

GCSE

Art and Design

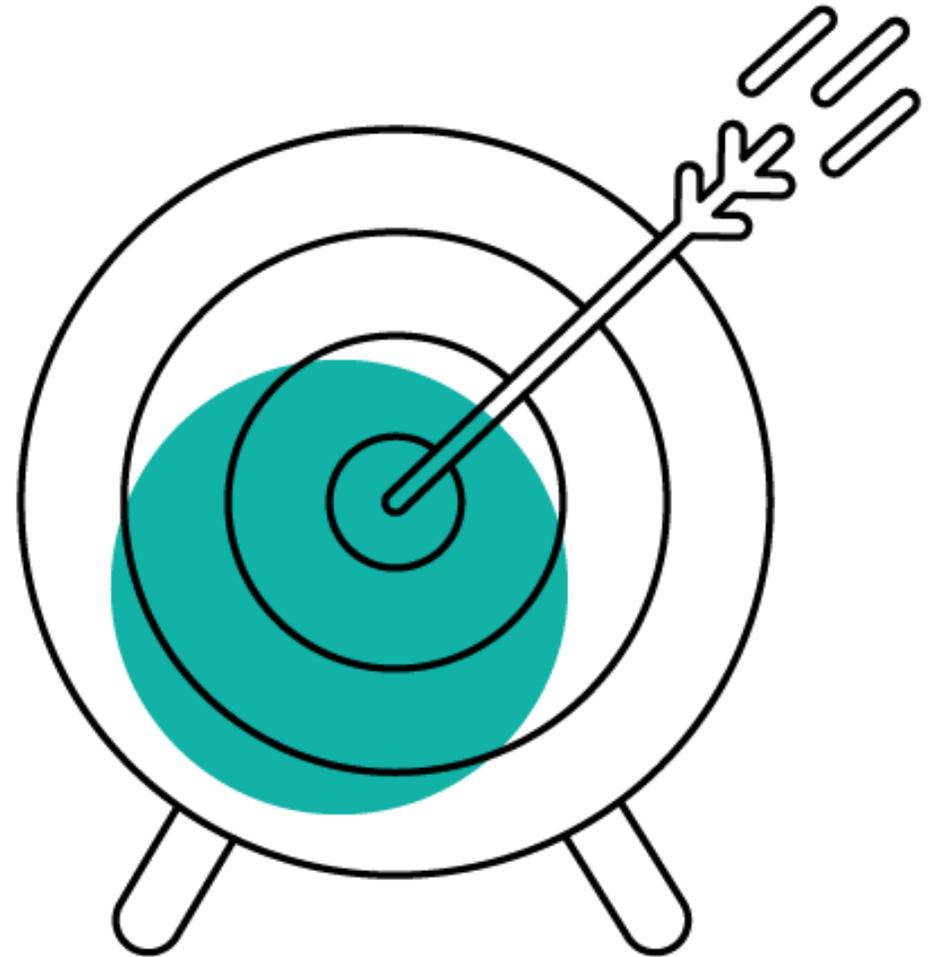

Coursework Marking Training Event
Module 4
2024/2025

Susan Welch
Linzi Stockdale-Bridson

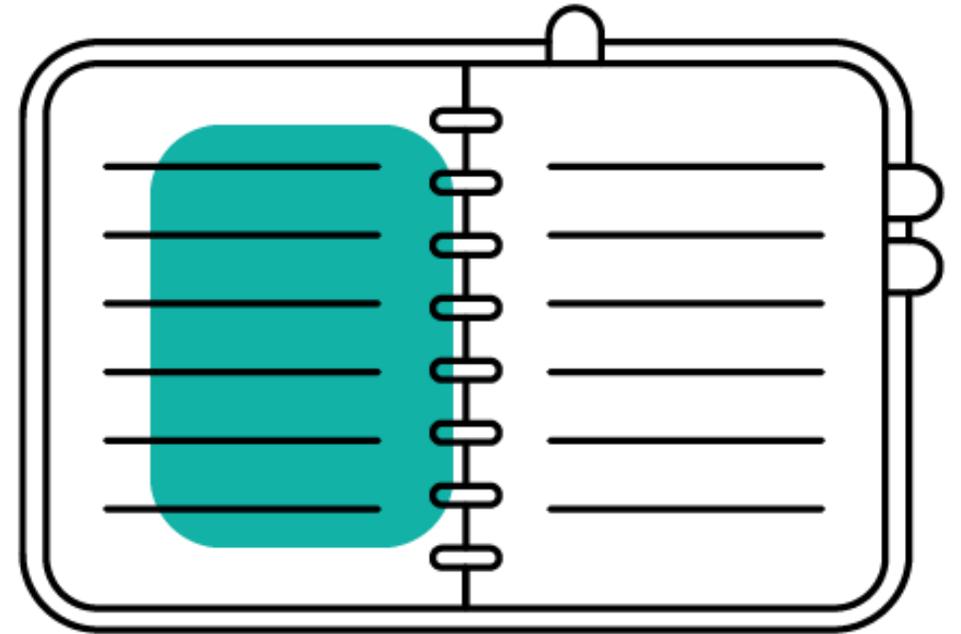

Aims and Objectives

- Understand the process of Marking and Standardisation
- Recognise characteristics of each performance level in GCSE Art and Design
- Understand how to use assessment tools and exemplars to mark students' work accurately
- Mark samples of work using the assessment tools
- Ask questions

Agenda

- Preparing for the Moderation/ Internal Standardisation
- Assessment grid and Taxonomy
- Warm up exercise
- Walk through Fine Art Component 1, Standard mark of 72
- Marking sample 1 (Photography) / feedback of Standard Mark
- Marking Sample 2 (Fine Art) / feedback of Standard mark
- Marking Sample 3 (Textile Design) / feedback of Standard mark
- Marking Sample 4 (Three-Dimensional Design) / feedback of Standard mark
- Q&A
- Plenary

- Assessment Objectives:
**DEVELOP, REFINE, RECORD,
PRESENT**
- Titles/areas of study
- Components
- Drawing
- Annotation
- Selection of work for assessment
- Grade Boundaries
- Exemplars and Support

Internal standardisation and moderation

Internal Standardisation Centres are reminded that it is their responsibility to ensure that where more than one teacher-examiner has marked the work in a centre, effective internal standardisation has been carried out within each component across all teaching groups and across all titles. The marking of all titles is considered as one and therefore adjustments applied to one title will affect the marks for other titles. This procedure ensures that the work of all candidates at the centre is marked to the same standard. The statement confirming the accuracy of mark being submitted online **MUST** be ticked.

It may not be possible for external moderation to take place if effective internal standardisation has not been carried out. If it appears to the moderator that the internal standardisation has not been carried out, they may withdraw from the moderation. The centre will then be required to remark all candidates' work and carry out internal standardisation, once complete moderation will resume.

(Administrative support guide, pp.10-11)

GCSE Art and Design Specification (p.28)

Standardisation

Where marking has been carried out by more than one teacher in a centre, there must be a process of internal standardisation carried out to ensure that there is a consistent application of the assessment criteria. During the internal standardisation process, teachers must:

- mark their own group's responses
- mark sample pieces of work together to compare marking standards across all teaching groups
- discuss any differences and ensure there is a common understanding of the criteria
- amend marks so they are consistent
- pay particular attention to marks awarded across both components and across all titles to ensure consistency of marking, using the generic assessment grid on pages 32 and 33 of the specification.

GCSE Art and Design Assessment Tools

Pearson Edexcel GCSE Art and Design (2016) Exemplar Gallery

This exemplar gallery has been created to make accessing our exemplar materials more effective and straightforward.

The gallery contains exemplar materials organised by performance level and separated into components. A thumbnail is provided for each exemplar as a visual reference point, accompanied by details of the mark and title.

We hope that this layout will make our exemplar materials more accessible, aiding the process of internal marking and standardisation in your centre.

Pearson - GCSE Art and Design 2016 - Assessment Taxonomy

How to use the Taxonomy in conjunction with Assessment Grid

The first stage is to decide in which performance level the candidate's work should be placed. When assessing work for each component, teachers should make a holistic judgement using the descriptors in the taxonomy, to establish which performance level matches most closely the candidate's work. The candidate should be placed in the performance level that best exemplifies the characteristics of their work. Candidate's work that falls between two performance levels must achieve all the keyword descriptors in the lower level and some in the level above. Where this happens, teachers must use their professional judgement to decide which performance level is most appropriate using a 'best-fit' approach.

After a performance level has been established, the next stage is to use the assessment grid to decide a mark within the performance level. Read the 'Instructions for use' which accompanies the assessment grid prior to establishing a mark for each assessment objective and total mark.

Component 1: Personal Portfolio

Endorsed title, Photography

- This work exemplifies emerging competent ability.

Why is it emerging competent?

- Adequate use of skills.
- Coherent development of ideas.
- Relevant and clear contextual links.
- Competent use of visual language and techniques.

How can this candidate improve?

- By exploring ideas with greater depth and understanding.
- Experiment with more innovative and imaginative ways of working.
- Extend the visual and contextual research.

Examiner's comment

A strength of this candidate's work is seen in their ability to produce a focussed and coherent submission of work.

THE TATE

The National Gallery of British Art is known as the Tate Gallery. It is found in Millbank, London. The Tate Britain is the world centre for understanding and enjoyment of British art. Internationally unrivalled displays show the development of art in Britain from Tudor times to the present day. These art displays are frequent in several different ways. The Tate has many kinds of art like modern, contemporary, sculpture, painting, etc. The Tate was based off Henry Tate, founder of The Tate. He was born on the 11th May.

This piece of art called 'Bursting Shell' influenced me to do more optic illusions and no beginning/no-end art pieces. I think that the swirl in the center drawing the viewer's gaze in us, us linked back to the colour drawing shell and with the stripes reflecting the swirl.

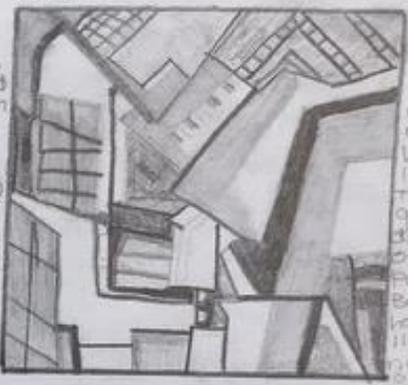

VORTICISM

Vorticism were a British avant-garde group formed in London in 1914 with the aim of creating art that expressed the dynamism of the modern world.

The group was founded by Wyndham Lewis in 1914 (a artist, writer and poetist).

Vorticism painting combined Cubist fragmentation of reality with hard-edged imagery.

First world war brought vorticism to an end. Although in 1920 Lewis made an attempt to revive it.

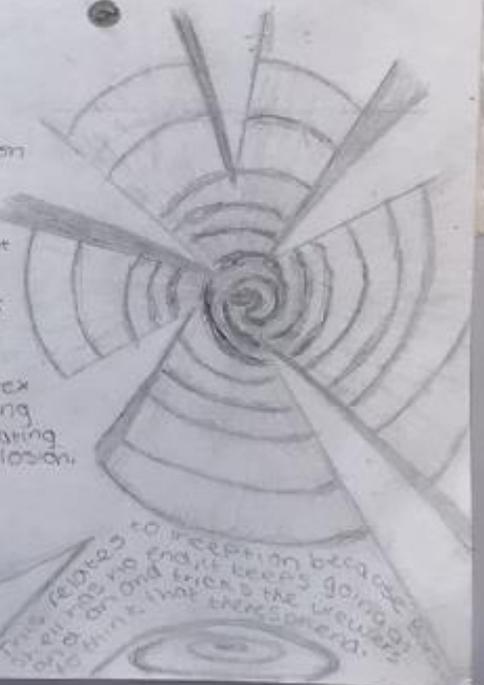

This painting relates to the illusion of inception where does it start? The viewer's gaze is directed all over the painting because it has the illusion of no beginning or end.

