

Statement of Purpose

500/9449/X – Pearson BTEC Level 3 Diploma in Forestry and Arboriculture (QCF)

The land-based sector is diverse and fragmented comprising 16 industries which are grouped around the three broad areas of land management and production, animal health and welfare and environmental industries. At 14% the food sector is the largest in the UK economy, and 60% of food eaten in the UK is produced in the UK.

Around 1.1m people and 500,000 volunteers work in the UK land-based sector, making 3% of the UK's workforce. Over 90% of the 230000 businesses in the sector employ fewer than 10 people and many are self-employed. The main employer in the forestry sector, The Forestry Commission, is the custodian of 900,000 hectares of land and harvests more than four million tonnes of wood every year from UK forests. This is more than a third of total domestic production and reduces UK dependency on imported wood. The Forestry Commission employs around 2400 people.

Growth in the land-based sectors is central to government policy. Caroline Spelman MP, Secretary of State for the Environment, Food and Rural Affairs stated in June 2010; *'Farming and food contributes approximately £86 billion to our economy. The [land-based sector is] an absolutely indispensable part of the green economy we are putting at the heart of our economic recovery'*.

To meet the challenges of the sector businesses need to be more highly equipped and skilled with the latest technologies and knowledge.

The Pearson BTEC Level 3 Diploma (720 GLH) in Forestry and Arboriculture is part of a larger suite of land-based forestry qualifications, in a range of sizes, which share the common purpose of helping people to become occupationally ready to take up employment in the land-based sector at the appropriate level. This can follow either directly after achieving the qualification, or via the stepping stone of Higher Education (HE) in university or college. By studying a BTEC National, learners develop knowledge, understanding and skills required by the sector, including essential employability skills, and apply them in real work contexts. Learners can operate at a standard that can reasonably be expected of an 18 year old in full-time education.

Within this suite, the Pearson BTEC Level 3 Diploma (720 GLH) is primarily a Technical Level qualification, equivalent in size to two A levels, which has been designed to occupy two-thirds of a full-time curriculum, enabling learners to develop a significant common core of knowledge, based on the fundamental science needed for this sector, including *Understanding the Principles of Soil and Plant Science, and the Principles of Identification, Care and Protection of Trees*. There is also a mandatory investigative project and work experience. Learners are also provided extensive opportunity to study in more depth a range of option areas of their choice, including:

- Understanding the Principles of Identifying Pests in Trees
- The Principles of Woodland and Habitat Management
- The Principles of Planning Forest Recreation and Community Projects
- Use and Maintenance of Land-based Machinery and Equipment.

The Diploma allows time in the curriculum to study other qualifications alongside it, for example A levels in Sciences, Maths or Business studies, a Level 3 vocational course in Business or Applied Science, or Functional Skills in Maths and English; or to undertake work experience/placement. The Pearson BTEC Level 3 Diploma in Forestry and Arboriculture can be studied part time by learners in schools, colleges and other training provider organisations. Its size makes it appropriate as the core component of a Technical Baccalaureate programme, allowing time in the curriculum for the study and completion of the other mandatory components.

As the qualification was designed in close collaboration with industry, it is fully supported by the Sector Skills Council (SSC) for the sector LANTRA. A range of professional organisations and employers in the sector has also confirmed their support for this Pearson BTEC Level 3 Diploma in Forestry and Arboriculture. This means it is a highly respected route for those who wish to move into employment in the sector, either directly or following further study.

A significant proportion of recruitment in this sector is at graduate level. The Pearson BTEC Level 3 Diploma in Forestry and Arboriculture also provides a well-established route into a variety of specialist Higher Education (HE) courses in this sector and beyond when taken alongside other qualifications appropriate for the desired course of study. UCAS has reviewed the qualification to assess its value for access to higher education, and has allocated UCAS points. See details published on the Pearson website here:
