COPY

I really enjoyed doing this copy, mainly because it's quite a bit of fun. The hardest part of this was getting the right colour scheme. For example, a skin colour was a shade of 30% to 35%, the hair was a shade of 30% to 35%. The figure was a shade of 30% to 35%. The background was a shade of 30% to 35%.

Superman is 2017. "There's a New Victim in town." (LA) "Super size me" 2.8 x 22.

The character, the ability to breathe through water, was a result of his being in the water for a long time. The character was a result of his being in the water for a long time.

The same character's strength was a result of his being in the water for a long time. The character was a result of his being in the water for a long time.

LIE

Comments:

- Knowledge, understanding and skills are generally cohesive throughout.
- There is evidence of experimentation and exploration of a range of photographic techniques and processes, however ideas are not always adequately developed.
- This is competent and consistent work with thoughtful development of ideas with informed references to the work of others.
- Annotation is reflective, however often descriptive and sometimes superfluous.
- The candidate has realised their intentions through the purposeful investigations they have pursued.