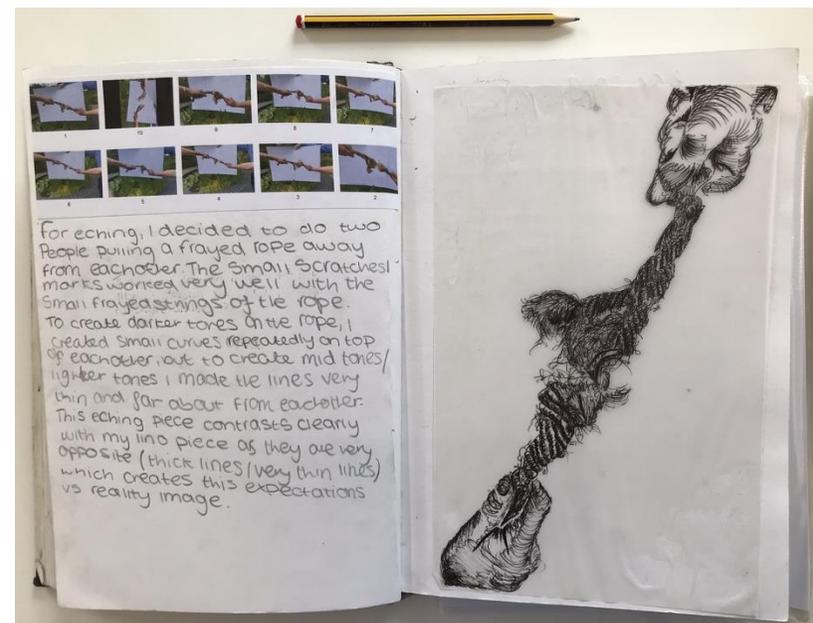

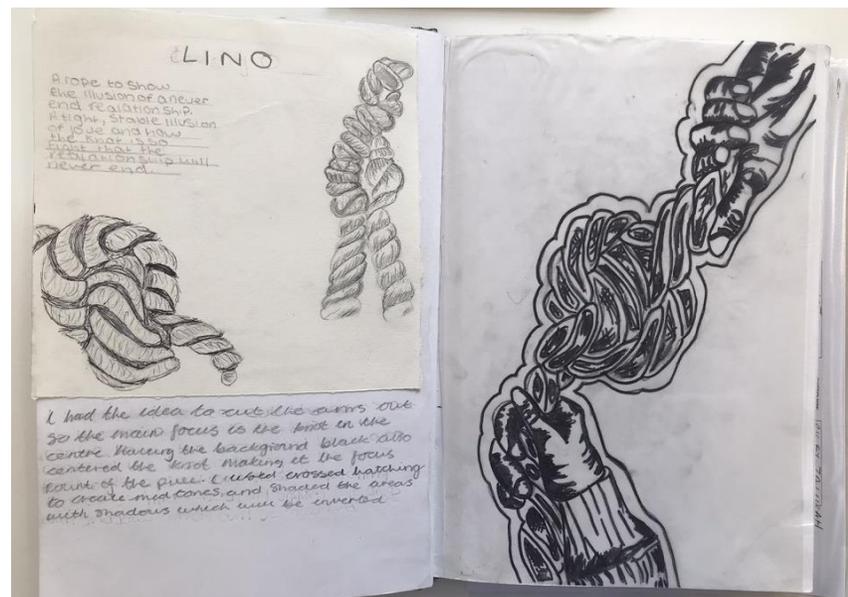

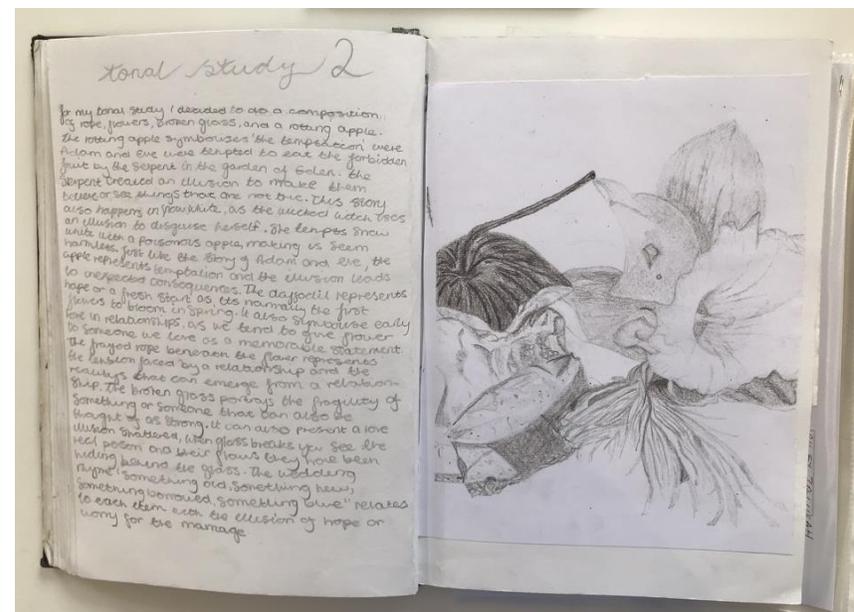

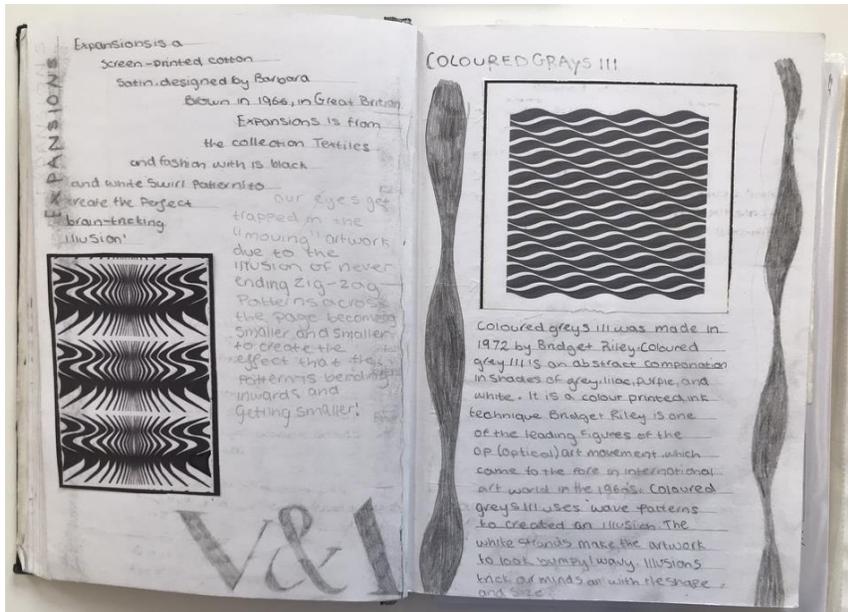

BURSTING SHELL

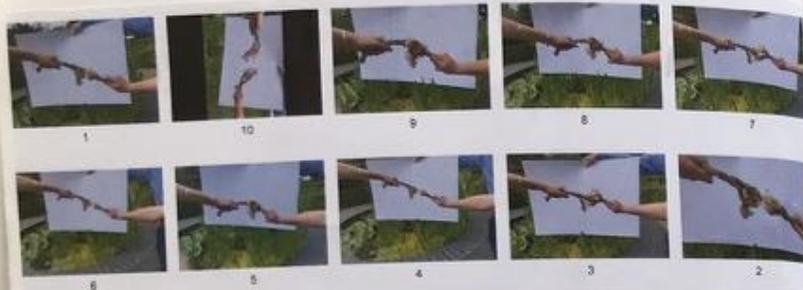

'Bursting Shell' was painted by Christopher Richard Wynne Nevinson in 1915 in the medium oil paints on canvas. 'Bursting Shell' uses the strong lines and swirling movements of futurist and vorticism compositions to recreate the effect of an explosion. The dark shapes, which could be shards of debris or shadows, fractures are involved in this art piece too.

The strong focal point of the vortex with its bright light and dizzying spiral stimulates the disorientating sensory experience of an explosion.

This relates to inception because it has no end, it keeps going and it tricks the viewer's mind to think that there's an end.

For etching, I decided to do two people pulling a frayed rope away from each other. The small scratches/marks worked very well with the small frayed strings of the rope. To create darker tones on the rope, I created small curves repeatedly on top of each other, but to create mid tones/lighter tones I made the lines very thin and far apart from each other. This etching piece contrasts clearly with my lino piece as they are very opposite (thick lines/very thin lines) which creates this expectations vs reality image.

Diamond ring

→ sakamshi is 3rd mentions
→ shadow of petal

ring is barely
different tones of the petals
detail on petals (veins)

↳ texture ring curves
reflections on diamond ring
curves on the petals

↳ not enough light tones
spacious top corners

↳ too green
good dark tones

↳ diamond is very reflective
↳ shadows
↳ leading line on petal to the right corner
↳ lightest tone is the diamond's reflection
↳ heavy bottom right corner
↳ diamond emphasised for big detail + texture

↳ diamond's shadow viewers gaze

CYANOTYPE

For this piece, I wanted the shell to be the main focus of the viewers eyes on the shell at first, and then go mind with the rope which gets further away from the center. The Blue creates an optic illusion with the stripes for the viewers eye. I decided to catch all of the small details and add to the illusion.

With the tone and colour of the cyanotype, I decided to make the shell brighter so it would stick out more by leaving it longer in the water to make it lighter. In between each rope is a reflection of it to create an optical illusion for the eyes, with one side being darker and the reflection of the rope becoming lighter.

↳ so the rope is the main focus of the viewer's eye
↳ the rope is the main focus of the viewer's eye
↳ the rope is the main focus of the viewer's eye

PAINTING

The texture is what I was making the colour black with red, yellow and orange blue.

for my painting, I decided to do a wedding ring on top of flowers to represent a proposal or engagement. this embodies love and commitment. The flowers can represent the blooming of a relationship, while the ring is a promise of the future together. the different tones on the big petal centered blend nicely to show reflection of the light. the diamond on the ring is a very significant object as it symbolises eternity and fidelity. On the other hand, the flower portrays the growth within a relationship. the plain black background creates a sharper image of the flower and ring and makes it the main focus for the viewer.

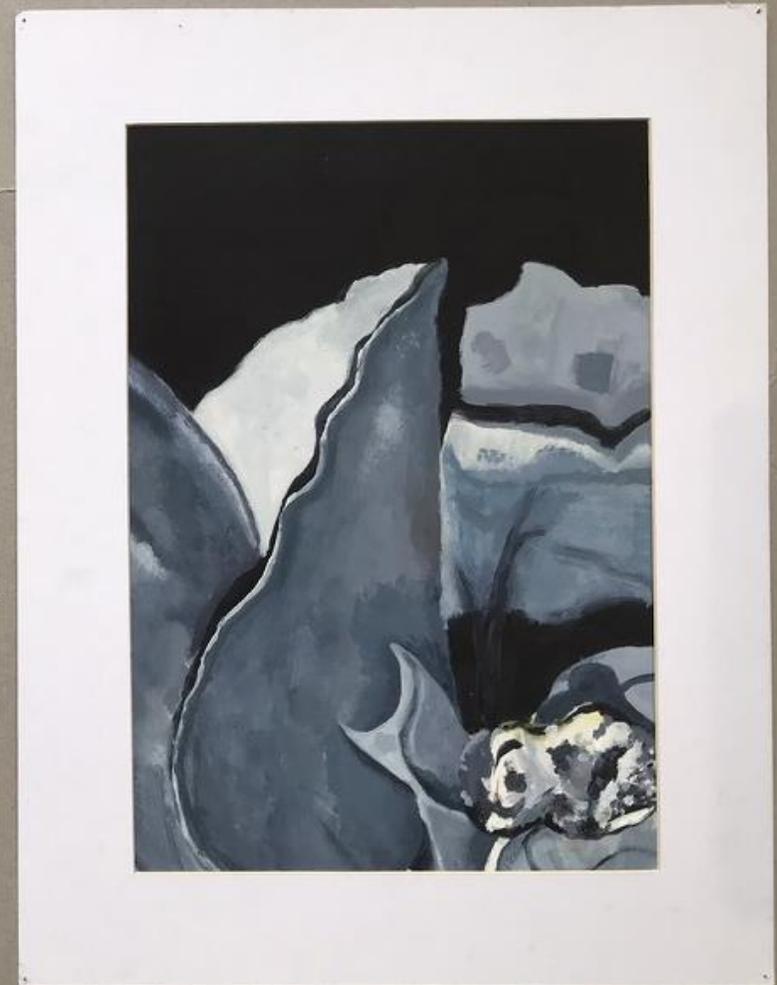

Initial Ideas

COLLAGES

↳ tissue paper didn't work with the rest of the pictures
↳ too much in the centre
↳ piece of glass shadows stood out too much

↳ both colours of tissue paper didn't match together
↳ focus point is the two frayed ropes

↳ leading line is the chain in the centre
↳ not alot going on
↳ contrast of grey and pink

collage

for my collage i decided to do a loop of life and death and how the grey tones on the skeleton hands represents death and the bad reality of a never ending relationship where as the pinky tones on the skeleton hands represent a strong bond of a relationship and the expectation of when 2 people become 1 in a lasting relationship. Pink flowers represent a symbol of love and happiness which contrasts with the grey skeleton hands which portray dead people and sorrow. But grey/white flowers imply and symbolize new beginning, hope and everlasting love. Grey flowers are usually used for wedding to also symbolize a perfect relationship. The chain entwined within the flowers and skeleton hand also shows an illusion how relationships inter-locked to create this strong bond.

