Please note that this Example Assessment Brief is **NOT** an authorised assignment brief. It is provided as a reference only.

Centres must develop assignments and assessment materials that meet the needs of their students and align with their curriculum planning. This Example Assessment Brief may be used as a starting point for the development of an assignment, however Centres are expected to modify and revise the Example Assessment Brief to meet the specific needs of their students and curriculum. All assessment briefs must be Internally Verified.

Higher National Certificate/Diploma in Animal Management

Example Assessment Brief

Student Name/ID Number	
Unit Number and Title	01 Animal Health and Welfare
Academic Year	
Unit Tutor	
Assignment Title	Assessing Animal Collections
Issue Date	
Submission Date	
IV Name & Date	

Submission Format

Submission should be in the form of an e-portfolio or a portfolio of evidence. E-portfolios should be submitted online; use of multiple evidence sources are recommended for hard copy portfolios. Within included reports, you are required to use headings, titles and captions where appropriate. You are encouraged to use images, drawings and other materials to support your work. The recommended word length is 2000 to 3000 words.

Please note that this Example Assessment Brief is **NOT** an authorised assignment brief. It is provided as a reference only.

Centres must develop assignments and assessment materials that meet the needs of their students and align with their curriculum planning. This Example Assessment Brief may be used as a starting point for the development of an assignment, however Centres are expected to modify and revise the Example Assessment Brief to meet the specific needs of their students and curriculum. All assessment briefs must be Internally Verified.

Unit Learning Outcomes

LO1 Define causal pathogens and factors that can influence animal health and disease

LO2 Discuss the concepts of animal health and disease, and methods of disease prevention

Assignment Brief and Guidance

*Please note that assignment guidance is for reference only and should be more specific in detail to meet customised needs.

Scenario

The Animal Department have been asked to review how well the current housing and management protocols promote good health and prevent disease in the College's animal collection to, ensure the highest standards of animal welfare are in place. You have been asked to conduct a practical assessment of the health of the animals housed in the unit and to appraise if the current protocols to manage animal health are fit for purpose or could be improved.

Activity

You are required to conduct a practical assessment of a selected animal collection or facility (LO1 and LO2). During this assessment, you are expected to assess if animals are healthy or currently suffering from disease, discussing with your assessor how you have reached your decisions. You should discuss the potential contagious and infectious diseases the animals in the collection are at risk from and evaluate the potential effect of identified diseases on the health of the entire collection, and how these risks could be minimised. You will then be asked to produce a report outlining a management plan to prevent disease for a minimum of one species within the collection.

Throughout the practical assessment, you are encouraged to video your assessment to include in your e-portfolio and to explain the reasons for your decisions to demonstrate your wider knowledge and understanding.

*Please access HN Global for additional resources support and reading for this unit. For further guidance and support on report writing please refer to the Study Skills Unit on HN Global. Link to www.highernationals.com

Please note that this Example Assessment Brief is **NOT** an authorised assignment brief. It is provided as a reference only.

Centres must develop assignments and assessment materials that meet the needs of their students and align with their curriculum planning. All assessment briefs must be Internally Verified.

Unit Learning Outcomes

LO1 Explain the different types, size and scope of land-based organisations

LO2 Demonstrate the interrelationship of the various functions within a land-based organisation and how they link to organisational structure

Assignment Brief and Guidance

*Please note that assignment guidance is for reference only and should be more specific in detail to meet customised needs.

Scenario

You have been employed as a Business Analyst by a large multinational organisation [insert here either a named organisation or enable students to choose an organisation and use the following insertion 'an organisation of your choice'. Students should be encouraged to use their own place of work, if appropriate], to investigate different types and sizes of business they will have to compete with.

You are required to investigate and explain three different types of organisations, their size and classification to highlight differences between them. This should include their legal structure, size and scope, as well as their key stakeholders.

For one of the organisations you must then explain the various functions within the business and create an organisational chart to explain the interrelationships between different functions. You must also explain how this would be different in the other two organisations.

Activity

This will be presented as a report to the CEO and should include the following.

- Introduction to provide an overview of different types of organisations and the growth of the business environment.
- An explanation of each of the chosen organisations, including: background details of the organisation; the products and services they supply; the size and scope of the organisation; their vision, mission and business objectives; the organisational and legal structure; and information about their stakeholders.

Please note that this Example Assessment Brief is NOT an authorised assignment brief. It is provided as a reference only.

Centres must develop assignments and assessment materials that meet the needs of their students and align with their curriculum planning. This Example Assessment Brief may be used as a starting point for the development of an assignment, however Centres are expected to modify and revise the Example Assessment Brief to meet the specific needs of their students and curriculum. All assessment briefs must be Internally Verified.

- In detail, explain the functions for one of the chosen organisations, using an organisation chart to show how the functions interrelate and an explanation of how they relate to structure.

