

Functional Skills Initial Assessment Tool (IAT): Deliverer's Guide

Contents

1. Introduction: The Functional Skills Initial Assessment Tool (IAT)	3
2. Getting Started	3
3. Using the Initial Assessment Tool	7
4. Retrieving Group Profiles	14

1. Intoduction: The Functional Skills Initial Assessment Tool (IAT)

This guide is designed for you, as a deliverer, to explain to you how to operate all the functions of the Functional Skills Assessment Tool (IAT) so that you can use it with your learners.

Its aim is to compliment other initial assessment instruments that might be available to you but that are not specifically designed to assess Functional Skills (FS). (Please note that it is **not** a full diagnostic tool and is **not** intended to replace any commercially produced products that you may already be using.)

On completion of the FS IAT your learner will have a broad idea of what level they are operating at but this should **not** be taken as an indication of what level of Functional Skills test they will pass. This is **not** a practice test and we strongly recommend that learners follow a suitable programme of delivery and learning before they are entered for one of the final assessments.

2. Getting Started

You can access the FS IAT from the home page of the Pearson Edexcel Functional Skills website www.edexcel.com/functionalskills

The screenshot shows the Pearson Edexcel Functional Skills website. The top navigation bar includes links for Home, Qualifications, Subjects, I want to..., I am a..., Contact us, and Resources. Below this, a breadcrumb trail reads 'You are here: Home > Qualifications > Functional skills'. The main heading is 'Functional skills'. A sidebar on the left contains links for 'Functional skills', 'About functional skills', 'Delivering functional skills', 'Support', 'Contact us', and 'Notices'. The main content area features a banner with the text 'Functional Skills Supporting you every step of the way'. Below the banner, a text box states: 'Functional skills are qualifications in **English, maths and ICT** that equip learners with the basic practical skills required in everyday life, education and the workplace. They are available at Entry Level 1 through to Level 2.' A callout box with the text 'on this link to access the IAT' has an arrow pointing to the 'Initial assessment tool' link in the list of resources. The list of resources includes: 'a unique **Initial assessment tool**', 'face-to-face and online **training events**', '**podcasts**', 'free **delivery and assessment support resources**', and '**published resources** for additional support'. At the bottom, there is a section for 'onscreen on-demand tests' and a link to 'Learn more about onscreen on-demand testing'. A footer link reads 'Check details of our Level 1 and 2 assessment windows for 2012-13.'

To run the IAT you will need to have the latest version of **Flash Player** and **Adobe Reader** installed on your computers.

On the next page there is an overview of the test and the link to the IAT.

You are here: Home > Qualifications > Functional skills > Support > **Initial Assessment Tool**

Functional skills | Initial Assessment Tool

We're pleased to announce our new and improved free Initial Assessment Tool (IAT) for English and maths is now available.

Our new Initial Assessment Tool (IAT) has been developed to provide a simple way of helping teachers and tutors to screen a learner's existing skills and give an indication of their ability in English and mathematics from Entry Level 1 up to Level 2. It can also be used as part of Information Advice and Guidance practice.

We have redeveloped the Initial Assessment Tool so that it is more adaptive to your learner's abilities and will alter the type of questions it asks according to their answers in the first half of the assessment.

New features also include:

- **Group profiles**
- Teachers/tutors have a personal log-in code which enables them to securely view their learning groups' performance
- Each group and subject can be given a separate code
- Profiles can be exported to a spreadsheet, showing marks, level and time taken to complete the assessments
- **Screen colour can be changed for dyslexic learners** – this functionality is operated in the actual test in the same way as our onscreen functional skills tests
- **Ability to save the entire test to PDF to aide feedback** – this can be saved to a desktop, memory stick or printed.

Coming soon:

- Extension exercises and mark schemes to help assess areas
- Full user guide
- ICT Initial Assessment

[Try our new Initial Assessment Tool now!](#)

Click on this link to access the IATClick

Before you let your learners sit an assessment you need to request a group code. This will identify the test on our system and allow you to access it at a later date. You can request as many group codes as you like (for example, if you teach several groups of FS English you can request a different code for each one) – this will allow you to produce a group profile of all the learners saved under that code.