Cyanotype

for this piece, i decided to create an illusion with rope, shell and other to portray a never ending illusion, i thought that entwining flowers into the rope could show over-grown love and a healthier relationship. Both the flower and the rope are coming from inside the shell which also shows the no end and no beginning illusion.

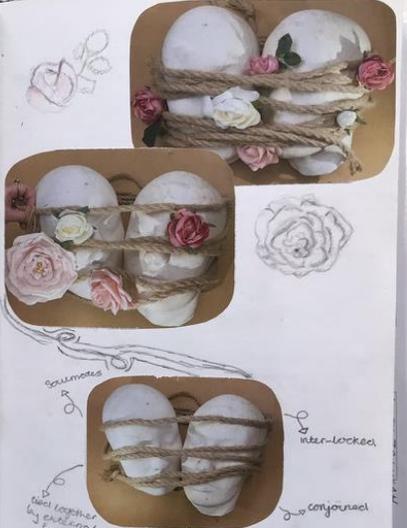

to remove any distractions in the background i am going to cut it out for the focus to only be the centre. i decided to do white and pink flower because they portray perfection which contrasts to the reality of a never-ending relationship. They also show love and gentleness, which suggests how love is a natural factor of life which is similar to the bloom of the flowers coming out of the shell.

i decided to make the line of flowers thinner as it go round to show the end better. The flowers on the shell show an illusion as well as they are also coming from inside the shell as well. i added leaves to show a more natural and over-grown look.

this photo shoot was inspired by "the bees". i decided to do two head molds with rope filling them together to re-enact "the bees with sting" making the two represent love and the over-growth that is happening with the two souls growing that is the white flowers represent and symbolize perfection and purity within the two heads. pink flowers symbolize the infinite love and gentleness which is being held between the bees.

we took multiple photos to show the different angles and lighting that can create different perspective for the viewer.

inter-locked

conjoined

to merge into one

to face

held together by external forces

Past

at the start of fourth form i was intrigued in the idea of no beginning, the opposite of the most inception and no endings, so i researched Escher and his artwork which pushed me to base my art pieces around illusions. After creating multiple artworks, i slowly got interested in never-ending relationships and how love can be eternal. Then i went on to the reality of an ever-lasting relationship and thought about the bad things that could happen, as shown in my two one evening.

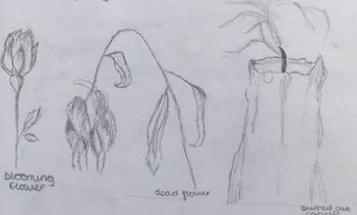

Present

at the moment i am creating art pieces around love becoming inter-locked with each other. i created a photoshoot with two head sculptures wrapped around each other with string/rope, this is forever emerging out of it to show how love can be ever-lasting and eternal. i also did a photoshoot and cyanotype of a piece of rope coming out from a shell and then entwining around to create an illusion. i also added flowers to show another illusion where love isn't ingenuously.

Future

Moving forward, i would like to look at the reality of never ending illusions more, and go into research and collect ideas about fantasies and the death. i also want to look more at love becoming inter-locked with each other and staying together for eternity. The less with strings by conical forms and Auguste Rodin consider love becoming on another. i also want to create a collage about life and death to create contrast. i would add different medias to show my progress and to tie everything together.

blooming flower

dead flower

buried the heart

This photo shoot was inspired by 'The Kiss'. I decided to do two head molds with rope pulling them together to re-enact 'The Kiss with string', making the two head statues together forever. I added flowers to represent love and the over-growth that is happening with the two souls coming to one. The white flowers represent and symbolise perfection and purity within the two heads. Pink flowers symbolise the infinite love and gentleness which is being held between the heads.

We took multiple photos to show the different angles and lighting that can create different perspective for the viewer.

The kiss with string

Cornelia Parker conceived 'the kiss' by Auguste Rodin with string in 2003. This was her contribution to the 2003 Tate Liverpool day kiss with strings attracted.

Cornelia Parker is one of Britain's best loved contemporary artists. Parker was born on the 11th July 1956 and studied at the Gloucestershire college of art and design.

Cornelia Parker decided to wrap 'the kiss' with a mile of string (which was wrapped by hand - without adhesive or tape) as a nod to the great French modern artist Marcel Duchamp who once used the same in his work.

Cornelia Parker has immortalized the two lovers to conceal their love. The two lovers are wrapped up within another, locking their love forever; to make it infinite.

Cornelia Parker

'The kiss' was created by Auguste Rodin in 1901 to 1904 for a Lewis-based artisan Edward Perry Warren. When Warren gave the suggestive sculpture to the people of Lewis in 1913, it was a suspicion on the town that but sparked such an outrage it had to be fenced off and covered up.

Parker has concealed the lovers with string once more but for the opposite reason. Exhibition curator Judith Nesbitt said "it is a highly erotic piece of work."

Cornelia Parker is interested in the emotionality of the work. Loves are shared within each other. The string binds the lovers together and conceals their kiss by wrapping their hands together.

Contact Sheet

A grid of 100 small photographs showing different views and details of the 'The Kiss with Strings' sculpture. Each photo is labeled with a file number, such as IMG_8468, IMG_8469, etc., up to IMG_8499.

Sanctified

eschat

A collection of larger photographs showing the 'The Kiss with Strings' sculpture in various settings and lighting. The images are arranged in a grid and show the sculpture from different angles and in different environments, including one with a white rose and another with a white skull.

MEDIA

for my final piece, I have decided to do a collage approach, and real life this gives context within objects and the real life life. I am going to draw candles with pencil and put them in a circular form to suggest the time by drawing 12 of them. The cyanotype will be a two heads, a face, a face with two eyes to show how love can be an illusion and 2 can become one. I am going to use a piece of rope around the edges, I will put colored pencil flowers underneath the candle to represent the new growth of love and an immortal soul.

I decided to do the rope in a cyanotype to create a contrast of color between the blue and white pencil drawing of a candle. This cyanotype will be an A3 to match the size of the base.

Adding colored pencil drawing of a flower also creates contrast with the candle as they represent death or disaster but the flower represents love and happiness.

I will surround to create a new life. This individuality on each candle, so represents the time and a new idea. The cyanotype will be colored pencil flowers underneath the candle to represent the new growth of love and an immortal soul.

Composition

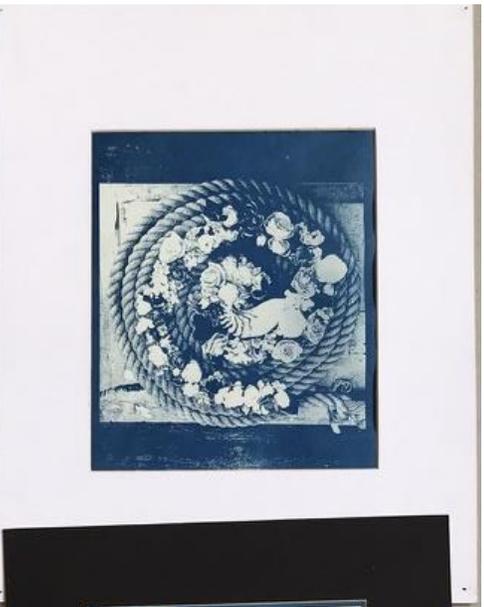

The pencil on the side of the page are going to be used in the outside of the composition as a cyanotype. This will represent how relationships have many different sides to them and when they break you wish the course to be with them. The diamonds and gems will be in a row beneath the cyanotype of the two moored heads well being.

I decided to put the pencil drawn candles in a circle form to represent the time and a circle, when one is being drawn on to represent the new and when one is being a moment to light the candle representing the start or beginning. This brings a new ending cycle of work that brings for eternity. I will use really pure suggest parts and the contrast to show different time in the time of a candle. I will do this by surrounding by a cyanotype and a line that surrounds the base of the candle.

I created a cyanotype of a swirl of rope, however it is smaller than the circular base so I need to enlarge it to match the rope and the real life rope and the real life rope and the real life rope.

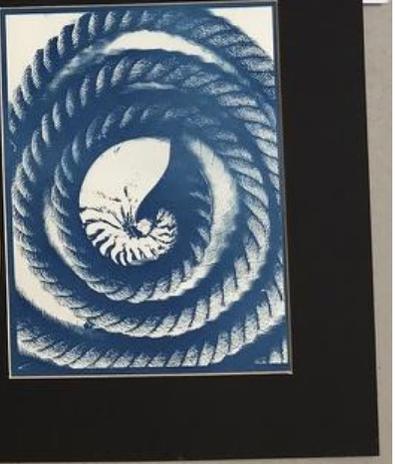

Final piece

for my final piece, I decided to create a collage of multiple objects in different mediums. This brings a sense of never ending love, tied with the Mexican decorative style, which shows a sense of a beginning and end, displaying the importance of being displayed in this manner for the viewer. My eye speaking into the world two pencil present how long is they are examined decided to have my his blunt contrast was because I decided to change the rope as the theme can stand rope complements the pink rope more especially with the bigger rope, I decided to show the essence of the rope due to the ends showing, with the the new rope, ending and immortality, are shown together.

Pearson - GCSE Art and Design 2016 - Assessment Taxonomy

COMPONENT 1 STANDARD MARK 49

How to use the Taxonomy in conjunction with Assessment Grid

The first stage is to decide in which performance level the candidate's work should be placed. When assessing work for each component, teachers should make a holistic judgement using the descriptors in the taxonomy, to establish which performance level matches most closely the candidate's work. The candidate should be placed in the performance level that best exemplifies the characteristics of their work. Candidate's work that falls between two performance levels must achieve all the keyword descriptors in the lower level and some in the level above. Where this happens, teachers must use their professional judgement to decide which performance level is most appropriate using a 'best-fit' approach.

After a performance level has been established, the next stage is to use the assessment grid to decide a mark within the performance level. Read the 'Instructions for use' which accompanies the assessment grid prior to establishing a mark for each assessment objective and total mark.

Annotations

Imaginings on The Sublime

brush to reveal highlights instead of using white or yellow – this retains local hue and does not interfere with the general sense of atmospheric depth.

The concept of 'The Illusion of Detail' - as outlined by Stuart Davies - was key here and somewhat of a breakthrough. Using simple line and rhythm as well as atmospheric perspective and a balance between blending and texture is an effective and simple way to describe area and detail. A sense of atmospheric depth can also be achieved by using contrast or a lack thereof such as in Rembrandt 'The Mill' - light against dark, dark against light, light against light and dark against dark can be seen along the mill's four blades. I attempted to employ this understanding in my painting of the Snowdon Horseshoe, where I also used what I had learnt in the first series, utilising swift, broad brushstrokes to depict clouds as a form of rhythm across the landscape.

In this series, I was able to experiment with media, developing skills with charcoal and Indian Ink to produce quick sketches whilst refining rapid pencil sketching too. I also discovered the important role of planning a composition in Photoshop before attempting a painting. Whilst spontaneity is key in my paintings, a basic structure needs to be developed prior to commencing on the final work in order for it to be a success. I did, however, struggle when it came to depicting trees using this rapid Tonalist method. Texture from a crumpled piece of tissue applied over thick, dark paint to reveal highlights was not entirely believable in my opinion. Helpfully, my next source of subject inspiration in Series 3 was the Faroe Islands, a landscape devoid of trees.

