Mark Scheme (Results)

January 2018

Pearson Edexcel Level 2 Certificate
In Digital Applications (DA201)

Unit 1: Developing Web Products

Edexcel and BTEC Qualifications

Edexcel and BTEC qualifications are awarded by Pearson, the UK's largest awarding body. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information visit our qualifications websites at www.edexcel.com or www.btec.co.uk. Alternatively, you can get in touch with us using the details on our contact us page at www.edexcel.com/contactus.

Pearson: helping people progress, everywhere

Pearson aspires to be the world's leading learning company. Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. Find out more about how we can help you and your students at: www.pearson.com/uk

General Marking Guidance

- All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.

- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.

- Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.

- There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.

- All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.

- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.

- When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the team leader must be consulted.

- Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.

Activity 1: Design, build and test the website

If a candidate's web pages are not saved in .htm or .html format, then 0 marks should be awarded for Activity 1.

Task	Response	Mark
Page template	**(P1)** Banner present, full width of page (1366 px), 1300–1400 px = acceptable range, **and** a suitable image is included on the banner.	1
	(P2) Name of the magazine (Create Mag) appears in the banner as follows: • all lower case • font weight of 'create' is normal • the word 'mag' is emboldened	1

Task	Response	Mark
Images	**(I1-2)** Front cover of the MAGAZINE included on the home page **(1)** that rolls over to show another page of the magazine that is the same size and position **(1)** The title of the magazine must be legible. Marks can still be awarded if the image is distorted. Award one mark if any two magazine pages rollover.	2
	(I3) SKILLSET is included on the about page. Must be edited to include a suitable image (on the tablet) Accept any file format.	1
	(I4) WEB_DESIGN image has been used (on web design page), retaining original proportions	1
	(I5) A thumbnail of INFOGRAPHIC is used to create a link to the original INFOGRAPHIC, which opens in a new browser window.	1
	(I6) At least one image has been created for an internal link on the features page. The image must be 400 x 200 px and edited to include the name of one of the child pages: web design and design trends.	1
	(I7) All images are in .jpg format	1
	(I8) All images are <350KB	1

Task	Response	Mark
Links	**(L1)** A correctly functioning email link is included (i.e. opens an email programme), linking to info@createmag.org.uk – the code should read: <a href="mailto:info@createmag.org.uk">	1
	(L2) Functioning hyperlink to www.creativeskillset.org – in the HTML code: 'http://www.creativeskillset.org' Ignore spelling of the web address if html correct.	1
	(L3) A hotspot has been created around the screen of the tablet on the image SKILLSET.	1
	(L4) Appropriate links to the child pages from the features page (accept any functioning link, including text). No mark for a link from the navigation bar.	1

Task	Response	Mark
Other content	**(O1)** A 400 x 200 px box with a background colour of #333333 is included on the features page.	1
	(O2) An <h1> header is used for the text 'Features'	1
	(O3) The 'Features' box and the two images are positioned horizontally across the features page.	1
	(O4) The video has been embedded on the web design page.	1
	(05) The video is 480 x 360 px.	1
	(O6) The video only plays on click.	1

Holistic marks

Structure and functionality		
Level	**Descriptor**	**Mark**
	No rewardable material.	0
Level 1	The website has a structure that does not fully address client requirements. It may not be logical (e.g. it may be difficult to find links to some pages or the user may need to drill down inappropriately). The site may not be fully functional (e.g. some links may be missing or broken).	1-2
Level 2	The website has a logical structure and most required links are present and functional. The navigation does not fully address the client's requirements (e.g. the hierarchy may not be as specified in the client's brief, such as all pages being included on the navigation bar with no need to drill down).	3-4
Level 3	The website has a logical structure with a hierarchy and functional links that fully address the client's requirements (an appropriate navigation bar requiring drill down from the features page as specified, and all required links).	5-6