Initial Assessment Tool for Functional Skills

If you are a student
Click [here to choose a test.](#)

If you are a teacher

- [Get group code for your students](#)
- [Review your students' tests](#)

[home | software you need](#)

Click here to request a group code

ALWAYS LEARNING PEARSON

The first time you request a group code you will need to give yourself a login and password. (You will use these to access the results for your learners when you want to produce a group profile.) The login and password should be memorable to you but can be anything you like (as in the example below).

You then enter your email address and confirmation of your login, password and group code will be automatically sent to this address. If you forget it at any time you can request a reminder (we will cover how to do this later in the guide)

The screenshot shows the 'Initial Assessment Tool for Functional Skills' registration page. The form is titled 'Get group code for your students' and includes the instruction: 'You need to get a group code for your students before they start tests.' The form fields are: Name (A N Other), Choose your login (Teacher1), Password (masked with dots), Repeat the password (masked with dots), Email (functionalskills@pearson.com), and Centre Number (Pearson). A 'Submit' button is at the bottom of the form. Below the form is a navigation bar with 'home | software you need'. Three callout boxes with arrows point to specific fields: 'Login chosen' points to the 'Choose your login' field, 'Email address & centre number (if known)' points to the 'Email' field, and 'Password chosen & confirmed' points to the 'Repeat the password' field.

Initial Assessment Tool for Functional Skills

Get group code for your students

You need to get a group code for your students before they start tests.

Name:

Choose your login:

Password:

Repeat the password:

Email:

Centre Number:

home | software you need

Login chosen

Email address & centre number (if known)

Password chosen & confirmed

The group code you have requested is automatically shown on the screen as in the example below:

The screenshot shows the confirmation page of the 'Initial Assessment Tool for Functional Skills'. The form is titled 'Get group code for your students' and includes the message: 'Thank you! New group code was successfully registered.' The group code is displayed as '406-891-699'. Below this, it states: 'All details were also sent to your email address (functionalskills@pearson.com)'. At the bottom of the form is a navigation bar with 'home | software you need'.