Series 3:

After planning to visit the Faroe Islands for the Summer holiday, it became clear that the magnificent landscapes, seascapes and skiescapes present throughout the islands should develop into a theme in my portfolio. I found a series of images of the Faroe Islands online which showed a great variety of subject matter: seascapes, landscapes and skiescapes in weather conditions of varying degrees of ferocity, clear or shrouded in mist. I was struck by the power of these images alone to conjure emotions of awe and veneration at the marvels of 'the sublime' and the natural world.

I was introduced to the work of John Virtue and Norman Ackroyd whose work resounded with me after I had collected images of the Faroes and developed new ideas about the potential direction for my portfolio. Their use of black and white further reinforced the ability of contrasting tones to convey the mood of dramatic atmospheric phenomena, an approach which is highly effective in capturing the awed emotions that settings such as those in the Faroe Islands inspire. I experimented in greyscale with simple compositions from images of the

4

Faroes. I used spray paint as a means of introducing physical movement across the canvas or board by standing the surface vertically and allowing gravity to carry beads of pure black or white paint downwards. I would then meet these drips with swift and broad lateral brushstrokes, blending the paint into the previous layers, creating complex and rhythmic tonal variety.

Whilst I enjoyed the effects of this technique, it was clear that it could be overdone, particularly when employed on a larger scale. I also felt that I should retain some element of colour in my paintings so as not to discount the knowledge I had gained in previous series. However, the idea of using drips of white paint to depict a light source returned later in the project.

This series culminated in a large painting of a Faroese cliff-face on paper using Indian ink, acrylic paint and spray paint. It was difficult to prevent large areas of black from overwhelming the viewer on this larger scale. I felt my desire to achieve an illusion of detail was somewhat hindered by this. The next step was to make use of large ambiguous space to depict clouds and atmosphere, and not rocks or less free-flowing subject matter.

Throughout this series, I felt that I had also managed to maintain much of the tonalist influence of Series 2 as well as drawing upon my admiration of artists such as Turner, who took pride in their ability to effectively render atmospheric effects and perspective with an emotional quality.

Series 4:

Upon a visit to a small gallery in Oxfordshire, I discovered the work of Kerr Ashmore, Harry Bricche and Claire Haley. Each depicted dramatic landscapes with varying degrees of realism or abstraction. All three inspired techniques I could use to enhance works based on the previous motifs touched upon in Year 10. The subject matter of Harry Bricche showed a more vibrant and modern take on Tonalism and Luminism, whilst also having a major focus on atmospheric phenomena, lighting and perspective. I could see that the technique of wiping out was frequently employed in his paintings, whilst also using blotting with a crumpled tissue to create texture and foliage. This led to experimenting over the holidays which resulted in my largest finished painting on board at the time. Kerr Ashmore's technique felt to me like a blend of the tone, hues and hazy form of Turner with the texture and rhythmic movement of John Virtue. I found that a larger board enabled me to experiment with greater textural detail as well as to expand the sense of scale within the picture, adding small details of buildings in the distance to convey the vastness of the surrounding landscape. This provided further inspiration for work during the next term, building on that of previous series.

FINE ART

Pearson - GCSE Art and Design 2016 - Assessment Taxonomy

COMPONENT 1 STANDARD MARK 72

How to use the Taxonomy in conjunction with Assessment Grid

The first stage is to decide in which performance level the candidate's work should be placed. When assessing work for each component, teachers should make a holistic judgement using the descriptors in the taxonomy, to establish which performance level matches most closely the candidate's work. The candidate should be placed in the performance level that best exemplifies the characteristics of their work. Candidate's work that falls between two performance levels must achieve all the keyword descriptors in the lower level and some in the level above. Where this happens, teachers must use their professional judgement to decide which performance level is most appropriate using a 'best-fit' approach.

After a performance level has been established, the next stage is to use the assessment grid to decide a mark within the performance level. Read the 'Instructions for use' which accompanies the assessment grid prior to establishing a mark for each assessment objective and total mark.

GCSE Art and Design marking exercise

For this activity you will need:

- A copy of the Taxonomy and the Assessment grid
- The answer sheet, to record your marks and make notes

You will look at 4 samples from different centres:

- Photography component 1
- Fine Art component 1
- Textile Design component 2
- Three-dimensional Design component 2

Test 1: Photography, Component 1

Lifetags - Gender, race, ethnicity, sexuality, nationality, religion
 Culture - Music, style, art, literature, language, economics, politics,
 Aims - Aspirations, hopes, dreams, goals, life plan, career plan
 Upbringing - Structure, play, discipline, rules, development, education
 Emotions - Moods, feelings, ideas, expressions, thoughts
 Personality - Traits, habits, outlook, morals, beliefs, opinions
 Memories - Experiences, origins, recollection, defining moments
 Physical Characteristics - Genes, fingerprints, eye colour, appearance, bone structure, features, shape of face, skin tone, distinguishing marks, tattoos
 Hobbies/interests - Past times, passions, obsessions, sport, computer games, fashion, music, socialising
 Lifestyle - Health, diet, physical activity, well being, mindfulness
 Family/friends - Mother, fathers, brother, sister, aunts, uncles, grandparents, friends, team mates, colleagues, peers
 Social groups - Friendship groups, social networks, Facebook, Instagram, Twitter, etc
 Personal objects - Items, possessions, clothing, phone, glasses, jewellery, books, watch, computer, iPad, books, journal/diary, past down family objects

Concept Plan Initial investigations/Experiments

Jorge Calambo: personal identity grids
 Adde Adesokan: personal identity triptychs
 Kevin Meredith: personal identity montage
 Jiri David: personal identity symmetry

: personal identity genetic similarities

Personal investigations/Experiments

Mood portraits: digital experimentation
 Personal photo shoot 1 - explanation of idea and photo shoot plan
 Personal photo shoot 2 - explanation of idea and photo shoot plan

CONCEPT ONE

PERSONAL IDENTITY

MOOD PORTRAITS

R E S P O N S E

In this portrait photoshoot I used brightness and contrast, black and white, blurring and vignette to create a powerful and intriguing layout as a final piece. I enjoyed creating these images as they are simple and once finished, give a professional and sophisticated final result with just a few amendments to the photograph. The use of blurring the background to make the foreground be more prominent adds a higher quality level to the edits, as it differentiates the two separate sections of the edits. If I could improve anything I would add more enhancements to the images to create more of a drastic appearance rather than just simple compositions.

PIXELATION

Element Dot Element Tile
Pattern Conceal Square Simplify

I think Chuck Close's work on pixelation is extraordinary and shows a different perspective of the pixelated artwork. I also like how there are many variations of his work and how there faces are distorted which means people can leave it up to their imagination. There are fewer shades of tone and colour compared to a painted portrait which shows the effort this photographer has taken to make these photos exquisite. He observes the light/darks tone from portrait photographs he has taken previously and creates an amazing contrast to the images.

Pixel Photography is a form of digital art, created through the use of software, where images are edited on the pixel level. The aesthetic for this kind of graphics comes from 8-bit and 16-bit computers and video game consoles, in addition to other limited systems such as graphing calculators. In most pixel art, the color palette used is limited in size and type

Chuck Close is known for his innovative conceptual portraiture, depicting his subjects, which are transposed from photographs, into visual data organized by gridded compositions.

ISABEL MARTINEZ

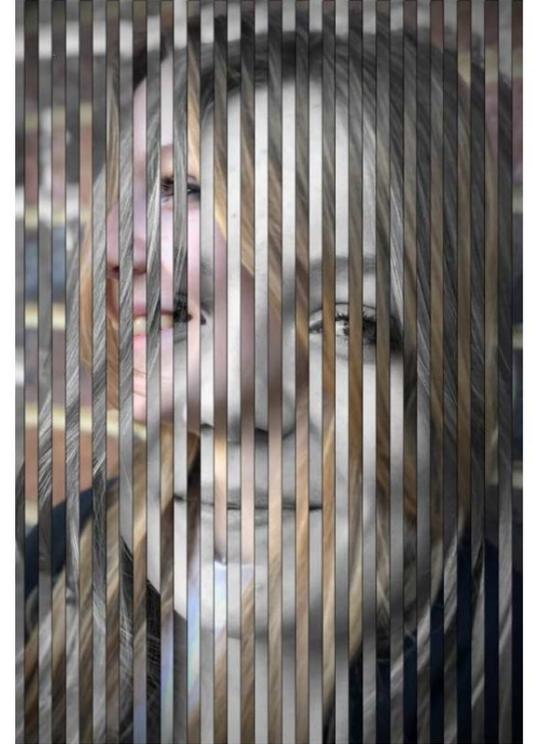

geometrical shapes
layering lines
concealing portraits
slicing hiding expression
splicing revealing

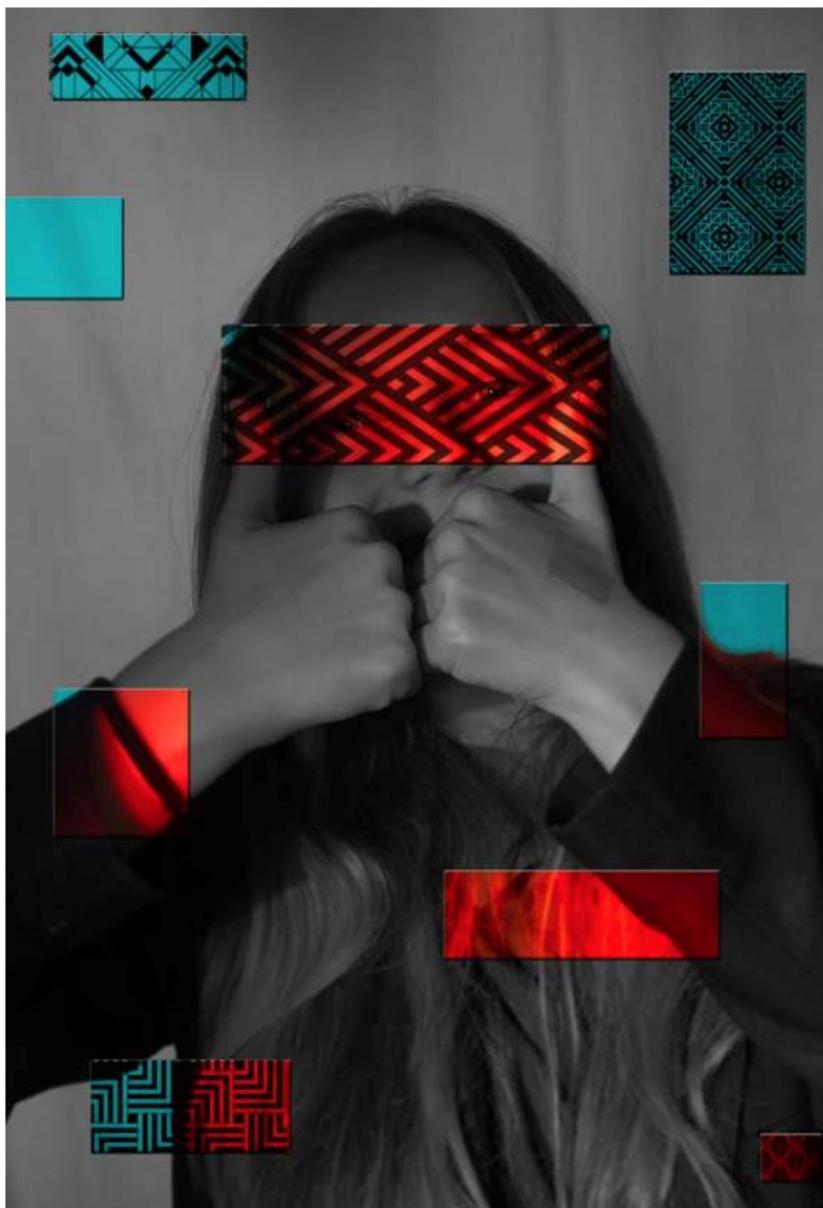

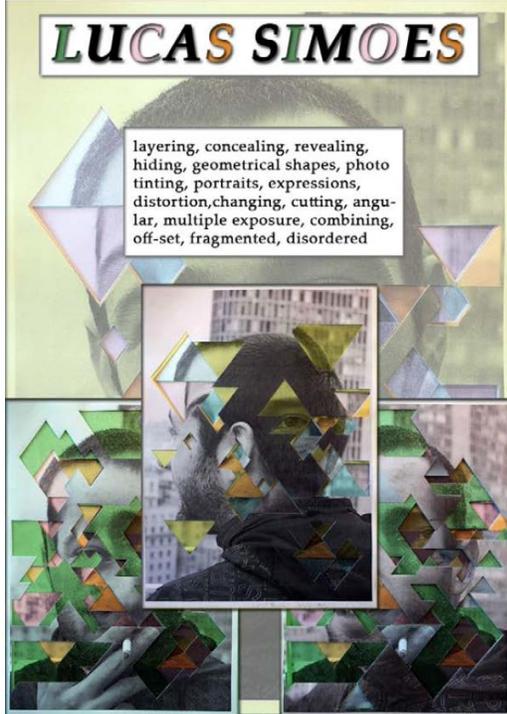

isabel martinez takes photos of people and splices two images together. she takes photos with an interesting background, where the subject is in the centre and with a square frame to border. Two photos taken from the same angle and lighting only moments apart, one on top of the other and blended together splicing (cutting) sections out. she captures it as if it was in the moment, with a lot of character to it. the mood of the work is a fun, relaxing, therapeutic feel. the offset of the photos are spliced together with a shadow to make it look 3D. How do these images relate to personal identity? (Clothing, mood expression of subject, location) What will you do in response to this research on Isabel Martinez work (who will you take photos of)? How will it link to your Personal Identity?