*Please access HN Global for additional resources support and reading for this unit. For further guidance and support on report writing please refer to the Study Skills Unit on HN Global. Link to www.highernationals.com

Submission Formats

The submission of this assignment should take the form of an organised report of several chapters. The document should be word-processed and use professional formatting. Each chapter of the report should be clearly defined using titles. The report will contain a range of additional materials such as images, charts and tables, and these should be appropriately labelled, captioned and referenced. This assignment will also require submission of evidence of practical activities undertaken; a correctly organised appendices section should also be included. The recommended word length for the whole report is approximately 4000 words.

Please note that this Example Assessment Brief is **NOT** an authorised assignment brief. It is provided as a reference only.

Centres must develop assignments and assessment materials that meet the needs of their students and align with their curriculum planning. This Example Assessment Brief may be used as a starting point for the development of an assignment, however Centres are expected to modify and revise the Example Assessment Brief to meet the specific needs of their students and curriculum. All assessment briefs must be Internally Verified.

Unit Learning Outcomes

LO2 Demonstrate ability in conducting animal behaviour observations and assessments

LO3 Apply principles of animal behaviour to the management of animals

Assignment Brief and Guidance

*Please note that assignment guidance is for reference only and should be more specific in detail to meet customised needs.

Scenario

In order to manage animals effectively, animal industry practitioners must be familiar with animal behaviour patterns. There are many methods for recording and assessing animal behaviours that generate different information, which can be used to make informed decisions about the management of animals.

You have been employed by an animal collection as a Behaviour Management Consultant to assess and modify animal behaviour. You will need to produce some informative literature about the principles of animal behaviour management as well as carry out, and report on, practical behaviour management strategies with live animals. Make sure you consider the professional nature of the report you will be submitting to your employer.

Activity

You must produce a report, which includes several chapters detailing behaviour management strategies and assessments.

Chapter 1:

Write an introduction to the scenario, explaining the context and background of the animal/s.

Chapter 2:

Conduct a behaviour observation study on a target animal species using an appropriate sampling technique over multiple sessions. Include an analysis of the observation data when you write up your conclusion. Within your analysis you should evaluate the causative factors for the behaviours you have recorded.

Chapter 3:

Write an explanation of techniques for modifying a behavioural aspect of the animal (or animals); explain which techniques would be appropriate in the context and why alternative methods may be limited.

Please note that this Example Assessment Brief is NOT an authorised assignment brief. It is provided as a reference only.

Centres must develop assignments and assessment materials that meet the needs of their students and align with their curriculum planning. This Example Assessment Brief may be used as a starting point for the development of an assignment, however Centres are expected to modify and revise the Example Assessment Brief to meet the specific needs of their students and curriculum. All assessment briefs must be Internally Verified.

Chapter 4:

Produce an action plan for modifying behaviour in the target animal(s). You should identify the steps that will be taken and explain how your actions would be justified by relevant theories and principles.

Chapter 5:

Implement the behaviour modification plan and write an evaluation of the effectiveness/significance of changes made to the behaviour of the animal/s. You should use the same observation sampling techniques you used earlier, in order to compare. This chapter should include a log/record of progress made as the plan is implemented.

Chapter 6:

Write a conclusion that summarises the overall progress made and makes recommendations for the employer.

*Please access HN Global for additional resources support and reading for this unit. For further guidance and support on report writing please refer to the Study Skills Unit on HN Global. Link to www.highernationals.com

All assessment briefs must be Internally Verified.

Unit Learning Outcomes

LO1 Examine Health and Safety practice within animal husbandry

Assignment Brief and Guidance

*Please note that assignment guidance is for reference only and should be more specific in detail to meet customised needs.

Scenario

You are presenting a health and safety introduction to Level 2 students, as part of their course induction. You will create and present a poster, which covers details of the legislation relevant to the sector and include a booklet that provides clear guidance on the factors affecting the safe handling of animals and how health and safety can be maintained. You will complete a series of risk assessment forms and, in a separate written report, analyse why this process is necessary.

Activity 1

- Complete an A2-sized poster indicating what legislation is relevant to health and safety within animal husbandry.
- Present this poster to your peers. Anonymous peer assessment will accompany this task.

Activity 2

Create a booklet that explains the factors affecting the safe handling of a range of animal species. You must include an examination of how these interact with health and safety in a specified animal husbandry situation.

Activity 3

- Using a standard risk assessment form, complete a series of risk assessments for daily activities undertaken within a specified animal facility.
- In a written report, present an analysis of the role and process of risk assessment within health and safety.

*Please access HN Global for additional resources support and reading for this unit. For further guidance and support on report writing please refer to the Study Skills Unit on HN Global. Link to www.highernationals.com
