STUDENT BROCHURE

[WWW.HNGLOBAL.HIGHERNATIONALS.COM](http://WWW.HNGLOBAL.HIGHERNATIONALS.COM)

# | What is it?

HN Global has been developed to enrich the student learning experience and ensure they have access to the best support.

A dedicated online learning platform, containing various free resources to support as well as guide students who are on their learning journey.

## LEARNING ZONE

# For students

Students on HN Global can access their subject content, a selection of Short Courses, the Learning Zone, the Progression Hub and a global Forum.

The Learning Zone has been created to include study materials such as Subject Resource Libraries – including core textbooks and reading lists – a Video Channel, General Resources and Upcoming Events. You can find out more about these resources in the following pages.

## HOW DO I SIGN UP?

# Self-register

Signing up is simple, you just need to complete a short self-registration form, which will grant you access to the resources available.

We understand that you might be considering a BTEC Higher National programme, and would like to know what support is available. Guest Students can get access to these resources for a period of time. If you do decide to onboard, we can update your account for you at a later date.

# LEARNING ZONE

## STUDENT CHANNEL

Watch informative videos on assignment writing, gain study tips, review transferable skills and learn more about the future skills gap.

## RESOURCE LIBRARIES

Access a curated selection of subject specific resources, including books, articles, videos, web links, podcasts and more!

## GENERAL RESOURCES

Here you can find handbooks, student guides, FAQs and student survey results. These are general to the BTEC Higher Nationals.

In addition to the Learning Zone, you can access a number of resources to support your programme across the HN Global platform. Here is an outline of what those services are and how you might use them:

## MY SUBJECT

This provides more information about your industry and includes resources relevant to your qualification. This includes an overview of your subject area, a suggested path of activities and in some cases, RSS feeds.

## SHORT COURSES

You can find further support in the Short Courses section with study skills modules and digital literacy learning paths. These modules have been created to support academic development within higher education.

## FORUM

The forum is designed to allow you to connect with your peers across the world, sharing best practice and starting discussions to support your learning journey. The best support you can get, normally comes from your fellow students and colleagues.

## BLOG

This is your space to gain insights into Higher Education and subjects; review leading educational sector profiles and hear from colleagues in Pearson. The Higher Nationals Blog is now open for submissions! Have your story published on our website.

**If you have any queries, contact [hnglobal@pearson.com](mailto:hnglobal@pearson.com)**

## PROGRESSION HUB

Here you will find resources, tools and industry guidance, designed to help you develop the skills you need no matter what stage you are at on the career ladder - whether that's starting, developing, or changing career.

Browse the industry recognition and agreements we have in place, including memberships, exemptions and certifications.

Explore what it means to be employable, industry profiles and destination options via the Degree Finder.

Get access to the career centre where you will have the opportunity to build your CV, learn how to succeed at interviews, gain access to industry reports and to a jobs board with exciting opportunities around the world.