double exposure
combining illusion
ordered disorder angular
distortion fragmented cutting
changing off-set photo tinting

In person, these photographic works appear to shift and change depending on the distance and the angle from which they are seen; an illusion of volume becomes apparent, while other times it may seem as though there are as many as three images at play. Martinez

LUCAS SIMOES

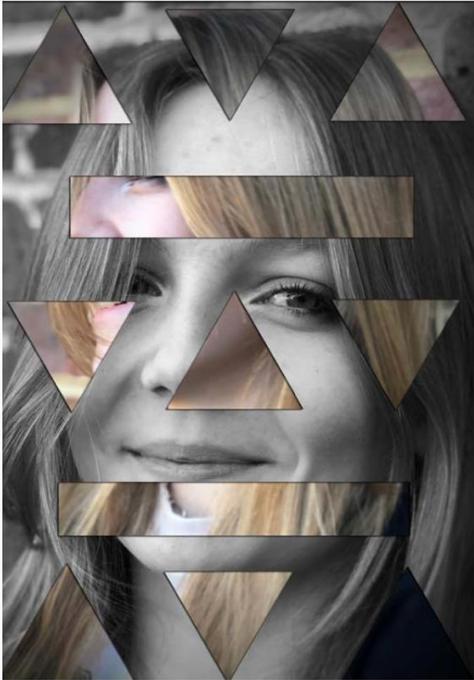

layering, concealing, revealing, hiding, geometrical shapes, photo tinting, portraits, expressions, distortion, changing, cutting, angular, multiple exposure, combining, off-set, fragmented, disordered

Lucas Simões is an independent artist based in São Paulo, with a background in architecture and design. His experiences of training as an architect redefined his perceptions of art and opened new paths of discovery. In architecture, he says, 'a drawing is more than a drawing: it is the intent that something concrete will materialize through the construction process'. This outlook has influenced his drawing process and his constructive approach to his work with collage and sculpture

'The work is achieved through the experiences it is subjected to, such as burning, cutting, distorting or diluting, which, at its most extreme, can destroy the subject.'

lucas simoes uses different, multi-coloured shapes to splice two images to create an interesting effect. he takes photographs of the same person in different angles to show a sense of identity and character to these images. i like how the cut out shapes create a new and original style of photography which is captured very well.

Cities - Brighton, Southampton, Portsmouth, London

Towns - Eastbourne, Hastings, Lewes, Bexhill, Worthing, Crawley

Villages - Heathfield, Ringmer, Burwash, Herstmonceux, Horam, Glyde

Urban - Dense, busy, loud, diversity, variety, large, scale, buildings, graffiti, grime, dirt, pollution, concrete, grey, built up, man made, cosmopolitan

Rural - Space, quiet, fields, paths, trees, farms, small, similar, natural, green, clean air, wood, brick, streams, rivers, provincial

Personal Places - Home/house, homes of relatives, bedroom, place of birth, school, college, garden, inside of a car, etc.

Memories of Place - Previous home, places visited in the past, old photographs of places, etc.

Visits - Holidays, days out, zoo, theme park, museum, beach, countryside

Events - Birthday, wedding, party, holiday, easter, christmas, etc.

Environments with Purpose - Shops, stations, garage, farm, hospital, building site, restaurants, school, college, etc.

Recreational Environments - Sports, football pitch/stand, cricket pitch,

netball court, athletics track, tennis court, cinema, theatre, art gallery, etc.

Concept Plan

Initial investigations/Experiments

Jorge Colombo: College identity grids

Alan Cohen: Textures of locations

Brighton Trip: Range of photographs capturing different elements of the city

Summer Holiday: Range of photographs capturing summer holiday

Personal investigations/Experiments

Personal photo shoot 1 - Summer holiday

Personal photo shoot 2 - Brighton trip

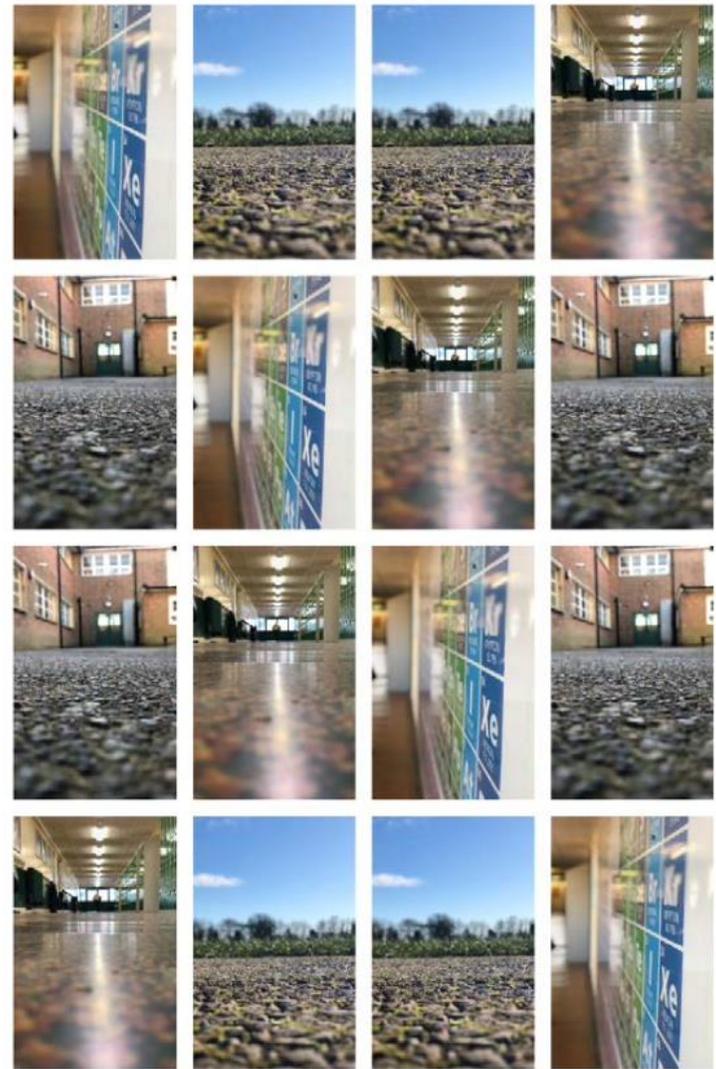

CONCEPT TWO

IDENTITY OF PLACE

Structure
Pattern

Order

Viewpoint

IDENTITY GRIDS

The subject matter of Jorge Colombo's identity grids is taking images of object, mainly vehicles.

Are they placed randomly or is there order? There are 16 tiles in the grids, they are rectangular and they are spaced out as 4 x 4.

They communicate identity of place by showing multiple different landscapes by showing it in different styles.

I like the grids because it shows many different ideas and images in a smaller and more compact way.

I will take images of books, trains, vehicles in general and buildings to take inspiration of Jorge Colombo and his work.

JORGE COLOMBO

Geometric
Abstract

Arrangement

Regular

MINIMALIST

PHOTOGRAPHY

Minimalist photography is a form of photography that is distinguished by extreme, austere simplicity. It emphasizes spareness and focuses solely on the smallest number of objects in the composition process. Minimalist photographers usually focus solely on one particular subject, rather than an abundance of color, patterns and information.

Keep it Simple

Use lots of negative space

Photograph contrasting colours

Use the rule of thirds

Look for strong horizontal, vertical or diagonal lines

Play with geometrical shapes and angles

Photograph against a plain background

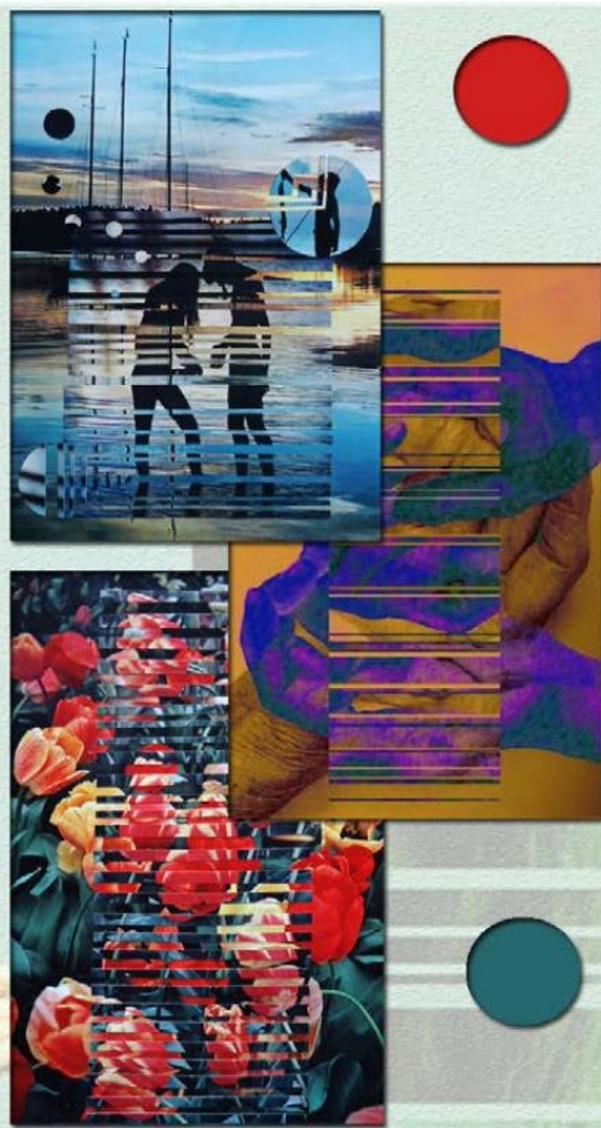

Use 50/50 compositions

Look for interesting patterns and textures

Use a square crop

Use an alternative viewpoint

PHOTOGRAPHIC COLLAGE

**cut, repeat, spice, invert, flip, hand
made, replace, remove,
accurate, change, transform, copy,
paste**

Terzieva uses images found in magazines and hand cuts them.

Another photographer that has a similar style is Isabel Martinez. By using cut out lines for texture.

I like how Terzieva uses originality and hand cut images which creates different textures which makes it fun to view.

What will you do in response to Terzieva's work?

