **Unit aim**

Working in health and social care requires an understanding of the physical, emotional and social health needs of individuals. This unit aims to help the learner understand that individuals have different health and social care needs which may be met by a range of health and social care provision. The unit also helps the learner to understand how health may be affected by different factors.

## Learning outcomes, assessment criteria and unit amplification

To pass this unit, the learner needs to demonstrate that they can meet all the learning outcomes for the unit. The assessment criteria determine the standard required to achieve the unit.

Learning outcomes		Assessment criteria		Unit amplification
1	Know about health needs	1.1	identify and describe the significance of physical health needs	<ul style="list-style-type: none"> <li>□ <i>Physical health needs:</i> food; water; fresh air; exercise; medical care; safe environment; warmth; shelter; hygiene; diet; changing health needs eg for babies, adolescents, adults and the elderly</li> </ul>
		1.2	identify and describe the significance of emotional and social health needs	<ul style="list-style-type: none"> <li>□ <i>Emotional and social health needs:</i> love/emotional support; independence; stimulation; self-esteem; social interaction</li> </ul>
2	Know how health is affected by different factors	2.1	describe different factors that affect health	<ul style="list-style-type: none"> <li>□ <i>Factors:</i> illness: disability; housing; poverty; unemployment; pollution; smoking; drug misuse; alcohol misuse; obesity; exercise</li> </ul>
3	Understand that individuals have different health needs	3.1	describe the health needs of individuals	<ul style="list-style-type: none"> <li>□ <i>Life stages:</i> babies and young children; adolescents; adults; older people</li> <li>□ <i>Groups:</i> those with physical disabilities; those with learning disabilities; those with chronic illnesses eg diabetes, emphysema, AIDS; those with acute illness eg pneumonia; those with mental illness; those with terminal illness</li> </ul>
4	Know what health care and social care is available for individuals	4.1	outline health care available for individuals	<ul style="list-style-type: none"> <li>□ <i>Health care:</i> general practitioner; hospital inpatient; hospital outpatient; home nursing; physiotherapy; occupational therapy; dentist; pharmacy</li> </ul>
		4.2	outline social care available for individuals	<ul style="list-style-type: none"> <li>□ <i>Social care:</i> home care; day care; adult residential care, eg for elderly, those with disabilities; respite care; community care, eg for those with physical disabilities, those with learning disabilities, those with mental health problems; children's residential care</li> </ul>

## Information for tutors

---

### Delivery

As many practical activities as possible should be included as possible to help learners relate to the unit content. In addition, a wide range of delivery methods may be used to teach this unit, including tutorials, presentations, videos, worksheets, internet sources.

Tutors could start delivery of this unit by asking learners to consider their own health needs and compare their answers with the rest of the group.

A question and answer session could help learners to identify physical, social and emotional health needs. Learners could design posters which include the definitions and display them in the classroom for learners to refer to throughout the unit.

To gain an understanding of the different factors that affect health for learning outcome 2 a mixture of tutor-led input and learner research is required.

Learners could work in groups to research the different factors using internet sites. Each group could present their findings to the other learners. Information could be presented using PowerPoint or paper-based materials and produced as handouts for the group.

As a stimulus for discussions for learning outcome 3, it would be useful for learners to consider the health needs of characters in the media, for example soap operas or famous personalities.

In order for learners to understand the concept of the different health needs of individuals, they could work in groups to discuss case studies of individuals at different life stages with different needs. They could then report back to the rest of the group.

Guest speakers could be invited to talk to learners about health and social care provision they have used and how it was able to meet their health and social care needs. Learners could work in groups to research the provision available locally for the different individuals described in the case studies.

## Outline learning plan

The outline learning plan has been included in this unit as guidance.

Topic and suggested assignments/activities
<p>Introduction to unit and structure of the programme of learning.</p> <p>Group discussion – ‘What are health needs?’</p> <p>Case studies – learners look at cases from four stages of life (babies, adolescents, adults, the elderly) to identify their health needs and analyse the significance of each, for example babies need protein food for development, adults need to exercise to keep healthy, elderly need social inter-action.</p> <p>Practical – presentation which uses the case studies to identify the health needs and their significance.</p> <p>Learners research the long-term significance of a health need, for example unbalanced diet for babies, effects of bereavement.</p> <p>Assessment – record information in a format suitable for parents/carers. (Learning outcome 1) [Functional Skills Level 1: Writing]</p>
<p>Small group research – learners select factors affecting health and make a fact sheet for other learners to compliment an oral presentation [Functional Skills Level 1: Writing, Speaking and Listening]</p> <p>Case studies – compare case studies within each of the four life stages (babies, adolescents, adults, the elderly) to consider the different factors impacting on health.</p> <p>Assessment – learners design individual poster to show different factors that affect health and how they affect health. (Learning outcome 2)</p>
<p>Case studies – learners to identify different health needs of individuals at four different life stages.</p> <p>Tutor-led discussion – ‘What is the difference between social care and health care?’</p> <p>Group research – social care and health care available for individuals in their local area for each of the four life stages.</p> <p>Guest speakers or visits – observe provision.</p> <p>Group presentation of information gathered.</p> <p>Assessment – using the case studies learners record the health needs of the individuals and health and social care available to the individuals. (Learning outcomes 3 and 4) [Functional Skills Level 1: Reading]</p>
<p>Assessment feedback, review and evaluation of unit.</p>

## Assessment

The criteria for this unit could be combined and evidence collected in a small portfolio/loose-leaf file, a display with photographic evidence and a supporting commentary, poster, booklet.

To meet 1.1, learners must identify different physical health needs and describe their significance. A proforma could be used for this purpose.

To meet 1.2 learners need to describe the social and emotional needs of at least two individuals. Learners should be able to make the link between the individuals

and the physical health needs identified in 1.1. This may be achieved in a table format.

2.1 requires learners to describe different factors that affect health. How the factors affect health will also need to be clarified. Case studies may be used or learners may provide a generic explanation.

The learner may keep a record of the different health needs of individuals they have encountered. This record may be used to provide evidence towards 3.1.

To achieve 4.1 and 4.2, learners need to identify the health and social care available for individuals. The individuals described for 1.2 may be used. Learners could undertake visits to a day care centre and hospital outpatients to observe the health and social care provision. Learners could discuss what they have found out with the group or with the tutor, which may be used to provide evidence.

## **Unit 13: Personal Care in Health and Social Care**

**Unit code:** A/501/7222

**QCF Level:** BTEC Level 1

**Credit value:** 4

**Guided learning hours:** 30

---

### **Unit aim**

This unit aims to help learners understand the personal care needs of individuals. The unit explores the practical skills and personal qualities required by carers to meet the physical and emotional needs of individuals during personal care procedures and which are essential for working in health and social care settings. The learner will find out about the procedures which relate to personal care and the reasons why it is important for these procedures to be adhered to.

## Learning outcomes, assessment criteria and unit amplification

To pass this unit, the learner needs to demonstrate that they can meet all the learning outcomes for the unit. The assessment criteria determine the standard required to achieve the unit.

Learning outcomes	Assessment criteria	Unit amplification
1	<p>1.1 Know that individuals have personal care needs</p> <p>1.2 describe the personal care needs of individuals</p>	<ul style="list-style-type: none"> <li>□ <i>Personal care:</i> washing; dressing; feeding; toileting</li> <li>□ <i>Individuals:</i> babies and young children; adults, eg elderly frail adults, those who use wheelchairs, those with learning disabilities, hearing impaired, visually impaired, those whose ability is affected by illness; cultural differences</li> <li>□ <i>Emotional needs:</i> respect; privacy; dignity; choice; independence</li> </ul>
2	<p>2.1 describe the skills needed for the personal care of others</p> <p>2.2 describe the personal qualities needed for the personal care of others</p>	<ul style="list-style-type: none"> <li>□ <i>Skills:</i> how to assist with personal care, eg washing, dressing; communication skills, eg listening, questioning, non-verbal skills, recording; observation; hygienic practice, eg hand washing, how to avoid cross infection; how to avoid embarrassment; how to maintain privacy and dignity; how to encourage independence</li> <li>□ <i>Personal qualities:</i> caring; empathy; gentleness; respectful; empowering; reliable; sensitive; non-judgemental</li> </ul>
3	<p>3.1 Understand why it is important to follow the health and social care setting's procedures when providing personal care</p> <p>3.2 identify the setting's procedures which relate to personal care</p> <p>3.3 explain why it is important to follow procedures which relate to personal care</p>	<ul style="list-style-type: none"> <li>□ <i>Setting:</i> eg hospital, residential care home, day care centre</li> <li>□ Procedures: moving and lifting; hand washing; disposal of waste, child protection; self-protection; cleaning equipment; food handling; confidentiality</li> <li>□ Reasons: health and safety of clients, health and safety of carers; infection control; efficiency; insurance/litigation; regulations, eg Care Standards Act – National Minimum Standards in relation to personal care</li> </ul>

## Information for tutors

---

### Delivery

The unit should be practically based wherever possible. Throughout this unit learners would benefit from practising skills using role-play and simulated activities such as the use of dolls for baby bathing and nappy changing. Tutors could also give learners video examples of care practice and case studies.

The tutor could start delivery of this unit by asking learners to consider how they would like their personal care needs to be met if they were, for example, in bed in hospital following surgery on their back. This would generate discussion and help learners to understand the emotional needs of individuals during personal care. Learners may refer to their own experiences which will make the unit content relevant. Learners could be encouraged to ask friends and colleagues about their experiences of receiving personal care. This could be explored further by inviting guest speakers to talk about their experiences.

Learners can discuss in groups the personal care needs of individuals using a wide range of case studies or care plans and then feed back to the rest of the group.

For learning outcome 2, learners could visit an early years setting or care home for the elderly to observe how carers respond to the needs of individuals. On return to the centre learners could discuss, in groups, their observations of the skills and personal qualities needed for the personal care of others. Learners could feed their observations back to the larger group. Learners will need to be reminded about issues of confidentiality.

Watching videos or television medical dramas could provide further opportunities to discuss the skills and personal qualities required for the personal care of others. Communication skills could be explored using role play.

A visit to an occupational therapy department may be possible to observe the range of equipment and see demonstrations of how the equipment may be used in personal care.

Learners could work in groups to find out the correct procedure, for example, for hand washing. Learners may access information from relevant websites, for example the Health Protection Agency, the Health and Safety Executive, and the Department of Health.

Learners could present the information on posters which could be displayed in the classroom.

A practical hand washing activity using a light box to identify if the correct hand washing routine is being followed is a good way to consolidate learning. Local health protection teams may be able to advise on the availability of light boxes.

An infection control nurse from the hospital may be invited to talk to learners about ways to avoid cross infection in health and social care settings.

For learning outcome 3, written procedures which relate to personal care from a range of different settings would be a useful resource. Learners can work in groups to determine the reasons why it is important to follow the procedures.

Guest speakers could be invited from different settings. Learners could prepare questions to ask speakers about the importance of following their procedures.

## Outline learning plan

The outline learning plan has been included in this unit as guidance.

Topic and suggested assignments/activities
<p>Introduction to unit and structure of the programme of learning.</p> <p>Tutor led discussion – ‘How would you feel and want to be cared for if you were dependent on someone else for your personal care needs?’</p> <p>Case studies (of individuals in care settings) – analysing personal care and emotional needs of adults and babies/children.</p> <p>Assessment – using the case studies describe the personal care needs and emotional needs, during their personal care, of the baby/child and adult. (Learning outcome 1) [Functional Skills Level 1: Reading]</p>
<p>Tutor led discussion – ‘What skills and qualities do carers need?’</p> <p>Visits to settings/media clips – to observe and identify skills and qualities demonstrated by carers.</p> <p>Role play with peer observation – providing personal care to an individual dependent on a carer, for example helping an individual put on their coat, tie their shoes or wash their hands.</p> <p>Assessments – using case studies from Learning outcome 1 record the skills and personal qualities needed to care for each of the individuals. (Learning outcome 2)</p>
<p>Tutor led discussion – to identify range of health and social care settings.</p> <p>Guest speakers (from different settings) – provide information on their procedures for providing personal care. Learners to prepare and ask questions about the importance of these procedures.</p> <p>Paired research – impact of not following procedures, for example spread of infection in health care settings, injury to person whilst being moved.</p> <p>Assessment – using the case studies from Learning outcome 1 record procedures for providing personal care in the setting and the reasons why they need to be followed. (Learning outcome 3 and 4)</p>
<p>Assessment feedback, review and evaluation of unit.</p>

## Assessment

Assessment criteria may be linked together into one assignment task in response to case studies or care plans.

Learners could provide guidance notes for a new care worker to help them meet the personal care needs of two babies or children and two adults with different care needs.

To meet 1.1, learners must describe the personal care needs of two babies or children and two adults with different care needs. The descriptions will need to include information about the personal care required. To meet 1.2, learners must describe the emotional needs of the two babies or children and two adults during the care procedures.