User experience		
Level	**Descriptor**	**Mark**
	No rewardable material.	0
Level 1	A user interface that allows access to most of the content. The elements on the page may distract or irritate users. Learners may have added accessibility features but these may not be used appropriately (e.g. alternative text may have been added to some images but some or all of the text may be inappropriate, and/or colours may be high contrast but include unsuitable combinations such as red and green).	1-2
Level 2	A user interface that allows access to all the content. Appropriate use of at least one accessibility feature for visually-impaired users (e.g. clear alternative text may be applied to most images or appropriate high contrast colours may be used on most pages).	3-4
Level 3	An easy-to-use user interface that allows access to all the content. The elements on the page enhance the user experience. Consistent use of accessibility features for visually-impaired users where appropriate throughout the site (e.g. consistent use of high contrast colours, scalable fonts and clear alternative text on all images, avoiding inappropriate colour combinations such as red and green).	5-6

Content selection, preparation and presentation		
Level	**Descriptor**	**Mark**
	No rewardable material.	0
Level 1	Some content is relevant and error free although selection and preparation of text and images is not generally the most appropriate (e.g. given text may not be copied correctly, additional text may be inappropriate, fonts may not be suitable for onscreen viewing, and some images may not be relevant to page content or may not be optimised, sized or positioned appropriately). Some combinations of assets on the pages are appropriate for the audience and purpose (e.g. images and text are generally appropriate on some pages but less so on others).	1-2
Level 2	Most content is relevant and error free with some appropriate selection and preparation of text and images (e.g. given text may be edited to improve its suitability, some images may be edited to improve their relevance to adjacent content). Some effective combinations of assets on the pages that demonstrate some awareness of the target audience (e.g. vibrant colour scheme. Some images may be well-chosen, optimised, sized or positioned to illustrate accompanying text which is generally error-free and appropriate for the intended audience).	3-4
Level 3	All content is effective, including appropriate selection and preparation of text, choice of format and emphasis, selection and preparation of images. Effective combinations of assets across the whole website that demonstrate sound awareness of the target audience (the student clearly understands the purpose of the website and has used combinations of text and images to produce content that would appeal to the intended audience and encourage them to download the magazine).	5-6

Overall consistency		
Level	**Descriptor**	**Mark**
	No rewardable material.	0
Level 1	Components of the page template and/or other aspects of the layout and design are not applied consistently (e.g. the navigation bar or page design may not be consistent across the site, colours or fonts may not be used consistently, the banner and/or logo may be positioned inconsistently or vary in size or colour).	1-2
Level 2	The page template may not have been applied to all pages but the required components (banner, navigation bar) are used consistently. Most aspects of the layout and design are effective and applied consistently (e.g. navigation, page structure, colour scheme, text formatting).	3-4
Level 3	A page template that includes the required components is applied to all pages. Layout and design are effective and applied consistently across the website, taking into account the requirements of the two intended audiences (e.g. subtle changes to tone, style, text formatting, colour scheme).	5-6

Activity 2: Complete an evaluation of your website

Evaluation		
Level	**Descriptor**	**Mark**
	No rewardable material.	0
Level 1	The student has made superficial descriptive comments about some of his or her design decisions (e.g. comments might relate to his or her choice of images but without linking this to the theme or intended audience). There will be limited reference to audience and purpose. Suggested improvements may not be appropriate or realistic (e.g. they might suggest adding content that could, in fact, distract readers).	1-2
Level 2	The student has made relevant descriptive comments about some of his or her important design decisions (e.g. answer might explain how the choice of images is appropriate to the brief). There will be some reference to audience and purpose. Some suggestions for improvement will be valid (e.g. answer might include valid suggestions in some areas, such as how to make the text more readable in relation to the target audience, but other suggestions may not be clear or realistic).	3-4
Level 3	The student has made valid justifications for the effectiveness of his or her important design decisions. The justifications will be clearly related to audience and purpose (e.g. answer justifies why the choice of colour and images are appropriate not only for the overall theme but also the ways in which they help to enthuse the target audience). Valid suggestions for improvement will be included and it will be clear how these would improve the outcome (e.g. answer includes valid suggestions for making the text more readable for the target audience in order to make it more likely that they would continue to browse).	5-6
