

Centre Guidance for Onscreen Tested Vocational Qualifications

Pearson BTEC Level 2 Award for Working as a Vehicle Immobiliser within the Private Security Industry (QCF)

Issue 1
January 2015

Purpose

This document is intended to provide approved Pearson centres delivering the Pearson BTEC Level 2 Award for Working as a Vehicle Immobiliser within the Private Security Industry (QCF) with information and guidance to help prepare learners for onscreen assessments. Please refer to the **Information Manual** on our website: www.edexcel.com/iwantto/Pages/information-manuals for further information about becoming an approved Pearson centre.

This guidance includes information about the onscreen test delivery software and details about the format, structure and coverage of the tests.

This information should only be used in relation to onscreen testing and is not to be used for any other form of assessment. Further documents and forms relating to onscreen testing can be found at on our website: www.edexcel.com/iwantto/Pages/onscreen-testing

Onscreen Test Delivery

Tests are available through the Pearson Onscreen Platform, which you will be required to install and use for the delivery of onscreen tests.

The Pearson Onscreen Platform has a useful help facility which provides guidance on the functions and layout of the system. Assessors and invigilators should familiarise themselves with the screen and ensure that there is time for learners to fully explore the information on the help screen before starting the test.

All centres offering onscreen assessment must comply with the current **Instructions for the Conduct of Examinations (ICE) document**. The current version of this document can be found on our website: www.edexcel.com/iwantto/Pages/conducting-examinations

Overview of Tests

The tests will operate on a test banking system. Where a group of learners is taking a test at the same time, different learners will be presented with different tests from the bank. Each year all the tests will be reviewed and updated.

Each test will have a set number of marks. Please refer to the **Test Structure Section** of this guidance for more detail. Question formats may vary throughout the test. The questions will predominantly be multiple choice, where the learner will be required to select the correct response to a question from one of four options. The question may be supported with a picture and the options may be in the form of pictures or text.

Other formats may include multiple response questions, where the learner will be required to select two from five options. Process order drag and drop where they will be required to drag and drop the stages of a process into the correct order. Two-part question where they will be required to justify their answer or explain the reason for their choice. Line matching, linking two from five options or hotspots. Hotspots will allow the learner to select one of four areas on an image as the correct response to a question. There will be no videos or sound.

Question Types

The tests will be comprised of both recall and application question types.

Recall questions test the learner's knowledge of the subject area. They are typically lower level questions and as such there will be more recall questions on a Level 2 test than there will be on a Level 3 test. An example of a recall question is: *"When should work tasks be prioritised?"*

Application questions test whether the learner can apply the knowledge of the subject area to a situation given in the question. These questions are higher level questions as they are testing more than just knowledge. As such, there will be more application questions on a Level 3 test than in a Level 2 test. An example of an application question is: *"Time is running out on a project. What action should be taken?"*

Test Structure

For the purposes of assessment, all the content of the published specification will be considered to be open to testing in detail against any of the related assessment criteria statements. Each test will provide a broad test of key principles and typical situations found in a business administration environment. Learners will be assessed across all the learning outcome statements to provide adequate evidence of learning and achievement.

The unit content found in the specification details the knowledge and understanding required in order for learners to be successful in the onscreen test. While all the knowledge cannot be tested within one test, the different versions of the test will all cover this knowledge. Therefore it is essential that learners are deemed to have a full knowledge of the test specification content before being entered for the onscreen test.

Test items will not necessarily be sequenced in the order of the criteria. No test item will rely on or directly follow on from another test item.

Learners are advised to use the time allocated for the test carefully. All questions in the test should be attempted. Learners are advised to use the "flag" facility to mark questions that they wish to return to when they have answered the other questions in the test.

All tests are graded pass/fail.

After completing the test, each learner will receive a score report which will show the learner's individual strengths and weaknesses against each learning outcome covered on the test. Unsuccessful learners should use this information when revising to re-take the test.

Learners who are unsuccessful will be eligible to re-take the test on the following day. However, it is strongly recommended that a period of revision against weak areas identified on the score report takes place before the test is attempted again.

The tables below give some guidance on which units are assessed as part of each test, the amount of marks and the duration of the tests. The number of marks in a test is related to the units being assessed, the level and credit rating.

Pearson BTEC Level 2 Award for Working as a Vehicle Immobiliser within the Private Security Industry (QCF)

Test Number	Unit Names	Number of Marks	Durations of Test
SDO-2-01	Working within the Private Security Industry	60	75 mins
SDO-2-03	Conflict Management within the Private Security Industry	35	45 mins

Feedback

- For queries relating to onscreen tests, guidance information can be found on our website: www.edexcel.com/iwantto/Pages/onscreen-testing-btec-qcf
- For general queries about BTEC tested qualifications, please email: btecdelivery@pearson.com
- For information about registering for onscreen testing, or for any technical queries, please contact your dedicated account specialist:
 - for WBL centres, email: wblcustomerservices@pearson.com
 - for Schools & FE colleges, email: serviceoperations@pearson.com

To provide us feedback on live test content, please email btectestfeedback@pearson.com. Please include as much detail as possible (without emailing any secure content); including the qualification title, question number, test name/number, centre number, candidate number, and date/time that test was taken.