To meet 2.1 and 2.2, learners will need to describe the personal skills and qualities needed for the personal care of others. Learners could refer to the individual needs of the babies, children and adults in the case studies.

To meet 3.1, learners will need to identify a health and social care setting and, to meet 3.2, they must identify the procedures which the setting has in place relating to personal care. To meet 3.3 they should give reasons why it is important that the procedures identified in 3.2 are followed. This information may be included in the evidence which learners prepared for 1.1, 1.2, 2.1 and 2.2. Alternatively, learners could present the information on posters.

# Unit 14: Creative Activities for Children

**Unit code:** F/501/7223

**QCF Level 1:** BTEC Level 1

**Credit value:** 4

**Guided learning hours:** 30

---

## Unit aim

This unit aims to help the learner develop the skills required for working with children, including work-related skills such as self-management, time management, being an effective team member, problem solving, working safely and communication skills. Learners will develop these skills within the context of finding out about the different types of creative activities children of different age groups may experience. The learner will be introduced to a range of creative activities suitable for pre-school and school-aged children.

While examples of creative activities are given in the unit content, we recognise that creative play can encompass more than the activities outlined in this unit.

The unit may be delivered in class or in a work setting. However, it is essential that the learner has significant practical experience of the different types of creative activities available to children of different ages.

## Essential resources

A range of different types of materials and tools will be necessary for the unit, for example different types of paint and paintbrushes, clay, textiles, modelling materials etc.

## Learning outcomes, assessment criteria and unit amplification

To pass this unit, the learner needs to demonstrate that they can meet all the learning outcomes for the unit. The assessment criteria determine the standard required to achieve the unit.

Learning outcomes	Assessment criteria	Unit amplification
1 Know about creative activities for children	1.1 describe creative activities for children aged 0-3, 3-5, 5-11, 11-16 years	<ul style="list-style-type: none"> <li><input type="checkbox"/> <i>Children:</i> 0-3 years; 3-5 years; 5-11 years; 11-16 years</li> <li><input type="checkbox"/> <i>Drawing:</i> eg ballpoint and felt pens, pencil, charcoal, wax resist, chalks, crayons</li> <li><input type="checkbox"/> <i>Collage:</i> eg white paper on coloured paper, coloured and textured paper, wool, string, fabric, found oddments</li> <li><input type="checkbox"/> <i>Painting:</i> eg bubble paints, blot painting, splatter painting, colour mixing, finger painting, straw painting; water colours, oil paints</li> <li><input type="checkbox"/> <i>Printing:</i> eg card edge, natural objects, string/block printing, leaf prints, mono printing</li> <li><input type="checkbox"/> <i>Puppets:</i> eg junk puppets, masks, mobiles, finger/hand puppets</li> <li><input type="checkbox"/> <i>Modelling:</i> eg junk, large junk, papier maché, clay, play dough</li> <li><input type="checkbox"/> <i>Crafts:</i> eg tie and dye, plaiting, twisting, knotting, stitching, weaving wool and/or paper</li> <li><input type="checkbox"/> <i>General skills:</i> presenting children's work; identifying different types of paper and their uses; cutting paper safely</li> </ul>

Learning outcomes	Assessment criteria	Unit amplification
2 Be able to demonstrate the work-related skills required in supporting creative activities for children	2.1 participate in a creative activity for children and demonstrate: <ul style="list-style-type: none"> <li>• self-management skills</li> <li>• a positive contribution as team member</li> <li>• meeting agreed deadlines</li> <li>• problem-solving skills</li> <li>• safe practice</li> <li>• communication skills</li> </ul>	<ul style="list-style-type: none"> <li>□ <i>Self-management</i>: flexibility; taking responsibility, eg gathering materials, setting up, tidying up; self-starting; assertiveness; readiness to improve own performance based on feedback</li> <li>□ <i>Time management</i>: attendance; punctuality; completing task within agreed timeline</li> <li>□ <i>Team member</i>: respecting others; cooperating with and supporting others; negotiating/persuading; contributing to discussions; awareness of interdependence on others</li> <li>□ <i>Problem solving</i>: identifying problem, eg lack of materials, materials will not work; making suggestions on how to solve problem; creative thinking</li> <li>□ <i>Health and safety</i>: safe use of tools, eg scissors, needles; non-toxic paints; unsuitable materials eg polystyrene chips, toilet rolls</li> <li>□ <i>Communication skills</i>: applying literacy skills, eg reading; able to produce clear and accurate records of activities; listening and questioning skills; discuss activities with colleagues, tutor, children</li> </ul>
3 Be able to assess own work-related skills in supporting children's creative activities	3.1 assess own work-related skills in supporting children's creative activities	<ul style="list-style-type: none"> <li>□ <i>Assess own work</i>: constructive feedback from colleagues/tutor/line manager; areas of strength and weakness; setting targets for further development</li> </ul>

## Information for tutors

---

### Delivery

This unit is a practical unit. The learner should have the opportunity to plan and experience a wide range of different children's creative activities. With this knowledge, the learner should be able to go into a workplace and make suggestions at team meetings about creative activities that are appropriate for the age of the children they are working with. Learners are not expected to have an in-depth knowledge of child development.

Throughout the unit the learner should also be assessed on their work-related skills. Where possible each session should give the learner the opportunity to demonstrate their self-management skills, ability to work as an effective team member, ability to solve problems and effective communication skills. Throughout delivery of this unit, the learner should be assessed on their ability to manage their time when planning, experimenting and tidying up at the end of the session. These are all critical work-related skills for working in children's settings. Learners will need to have a working knowledge of the health and safety issues related to preparing craft activities, for example safe use of scissors, ensuring paints are non-toxic, knowing that some materials are not safe for young children to handle, for example polystyrene chips. Learners may take turns to lead a small group in planning, preparing, experiencing and completing the activity.

The unit focuses on four different age groups of children: 0-3 years, 3-5 years, 5-11 years and 11-16 years. Learners are not required to experience activities for every year within each age group. The purpose of the age groups is to help the learner understand that children will be able to achieve more as they develop.

Each session should focus on one or more type of activity. Following an introduction to the unit, the first session may focus on the different types of paper that are available and their uses. Learners may then make up different types of paints and mix colours. As one assessment criterion is for the learner to make a positive contribution as a team member, the activities could be carried out in small teams.

At the end of each session, the learner could carry out a self-assessment of how effective their own work-related skills were during the activity. Peer assessment and tutor feedback could also be a useful source of information. This information may be recorded on a checklist or through other forms of recording documentation.

Collage is a popular form of creative activity in children's settings. However, it can be difficult for young children in particular if they do not have the ability to cut different materials or the appropriate tools. Learners should be given the opportunity to create collages using different types of materials, including textiles. They could also experiment with different types of glue to see which are the most effective.

Paints are generally found in all children's settings. Learners should be encouraged to experiment with different types of paint, for example water colour, poster paints, pastels, oils. They could then decide which age group could cope more effectively with each type of paint. Having experimented, the learner may then present the completed work to a high standard of presentation. This will help them develop the skills of displaying children's work.

Printing is also a popular creative activity in children’s settings. Learners should be encouraged to gather different ‘printing’ tools, for example card, tools, natural objects. They could also experiment to find the most appropriate way to put on sufficient paint to ensure a good print without having excessive paint. The learner may also be encouraged to share their experiences when working with children, for example younger children tend to ‘paint’ rather than print. The learner may also want to experience hand and feet printing and the importance of good organisation to ensure safety and minimal mess.

Making puppets can be good fun and the learner could research the different types of puppet that can be made before the session begins. They would then need to gather appropriate materials and have time to make different types of puppets.

Before the learner can experience three-dimensional modelling they will need to gather different materials. This may include food packaging, different types of paper, straws, wooden stirrers, cardboard boxes etc. The learner should then be encouraged to make small and large models. As with the collage activities, the learner will experience the challenges of cutting different thicknesses of materials and using the most appropriate types of glue. Learners should also have the opportunity to use clay and make different types of dough.

Many children will not have experienced different crafts, for example knitting, sewing. This session could be an opportunity for peer tutoring using the skills that they are familiar with. Learners could also have the opportunity to experience weaving using both materials and paper.

Throughout this unit the learner may keep a record of the different types of creative experience they have encountered. This record may be used to provide evidence for 1.1.

### Outline learning plan

The outline learning plan has been included in this unit as guidance.

Topic and suggested assignments/activities
Introduction to unit and structure of the programme of learning.
Practical – sessions to experience a range of creative activities suitable for children aged 0-3, 3-5, 5-11 and 11-16.
Assessment – record practical sessions undertaken, for example a file with completed products, display, photographic evidence. Learner to include notes with information on resources, health and safety issues and the suitable age range. (Learning outcome 1)
Tutor led discussion – identify work skills needed for participation in practical sessions.
Practical – create a way to record the work skills included in the unit content.
Activity – individual recording of own work skills used in practical sessions and self-assessment.
One-to-one tutorial to discuss work skills and self-assessment.
Assessment – evidence of work related skills identified in assessment criteria 2.1 demonstrated throughout delivery of unit. (Learning outcome 1, 2 and 3)
Assessment feedback, review and evaluation of unit.

## Assessment

For 1.1, the learner should be able to describe four different creative activities, one for each age range. The activities chosen should demonstrate understanding of the age range that the activity may be most appropriate, for example making glove puppets with the older age group but finger painting with the youngest age group. The description should include information about the resources necessary for the activity and health and safety issues. This work may be presented in a variety of different ways, for example a file with photographic evidence and a commentary to support it, poster or booklet. Lengthy descriptions of each activity are not required.

2.1 may be evidenced through witness testimonies, observation reports, peer group assessment, self-assessment checklists and/or one-to-one discussions with the tutor/line manager. The learner must be able to demonstrate that by the end of the unit they have developed each of the work-related skills stated in the unit content. It may be helpful for the learner to complete a review of their progress at the end of each session.

This will then be a valuable source of evidence for 3.1 when the learner is required to assess their own work-related skills. This criterion may be assessed through one-to-one discussions with the tutor/line manager or through written evidence. If discussions are used as an assessment method it is important that documentation is retained for internal and external verification.

# **Unit 15: Learning Experiences for Children and Young People**

**Unit code: J/501/7224**

**QCF Level 1: BTEC Level 1**

**Credit value: 4**

**Guided learning hours: 30**

---

## **Unit aim**

This unit will introduce the learner to a range of learning experiences suitable for babies and toddlers, pre-school children, primary school children and adolescents. Throughout the unit the learner will develop the skills that are essential for working with children and young people including self-management, time management, being an effective team member, working safely, problem solving, communication skills and IT. These skills will be developed within the context of finding out about and providing experiences for children and young people of different ages.

This unit may be delivered in class or in a work setting. However, it is essential that the learner has significant practical experience of the different types of learning experiences available to children and young people.

## **Essential resources**

A range of different resources are required for this unit, for example access to musical instruments, different types of table-top games, outdoor equipment. If equipment is not available, learners may be able to complete this unit in a practical work setting. Alternatively, learners may visit settings to observe the different types of equipment being used with children and young people of different ages.

## Learning outcomes, assessment criteria and unit amplification

To pass this unit, the learner needs to demonstrate that they can meet all the learning outcomes for the unit. The assessment criteria determine the standard required to achieve the unit.

Learning outcomes	Assessment criteria	Unit amplification
<p>1 Know about learning experiences for children and young people</p>	<p>1.1 describe learning experiences for children and young people aged 0-3, 3-5, 5-11, 11-16 years</p>	<ul style="list-style-type: none"> <li data-bbox="438 1220 829 1366">□ <i>Learning experiences 0-3 years:</i> language eg books, stories, rhymes; music, eg singing, listening, moving; treasure baskets; use of household utensils; playing with pram and bath toys; games, eg peek-a-boo, table top games; outdoor activities, eg visit to park, shops, seaside</li> <li data-bbox="438 1366 829 1512">□ <i>Learning experiences 3-5 years:</i> books, stories, rhymes and poems; music eg singing, listening, playing, moving; games, eg jigsaw puzzles, table-top games, computer software; outdoor activities eg gardening, ball games, kites, parachute games; cooking and baking</li> <li data-bbox="438 1512 829 1657">□ <i>Learning experiences 5-11 years:</i> language, eg books, magazines, poems; music eg singing, listening, playing, dancing; games, eg table top-games, floor games, computer software; outdoor activities eg skipping games, 'pavement' games, ball games; cooking and baking</li> <li data-bbox="438 1657 829 1803">□ <i>Learning experiences 11-16 years:</i> eg music; dance; exercise; yoga; computers; graphics; electronic games</li> </ul>

## Information for tutors

---

### Delivery

This unit is a practical unit. The learner should provide learning experiences for children and young people and also set up different experiences for different ages of children and young people. Throughout this unit the learner's work-related skills will be assessed.

The unit may be delivered in two ways. The tutor could hold different sessions focusing on the age group and the types of learning experience appropriate to them. Or tutors could hold different sessions focusing on the experience and then matching the experience to the age group of the children or young people.

The learner could be given the opportunity to visit the local library and choose a selection of books and stories that are suitable for children and young people of different ages. They should then be given the opportunity to read a story to a small group of children, if possible, or to other learners. The learner should also be encouraged to build up a small repertoire of finger rhymes and poems which could be used with children of different ages.

The learner should understand that there are four different areas within music ie singing, listening, playing and moving. Using these categories as a base, the learner could then build up a small repertoire of songs that are suitable for children and young people of different ages. They could also find music that children may enjoy listening and moving to. The learner should be able to identify simple instruments and have the opportunity to 'play' them, for example xylophone, different types of drum, glockenspiel, bells, chime bars. A visit to a local school or nursery to see the instruments in action could be a valuable experience for the learner.

The learner could be given the opportunity to experience a range of different types of games for children and young people. They may be able to bring in games that their own children have at home to share with other learners. A session may also be spent researching computer games. Several websites have games available for children and young people of all ages. Learners could consider the educational value, level of interest, recommended age etc.

If possible, the learner should have the opportunity to experience a range of different outdoor games, for example using a parachute, ball games, 'sport' games, for example egg and spoon race, sack race. Health and safety issues should be discussed. Gardening may also be included in this session, for example planting cress, mustard, seeds, flowers, vegetables.

Opportunities should be made available for the learner to gather simple recipes that may be used with children and young people of different ages. These could include making bread, sandwiches, porridge etc. Discussions during this session should focus on how health and safety are ensured when working with children and young people.

Throughout this unit the learner could keep a record of the different types of learning experiences they have provided, and for which age groups. This record may be used to provide evidence for 1.1.

## Outline learning plan

The outline learning plan has been included in this unit as guidance.

Topic and suggested assignments/activities
Introduction to unit and structure of the programme of learning.
Practical – sessions to experience a range of learning experiences suitable for children aged 0-3, 3-5, 5-11 and 11-16.
Assessment – record practical sessions undertaken, for example a file with completed products, display, photographic evidence. Learner to include notes with information on resources, health and safety issues and the suitable age range. (Learning outcome 1)
Tutor-led discussion – identify work skills needed for participation in practical sessions.
Practical – create a way to record the work skills included in the unit content.
Activity – individual recording of own work skills used in practical sessions and self-assessment.
One-to-one tutorial to discuss work skills and self-assessment.
Assessment – evidence of work related skills identified in assessment criteria 2.1 demonstrated throughout delivery of unit. (Learning outcome 1, 2 and 3)
Assessment feedback, review and evaluation of unit.

## Assessment

In order to achieve 1.1, the learner should be able to describe one different learning experience for each of the age groups identified in the unit content (four in total). The description could include information about the resources necessary for the experience and the associated health and safety issues. This work may be presented in a variety of different ways, for example a file with photographic evidence and a commentary to support it, poster or booklet.

2.1 may be evidenced through witness testimonies, observation records, peer group assessment, self-assessment checklists and/or one-to-one discussions with the tutor/line manager. The learner must be able to demonstrate that by the end of the unit they have gained each of the work-related skills stated in the unit content. It may be helpful for the learner to complete a review of their progress at the end of each session. This will then be a valuable source of evidence for 3.1 when the learner is required to assess their own work-related skills.

3.1 may be assessed through one-to-one discussions with the tutor/line manager or through written evidence. If discussions are used as an assessment method it is important that documentation is retained for internal and external verification.

# **Unit 16: Creative and Leisure Activities for Adults in Health and Social Care**

**Unit code:** L/501/7225

**QCF Level:** BTEC Level 1

**Credit value:** 4

**Guided learning hours:** 30

---

## **Unit aim**

This unit aims to help the learner develop the skills required for working with adults by finding out about a range of different types of creative and leisure activities for adults. The learner will be introduced to a range of creative and leisure activities suitable for different groups of adults in health and social care settings. Throughout the unit the learner will have the opportunity to develop the skills essential for working with adults in health and social care settings including self-management, being an effective team member, problem-solving and communication skills.

## **Essential resources**

A range of different resources are required for this unit, for example access to painting and drawing materials, modelling material, digital cameras, games. If equipment is not available learners may be able to complete this unit in a practical work setting. Alternatively, learners may visit settings to observe the different types of equipment being used with different groups of adults.

## Learning outcomes, assessment criteria and unit amplification

To pass this unit, the learner needs to demonstrate that they can meet all the learning outcomes for the unit. The assessment criteria determine the standard required to achieve the unit.

Learning outcomes	Assessment criteria		Unit amplification
1 Know about creative and leisure activities for adults	1.1	describe creative activities for adults	<ul style="list-style-type: none"> <li>□ <i>Adults:</i> physical difficulties eg mobility, hearing, vision, manipulation; learning disabilities; ill health; frailty; mental health, eg memory, concentration</li> <li>□ <i>Creative activities:</i> painting, eg oil, water colour; drawing eg charcoal, pastel, inks; photography; drama; pottery/clay modelling; sewing; weaving; knitting</li> </ul>
	1.2	describe leisure activities for adults	<ul style="list-style-type: none"> <li>□ <i>Leisure activities:</i> reading, eg newspapers, large print books/newspapers, hearing books; exercise, eg walking, swimming, exercise classes; gardening/growing; outings, eg to museums, galleries, stately homes, gardens; entertainment, eg to cinema, theatre, concerts, bingo, restaurants, pubs; games, eg word games, puzzles, quizzes, computer; music, eg singing, playing instruments, listening to music; cooking</li> </ul>

Learning outcomes	Assessment criteria	Unit amplification
2 Be able to use work-related skills required for creative and leisure activities for adults	2.1 participate in a creative and leisure activities for adults and demonstrate: <ul style="list-style-type: none"> <li>• self-management skills</li> <li>• a positive contribution as team member</li> <li>• meeting agreed deadlines</li> <li>• problem-solving skills</li> <li>• safe practice</li> <li>• communication skills</li> <li>• the use of IT</li> </ul>	<ul style="list-style-type: none"> <li>□ <i>Self-management</i>: eg flexibility, taking responsibility, self-starting, assertiveness</li> <li>□ <i>Team member</i>: eg respecting others, cooperating, negotiating/persuading, contributing to discussions, awareness of interdependence on others; discussing activities with colleagues, tutor, adults; readiness to improve own performance based on feedback</li> <li>□ <i>Time management</i>: attendance, punctuality, completing task within agreed deadline</li> <li>□ <i>Health and safety</i>: safe use of tools eg scissors, needles; non-toxic paints; outdoors; equipment; working in groups; taking risks in a safe environment</li> <li>□ <i>Communication skills</i>: eg applying literacy skills, able to produce clear and accurate records, listening and questioning skills; listening to instructions, reading tasks, recording activities</li> <li>□ <i>Problem solving</i>: eg identifying problem, making suggestions on how to solve a problem, creative thinking</li> <li>□ <i>Application of number</i>: eg manipulating numbers, maths awareness, applying mathematics in a practical context</li> <li>□ <i>Application of IT</i>: eg basic IT skills, use of internet search engines; safe practice eg identifying potential hazards, risks</li> </ul>
3 Be able to assess own work-related skills in creative and leisure activities for adults	3.1 assess own work-related skills required for providing creative and leisure activities for adults	<ul style="list-style-type: none"> <li>□ <i>Assess own work</i>: constructive feedback from colleagues/tutor/line manager; areas of strength and weakness; setting targets for further development</li> </ul>

## Information for tutors

---

### Delivery

The unit focuses on creative and leisure activities that may be appropriate for different groups of adults in health and social care settings; those with physical disabilities, those with learning disabilities, those who are ill and frail and those with mental health difficulties.

This unit is a practical unit. The learner should experience activities for adults and also set up different activities for different groups of adults. Throughout the unit the learner's work-related skills will be assessed. Where possible, sessions should give the learner the opportunity to demonstrate their self-management skills, ability to work as an effective team member, ability to solve problems and effective communication skills. Learners may take turns to lead a small group in planning, preparing, experiencing and completing the activity.

Learners will need to have a working knowledge of the health and safety issues related to creative and leisure activities when working with vulnerable adults.

The unit may be delivered in two ways. The tutor could hold different sessions focusing on different groups of adults and the types of activities appropriate to them. Or tutors could hold different sessions focusing on the activity and then match the activity to the groups of adults they may be suitable for.

Learners may work in small teams to plan, prepare, experience and complete oil and water colour painting or charcoal and pastel drawing. Discussion following the activity could focus on the suitability of each of the activities for the different groups of adults. The learner could carry out a self-assessment of how effective their own work-related skills were during the activities. Peer assessment and tutor feedback could also be a useful source of information. This information may be recorded on a checklist or through other forms of recording documentation.

Modelling with clay is an activity enjoyed by many adults as it has therapeutic benefits as well as encouraging creativity. Before learners can experience clay modelling they will need to plan the activity carefully as clay is very messy. Protective clothing and covering for tables will be required. Tools suitable for sculpting the clay could be made available.

Photography is a popular activity with many adults. Learners could be given the opportunity to use digital cameras to take portraits or images of natural environments, and to practise downloading, editing and enlarging images.

Opportunities should be made available for the learner to gather simple recipes that may be used with adults in health and social care settings. These could include making bread, sandwiches, porridge, light meals etc. This session should focus on the health and safety issues which may arise with different groups of adults.

The learner could experience a range of different types of games for adults. They may be able to bring in games that they have at home to share with other learners. A session may also be spent researching computer games. Several websites have quizzes and word games. Learners could consider the suitability of the games for the different groups of adults and discuss how the games may be adapted, for example larger font for adults with visual impairment.

Learners could visit the local library to choose and select reading materials available to different groups of adults.

Learners could work in groups to research how different groups and adults could access a range of activities. They could provide a handout reference for other learners.

Learners could work in groups to plan an outing for a group of adults whose needs and interests are outlined in a case study.

Through this unit the learner may keep a record of the different types of activities they have experienced. This record may be used to provide evidence for 1.1 and 1.2.

This unit may be delivered in class or in a work setting. However, it is essential that the learner has significant practical experience of the different types of activities available to adults. The list of activities provided in the unit content is not supposed to be exhaustive, and other appropriate activities can be included.

Visits to settings would provide opportunity for learners to observe and, if possible, participate in creative and leisure activities with groups of adults. Witness statements or a checklist signed by tutors or supervisors recording the learner's use of work-related skills could provide evidence towards 2.1.

Activity coordinators from different settings could be invited to speak about their experience of leisure and creative activities for adults. Learners could prepare questions to ask speakers about the adult's enjoyment of the activities, planning, health and safety issues solving any problems that arose. This will help learners to understand the importance of work-related skills in providing leisure and creative activities for adults.

### Outline learning plan

The outline learning plan has been included in this unit as guidance.

Topic and suggested assignments/activities
Introduction to unit and structure of the programme of learning.
Practical – sessions to experience a range of creative and leisure activities suitable for adults with different needs.
Assessment – record practical sessions undertaken, for example a file with completed products, display, photographic evidence. Learner to include notes with information on resources, health and safety issues and suitability for adults' needs. (Learning outcome 1)
Tutor-led discussion – identify work skills needed for participation in practical sessions.
Practical – create a way to record the work skills included in the unit content.
Activity – individual recording of own work skills used in practical sessions and self-assessment.
One-to-one tutorial to discuss work skills and self-assessment.
Assessment – evidence of work related skills identified in assessment criteria 2.1 demonstrated throughout delivery of unit. (Learning outcome 1, 2 and 3)
Assessment feedback, review and evaluation of unit.

## Assessment

For 1.1, the learner should be able to describe four different creative activities. The activities chosen should demonstrate understanding of the adults that the activity may be most appropriate for, for example clay modelling with adults with visual impairment but water colour painting with frail adults. The description should include information about the resources necessary for the activity and health and safety issues. This work may be presented in a variety of different ways, for example as a file, photographic evidence and a commentary to support it, poster, booklet. Lengthy descriptions of each activity are not anticipated.

For 1.2, the learner should be able to describe four different leisure activities. The activities chosen should demonstrate understanding of the adults that the activity may be most appropriate for, for example swimming at the leisure centre for adults with learning disabilities but growing tomatoes in pots for adults with mobility difficulties. The description should include information about the resources necessary for the activity and health and safety issues. This work may be presented in a variety of different ways, for example a file, poster, booklet. Lengthy descriptions of each activity are not anticipated.

2.1 may be evidenced through witness testimonies, observation records, peer-group assessment, self-assessment checklists and/or one-to-one discussions with the tutor/line manager. The learner must be able to demonstrate that by the end of the unit they have developed each of the work-related skills stated in the unit content. It may be helpful for the learner to complete a review of their progress at the end of each session.

