NFEC are a corporate membership (approximately 110) organisation that has been operating since 1993 helping to steer thinking on key issues relating to quality, content, structure, funding and management of training and education in Engineering on behalf of colleges of further education, private providers and companies with their own training functions such as Rolls Royce, Babcock and Toyota Manufacturing UK.

The content within these qualifications prepares the learners for a career in this sector by providing a substantial number of units which represent the core competencies of the role alongside a range of options.

The qualifications develop the skills needed in the workplace and I support them for inclusion in the school and college performance tables for 16-19 year olds.

I am happy for my company name and website to be made available on the DfE and Pearson website to confirm our support for the qualifications.

Yours sincerely
