

Entry Level Functional Skills Assessments

Pass Marks - Mathematics

The pass marks for our Entry Level assessments published for reformed Mathematics qualifications have now been finalised for all test papers.

Final pass marks - Mathematics

Entry 1 - 14

Entry 2 - 20

Entry 3 - 24

These should be used when marking either practice or live papers. These pass marks are also located on the assessment record and authentication sheets.

Setting and maintaining standards

The pass threshold boundaries are determined during what we term the ‘awarding’ process.

To determine the final boundaries for these Entry Level assessments, we held a validation meeting at which our subject experts reviewed a range of evidence to determine where the final pass threshold boundary should be set. This evidence included:

- a report from the author of the test
- script inspection by subject experts
- any other external information which may have been given.

We hold a validation meeting every academic year to ensure we are meeting the standards consistently.