This will then be a valuable source of evidence for 3.1 when the learner is required to assess their own work-related skills. This criterion may be assessed through one-to-one discussions with the tutor/line manager or through written evidence. If discussions are used as an assessment method it is important that documentation is retained for internal and external verification.

# **Unit 17: Promoting Healthy Eating in Care**

**Unit code:** R/501/7226

**QCF Level:** BTEC Level 1

**Credit value:** 4

**Guided learning hours:** 30

---

## **Unit aim**

This unit aims to help the learner to develop the skills required for preparing healthy drinks and snacks for groups in health and social care settings. Learners will be given the opportunity to find out about how food contributes to the health of individuals. The learner will be introduced to the types of drinks and snacks suitable for different groups of people. They will learn how to make healthy drinks and snacks to meet individual needs.

It is essential that the learner has practical experience of preparing drinks and snacks. This may be in class or in a work setting.

## **Essential resources**

Learners will need appropriate resources to make drinks and snacks. If resources are not available learners may be able to complete some of this unit in a practical work setting.

## Learning outcomes, assessment criteria and unit amplification

To pass this unit, the learner needs to demonstrate that they can meet all the learning outcomes for the unit. The assessment criteria determine the standard required to achieve the unit.

Learning outcomes		Assessment criteria		Unit amplification
1	Know how food contributes to the health of individuals	1.1	describe ways food contributes to the health of individuals	<ul style="list-style-type: none"> <li>□ <i>Food for good health</i>: relative proportions of the five food groups: meat, fish and alternatives; milk and dairy food; fruit and vegetables; foods containing fat/sugar; bread, cereals and potatoes</li> <li>□ <i>Individuals</i>: babies, children, adults</li> <li>□ <i>Physical health</i>: growth, eg milk for bone growth for babies and children; energy eg pasta for adults to provide fuel for exercise; body functions eg orange juice for babies, children and adults to fight infection; repair, eg chicken for adults after an operation</li> <li>□ <i>Emotional health</i>: wellbeing, eg mealtimes need to be relaxed and unhurried, presentation of food, personal preferences</li> </ul>
2	Know about healthy drinks and snacks for groups in health and social care settings	2.1	outline healthy drinks and snacks for groups	<ul style="list-style-type: none"> <li>□ <i>Healthy drinks</i>: milk; hot milk drinks; fresh fruit juice; smoothies eg made with fruit, yogurt, milk; water; sugar free drinks</li> <li>□ <i>Healthy snacks</i>: fruit, eg fresh, dried, stewed; raw vegetables with dips eg hummus; yogurt; cereal with milk; cheese; wholemeal bread, eg sandwiches, bread sticks, toast, toasted sandwiches, pitta bread; wraps; crispbread; nuts and seeds; beans on toast; scrambled eggs on toast</li> <li>□ <i>Groups</i>: young children; teenagers; elderly adults</li> </ul>

Learning outcomes	Assessment criteria		Unit amplification
3 Be able to make healthy drinks and snacks to meet individual needs	3.1	make healthy drinks and snacks to meet individual needs	<ul style="list-style-type: none"> <li>□ <i>Hygiene</i>: food storage; hand washing; preparation areas; utensils; crockery</li> <li>□ <i>Safety</i>: correct use of equipment, eg knives, blenders; ensuring correct food is given to individuals</li> <li>□ <i>Presentation of food and drink</i>: amount, eg according to needs of individual, age, stage of development, health, appetite; colour; arrangement of food; appropriate plate, bowl</li> <li>□ <i>Health needs</i>: special dietary requirements, eg for diabetes, allergies eg to dairy products, eggs, wheat, nuts, coronary heart disease, eg low in saturated fat</li> <li>□ <i>Individual needs</i>: vegetarian; cultural, religious; personal preference; physical needs, eg unable to chew</li> </ul>
	3.2	serve drinks and snacks to meet individual needs	

## Information for tutors

---

### Delivery

As many practical activities as possible should be included to help learners relate to the unit content. In addition, a wide range of delivery methods may be used to including tutorials, presentations, videos, worksheets and internet sources.

The tutor could start delivery of this unit by asking learners to complete a personal food diary. To understand the concept of a balanced diet they could use the internet to compare their diet with the eatwell plate on the Food Standards Agency website. Learners could work in groups to assess the strengths and weaknesses of their diets and make recommendations for a more balanced diet.

Learners could analyse the nutritional balance of menus from different health and social care settings.

A dietician may be invited to talk to the group. Learners could prepare questions to ask the speaker about the importance of a balanced diet for different age groups.

To gain an understanding of how food contributes to the health of individuals, a mixture of tutor-led input and individual learner research is required. In small groups learners could find out about the specific dietary needs of babies, children and adults. Each group could present their findings to the other learners. The results of the research could be incorporated into posters, which could be displayed in the classroom.

Learning outcome 2 gives learners the opportunity to use a range of different methods to determine an extensive range of healthy snacks and drinks appropriate for the different groups. The internet and journals could provide useful sources of information. Learners could visit a food market to research appropriate food.

Learners could work in small groups to complete the research. The learner may keep a record of the different drinks and snacks they have found out about. This record may be used to provide evidence for 2.1.

The particular dietary needs of individuals could be covered by the use of different case studies. Learners could find out about and answer questions on a worksheet related to the case study and present their answers to the rest of the group. Learners could plan healthy snacks and drinks for the individuals in the case studies.

Learners should be given as much practical experience as possible during delivery of learning outcome 3. Opportunities to prepare and present healthy drinks and snacks, appropriate for different age groups, reflecting a wide range of health and individual needs, will provide learners with knowledge and skills which can be applied to the workplace.

Learners could plan, make and present healthy snacks and drinks for members of their peer group. Peer assessment could take account of hygiene, safety, presentation and taste. Learners could undertake self-assessment, assessing their strengths and weaknesses and incorporating conclusions and recommendations.

Visits to different settings would give learners the opportunity to observe how individual needs are met at mealtimes.

## Outline learning plan

The outline learning plan has been included in this unit as guidance.

Topic and suggested assignments/activities
<p>Introduction to unit and structure of the programme of learning.</p> <p>Activity – individual outline of food and drink consumed in the last 24 hours.</p> <p>Tutor-led discussion to provide details on the five food groups.</p> <p>Activity – compare individual diet against the <i>eatwell plate</i>.</p> <p>Group discussion – ‘How can you improve your diet?’</p> <p>Guest speaker, eg dietician, practice nurse, to speak about the importance of diet to health. Learners to prepare questions to ask on the dietary needs of babies, children and adults.</p> <p>Assessment – record how food contributes to health of different individuals, in a format suitable for parents/carers. (Learning outcome 1) [Functional Skills: Writing]</p>
<p>Activity – learners to research detail of different foods and drinks suitable for healthy snacks for young children, teenagers, elderly adults. Information could include components of fruit smoothie, content of ready-made sandwiches compared with home-made sandwiches. Research could include internet research, visits to settings eg day centres, nurseries, shops.</p> <p>Present research findings to other groups.</p> <p>Assessment – learners to record information about healthy snacks and drinks in a format suitable for a display in different settings. For example, a nursery, after-school club, day centre or health centre. (Learning outcome 2)</p>
<p>Activity – quiz to test understanding of hygiene and safety in food preparation.</p> <p>Tutor-led discussion following feedback.</p> <p>Group research – each group selects a different dietary requirement and researches suitable snacks.</p> <p>Present research findings to other groups.</p> <p>Practical session – learners make healthy drinks and snacks for different dietary requirements.</p> <p>Assessment – make healthy drinks and snacks for different dietary requirements. Present drinks and snacks attractively. Demonstrate hygiene, and health and safety throughout. (Learning outcome 3)</p>
<p>Assessment feedback, review and evaluation of unit.</p>

## Assessment

For 1.1, learners will need to identify two different foods that are important for the health of each of the groups: babies, children and adults. For each food identified the learner will need to describe how it contributes to health. This information could be evidenced in a number of different ways, for example a leaflet or poster.

To meet 2.1 learners need to outline five healthy drinks and five healthy snacks for each of the different groups: young children, teenagers, elderly adults. The drinks and snacks chosen should demonstrate understanding of the needs of each group and the food and drink that may be most appropriate. The learner needs to include

information about the constituents of the drink and snack, for example the sandwich filling, ingredients of smoothie. The evidence for this criterion could be provided in a loose-leaf file as a reference document or as a chart or booklet.

To meet 3.1 and 3.2, learners need to make and serve two healthy drinks and snacks for two individuals with different needs. The learner must be able to demonstrate that they have selected appropriate drinks and snacks for the identified individuals. Learners must also show awareness of hygiene, safety and attractive presentation in making and serving the drinks and snacks. This may be evidenced through witness testimonies supported with photographic evidence. It is important that documentation is retained for internal and external verification.

---

## **Unit introduction**

Understanding how to communicate successfully is fundamental for progress in the world of work and has particular importance in the health and social care sector. In this unit learners will be introduced to the principles of communication. Learners will apply this knowledge to communicate effectively with adults with different needs. The learner will also be introduced to a range of ways to communicate with babies, children and teenagers.

## Learning outcomes, assessment criteria and unit amplification

To pass this unit, the learner needs to demonstrate that they can meet all the learning outcomes for the unit. The assessment criteria determine the standard required to achieve the unit.

Learning outcomes		Assessment criteria		Unit amplification
1	Know about the principles of communication in health and social care	1.1	outline different forms of communication	<ul style="list-style-type: none"> <li>□ <i>Forms of communication:</i> one to one; groups; formal; informal; verbal; eg tone of voice, pitch; non-verbal eg body language – facial expressions, eye contact, posture, use of hands; pauses; turn taking; questioning; active listening; written communication</li> <li>□ <i>Communicating with non-verbal children and/or adults:</i> (due to learning disabilities or medical conditions) sign language, understanding individual methods of communication; importance of observing facial expression, moods, reactions and gestures; the need for patience</li> </ul>
		1.2	describe barriers to communication in health and social care	<ul style="list-style-type: none"> <li>□ <i>Barriers to communication:</i> physical barriers eg background noise; different language; impairments eg hearing loss, visual impairment, speech difficulties; emotional factors eg fear, anxiety; complex language eg use of jargon; patronising communication eg words, tone, behaviour; cultural differences</li> </ul>
2	Understand how to communicate with adults in health and social care	2.1	explain ways to communicate with adults with different needs in health and social care	<ul style="list-style-type: none"> <li>□ <i>Different groups:</i> senior citizens; those with disabilities (sensory, emotional, physical or learning disabilities); those affected by illness or frailty</li> <li>□ <i>Ways to communicate:</i> show respect; appropriate body language; undivided attention; calm listening; give time for responses, check understanding; avoid patronising; use of signs, pictures, lip reading, translator; eye contact; awareness of cultural differences in terms of eye contact and body language</li> </ul>

Learning outcomes	Assessment criteria		Unit amplification
3 Understand how to communicate with babies, children and young people in health and social care	3.1	explain ways to communicate with babies, children and young people in health and social care	<ul style="list-style-type: none"> <li data-bbox="280 232 344 1227">□ <i>Different groups:</i> babies; children; teenagers; those with disabilities; those affected by illness or frailty</li> <li data-bbox="360 192 539 1227">□ <i>Ways to communicate:</i> using language appropriate to stage of language development; establish bond/rapport; give time; communicate at same level; avoiding patronising communication; active listening; checking understanding; open questions; being a good role model; using signs, pictures, translators</li> </ul>

## Information for tutors

---

### Delivery

Throughout this unit learners would benefit from practising skills using role play, accessing video examples of communication, using case studies and the opportunity to carry out simulated activities.

The tutor could start delivery of this unit by asking learners to consider situations when they experienced difficulties in communicating.

To develop knowledge and understanding of different forms of communication, learners could work in groups to analyse recordings from programmes such as *Holby City* or *Casualty*.

A video camera could be used to record communication in the classroom and learners could analyse their own use of body language and non-verbal communication to help understand how these may affect effective communication.

In groups learners can discuss and analyse the effect on individuals if they are unable to communicate their needs and report back to the rest of the group.

Role play could be used to explore barriers to communication. Key words could be collated on the board/flipchart.

Learners could work in groups to produce posters highlighting barriers to communication to display in the classroom to act as a reference throughout the unit.

For learning outcome 2, learners could visit a residential home to observe communication and, on return to the centre, discuss what they have learned. Learners could create a guidelines sheet on effective communication as a factsheet for other learners to follow.

When looking at ways to communicate, learners could discuss case studies in groups and then report back to the rest of the group. Learners may use PowerPoint or flipcharts to present this information.

Role play could be used for learners to practise their skills in communicating effectively with adults.

Learners could be shown video clips of adults communicating with children for learning outcome 3. Learners could work in groups to consider ways to communicate effectively with children.

Learners could visit an early years setting, in small groups, to observe adults communicating with babies and children.