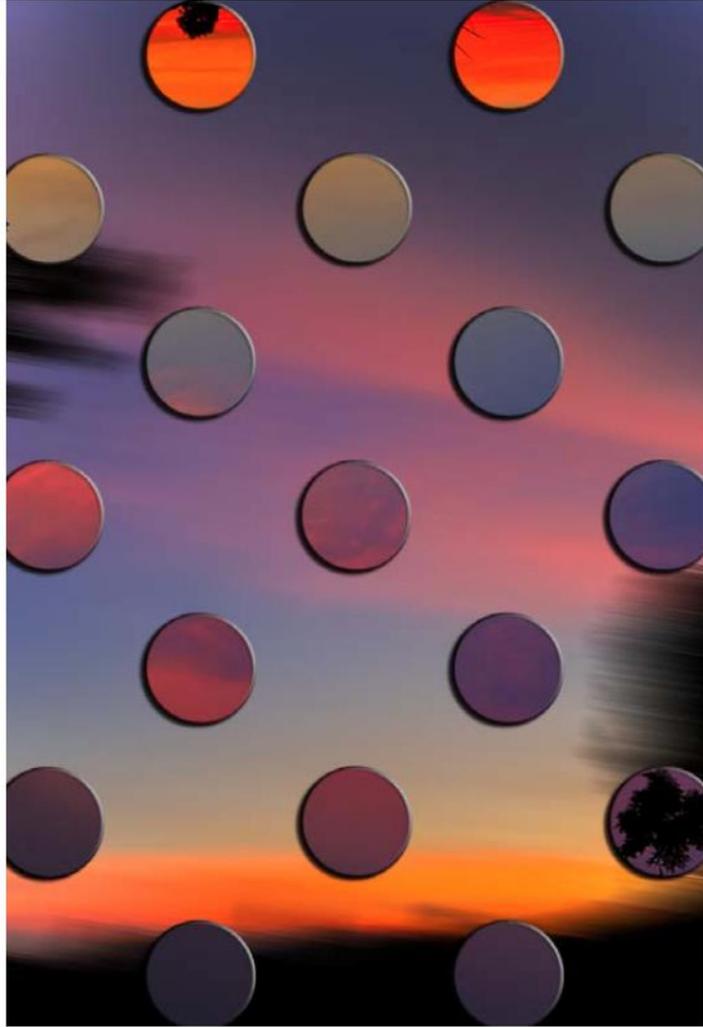

Usually working with cut pictures from old books and magazines, Dessi has recently ventured into digital collages made on Microsoft Paint in her recent Digital Age series.

"I get to know my characters and their story, ultimately to make them my own. By giving them a new reality, they give me a voice. Each collage is the equivalent of a diary entry—I am speaking to you and others, telling you how I feel, what I think, what I crave, and what I despise." - Dessi Terzieva

DESSI TERZIEVA

R E S P O N S E

The use of various templates to create different textures and blurring ensures a unique and original representation of nature with Dessi Terzieva's inspiration. Personally I enjoy the multiple different vibrant colours, textures, contrast and geometric shapes used in this piece as it represents a concise view over nature and the power of it. If I could make any improvements I would add more natural colours and nature themes to enhance the inspiration and make it more accurate.

David Carson presents images with many different texts and images combined together in a sense of maximalism. The subject matter is either an image or a specific word. I see many different words combined to create a maximalist effect. What is the mood or style of the graphic design? Its very chaotic and powerful. This work reminds me of maximalism by the chaotic yet controlled view of it.

Its been set up by combining many different images which have similar characteristics and effects to create an interesting piece. He used photography to crop and create original and unique pieces of work. It's been edited by adding and merging different words and images to create a maximalist yet interesting page. It makes me feel submerged into the art of this photography since its fairly original and very interesting.

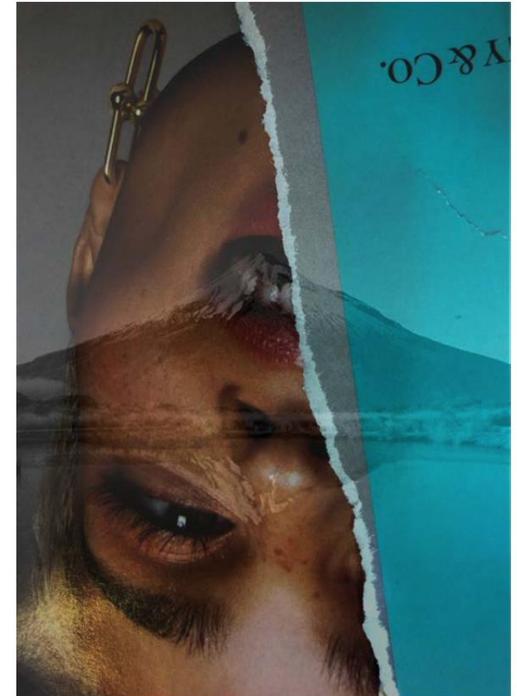

"Don't mistake legibility for communication" - Carson

DAVID CARSON

FOR BILITY
ICATION N. COMMUN

Ex Pro surfer
Limited Art and Design Training
Became art director for a Trans World Skateboarding Magazine then Raygun Magazine
Changed magazine design and the use of type and image
Developed style before the wide use of computers in graphic design, often using fax machine, photocopier, scissors and glue
Tried to capture the feeling and spirit of the topic through the combination of image and typography
One of the most influential graphic designers of the last 30 years

BRIGHTON

Ever since royal party animal George IV fell in love with Brighton back in the 18th Century, the city has been a magnet for visitors in search of fun, frolics and fresh sea air. With its majestic Regency squares and crescents, iconic Royal Pavilion and famous piers, today Brighton is as well-known for being a welcoming and diverse city with a passion for culture, creativity and sustainability as it is for its historic landmarks.

An inclusive, free-thinking city in the heart of Sussex. With a blend of modern culture and exotic architecture, sea and countryside, make Brighton your base and discover new places and experiences both inside the city and out

RED LONDON BUS

The red London bus is a classic symbol of the city. It is a mix of old and new, and the streets are full of life and activity. The bus is a mix of different styles and materials, and it is a very important part of the city's transportation system.

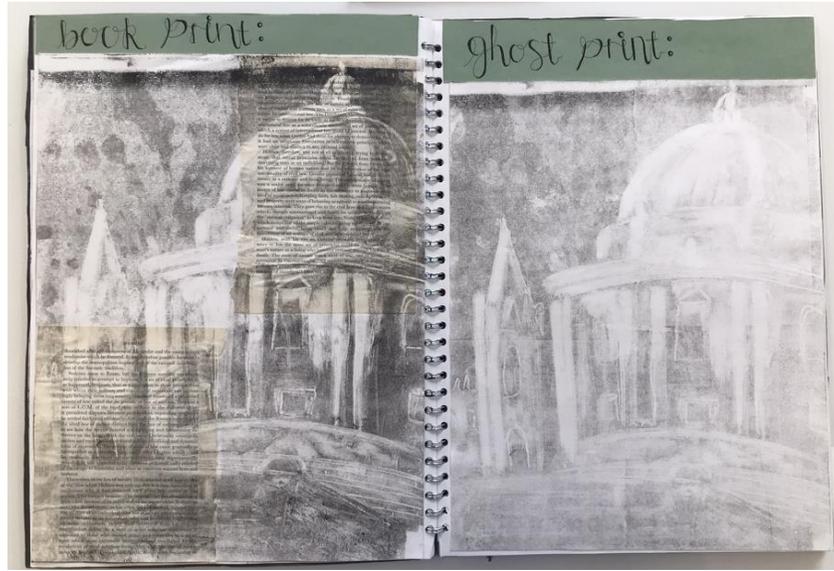

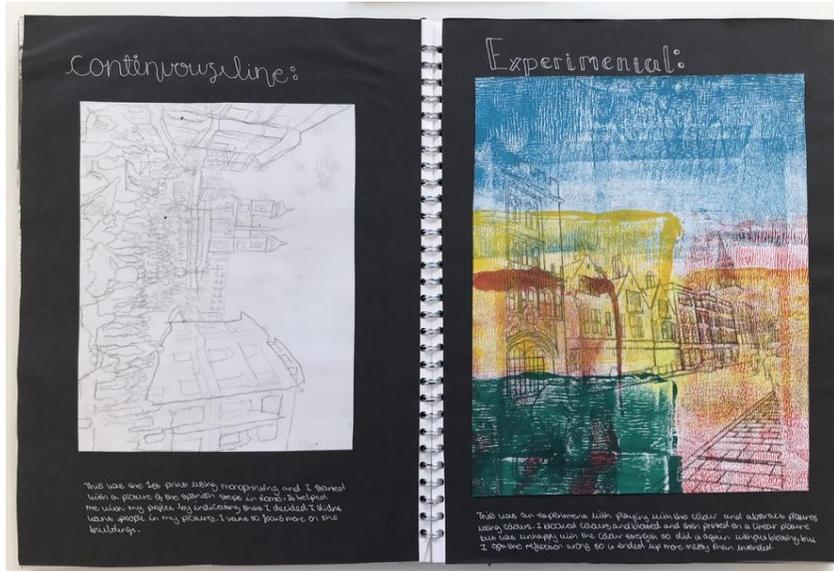

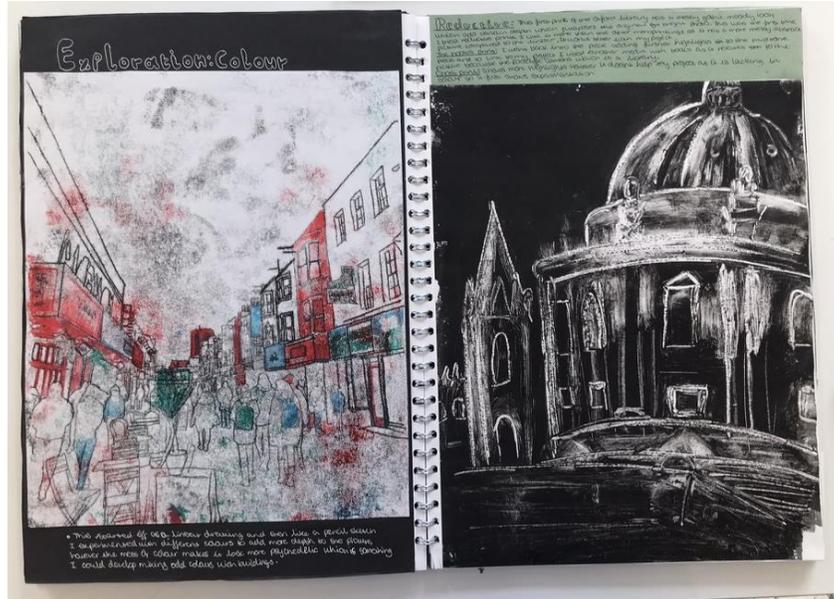

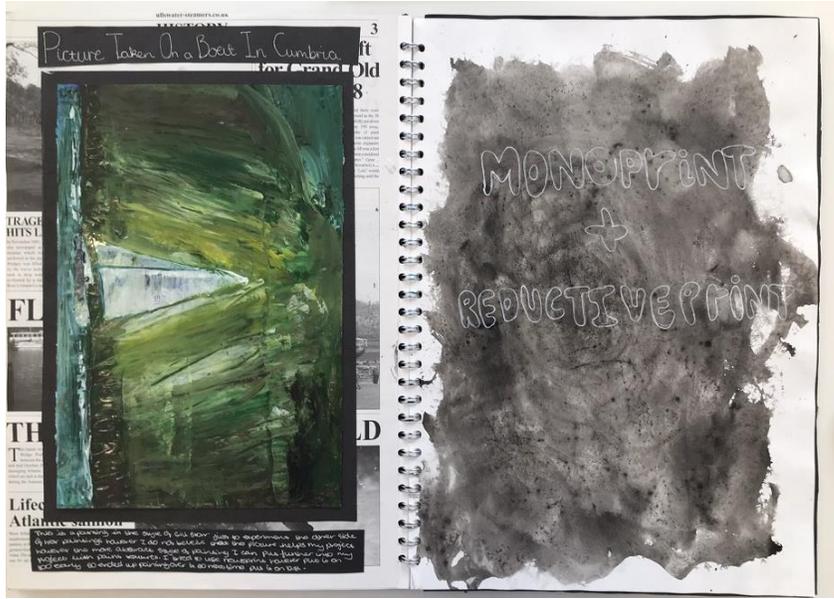

The red London bus is a classic symbol of the city. It is a mix of old and new, and the streets are full of life and activity. The bus is a mix of different styles and materials, and it is a very important part of the city's transportation system.

This picture of the red London bus is a classic view of the city. It shows the famous Big Ben and the Houses of Parliament. The architecture is a mix of old and new, and the streets are full of life and activity.