Initial Assessment Tool for Functional Skills

Get group code for your students

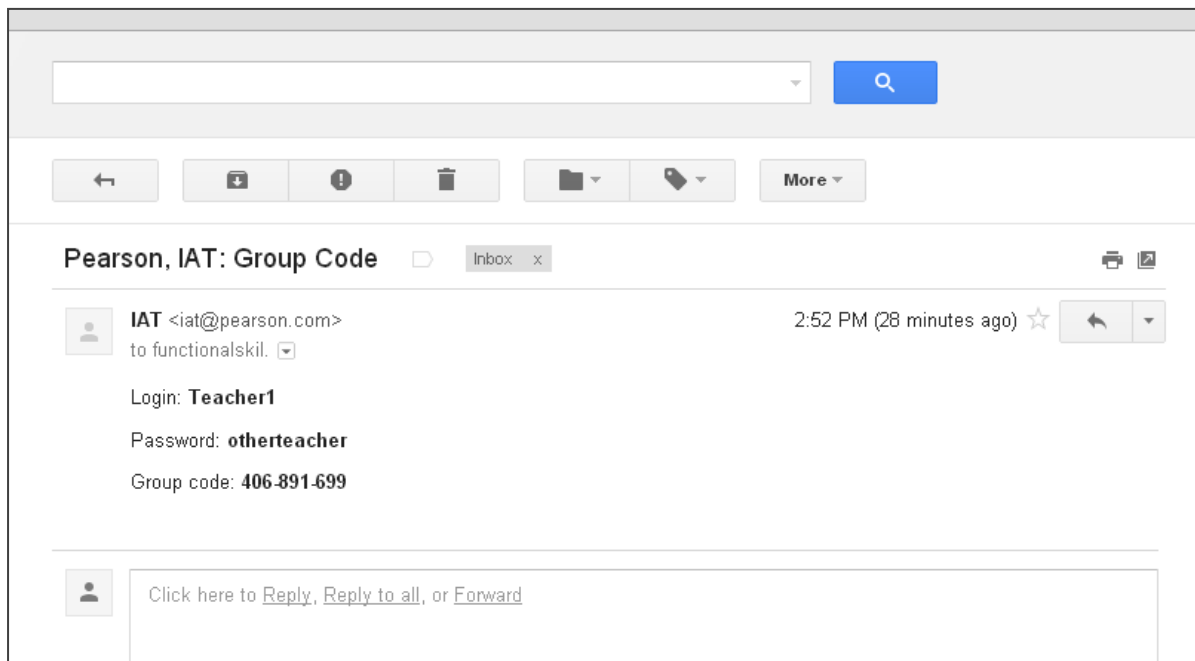

Thank you! New group code was successfully registered.

The group code is: **406-891-699**

All details were also sent to your email address (functionalskills@pearson.com).

home | software you need

The group code is also emailed to you along with your password and login.