## Outline learning plan

The outline learning plan has been included in this unit as guidance.

### Topic and suggested assignments/activities

Introduction to unit and structure of the programme of learning.

Tutor-led discussion on how we communicate.

Activity – tutor demonstration of different forms of communication including verbal, non-verbal and active listening.

Practical session – activities to reinforce understanding of different forms of communication, for example, charades, pictorial. Learners encouraged to discuss their experiences.

Assessment – learner to produce notes on different forms of communication for their future reference. (Learning outcome 1)

Tutor-led discussion on barriers to communication.

Practical session – activities related to health and social care to reinforce the importance of communication skills for example asking an individual with hearing loss what they would like for breakfast, helping a child who is having difficulty with tying their shoe laces. Learners encouraged to discuss their experiences and any barriers to communication.

Assessment – learners to record information on barriers to communication in health and social care settings for their future reference. (Learning outcome 1)

Practical session – learners to devise a checklist to use when observing communication with adults in health and social care to include forms of communication and ways that adults communicate.

Activity – learners to visit health and social care settings to observe communication with adults, or watch DVDs showing communication in health and social care situations. Learners record ways that adults communicate.

Guest speaker – practitioner from health and social care setting for adults to speak about different ways to communicate.

Practical session – learners to role-play communicating with adults with different needs. Learners encouraged to discuss their experiences.

Activity – learners to be given scenarios of communication with adults of different needs. Learners to decide how they would communicate, and to present this to the rest of the group.

Assessment – learners to provide evidence of how to communicate with adults with different needs and why that method of communication is appropriate, for example, observation notes from a visit to a setting, leaflets on British Sign Language (BSL) with notes, witness statement evidencing effective learner's communication skills. (Learning outcome 2)

## Topic and suggested assignments/activities

Guest speaker – parent with a baby, learners encouraged to observe communication between parent and baby.

Tutor-led discussion – how did parent communicate with baby? For example, eye contact, listening, turn taking, signs, facial expressions.

Guest speakers – parents with children. Learners encouraged to observe, and where possible, communicate with children playing.

Tutor-led discussion – how did the parents/learners communicate with the children? For example, asking open-ended questions, listening to the children, use appropriate language, observing children.

Role-play communication with young people, working in small groups with one observer – patronising language, street language.

Demonstration of Makaton signs.

Practical session – learn Makaton signs to support a child's activity for example, rhyme, story, actions to support a song.

Assessment – learners to provide evidence of how to communicate with babies, children and young people and why that method of communication is appropriate, for example, observation notes from guest speakers, witness statement evidencing effective learner's communication skills. (Learning outcome 3)

Assessment feedback, review and evaluation of unit.

## Assessment

The assessment criteria for this unit could be combined and evidence collected in a small portfolio/loose-leaf file, or as a booklet to be used as a reference document when working in the health and social care sector.

To meet 1.1, learners must give a brief summary of different forms of communication. Learners could complete a prepared worksheet.

To meet 1.2, learners will need to give an accurate description of different barriers to communication. Examples which relate to the health and social care sector need to be given to support the description.

2.1 requires learners to explain how to communicate with adults with different needs. Case studies or video recordings may be used as a stimulus. Learners may be able to provide evidence from practical work settings of their effective communication with different adults, verified with witness statements. The learner will need to include a brief self-assessment which explains how the communication was effective to meet the criterion.

For 3.1, learners will need to consider ways to communicate effectively with babies, children and young people. One example from each of the three groups will be needed. Case studies or video recordings may be used as a stimulus. Learners may be able to provide evidence of their communication with different babies, children and young people from practical work settings, verified with witness statements. The learner will need to include a brief self-assessment which explains how the communication was effective to meet the criterion.

---

### **Unit aim**

The principal aim of this unit is for learners to develop a plan for starting work in health and social care by being given the opportunity to explore job opportunities across the health and social care sector. The learner will explore conditions of employment and the qualifications and skills required for different jobs in the sector. The learner will have the opportunity to set realistic short- and medium-term goals for their career pathway in health and social care.

## Learning outcomes, assessment criteria and unit amplification

To pass this unit, the learner needs to demonstrate that they can meet all the learning outcomes for the unit. The assessment criteria determine the standard required to achieve the unit.

Learning outcomes		Assessment criteria	Unit amplification
1	Know job opportunities in health and social care	1.1 identify jobs in different sectors of health and social care	<ul style="list-style-type: none"> <li>□ <i>Health care sector:</i> direct care workers; indirect care workers; jobs, eg health care assistant, adults' nurse, children's nurse, learning disabilities nurse, mental health nurse, midwife, dental nurse, dental hygienist, ambulance care assistant, paramedic, emergency call handler, receptionist, hospital porter</li> <li>□ <i>Social care sector:</i> community work; residential work; jobs, eg home care worker, community worker with families, residential care worker with adults, residential care worker with children, community worker with young people, personal assistant for adult with disabilities, social worker</li> </ul>
		1.2 describe a job role in a health and social care setting/department	<ul style="list-style-type: none"> <li>□ <i>Children's services:</i> eg nursery assistant, early years practitioner, childminder, playworker, crèche worker, hospital play specialist, early years teacher</li> </ul>
2	Understand terms and conditions of employment within health and social care	2.1 describe the terms and conditions of employment for jobs in health and social care	<ul style="list-style-type: none"> <li>□ <i>Work patterns:</i> hours of work; shift work, eg early starts, late finishes, night work, weekend work, bank holiday work; irregular work pattern; flexitime, days off during week; annual leave</li> <li>□ <i>Pay:</i> eg weekly, monthly, salary scales, increments</li> <li>□ <i>Benefits:</i> eg pension, bonus for overtime, uniform/clothing allowance, subsidised/free meals, training/professional development</li> </ul>

Learning outcomes		Assessment criteria	Unit amplification
3	Know about the qualifications and skills needed for jobs in health and social care	3.1 present information about qualifications and skills required for selected jobs in health and social care	<ul style="list-style-type: none"> <li>□ <i>Qualifications:</i> essential; desirable; general qualifications eg GCSEs, GCEs, diplomas; work-based qualifications eg NVQs; vocational qualifications eg BTEC Firsts, Nationals, apprenticeships; practical qualifications in eg food handling, moving and lifting, First Aid; higher qualifications, eg degree</li> <li>□ <i>Skills and qualities:</i> personal qualities, eg caring, empathy, gentle, respectful; work-related skills eg communication, teamwork, problem solving, self-management; level of fitness</li> <li>□ <i>Requirements:</i> Criminal Records Bureau (CRB) check</li> </ul>
4	Be able to plan how to start work within health and social care	4.1 produce a plan to start work within health and social care	<ul style="list-style-type: none"> <li>□ <i>Career planning:</i> personal skills audit, own abilities, interests, values, personal qualities, lifestyle, constraints</li> <li>□ <i>Finding out about jobs:</i> career pathways; experience requirements; methods, eg websites, careers fairs, journals, people, eg family, friends, tutor</li> <li>□ <i>Making plans:</i> consider options; realistic short-term goals, medium-term goals</li> </ul>

## Information for tutors

---

### Delivery

Tutors delivering this unit have the opportunity to use a wide range of techniques including presentations, seminars, practical workshops, external trips and guest speakers. Additional learning resources can include journals, videos, DVDs, case studies, learner presentations and group work.

The tutor could start delivery of this unit by inviting guest speakers working in different jobs across the health and social care sector. Learners could prepare questions to ask speakers about their job roles and conditions of employment.

Learners may be able to visit different health and social care settings and interview or work shadow an employee. On return to the centre learners could create a leaflet to include information about the job role and conditions of employment as a factsheet for other learners to follow.

Videos and case studies may be used to help learners understand the range of job roles in the sector, and the difference between direct and indirect care.

In groups learners could complete web-based research into job roles in different settings and departments in health and social care, and then report back to the rest of the group.

For learning outcome 2, learners could work in groups and use the local and national press and the internet to find a variety of job adverts and list the work patterns, pay and benefits advertised.

The opportunity to analyse real job descriptions, covering a wide range of jobs in health and social care, would help learners to understand the similarities and differences between the work patterns, pay and benefits of different jobs in the sectors.

Learners could be grouped with those who are interested in similar jobs to complete web-based research into the qualifications, skills and qualities required for their preferred jobs in the sector and then report back to the rest of the group. Learners may use PowerPoint or flipcharts to present this information.

Learners could access careers advice from LearnDirect to help them begin their career plan. The need for goal setting and the difference between long-term and short-term goals could be explored through a question and answer session.

Learners at this level may need support in completing a personal skills audit and identifying and setting long-term and short-term goals for themselves for learning outcome 4. This may be achieved through one-to-one discussion or tutorials.

## Outline learning plan

The outline learning plan has been included in this unit as guidance.

### Topic and suggested assignments/activities

Introduction to unit and structure of the programme of learning.

Tutor-led discussion on job opportunities in:

- health care
- social care
- children's services.

Small group research – learners select one of the above and gather information about the following:

- range of jobs
- working patterns
- pay
- benefits
- qualifications
- skills and qualities
- additional requirements eg Criminal Records Bureau (CRB).

Research could involve internet, visits to settings, professional journals.

Activity – group presentation of information to include a factsheet for other learners.

Activity – learners invite an employee from the chosen sector to share information about their job. Alternatively, learners may visit an appropriate work setting or talk to an employee to gather information.

Activity – using the information gathered from the group work on skills, qualities and qualifications, the individual learner carries out a personal skills audit, eg using a template or online assessment.

One-to-one tutorial to discuss opportunities in line with skills audit.

Assessment – using the information gathered from the activities outlined above, individual learners provide evidence for each of the assessment criteria within the unit. (Learning outcome 1, 2, 3 and 4)

Assessment feedback, review and evaluation of unit.

### Assessment

The assessment criteria for this unit may combined into one assignment task as a plan to start work. This may take the form of a loose-leaf folder.

To meet 1.1, learners will need to state three different jobs in each of the following: health care, social care and children's services.

To meet 1.2, learners will need to select one health and social care setting/department, for example a residential care home for the elderly, a community home for adults with learning disabilities, a hospital ward, a day care setting for children and describe one job in the selected setting.

To meet 2.1, learners must select one job in health care, one job in social care and one job in children's services and compare the work patterns pay and benefits. This could be presented in the format of a chart.

For 3.1, learners will need to give details about the skills, qualities and qualifications required for different jobs: one in social care, one in health care and one in children's services. These could be the three jobs selected for 2.1.

The career plan required for 4.1 requires the learner to undertake a personal skills audit and identify their interests. This could be recorded using a pro forma.

Learners will need to provide evidence of their research into possible jobs in health and social care. This may be evidenced with leaflets, downloads from websites, discussions with the class group, tutors or careers advisers.

The career plan should identify one medium-term goal and two short-term goals.

### **Unit aim**

This unit aims to help the learner develop work-related skills by being given the opportunity to work with others to find out about an aspect of health and social care. The learner will be introduced to a range of health and social care topics and work with members of a group to research a topic that interests them. Throughout the unit the learner will have the opportunity to develop the teamworking skills essential for working in health and social care including communication skills, self-management and problem-solving skills.

## Learning outcomes, assessment criteria and unit amplification

To pass this unit, the learner needs to demonstrate that they can meet all the learning outcomes for the unit. The assessment criteria determine the standard required to achieve the unit.

Learning outcomes		Assessment criteria		Unit amplification	
1	Be able to find out about an aspect of health and social care	1.1	identify an aspect of health and social care for research	<ul style="list-style-type: none"> <li>□ <i>Aspects of health and social care:</i> eg access to leisure facilities for people with mobility difficulties, day care provision for young children, analysis of menus in care homes for the elderly, access to public transport for people who use a wheelchair, social activities for people with hearing impairment, local access to national health dentists</li> <li>□ <i>Finding information:</i> eg use internet search engines, questionnaires, interviews, collect evidence, confidentiality</li> <li>□ <i>Teamwork:</i> eg helping other team members, contributing ideas, cooperating, negotiating, persuading, respecting the contribution of others</li> </ul>	
		1.2	work as a team member in finding relevant information		
2	Be able to demonstrate work-related skills in presenting information as a team member	2.1	use communication skills to present information clearly and accurately	<ul style="list-style-type: none"> <li>□ <i>Communication skills:</i> eg applying literacy skills, able to produce clear and accurate records, listening and questioning skills</li> </ul>	
		2.2	make a positive contribution as a team member	<ul style="list-style-type: none"> <li>□ <i>Team member:</i> eg helping other team members, contributing ideas, cooperating, negotiating, persuading, respecting others</li> </ul>	
		2.3	use self-management skills to meet agreed deadlines and solve problems	<ul style="list-style-type: none"> <li>□ <i>Self-management:</i> eg flexibility, organising self, accepting responsibility; meeting agreed deadlines eg completing all set tasks, completing tasks on time; problem solving eg recognising problems, making suggestions on how to solve problems, thinking creatively to solve problems</li> </ul>	

Learning outcomes	Assessment criteria	Unit amplification
3 Be able to discuss own work-related skills in finding out about an aspect of health and social care	3.1 discuss own work-related skills in finding out about an aspect of health and social care	<ul style="list-style-type: none"> <li>□ <i>Assess own work:</i> constructive feedback from colleagues/tutors/line managers; areas of strength and weakness; setting targets for further development</li> </ul>

## Information for tutors

---

### Delivery

This unit has been designed to enable learners to develop their teamworking skills by working in groups to find out about an aspect of local health and social care.