DISTORTED TRAINS

This piece was inspired by collaborating all sorts of images of trains with collage. It gives a sense of the motion and the flying and the perspective. The idea of the piece mainly was that the train was moving away from the viewer and the perspective was very different.

COLLAGING

I chose Rauschenberg to experiment collaborating painting and collage into my project to not only create and visually fragmented piece but also a fragmented perspective to cities and political issue incorporating Gill Storm painting style with Rauschenberg's collaging technique and choices of photos.

I have also taken inspiration from the doctor strange movie when there is a kaleidoscope of buildings made by CGI which creates a fragmented world which is could relate to the increase in world urbanisation and the lack of respect to the rural historical places in England and around the world.

Robert Rauschenberg

October 22, 1925 - May 12, 2008

Rauschenberg was an American painter and graphic artist in the pop art movement. American artist from German, Cherokee heritage who worked and lived in New York.

His art incorporating everyday materials and weaving it into his works of painting and sculpting. As well as that he also experimented works with photography, printmaking and papermaking. Rauschenberg also captures different perspectives using collage and abstract expressionism but making his are very saturated in images and in colour.

I chose Rauschenberg to experiment collaborating painting and collage into my project to not only create and visually fragmented piece but also a fragmented perspective to cities and political issue incorporating Gill Storm painting style with Rauschenberg's collaging technique and choices of photos.

Whether you are looking for selling, buying, or just looking for inspiration, we have what you need. Call us today on 020 7424 2474 or 020 7775 8888. Order online at www.therestaurant.com or visit us at the shop at 114 Raffle Place, London, E2 2JF.

Contact the Albany team at Drive to have more about our treatment or info@albanyspa.com or call 020 7424 2474. Then the gallery at 114 Raffle Place, London, E2 2JF.

emulsion Print

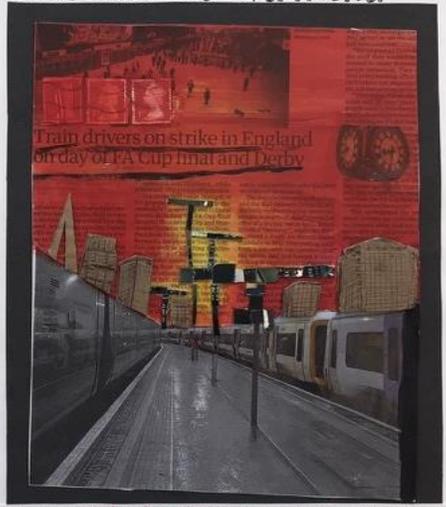

EMULSION EXPERIMENT

- I used emulsion printing to try a different medium which could add a distorted perspective to my prints.
- I did do it right and turned the picture while the painting was there and I didn't know you had to use water when it discovered later on the next page.
- I used the same image as the previous page to see how the bus would turn out.
- The fact of emulsion printing looks better than the successful one because where the paint did not mark it highlights individual pockets of colour from the picture.
- I will reuse this method as the circular look is very unique and distorted.

Ordnance Survey photos

Rauschenberg experiment:

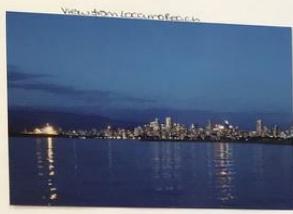

This piece was inspired by Robert Rauschenberg using collage, painting and drawing.

I used the picture of Cheung Choo as it is one of my favourite urban pictures. I have taken it and added a train going through in the paper to be my background. I then put in the newspaper clipping of the strike on the red background. I then added some more newspaper to add texture and to make it look like a collage. I then added some more newspaper to add texture and to make it look like a collage. I then added some more newspaper to add texture and to make it look like a collage.

final piece:

- My final piece I want to take cityscape photos added with painting colors, that would be collage.
- Then using white paper down the images and tape over onto with individual building or trees.
- Then using newspaper to add collage's technique as an collage to my final piece.
- Then painting over an as photograph of waterloo station using collage's technique of collage and messy foundations.
- I will then further details this by painting the piece into the collage photos paper, create the sense of waterloo station into the piece.
- Also maybe and the collage photos will see more toned down.
- Also I may add street drawings on cardboard.

Vancouver from across the water

This picture looking back on Vancouver was taken inspired by Howl's Moving Castle. I was on a cruise across Vancouver in a really quiet area in Canada so the view inspired by the tranquillity of Vancouver's harbor.

Vancouver, Canada

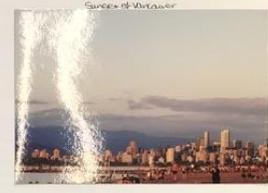

CITYSCAPES

This is a zoomed in picture taken during summer when there is a different perspective of buildings which I can do but other times during the winter because of the weather.

Looking down on Vancouver from a high angle

This is a view from the water looking across the city. It's a different perspective of buildings which I can do but other times during the winter because of the weather.

View of Vancouver from the water

The picture on Vancouver is the same picture as the previous one but it's a different angle so it's interesting to see how the city changes with view and perspective. It was taken from a boat on the water.

View from the water

The view from the water is a different perspective of buildings which I can do but other times during the winter because of the weather.

City lights from the water

This picture is more of a view from the water looking across the city. It's a different perspective of buildings which I can do but other times during the winter because of the weather.

This is a picture I took of Battersea Power Station. This is quite an iconic building and I think it's quite nice. I could see it from my house with the view of the river.

This picture I took of London in the rain. I took it because I love a view of London from a different perspective. I also like the monument covered in the picture.

Buildings/monument

This picture I took of London in the underground. I took the picture from a different perspective and it's quite nice. I also like the view of the river.

This picture is more of a view from the water looking across the city. It's a different perspective of buildings which I can do but other times during the winter because of the weather.

This picture I took of London in the underground. I took the picture from a different perspective and it's quite nice. I also like the view of the river.

STARDU

This picture I took of London in the underground. I took the picture from a different perspective and it's quite nice. I also like the view of the river.

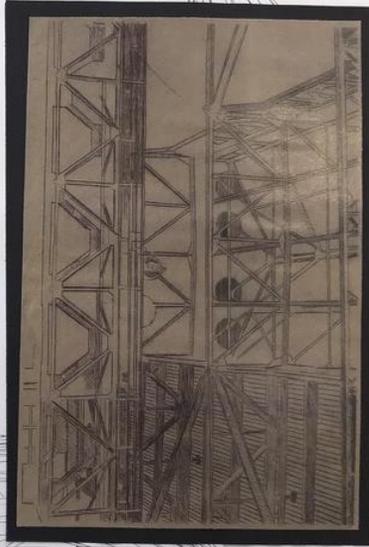

STARDU

Etching Experiments

Basic Print:
This is one of my refined etching prints and complete picture due to be finished. This means that there was more work for experimentation. I could add more ink and erudge to add more line in place outside the main panel are work.

Brown Water Print:
The drawing printed onto brown paper to give different paper and the paper brown paper to show the rich brown color. The paper was also brown which gave a look to the etching with coffee grounds.

Coffee staining Print:
In this print I painted a background base for the background details. This I just wanted to try to see if it was a good medium to use. I found that the watercolor are more effective in giving a range of shades and also to define small details. I also mixed a reddish brown color for the overall staining.

Total drawing of a building in Vancouver: I took this from an opinion Vancouver because I liked the perspective and rhythm. This piece took a long time to complete but was refined and shows the form and design of the building. I never use this printing in my final piece.

MOTH PRINT

This moth print was an experiment to try to mix
oil colors and print out the day and then
do on water with ink. It's with a lot of
print and with the background of abstract print
with experimental pictures.

CELLI PRINT

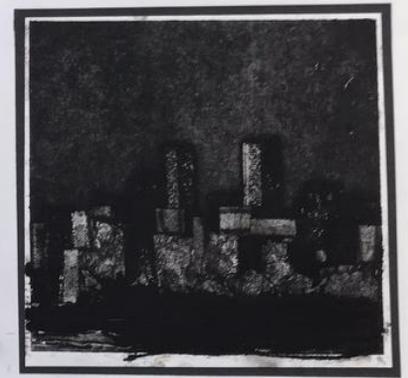

The building of the print is a print. I used
an ink and I used the same technique
as the other print and the background is
black. I printed the print in black and
the background is black. I printed the
print in black and the background is
black.

Photograph
Print

This is my photograph
print which is of a
landscape I took of
the city of New York
and I printed it as the
cell print and the background
is black. I used the same
technique as the other
print and I printed the
print in black and the
background is black.

Photograph

I used one use of maps and taken up images due to split pins. As well as this, photos and other media. I incorporated them into my piece. As this was part of my inspiration.

The use of old buildings I used in the green. These were taken from the piece. The broken images were also inspired by the mix of fading images and notes and signs were inspired by this object.

This is similar to the one below which were about I would like to use media relevant to the location of my piece.
This design some of the paintings that I was inspired called from Jules who comes regular and painter create buildings.

This picture uses dark pigments and was which I would like to use and fragmented use of colors in the windows and the pavement.

The classical buildings were slightly fragmented printing lines to get colors and textures.

The use of the sea leads to my project of architectural and I would like to incorporate the crane into my piece of buildings and construction.

The use of abstract and signs and images. The colors of mixed and used and used the background.

FINAL PIECE IN SPO

This is the background and I was very inspired by him for my piece. The drawing of colors is something I had to inspire in the same piece.

The back of colors inspired me when I saw the back colors combined to inspire the new piece. The colors were inspired by this piece: red, green, blue and purple.

This is the piece of colors and pieces of textures of green and.

CRANE PIECE. PROBABLY INCLUDING A CRANE AND OTHER BUILDINGS.

CRANE PIECE. PROBABLY INCLUDING A CRANE AND OTHER BUILDINGS.

This picture was inspired by the colors that I used to bring the picture together. The colors were inspired by the background and the colors were inspired by the background.

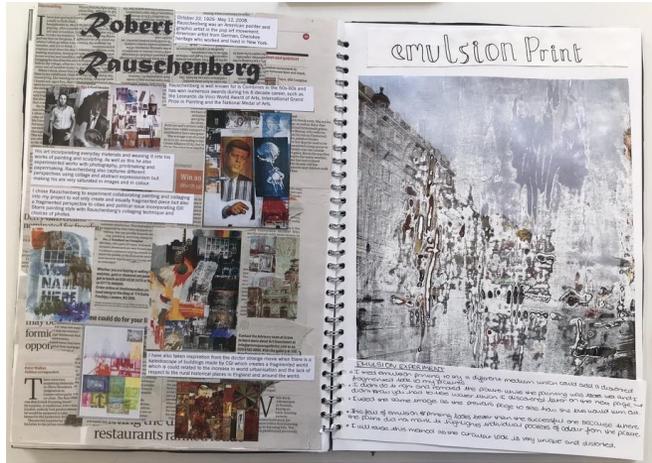

Standard Mark 54

Component 1 Fine Art

Pearson - GCSE Art and Design 2016 - Assessment Taxonomy

How to use the Taxonomy in conjunction with Assessment Grid
 The first stage is to decide in which performance level the candidate's work should be placed. When assessing work for each component, teachers should make a holistic judgement using the descriptors in the taxonomy, to establish which performance level matches most closely the candidate's work. The candidate should be placed in the performance level that best exemplifies the characteristics of their work. Candidate's work that falls between two performance levels must achieve at least the keyword descriptors in the lower level and some in the level above. Where this happens, teachers must use their professional judgement to decide which performance level is most appropriate using a 'best-fit' approach.

After a performance level has been established, the next stage is to use the assessment grid to decide a mark within the performance level. Read the 'instructions for use' which accompanies the assessment grid prior to establishing a mark for each assessment objective and total mark.