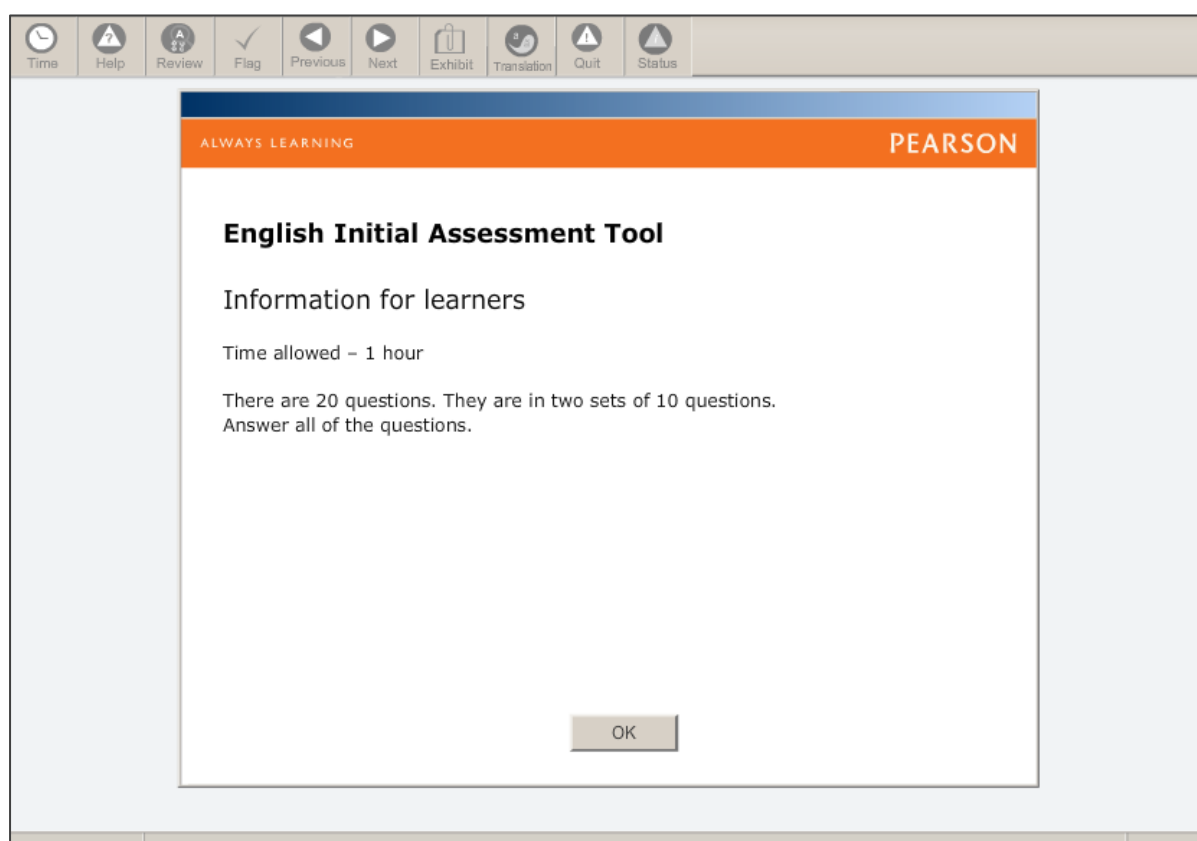

3. Using the Initial Assessment Tool

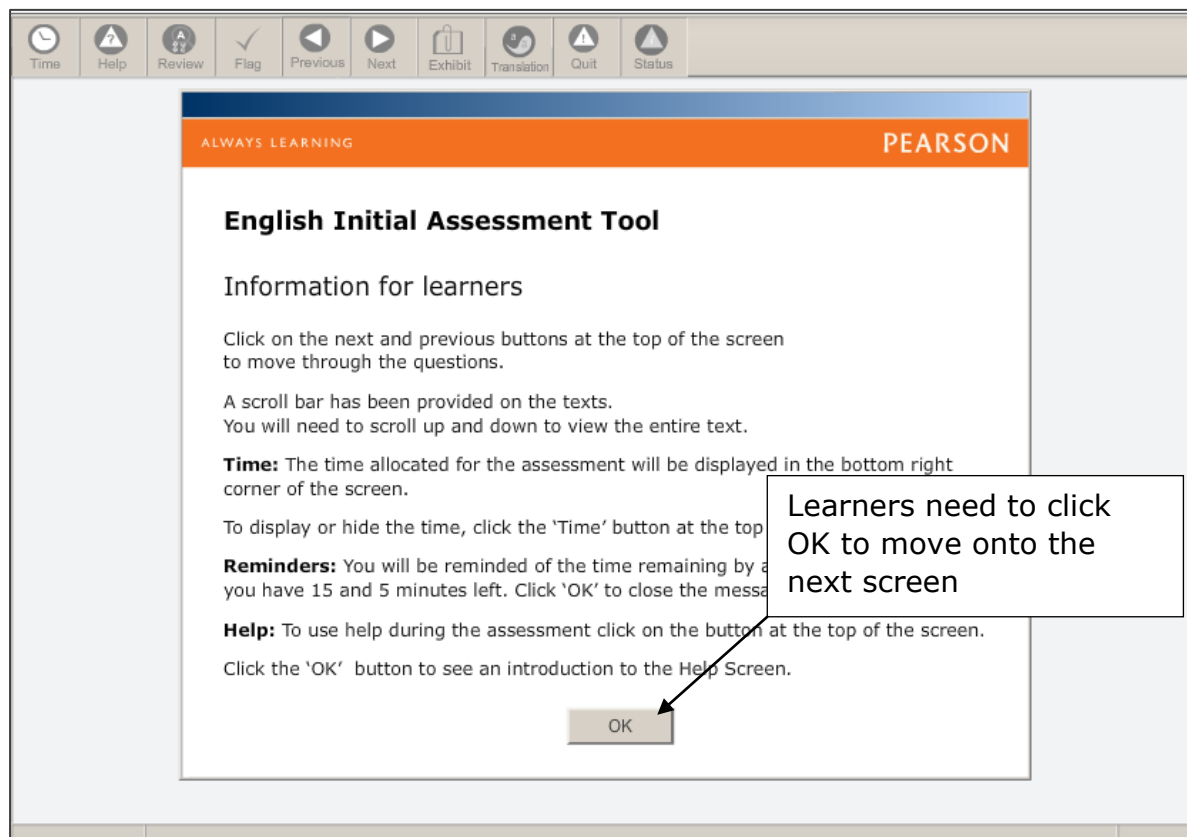

Now you are ready for your learners to take their assessments. They need to click on the subject they wish to sit and then they will see two screens which give them information. You can read these with them if you feel they will need assistance. The first shows which subject they have chosen and informs them that there are 20 questions (in two sets of 10 questions).

Each test takes one hour maximum. The time does not start until the first question is loaded.

