### Examiner comments:
- The candidate's knowledge, understanding and skills are simplistic and deliberate.
- The development process is superficial in the formulation of ideas. Investigations demonstrate a basic critical understanding of their own ideas and the sources that have informed them.
- Experimentation is methodical in the use of media and processes, appropriate to intentions.
- The recording of ideas through the manipulation of photographic processes is superficial and unrefined.
- Annotation shows a basic understanding of sources, related to personal work and the work of others.
- The final realisations demonstrate a basic understanding of visual language through the application of the formal elements.

### Keyword descriptors from the taxonomy:
- Deliberate
- Simplistic
- Methodical
- Superficial
- Unrefined
Standard Mark – 23
I have used crop and used original.

This photo went well as it shows the amount of rubbish we waste.

I changed the brightness and the contrast. This idea is influenced by Ansel Adams.

This shows harming the environment because we throw away 90% of the rubbish.

This photo went well as it expresses my message which is to reduce 1 environment.
I used Photoshop to edit my photos. I used Adjust hues to change to black and white.

- Change the brightness and contrast to a specific level.
- Adjust the background image to match the photo.

This is the final edited photo.
