No me gusta cafe pero me encanta beber agua mineral porque es muy bien para mí, bebo dos litros todos los días.'

Communication and Content 5/5

This task focuses on food and drinks to allow candidates to exploit very familiar language. By asking the candidate to put a reason for liking the items, the task guides the candidate away from merely listing a number of items.

In this piece the candidate uses very simple language to address the task set. Despite some errors the meaning is conveyed with very little ambiguity.

The candidate's response is mostly independent. He has used the following words from the supporting passage: carne, buenos para mi salud, café, me encanta, bebo.

Knowledge and Application of language 5/5

There is a good range of vocabulary and structures: *helado, son muy deliciosos, no como todos los días, bebo dos litros.*

There are some errors in spelling and grammar: *mis comidas favoritos*. Some accents are missing or they have been wrongly placed.

There is control of verb forms although there are some errors: *pero son no buenos para mi salud.*