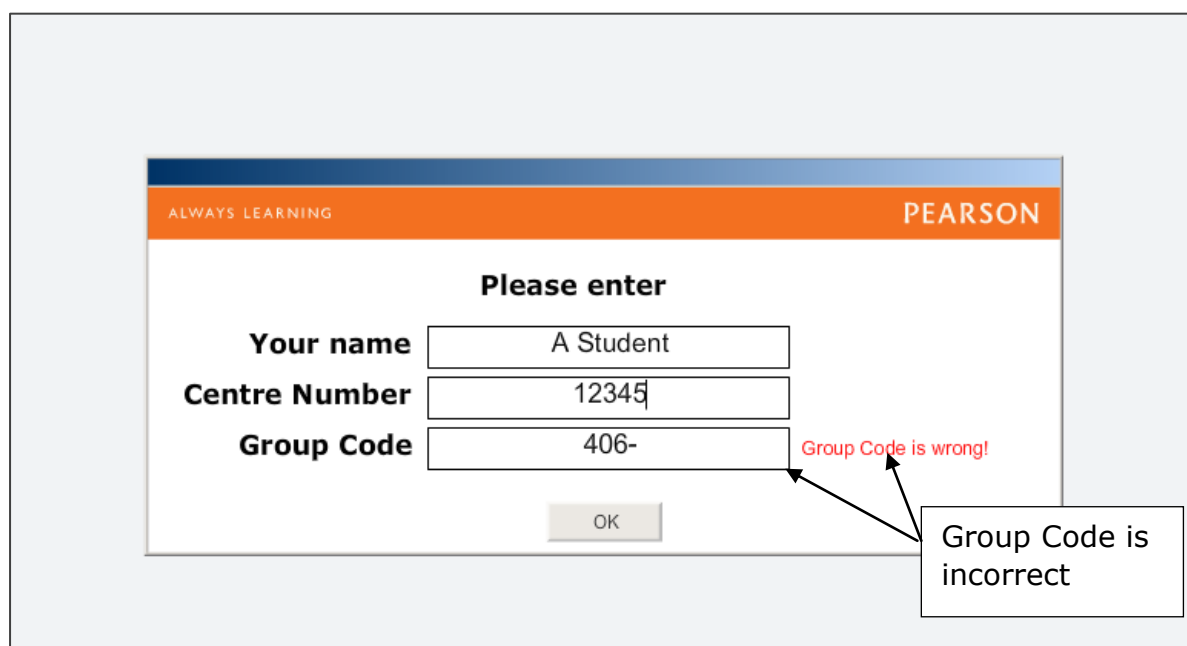

Screen 1

Screen 2 - This screen explains some of tools they will use and that they will get reminders about the time remaining. (Remind your learners that the time will not pause if they click on the Help button during the test.)

Next your learner should enter their details (name, centre number and Group Code). Please note – if the learner does not put the group code in correctly an error will show and they will not be able to enter the IAT(As in the example below).

The IAT uses several types of items which are all be computer marked. They do not require a great deal of IT ability to complete but you need to be aware of them so that you can help your learner if they are confused. The examples below illustrate the types of techniques that are used:

Time Help Review Flag Previous Next Exhibit Translation Quit Status

Jess sells beauty products on a website.

A customer orders some face cream.

What shape is the container?

A. A cube ☐

B. A circle ☐

C. A sphere ☐

D. A cylinder ☐

face cream

This item has a simple MCQ format. Learners just need to select one answer by clicking on it.

Note the calculator. It is a BODMAS calculator and is on every maths item, although learners may use their own or not use one at all if they prefer. It cannot change position.

Click on the right answer

Calculator: 0 C 7 8 9 ÷ 4 5 6 x 1 2 3 + 0 . = -

Question Number 5

Time Help Review Flag Previous Next Exhibit Translation Quit Status

Josh starts a new job.

Each week he works for 7 hours a day, Monday to Friday

How many hours in total does he work each week?

Put your answer in this box.

In this item learners need to type their answer into the box provided

Question Number 1

Time Help Review Flag Previous Next Exhibit Translation Quit Status

Jay has these plates.

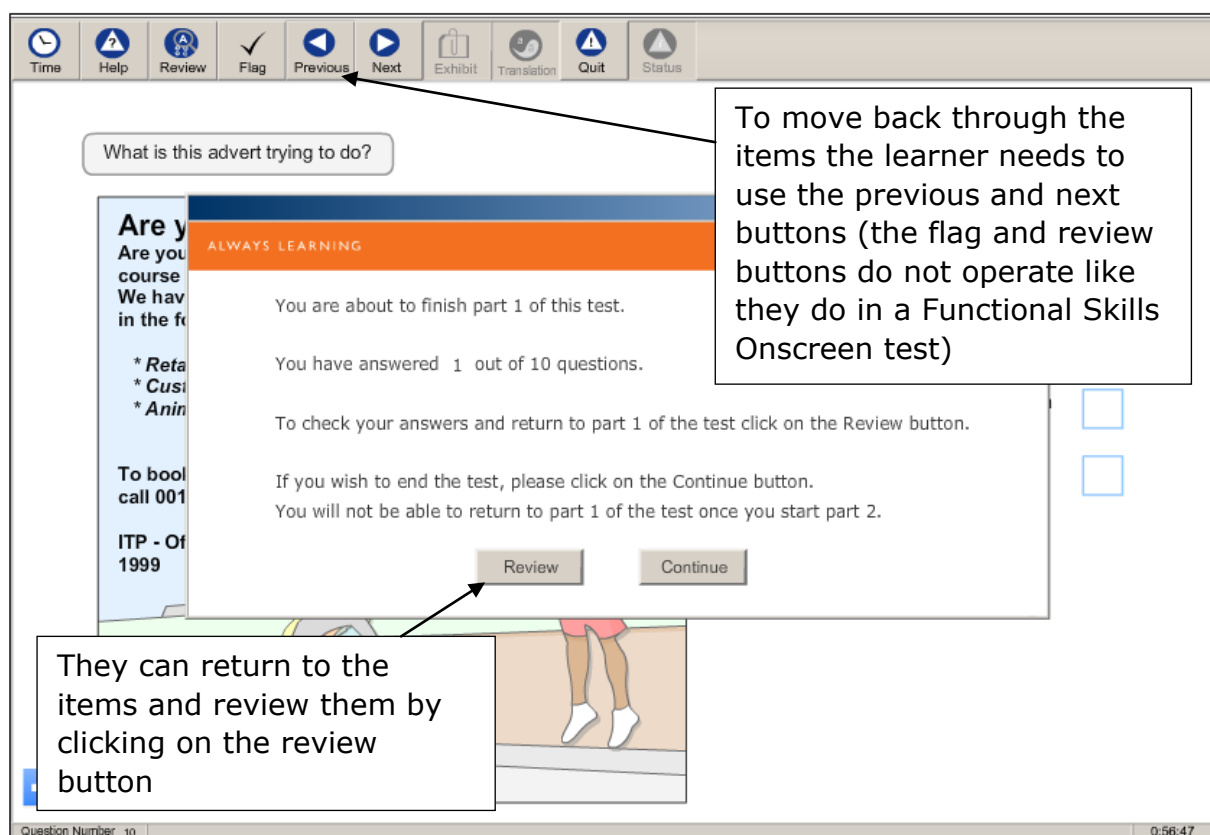

Drag all the **square** plates to this box.

In this item the learner needs to pick up the items from the list by clicking on them and then dragging them into the box below before releasing the mouse button

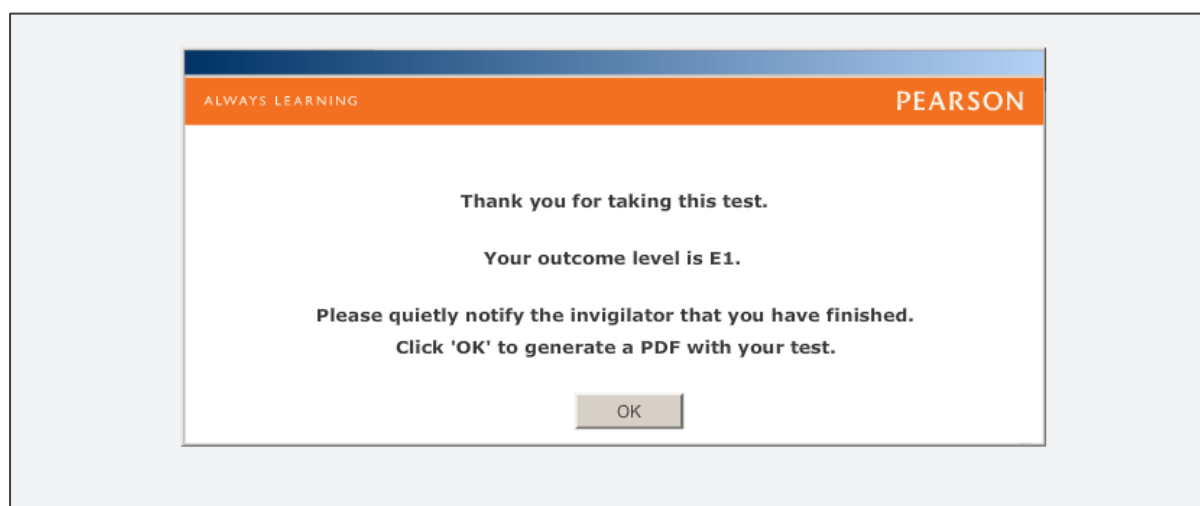

Question Number 13

When your learner has completed 10 questions a box will pop up asking them if they want to review any of their answers (NB if they choose to go on, they cannot review these items at a later stage).

Once the learner presses the 'Continue' button they will be given another 10 items to answer. At the end of the assessment a screen appears which gives them an indication of the level they are working at. They will also be asked to click 'OK' to generate a PDF of their test. (If they do not click on 'OK' the data from this assessment will be lost and not saved to your group profile.) Please be aware that this PDF takes a few minutes to be produced as the data is simultaneously being saved to the teacher's section of the web under the group profile.

4. Retrieving Group Profiles

When you want to produce your group profiles you need to return to the home page of the IAT. Then follow the instructions shown in the images below:

Initial Assessment Tool for Functional Skills

If you are a student
Click [here to choose a test](#).

If you are a teacher

- [Get group code for your students](#)
- [Review your students' tests](#)

[home](#) | [software you need](#)

Click here to review the tests

ALWAYS LEARNING PEARSON

Initial Assessment Tool for Functional Skills

Review your students' tests

Enter the login and password you set up for yourself before. Then enter the group code you want to look at

Login:

Password:

Group Code:

Click here if you [do not remember](#) your login or password.

[home](#) | [software](#)

ALWAYS LEARNING

If you can't remember you login and/or password you can request a reminder by clicking here and entering you email address. A reminder will automatically be sent to your email address containing your login, password and all the group codes you have set up.

Once you have entered the correct details and clicked submit you will be taken to the following screen. Your list of learners' tests will appear. This group code only has one test in it.

Initial Assessment Tool for Functional Skills

Review your students' tests

List of your students who took tests
Group Code: 406-891-699

Download this table as a [spreadsheet \(xls\)](#).

Name	Started	Duration	Marks	Level	
A Learner	2013-04-30 20:53:37	00:03:44	10	E3	pdf

Please [logout](#) once you are finished.

[home](#) | [software you need](#)

ALWAYS LEARNING PEARSON

The spreadsheet will show the group code, the learners' names, the dates they took the assessment, their total marks, level and each item's results. (Each item is marked 1 or 0 (representing right or wrong)).

406-891-699 - Excel

FILE HOME INSERT PAGE LAYOUT FORMULAS DATA REVIEW VIEW

Clipboard Font Alignment Number Styles

A1 Group Code: 406-891-699

	Name	Started	Duration	Total Marks	Level	Q1	Q2	Q3	Q4	Q5	Q6	Q7	Q8	Q9	Q10	Q11	Q12	Q13	Q14	Q15	Q16	Q17	Q18	Q19	Q20
1	A Learner	30/04/2013 20:53	00:03:44	10	E3	1	1	1	0	0	0	1	1	0	0	1	0	1	1	0	0	1	0	1	0

The spreadsheet also indicates the time the learner spent on the test. This may help you decide if this is a fair picture of their ability or whether you need to do further assessment. In this case the learner took less than 5 minutes, suggesting they rushed and should be encouraged to try again

You should now be familiar enough with the FS IAT to try it with your learners. We hope that you find it useful in helping to decide which Level of programme will challenge your learner but be achievable during their course of study.

If you have any further questions please contact: functionalskills@pearson.com
