

Statement of Purpose

601/0167/2 – Pearson BTEC Level 1/Level 2 First Extended Certificate in Creative Digital Media Production

Who is the qualification for?

This qualification is a Technical Certificate at level 2 (360 GLH) designed for post-16 students working at that level who want to undertake practical and technical study of the creative digital media industry in order to fulfil their progression aims, either to further study or to assistant and junior roles in the sector.

What does this qualification cover?

This qualification prepares students for employment with an engaging and stimulating coverage of a range of the key creative digital media disciplines which will enable students to develop and apply their knowledge of the sector whilst developing a range of relevant practical skills. It offers a choice of focus for students in, for example digital moving image, digital audio, digital games design, website production and digital publishing.

The qualification consists of three mandatory units, making up 25% of the qualification and a choice from a range of 30 and 60 GLH optional specialist units, to make up the remaining 240 GLH required to complete the course. The mandatory units provide the essential knowledge and skills for the sector.

Mandatory units

- Unit 1: 'Digital Media Sectors and Audiences' reflects the breadth of the industry. This unit covers the fundamental knowledge and understanding of media principles across the five key themes within the sector of digital moving image, digital audio production, digital publishing, website production and digital games production. This unit is externally assessed.
- Unit 2: 'Planning and Pitching a Digital media Product' requires students to formulate, develop and pitch ideas of a product that they then plan to produce. This unit develops essential communication techniques and skills (verbal, written and visual) and further supports the development of media core skills and knowledge, it is project-based and it is internally assessed.
- Unit 8: 'Media Industry in Context' develops students' knowledge of the organisation and structure of a range of media industries from global multinationals to local and community organisations. This unit is externally assessed.

Optional specialist units

Optional specialist units build on and extend students skills and knowledge, enabling students to respond to focused assignment briefs, develop ideas in the context of a particular discipline and produce creative digital media outcomes.

The internally assessed optional units may be chosen from the following key areas: digital moving image, digital audio, digital publishing, website production, digital games, digital photography, animation, graphic design, editing for moving image and audio, writing for digital media and digital art.

What could this qualification lead to?

Achievement of this qualification at level 2 will mean that students will have developed specific knowledge and practical skills related to the creative digital media sector, enhancing their knowledge of creative digital media techniques and processes. Students will be able to apply knowledge gained in the context of a range of creative digital media industries such as moving image, audio, publishing, website and digital games production.

This will provide a sound basis for progression for those students who wish to progress to associate and junior levels in these areas or progress on to further study in a specialist qualification at Level 3, such as a BTEC Level 3 Diploma or Extended Diploma in Creative Media Production and/or an apprenticeship.

A focus on moving image and audio production skills will prepare students for junior roles in film production companies, advertising agencies or the radio, digital games and motion graphics industries.

Digital publishing, photography, graphic design and website production skills might enable a student to progress to employment in an advertising agency, website design studio or working on an 'in-house' website for a large company.

Students wishing to progress to employment within the games design and animation sector might progress to a games design studio or, if they have achieved skills at a high level, as a freelance/self-employed digital artist or games designer. There are many opportunities within the media sector for digital artists working on a wide range of digital media products.

This qualification is part of a larger suite of Creative Digital Media qualifications at level 2

The BTEC Level 1/Level 2 First Extended Certificate and the BTEC Level 1/Level 2 First Diploma are post-16 Technical Certificates.

The BTEC Level 1/Level 2 First Extended Certificate is 360 GLH and broadly equivalent in size to 3 GCSEs. The BTEC Level 1/Level 2 First Diploma, at 480 GLH, is broadly equivalent in size to 3 GCSEs.

(The suite also contains an Award (120 GLH) and Certificate (240 GLH) but they are designed for use pre-16.)

Students might choose to study for an Extended Certificate rather than a Diploma if they require space in their full time study programme to undertake an additional qualification, which could complement their main course of study and support their progression aims. For instance, studying art with this qualification would help support a student's aims for a career in animation or a student could receive additional support in English and/or Maths, or other related qualifications such as ICT, Business and Music GCSEs.

Who supports this qualification?

This qualification is supported by the following employers and professional bodies:

- Doner Ltd
- Momentum
- Creative Jar
- The Ironbridge Gorge Museum Trust
- Into Film