The tutor could start delivery of this unit by introducing a wide range of possible topics to act as a stimulus to help learners select a topic that interests them.

Tutors could use a wide range of techniques including presentations, practical workshops, external trips and guest speakers to stimulate learner interest. Additional resources can include local newspapers, journals, videos, DVDs, and case studies.

Learners should be involved in selecting the aspect of local health and social care for their team to research. Teams could be made up of around three to five learners.

In small groups learners can discuss and analyse appropriate methods to use when researching aspects of health and social care and then report back to the rest of the group.

In their team, learners can discuss possibilities for tasks and decide which tasks are manageable, achievable and match the skills and interests of the team members in 'what if?' scenarios. Learners could agree an action plan which involves contributions from all team members.

Learners will need a mixture of tutor support and individual research to complete their agreed tasks. This may include suggestions by the tutor of suitable websites, appropriate methods for obtaining relevant information, helpful local organisations and personnel who could be contacted.

Learners could work in teams to design a checklist to record when and how they used work-related skills during planning, researching and presenting their research.

Presentation of the team's research to the whole group provides the opportunity for individuals to demonstrate their communication skills and make a positive contribution as a team member. The whole group could be involved in peer assessment of communication skills, which would be helpful to learners when completing self-assessment of their work-related skills for learning outcome 3.

Learners should be encouraged to analyse their own performance in the team task for learning outcome 3, using evidence from their checklist. Learners should concentrate on their own work-related skills as a member of the team rather than how well the team outcome was achieved. Ways for learners to develop work-related skills could be explored through tutorials.

## Outline learning plan

The outline learning plan has been included in this unit as guidance.

### Topic and suggested assignments/activities

Introduction to unit and structure of the programme of learning.

Tutor-led discussion – what makes a good team? What roles are there within a team?

Group activity – ground rules for team work.

Team building activities.

Tutor-led discussion on what is involved in a group project, eg what information to gather, how to gather information, how to present the information, timescales and team roles.

Activity – work-related skills – design a format to log communication skills and their contribution as a team member.

Tutor-led discussion on possible topics to research.

Small group tutorial to select a topic to research from a given list and agree deadlines (if learners are particularly interested in a topic not on the list, this may also be acceptable).

Group work – plan research including allocation of individual tasks.

Tutor-led discussion on self-management skills eg managing time, solving problems.

Activity – work-related skills – add the self-management skills to the log.

Assessment:

Small group work – gather information for group project.

Small group tutorials on a regular basis to monitor progress.

Work on presentation for group project.

Present information (Learning outcomes 1, 2 and 3)

Assessment feedback, review and evaluation of unit.

### Assessment

For 1.1 the learner will need to outline the aspect of local health and social care they have chosen to investigate with the group.

How the team negotiated and planned the tasks, the methods chosen to find the relevant information, the tasks allocated to individual team members and the contribution of individuals may be presented in the form of a record of group discussions. To meet the requirements for 1.2, the contribution of individuals will need to be identified and assessed which may be through witness testimonies, peer group or tutor assessment. Documentation will need to be retained for internal and external verification.

Evidence for 2.1 will depend on the method chosen by the group to feed back the information. This may be in the form of a short talk, a poster, PowerPoint slides or a leaflet. The communication skills used by individuals will need to be assessed. This may be evidenced through witness testimonies, peer group assessment, and/or one-to-one discussions with the tutor/line manager. Documentation will need to be retained for internal and external verification.

Learners could complete a self-assessment checklist where they record the contribution they made as a team member, how and when they used self-management skills, when they met deadlines agreed by the team and situations when they used problem-solving skills to meet 2.2 and 2.3.

This checklist will then be a valuable source of evidence for 3.1 when the learner is required to discuss their own work-related skills. This criterion may be assessed through one-to-one discussions with the tutor/line manager or through written evidence. If discussions are used as an assessment method it is important that documentation is retained for internal and external verification.

# **Unit 21: Investigating Rights and Responsibilities at Work**

**Unit code: J/501/6414**

**QCF Level 2: BTEC Level 2**

**Credit value: 1**

**Guided learning hours: 10**

---

## **Unit aim**

Employees and employers have responsibilities to each other. They should also expect their rights to be upheld. These rights and responsibilities relate to areas such as the provision of terms and conditions of employment, privacy of personal information, health and safety, equal opportunities and the right to be paid a minimum wage. The Health and Safety at Work Acts set out responsibilities and rights for both employees and employers. Employees are expected to carry out their work in a way that has regard to the safety of others. Employers are expected to abide by a range of requirements governing such aspects as providing safe machinery and equipment, carrying out regular health and safety checks, ensuring the training of employees in health and safety issues, and carrying out a risk assessment to assess the dangers of particular work activities.

The aim of this unit is to help the learner understand what is meant by the terms 'rights' and 'responsibilities' and how they are enforced. They will also gain an understanding of some of the legislation that is there to protect them and the employer. The unit will also help the learner find sources of help and advice relating to their rights and responsibilities.

## **Essential resources**

Learners will require access to appropriate sources of information about rights and responsibilities in the workplace.

## Learning outcomes, assessment criteria and unit amplification

To pass this unit, the learner needs to demonstrate that they can meet all the learning outcomes for the unit. The assessment criteria determine the standard required to achieve the unit.

Learning outcomes	Assessment criteria	Unit amplification
1	<p>Understand why rights and responsibilities are important in a workplace</p> <p>1.1 explain reasons why rights and responsibilities are important in a workplace</p>	<ul style="list-style-type: none"> <li>□ <i>Reasons why rights and responsibilities are important: safety and wellbeing of staff, visitors and customers in the workplace, complying with the law, complying with standards and morals of our society, provides guidelines for resolving workplace problems or conflict in an appropriate way, establishes order and agreed obligations in a workplace, enables employers to conduct business in a fair and productive way, protection of employees, protection of employers</i></li> <li>□ <i>Types of rights: rights eg human rights, rights in workplace, rights of the child, legal rights, informal rights, eg club membership</i></li> <li>□ <i>Types of responsibilities: eg member of society, workplace responsibilities, family responsibilities</i></li> </ul>
	<p>1.2 understand how rights and responsibilities are established and enforced in a workplace</p>	<ul style="list-style-type: none"> <li>□ <i>How rights and responsibilities are established and enforced: use of legislation, codes of conduct; regulatory or advisory bodies/organisations; employer and peer expectations</i></li> </ul>
2	<p>Understand why employees and employers have certain rights and responsibilities</p> <p>2.1 identify the rights and responsibilities an employee has at work</p> <p>2.2 explain the implications of employee rights and responsibilities</p>	<ul style="list-style-type: none"> <li>□ <i>Rights and responsibilities: health and safety; pay and benefits; job recruitment and advertising; terms and conditions at work; contract of employment; appraisal, promotion and training; dismissal, redundancy and retirement, privacy of personal information</i></li> <li>□ <i>Implications: safe work environment; policies and procedures; work culture</i></li> </ul>

Learning outcomes	Assessment criteria		Unit amplification
3 Be able to access sources of guidance and information about rights and responsibilities at work	3.1	identify key representative bodies for employers and employees who would be able to advise on rights and responsibilities	<ul style="list-style-type: none"> <li>□ <i>Representative bodies:</i> eg HSE (Health and Safety Executive), Citizens' Advice Bureau, Equality and Human Rights Commission, trade unions, staff associations, CRB (Criminal Records Bureau)</li> </ul>
	3.2	describe the type of advice given by key representative bodies	<ul style="list-style-type: none"> <li>□ <i>Type of advice:</i> safety of working environment and practices; financial; legal; benefits</li> </ul>

## Information for tutors

---

### Delivery

Although this unit could be presented through small group discussions, it is important to use a range of delivery methods. Television programmes or extracts from films can be a valuable learning tool. Similarly, speakers invited to share their experiences can also be a useful source of information.

Learners could consider the concept of rights and responsibilities in general before they focus on those that relate to the workplace. Discussion might include human rights, children's rights, consumers' or patients' rights, rights and responsibilities set out in legislation and those that are less formal such as those relating to particular groups or settings (eg within a school, society or club): they could consider issues such as justice, fairness, equality, citizenship and safety. They can then go on to relate these to the context of the workplace.

Tutors will need to be creative in their approach to this unit which is largely based on knowledge and understanding rather than skills. Active learning, however, can still be achieved, for example through learners going into the workplace to interview employers and employees or through role-playing scenarios. Debate and discussion should also be encouraged, particularly when defining the terms and considering rights and responsibilities beyond those enshrined in law.

For each assessment criterion, it is likely that group discussion and shared research will be appropriate. However learners should independently record their assessment evidence.

### Assessment

In order to achieve 1.1, the learner must be able to give at least one reason why rights are important in the workplace, and at least one reason why responsibilities are important in the workplace. In addition, the learner's explanations must show a clear understanding of the terms 'rights' and 'responsibilities'.

For 1.2, the learner will need to consider how rights and responsibilities are established and enforced at work. Learners could be provided with a case study which requires them to identify how certain aspects of legislation could be enforced. Alternatively the learner could select two different rights and explain how they are enforced in the workplace.

For 2.1 and 2.2, the learner is required to identify at least two rights and responsibilities for each area listed in the content. Employer rights are much fewer than employer responsibilities; it is reasonable, therefore, that the learner should focus largely on employer responsibilities. They must also be able to explain the implications of the rights and responsibilities, rather than just listing them. So, for example, a learner listing an employee's right to one week's notice for every full year worked, could note that this means that an employer cannot dismiss a member of the workforce on the spot simply because they are no longer needed.

For 3.1, the learner must identify three key representative bodies. They must then describe the type of advice given by each of the chosen representative bodies. Trade unions, staff associations and bodies such as the CBI or trade associations as sources of information and guidance. A case study may be used as an assessment method for this criterion.

## Unit 22:

## Managing your Health at Work

**Unit code:**

**J/501/6137**

**QCF:**

**BTEC Level 2**

**Credit value:**

**1**

**Guided learning hours: 10**

---

### Unit aim

The aim of this unit is to help the learner understand how they can be instrumental in managing their own health whilst at work. The learner will find out what their responsibility is in maintaining good health at work. They will consider the importance of taking regular breaks throughout the day, maintaining a balanced diet and wearing suitable clothing for the job. The learner will also learn what services the employer might offer to the employee and other sources of help to ensure good health at work.

### Essential resources

Learners will require access to appropriate sources of information about maintaining good health at work.

## Learning outcomes, assessment criteria and unit amplification

To pass this unit, the learner needs to demonstrate that they can meet all the learning outcomes for the unit. The assessment criteria determine the standard required to achieve the unit.

Learning outcomes		Assessment criteria		Unit amplification
1	Understand the employee's role in maintaining good health at work	1.1	explain how employees can maintain good health in the workplace	<ul style="list-style-type: none"> <li>□ <i>Employee's role:</i> appropriate diet and exercise; reduce and report potential risks and hazards; wear correct protective clothing if required; take regular breaks, maintain work-life balance; manage ill health appropriately</li> </ul>
2	Know the services employers can provide to help maintain the health of the workforce	2.1	explain services that can be provided by employers to help maintain the health of the workforce	<ul style="list-style-type: none"> <li>□ <i>Services provided by employers:</i> first aid; health surveillance and medical check-ups; access to health support networks eg advice on dealing with addictions, counselling services; sick pay; health initiatives to benefit employees eg healthy eating campaigns in workplace canteen, keeping active campaigns, subsidised gym memberships or bicycle purchases for staff, onsite gym or recreational facilities, free annual flu vaccinations at work</li> </ul>
3	Know sources of help to ensure good health at work	3.1	describe different sources of help to ensure good health at work	<ul style="list-style-type: none"> <li>□ <i>Sources of help:</i> workplace occupational health; trade unions; community occupational health; first aid officer; health and safety officer; support networks (particularly for self-employed workers)</li> </ul>
		3.2	explain the services offered by different sources of help	<ul style="list-style-type: none"> <li>□ <i>Services offered by sources of help:</i> prevention of risks or hazards to health in the workplace; counselling for stress, addictions or any other personal difficulties; advice on rights and responsibilities in the workplace; risk assessments; provision of specialist support equipment, first aid treatment to deal with injuries or medical incidents in the workplace</li> </ul>

## Information for tutors

---

### Delivery

Tutors delivering this unit have the opportunity to use a wide range of techniques including presentations, seminars, practical workshops, external trips and guest speakers. Additional learning resources can include journals, videos, DVDs, case studies, learner presentation and group work.

In the learning outcome 1, learners will need to explore the role they have to play in maintaining their own health at work. Practical scenarios may be given which allow the learner to identify what action they could take to ensure good health, for example 'How can employees maintain good health when a sickness bug goes through the work place?' Learners could also be provided with newspaper or magazine articles to find out what types of health situations arise and how good health may be promoted.

In the learning outcome 2, the learner will find out about the services that an employer might provide to promote good health. If possible, a local employer could be invited to talk about the services they offer. Alternatively an internet search could be undertaken of large companies to find out what services they offer.

Learners should be given the opportunity to find information on different sources of help available to them at work. They should understand the role of the service and what the service provides. It would also be appropriate to consider services available to the self-employed worker.

### Assessment

In order to achieve 1.1, the learner must explain how employees can maintain good health in the workplace. The learner will need to provide detailed information on five different examples, for example the employee is responsible for maintaining a healthy diet and taking regular exercise. Practical examples of how this can be achieved must also be provided, for example using the stairs instead of the lifts, and drinking sufficient water throughout the day. This information could be evidenced in a number of different ways, for example the learner may gather the information and present it to the group or they may prepare an article for an internal newsletter for colleagues. If this assessment method is chosen, the learner should use language, formatting and structure that is appropriate for the intended audience.

For 2.1, the learner must explain two different services that an employer provides to promote healthy working. This evidence may be provided in the form of a letter to employees naming the service on offer and explaining what the service is. Alternative methods of evidencing learning may be used.

3.1 and 3.2 require the learner to describe different sources of help to ensure healthy working and explain the services provided. Three different sources should be described and an explanation of the services offered should be given for each source.

The learner could produce a leaflet or poster to evidence this. Alternatively they may participate in a discussion which highlights sources of help to ensure healthy working, with the tutor recording the required descriptions and explanations provided by the learner.

# Unit 23: Preparing for Work Placement

**Unit code:** T/501/6148

**QCF:** BTEC Level 2

**Credit value:** 1

**Guided learning hours:** 10

---

## Unit aim

Attending a work placement will give the learner the opportunity to experience a work setting. They will find out about the roles and responsibilities of individual employees, specific types of careers and general workplace skills. However, if the learner is not prepared for work placement and does not know what they expect to learn, then this valuable experience may not reach its full potential.

The unit will help the learner find out, prior to starting their placement, about the company or organisation where they are going to be working. It will also raise their awareness to the skills and knowledge that they already have and could use during the work placement. The learner will find out how to set goals which meet their employer's expectations. All these skills will be crucial when learners begin the job seeking process.

Although the term 'company or organisation' has been used throughout this unit, it can refer to any type of work placement for which the learner may be preparing.

## Essential resources

In order to make this unit relevant, the learner must be preparing to go on a suitable work placement. Employers must also be prepared for the upcoming work placement and support the learner in gathering relevant information.

## Learning outcomes, assessment criteria and unit amplification

To pass this unit, the learner needs to demonstrate that they can meet all the learning outcomes for the unit. The assessment criteria determine the standard required to achieve the unit.

Learning outcomes		Assessment criteria	Unit amplification
1	Understand the company or organisation where they plan to do the work placement	<p>1.1 explain key information about the company or organisation providing the work placement and where this information was obtained</p>	<ul style="list-style-type: none"> <li>□ <i>Information about the company/organisation:</i> type of company or organisation; ownership eg public or private; function eg service provision, retail, construction, logistics, administrative; location; size eg small, large, number of employees, number of departments, international, national or local organisation; internal and external customers</li> <li>□ <i>Sources of information:</i> eg company leaflets or brochures, company or organisation website, newspaper, magazine or internet articles about company or organisation, Job Centre Plus, learners who have previously been on work placement at the same company or organisation, staff from the company or organisation, conversation or correspondence with company or organisation providing the work placement</li> </ul>
2	Understand information they need before starting work placement	2.1	<ul style="list-style-type: none"> <li>□ <i>Terms and conditions of work:</i> hours of work; absence procedures; dress code; line manager or supervisor; health and safety responsibilities, eg evacuation procedures, first aid procedures, reporting hazards; refreshment facilities; seeking advice relating to work and/or colleague relationships</li> </ul>
		2.2	<ul style="list-style-type: none"> <li>□ <i>Tasks:</i> daily routine tasks eg opening post, taking messages, checking emails, checking equipment for health and safety purposes, setting up equipment, liaising with line manager; project work</li> </ul>

Learning outcomes	Assessment criteria		Unit amplification
3 Understand what the company or organisation expects of the learner during the work placement	3.1	explain why workplace values are important for success at the work placement	<ul style="list-style-type: none"> <li>□ <i>Workplace values</i>: definition of values, eg concepts and ideas that lead to workplace satisfaction; different types of values, eg place customer service at heart of business, produce quality products, celebrate diversity, promote mutual respect, encourage creativity, recognise and reward achievement and good work</li> <li>□ <i>Importance of workplace values in a work placement</i>: helps learner understand what is expected of them by employer and helps in meeting those expectations eg how to treat other staff and customers appropriately, how to do job to a high standard, how to prioritise daily tasks, how to make decisions</li> </ul>
3.2	describe personal presentation requirements appropriate to the placement	<ul style="list-style-type: none"> <li>□ <i>Personal presentation</i>: appropriate clothing for job role; personal hygiene; attitudes and behaviours; body language</li> </ul>	
3.3	explain how they could deal effectively with situations of emotional stress, difficulty or confusion during the work placement	<ul style="list-style-type: none"> <li>□ <i>Dealing effectively with situations of emotional stress, difficulty or confusion</i>: use appropriate sources of support and guidance in situations of emotional stress eg speak to work placement supervisor if there are difficulties in getting along with another colleague, ask questions or request clarification if instructions or messages are unclear or confusing, ask for help or guidance from other people if a task is difficult or unclear, consult user guides or request further training and assistance if nervous about using a new piece of equipment</li> </ul>	
4 Be able to set goals for the work placement including skills development	4.1	set specific, realistic goals for the work placement, including a goal that relates to skills development	<ul style="list-style-type: none"> <li>□ <i>Goal setting for the work placement</i>: different types of goals, eg personal goals, work-related goals, skills development; goals for the work placement should be in line with employer's expectations for the work placement; setting a goal that draws on a current skill or knowledge of learner or skills and knowledge the learner would like to acquire</li> </ul>

## Information for tutors

---

### Delivery

Although each learner will be attending a different work setting, the principles behind preparing for the work placement will be the same. Before starting to find out about their work placement, learners could be encouraged to discuss what information they need to know about the organisation in which they are going to be working. A checklist could be compiled by the learners to help direct their research. Learners could collect information on aspects such as the function of the organisation, its structure (if relevant) and types of customers. Information may also be gathered from the internet and visits to the careers office to find out about the organisation providing the work placement.

To help the learner understand the concept of 'terms and conditions' of work, they could undertake a comparison of different terms and conditions of work to identify the common elements. Although some aspects will not be relevant for work placement (eg annual leave entitlement) learners should be able to identify those terms and conditions that are relevant, for example dress code, absence notification, hours of work.

Learners should extract the relevant details about the main tasks relating to the job role or main areas of learning at the company or organisation. This could be done from leaflets or marketing brochures for the organisation, visits to the careers office and/or tutor-led group discussions. Ideally, the learner will have an interview with the employer prior to starting the work placement. This would provide them with an opportunity to find out about the tasks that they will be expected to undertake. Alternatively, learners who have previously participated in the same or similar work placement could be asked to speak to learners in small groups.

It would be useful for tutors to stress the importance of workplace values and rules and the possible skills or qualities needed to satisfy the requirements of the placement. To help learners understand the concept of 'workplace values', they could think about their own values, for example honesty, being trustworthy, respect for others. This could then be translated into the workplace situation and how it relates to day to day working and enhances the chances of a successful work placement experience.

Employers could be invited as guest speakers to discuss expectations of learners during work placement. It is important that learners are given the opportunity to discuss these qualities and expectations so that they can identify a range of possible skills and goals to aim for. These should be linked to their course requirements or career ideas, in order to help them get the most out of their time on work experience.

Learners going into a work placement might feel nervous and concerned that they will appear incompetent or will not be able to do what they are instructed to do. It would therefore be beneficial to prepare learners to deal effectively with any potential feelings of stress or confusion. For example, a group discussion or role play activity could be used to explore different types of stressful, confusing or difficult situations in a work placement; it could also assist learners in developing skill and confidence in asking appropriate questions or asking others for help and guidance. Alternatively, learners could watch a TV or film clip that depicts a stressful or confusing scene in the workplace and then hold a group discussion about what could be done to resolve the stress, difficulty or confusion in that

workplace scenario. This could help address learners' fears and concerns about handling uncertain or difficult situations they may encounter.

Learners may discuss possible work placement goals in group situations and/or individually with tutor or careers advisors, but should be encouraged to come up with their own final action plan, identifying personal targets and opportunities for development of skills or knowledge from the placement. Time will need to be spent helping learners produce relevant and realistic goals which are relevant to their situation.

## Assessment

In order to achieve 1.1, the learner must be able to explain key information about their proposed work placement and where this information was obtained. This explanation needs to provide information on the type, size and purpose of the organisation, the organisational structure and its internal and external customers (if relevant).

2.1 requires the learner to provide an explanation of the terms and conditions of work that are relevant to their work placement. Information could include detail such as hours of work, dress code, number of days attending work placement, breaks, absence procedures.

2.2 requires the learner to provide an explanation of the tasks that they are likely to do during work placement. This explanation should provide detailed information for each task and should not simply be a list. Details could include information on the procedures to be followed, health and safety issues, quality checking processes, for example check work has been completed to a satisfactory standard by the line manager, time scales (if relevant).

To achieve 3.1, the learner must be able to explain the importance of at least two workplace values and why they are important to a work placement experience. Part of this explanation should demonstrate the learner's understanding of what workplace values are.

Evidence of understanding of 3.2 could be included as part of 3.1. The learner must describe at least two personal presentation requirements for the upcoming work placement.

For 3.3, the learner needs to provide two examples of situations in the workplace where they might encounter stress, difficulty or confusion. For each example, the learner must explain at least one positive action they could take to help resolve the stress, difficulty or confusion. The learner's explanation of the positive action must be appropriate and relevant to the nature of the stressful, difficult or confusing situation which they have given as an example.

For 4.1, the learner must be able to demonstrate their ability to set specific, realistic goals for the work placement. The learner should need to provide four goals, one of which must be related to skills development. The skills development goal may relate to an existing skill which the learner would like to use during the work placement, or a new skill which the learner would like to acquire during the work placement.

## **Learning from Work Placement**

**Unit code:**

**L/501/6186**

**QCF:**

**BTEC Level 2**

**Credit value:**

**2**

**Guided learning hours: 10**

---

### **Unit aim**

Work placement can be a valuable experience for all learners. It can help them develop new skills and increase their knowledge of a vocational area. However, in order to achieve this, the learner must be able to reflect on what they have learned and use that learning for future development and goal-setting. Although this unit has been designed to be used after a learner has experienced a work placement, they will need to have gathered evidence during their work placement which they can apply in carrying out the requirements of the unit.

### **Essential resources**

Learners will need to have undertaken a period of work experience.

## Learning outcomes, assessment criteria and unit amplification

To pass this unit, the learner needs to demonstrate that they can meet all the learning outcomes for the unit. The assessment criteria determine the standard required to achieve the unit.

Learning outcomes		Assessment criteria		Unit amplification
1	Be able to present evidence of learning gained from tasks undertaken during the work placement	1.1	show evidence that explains the learning gained from tasks undertaken during the work placement	<ul style="list-style-type: none"> <li>□ <i>Evidence of tasks undertaken:</i> employer reference, tutor report, description of tasks undertaken, video log, reports, minutes of meetings attended</li> <li>□ <i>Presenting evidence:</i> methods, eg portfolio, CD, video, handwritten, electronic, word processed; verbal and written presentations; informal and formal presentations</li> <li>□ <i>Explaining learning gained from tasks undertaken:</i> what was learned from specific work placement tasks, when this was learned, how it was learned, how it can be evidenced</li> </ul>
2	Understand what skills were used or gained during the work placement	2.1	explain how they used their strengths or skills during the work placement and where they experienced challenges	<ul style="list-style-type: none"> <li>□ <i>Strengths and skills:</i> personal skills, eg self-management, team work, business and customer awareness, communication; prior knowledge and experience eg hobbies, interests, previous work experience, knowledge gained in school or college subjects; personal qualities eg enthusiasm, patience, confidence, curiosity</li> <li>□ <i>Challenges:</i> learning new skills, retaining information, establishing relationships with other people, prioritising tasks, asking others for help</li> </ul>
3	Understand aspects of the work placement that could have been improved	3.1	explain any aspect of the work placement experience that could have been improved and how it could have been improved	<ul style="list-style-type: none"> <li>□ <i>Aspects that could have been improved:</i> eg additional learning or experience of a particular task, practise certain skills before undertaking work placement, communicating more effectively with supervisor, managing time more efficiently</li> </ul>

Learning outcomes	Assessment criteria		Unit amplification
4	4.1	describe how the work placement experience might assist them in making choices about a future career	<ul style="list-style-type: none"> <li>□ <i>Making choices about a future career as a result of work placement:</i> eg knowledge of new vocational area or area of interest, confirming whether they do or do not wish to work in a particular sector or industry, awareness of personal skills, awareness of strengths and weaknesses, desire to find out further information about a particular career, industry or organisation</li> </ul>
	4.2	set short-term and long-term goals which build on their learning from the work placement	<ul style="list-style-type: none"> <li>□ <i>Setting goals:</i> SMART goals; skills and knowledge development, eg further study, investigate specific career options or work areas; employment opportunities or goals, eg apply for full time employment, seek voluntary work in a particular area</li> </ul>

## Information for tutors

---

### Delivery

In order to achieve this unit, the learner must have experienced a work placement. The length of time spent in the work placement is not defined, however sufficient time must be given to allow the learner to achieve the assessment criteria.

The learner will be expected to have gathered evidence of the tasks or activities that they are involved in during their work placement. They will then be able to use the evidence gathered from the work placement to demonstrate competence for each assessment criterion. The learner is also expected to have gathered evidence showing new skills or knowledge they have acquired as a result of various work placement tasks or activities. It would therefore be helpful for tutors to encourage learners to think about how they can show that they have gained new skills or knowledge from the tasks and activities.

Prior to starting the work placement, a group discussion may be used to identify different forms of evidence. This could include employer or tutor reports, evidence of work completed, descriptions of tasks or activities undertaken (perhaps in the form of a diary or minutes of meetings that the learner attended or facilitated). In this regard, the learner must adhere to the company policy on confidentiality and intellectual property.

Different methods of record keeping should be discussed. Examples of previous learner work could be shown. Paper based and/or electronic record keeping methods may be used.

Learning outcome 2 focuses on the learner's skills, strengths and the challenges faced. The skills discussed should be based on the CBI employability competencies detailed in their 'Time Well Spent' report found on the CBI website: [www.cbi.org.uk](http://www.cbi.org.uk).

The skills required for employability include self-management, team working, business and customer awareness, problem solving, communication, number and ICT skills. It would be appropriate to spend time discussing the meaning of these skills and how they relate to individual learners. Checklists could be developed which allow the learner to describe when they demonstrated their skills during their work placement. Checklists could also be used to describe those aspects of the work placement experience that could have been improved, and how they could have been improved.

The learner also needs to consider their strengths based on their personal skills, knowledge and experience. One-to-one discussions or small group discussions may be used to identify what the learner's strengths are. Alternatively, the learner may ask their employer to help them identify their strengths.

Small group discussions could be used to help the learner identify the challenges of the work placement. Record sheets may be developed to allow the learner to identify the challenges and then state how they overcame them.

In order to achieve learning outcome 3, the learner will need to know and understand what SMART goals are. This method of target setting is often used as part of performance development review processes and it is important for learners to understand how to set such goals. The acronym has a number of variations:

S – specific, significant, stretching

M – measurable, meaningful, motivational

A – agreed upon, attainable, achievable, acceptable, action-oriented

R – realistic, relevant, reasonable, rewarding, results-oriented

T – time-based, timely, tangible, trackable

A useful web site for more detailed information is [www.projectsmart.co.uk/smart-goals.html](http://www.projectsmart.co.uk/smart-goals.html)

## Assessment

In order to achieve 1.1, the learner must present evidence of tasks undertaken in the work placement and what was learned from the tasks undertaken. This evidence can then be used as a basis for the remaining assessment criteria. The evidence presented must show that the learner has learned something new, ie skills or knowledge. The learner needs to relate the development of the skill or knowledge to their specific experiences and completed work tasks. It is not sufficient for the learner to simply write a description of an activity or task undertaken. They must also be able to explain how they have evidenced that they have learned something new, for example checklist completed by work placement supervisor, witness statement, practical demonstration of a new skill.

For 2.1, the learner must explain how they used their strengths or skills and where they experienced challenges. (These could be strengths or skills which the learner had before the work placement or those which they acquired during the work placement.) This could be cross-referenced to the evidence provided for P1 or a separate explanation could be provided which highlights a range of strengths and challenges.

3.1 requires the learner to give an explanation of what could be improved and how it could be improved. This could be cross-referenced to the evidence provided in 1.1. Alternatively, a separate piece of work which is more generic, could be provided.

In 4.1, the learner needs to make straightforward value judgements on how their work placement has helped them in planning their career choices. The learner must make at least one suggestion regarding how the work placement experience has influenced their thinking about their future. The suggestion need not be lengthy or complex.

In achieving 4.2, the learner must be able to set and produce appropriate evidence of two short-term and two long-term SMART goals as a result of what they have learned from their work placement. The method used to evidence the learner's goals may take the form of a log, presentation, poster, written statement provided by the learner (with supporting notes from the tutor) or other appropriate format.

## 14 Professional development and training

Edexcel supports UK and international customers with training related to BTEC qualifications. This support is available through a choice of training options offered in our published training directory, or through customised training at your centre.

The support we offer focuses on a range of issues, including:

- planning for the delivery of a new programme
- planning for assessment and grading
- developing effective assignments
- building your team and teamwork skills
- developing learner-centred learning and teaching approaches
- building functional skills into your programme
- building in effective and efficient quality assurance systems.

The national programme of training we offer is on our website at: [www.edexcel.com/training](http://www.edexcel.com/training). You can request customised training through the website or you can contact one of our advisors in the Training from Edexcel team via Customer Services to discuss your training needs.

### BTEC training and support for the lifetime of the qualifications

**Training and networks:** our training programme ranges from free introductory events through sector-specific opportunities to detailed training on all aspects of delivery, assignments and assessment. We have designed our new network events programme to allow you to share your experiences, ideas and best practice with other BTEC colleagues in your region. Sign up to the training you need at: [www.btec.co.uk/training](http://www.btec.co.uk/training)

**Regional support:** our team of Curriculum Development Managers and Curriculum Support Consultants, based around the country, are responsible for providing advice and support in centres. They can help you with planning and curriculum developments. If you would like your Curriculum Development Manager to contact you, please get in touch with your regional office on: **0844 463 2535**.

### Your BTEC support team

Whether you want to talk to a sector specialist, browse online or submit your query for an individual response, there's someone in our BTEC support team to help you whenever – and however – you need, with:

- **Subject Advisors:** find out more about our subject advisor team – immediate, reliable support from a fellow subject expert – at: [www.edexcel.com/subjectadvisors](http://www.edexcel.com/subjectadvisors)
- **Ask Edexcel:** submit your question online to our Ask Edexcel online service [www.edexcel.com/ask](http://www.edexcel.com/ask) and we will make sure your query is handled by a subject specialist

## Mapping to Functional Skills

Entry 3	Unit number									
English — Speaking and listening	1	2	3	4	5	6	7	8	9	10
Respond appropriately to others and make some extended contributions in familiar formal and informal discussions and exchanges	✓		✓	✓	✓	✓	✓	✓	✓	✓
English — Reading										
Read and understand the purpose and content of straightforward texts that explain, inform and recount information	✓	✓						✓	✓	
English — Writing										
Write texts with some adaptation to the intended audience										

Entry 3	Unit number									
English — Speaking and listening	11	12	13	14	15	16	17	18	19	20
Respond appropriately to others and make some extended contributions in familiar formal and informal discussions and exchanges	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓
English — Reading										
Read and understand the purpose and content of straightforward texts that explain, inform and recount information		✓							✓	✓
English — Writing										
Write texts with some adaptation to the intended audience		✓					✓			

Entry 3	Unit number			
English – Speaking and listening	21	22	23	24
Respond appropriately to others and make some extended contributions in familiar formal and informal discussions and exchanges	✓		✓	✓
English – Reading				
Read and understand the purpose and content of straightforward texts that explain, inform and recount information	✓	✓	✓	✓
English – Writing				
Write texts with some adaptation to the intended audience			✓	✓

Entry 3	Unit number									
Mathematics – Learners can	1	2	3	4	5	6	7	8	9	10
<b>Representing</b>										
<ul style="list-style-type: none"> <li>understand practical problems in familiar contexts and situations</li> </ul>										
<ul style="list-style-type: none"> <li>begin to develop own strategies for solving simple problems</li> </ul>										
<ul style="list-style-type: none"> <li>select mathematics to obtain answers to simple given practical problems that are clear and routine</li> </ul>										
<ul style="list-style-type: none"> <li>Analysing</li> <li>apply mathematics to obtain answers to simple given practical problems that are clear and routine</li> </ul>										
<ul style="list-style-type: none"> <li>use simple checking procedures</li> </ul>										
<b>Interpreting</b>										
<ul style="list-style-type: none"> <li>interpret and communicate solutions to practical problems in familiar contexts and situations</li> </ul>										

Entry 3	Unit number									
Mathematics – Learners can	11	12	13	14	15	16	17	18	19	20
<b>Representing</b> <ul style="list-style-type: none"> <li>understand practical problems in familiar contexts and situations</li> </ul>										
<ul style="list-style-type: none"> <li>begin to develop own strategies for solving simple problems</li> </ul>										
<ul style="list-style-type: none"> <li>select mathematics to obtain answers to simple given practical problems that are clear and routine</li> </ul>

<ul style="list-style-type: none"> <li>use simple checking procedures</li> </ul>										
<b>Interpreting</b> <ul style="list-style-type: none"> <li>interpret and communicate solutions to practical problems in familiar contexts and situations</li> </ul>										

Entry 3	Unit number			
Mathematics – Learners can	21	22	23	24
<ul style="list-style-type: none"> <li>Representing</li> <li>understand practical problems in familiar contexts and situations</li> </ul>				
<ul style="list-style-type: none"> <li>begin to develop own strategies for solving simple problems</li> </ul>				
<ul style="list-style-type: none"> <li>select mathematics to obtain answers to simple given practical problems that are clear and routine</li> </ul>				
<p><b>Analysing</b></p> <ul style="list-style-type: none"> <li>apply mathematics to obtain answers to simple given practical problems that are clear and routine</li> </ul>				
<ul style="list-style-type: none"> <li>use simple checking procedures</li> </ul>				
<p><b>Interpreting</b></p> <ul style="list-style-type: none"> <li>interpret and communicate solutions to practical problems in familiar contexts and situations</li> </ul>				

Entry 3	Unit number									
ICT – Use ICT systems	1	2	3	4	5	6	7	8	9	10
Interact with and use ICT systems to meet needs										
Store information										
Follow safety and security practices										
ICT – Find and select information										
use simple searches to find information	✓	✓	✓		✓		✓			
select relevant information that matches requirements of given task	✓	✓					✓			
ICT – Develop, present and communicate information										
enter and develop different types of information to meet given needs										
bring together different types of information										
use ICT-based communication										
ICT – Use ICT systems										

Entry 3	Unit number									
ICT – Use ICT systems	11	12	13	14	15	16	17	18	19	20
Interact with and use ICT systems to meet needs										
Store information										
Follow safety and security practices										
ICT – Find and select information										
use simple searches to find information							✓		✓	✓
select relevant information that matches requirements of given task							✓		✓	✓
ICT – Develop, present and communicate information										
enter and develop different types of information to meet given needs										
bring together different types of information										
use ICT-based communication										
ICT – Use ICT systems										

Entry 3	Unit number			
ICT – Use ICT systems	21	22	23	24
Interact with and use ICT systems to meet needs				
Store information				
Follow safety and security practices				
ICT – Find and select information				
use simple searches to find information	✓			
select relevant information that matches requirements of given task

Level 1	Unit number									
ICT – Use ICT systems	1	2	3	4	5	6	7	8	9	10
Identify the ICT requirements of a straightforward task										
Interact with and use ICT systems to meet requirements of a straightforward task in a familiar context										
Manage information storage										
Follow and demonstrate understanding of the need for safety and security practices										
ICT – Find and select information										
Use search techniques to locate and select relevant information									✓	
Select information from a variety of ICT sources for a straightforward task										
ICT – Develop, present and communicate information										
Enter, develop and refine information using appropriate software to meet the requirements of straightforward tasks										
Use appropriate software to meet requirements of straightforward data-handling task										
Use communications software to meet requirements of a straightforward task										
Evaluate the selection and use of ICT tools and facilities used to present information										
combine information within a publication for a familiar audience and purpose										
Evaluate own use of ICT tools