Performance level	BELOW LEVEL 1	Level 1 LIMITED	Level 2 BASIC	Level 3 EMERGING COMPETENT / COMPETENT	Level 4 CONFIDENT & CONSISTENT	Level 5 CONFIDENT & ASSURED	Level 6 ACCOMPLISHED
Consider the keyword descriptors to this right carefully.	Unstructured Cluttered Minimal Elementary	The candidate has achieved all, most or some of the descriptors?	Deliberate Methodical Superficial Unrefined Simplistic Tentative	Reflective Predictable Growing control Broadening Endeavour Safe	Informed Purposeful Secure Engaged Skilful Thoughtful Cohesive	Advanced Convincing Comprehensive Focused Perceptive Refined Risk-taking	Accomplished Inspired Intuitive Insightful Powerful Extraordinary Unexpected Outstanding

Test 3: Textile Design, Component 2

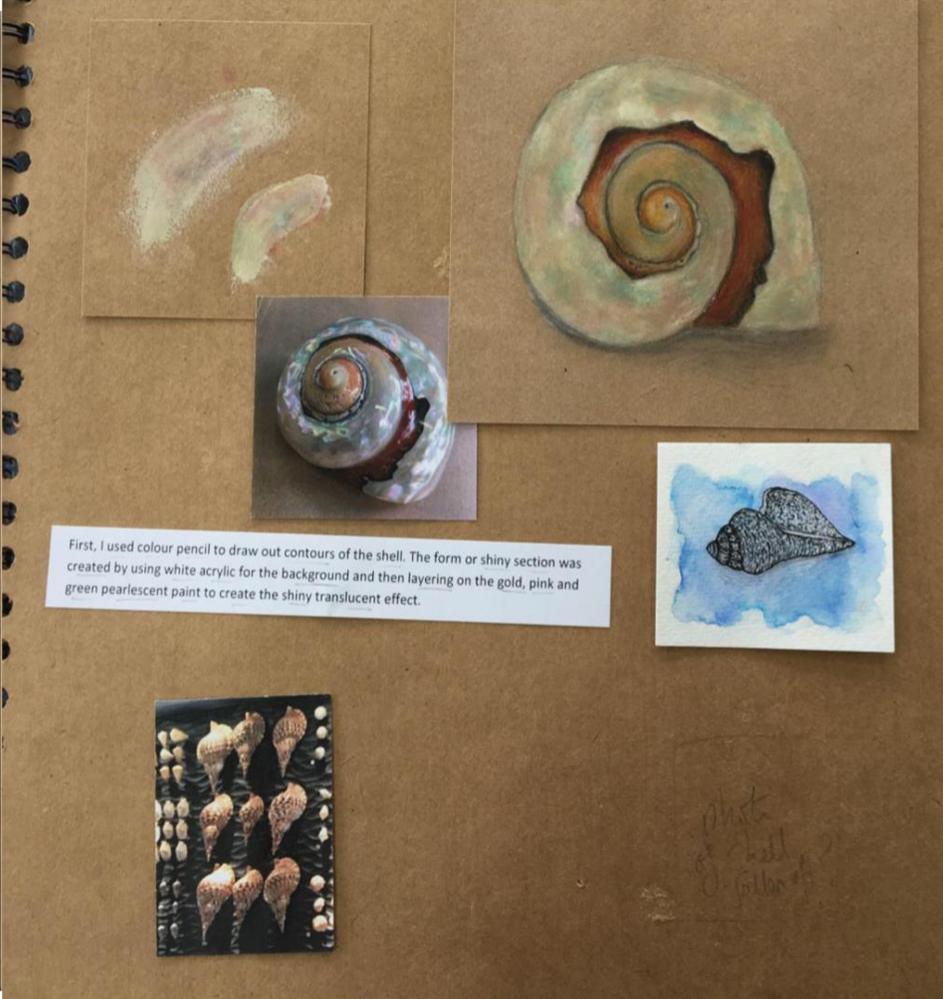

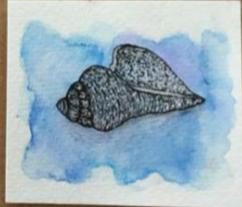

Fragments – Fragile waters -sealife
 broken up and being destroyed by man

bleached and fading corals

colourful sealife fighting back

First, I used colour pencil to draw out contours of the shell. The form or shiny section was created by using white acrylic for the background and then layering on the gold, pink and green pearlescent paint to create the shiny translucent effect.

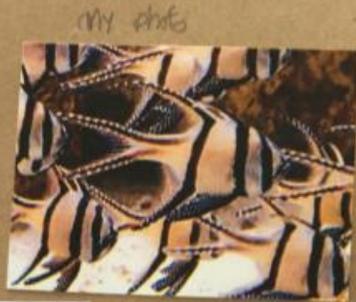

I usually use a Japanese rubber block as UK lino blocks are not as good because I think they are too hard and don't cut very well. I use Xacto knives as they are really sharp and cut the rubber easily making the patterns lines. I prefer to take away the very fine lines to create my image. I feel I am technically very skilled in this area and want to develop even further for my outcome.

I quite like this one because the prints are clearer and the colours are more defined.

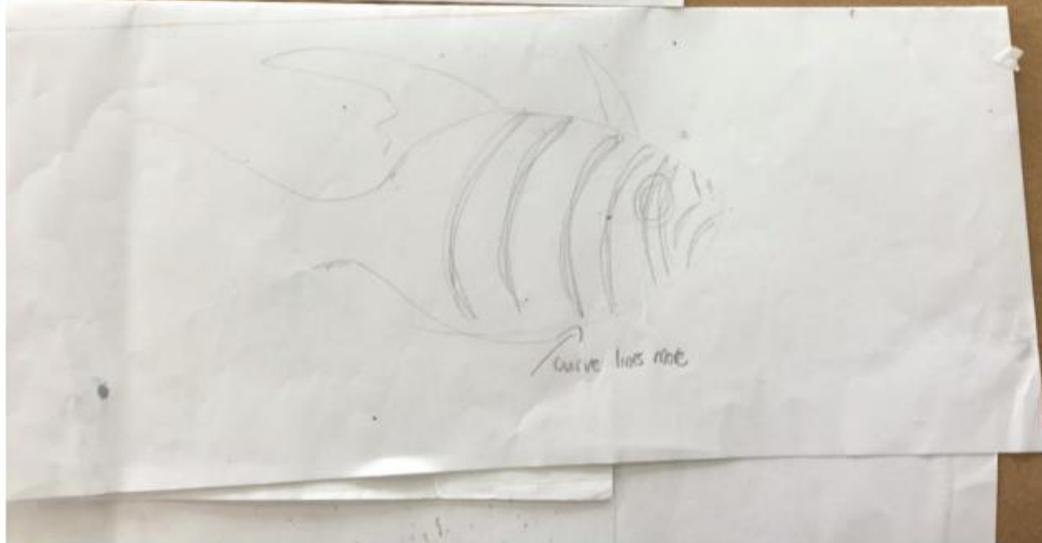

I don't like this one so much because some of them didn't very well, one is smudgie and one is distorted by water.

The colours I used are pearlescent rust, pearlescent poppy, rocket red gold, pearlescent chocolate and cosmic copper.

wide-fail but body too flat

I used silk dyes to paint the background, I chose colours to create a feel of water. I drew a section of the fish. Using metallic 40 madeira thread and black and white thread I created the fins. I did not use an embroidery hoop and this caused the fabric to ruche up, however, I like this effect as it makes it look more like water.

curve lines rise

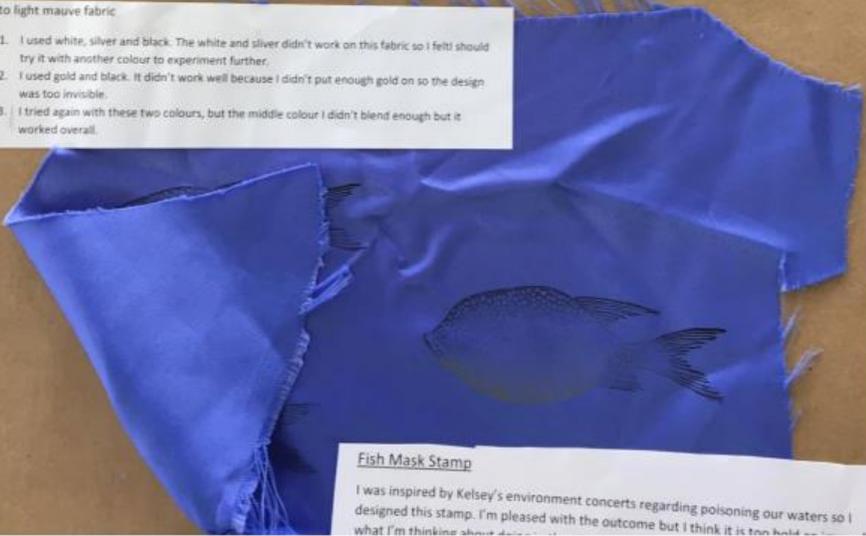

My handcut stamp is from my observation of a fish I saw at the Aquarium in London Zoo, Revent Park. It took 1 hour and 40 mins to cut.

On to light mauve fabric

1. I used white, silver and black. The white and silver didn't work on this fabric so I felt I should try it with another colour to experiment further.
2. I used gold and black. It didn't work well because I didn't put enough gold on so the design was too invisible.
3. I tried again with these two colours, but the middle colour I didn't blend enough but it worked overall.

Fish Mask Stamp
I was inspired by Kelsey's environment concerts regarding poisoning our waters so I designed this stamp. I'm pleased with the outcome but I think it is too bold.

These marks were accidental, I was just cleaning and blending the blocks however I like the sense of 3D and maybe I could use this to create corals or other marine life.

This one worked better than others, the black and gold both worked on this polyester silk and they were clearer than others. I might use this one on my exam piece. In my exam piece, I may print onto this kind of fabric and iron bondaweb to the back and cut out the shape, peel of the backing paper. Then iron onto the panel.

- First, I got a 100% cotton(rayon, silk, cotton is 100% fabric) and I used Paraffin wax and it had to be melted and very hot, because it has to go through the fabric or the dye so it would flood across the design. Paraffin wax is probably the easiest to use, also it easy to use for cracking as it is harder. Bees wax is used when you don't want it to crack as it is much softer.
- Secondly, I used paraffin wax and a Tjanting to draw out the shape of the coral and waited for it to cool. I used the procion dyes the on the cotton and waited for it dry.
- I ironed it to take the wax out between sheets of newspaper and waited for it to cool. I used different kind of pink threads and machined the shape of coral by using different techniques.
- Finally, I added the beads to create a shiny effect and embellish the surface.

I'm more prefer the pink batik coral because this piece is more clear than the first one and it's more easy to control. However the first one is more colorful than the pink coral.

- Firstly, I took a natural sea sponge and carefully dipped the hot wax and transferin the marks in a random way to show the shape of coral, I think this works very well, and it suggests the texture and form of the corals.
- Secondly, I dyed the fabric with pink and purple dyes and waited for it to dry. The bottom foreground was dyed gradually so it fades from dark to show that the coral is just starting to die. The right hand corner, I used the pale colour to suggest the coral is fading away to suggest extinction.
- Next, I ironed the wax out. Then used light pink threads as a base to stitch the outline and overlaid with cream swirling to create shapes and texture.
- Then I stitched the lilac pink over the cream in a loose random way and I use the lilac again not worrying about where but instead to create shadows and overlaid again in cream to make the form clearer and create a dense effect.
- Finally I use a small amount of purple thread to add depth to the piece to show the difference between the light and the dark.

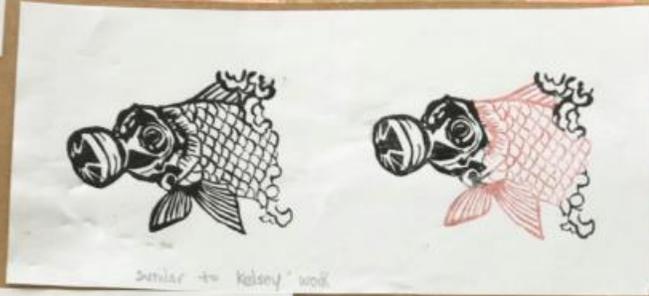

How plastic effect corals?

Individes Record

I discovered that when mushroom coral die, they become colourless and they become hard, not as soft as when they lived in the water. Plastic trapped in the reefs around the world is having a serious impact on coral health. More than 11 billion pieces of plastic were lodged in the Asia-Pacific oceans corals. This rubbish appears to be leading to coral diseases. "Our work shows that plastic pollution is killing corals," said senior author Professor Drew Harvell, an ecologist at Cornell. It is through that the increased disease could be due to plastic items blocking light and oxygen from reaching the corals, which require both to survive. Depriving them of these could also make corals more susceptible to infection by harmful microbes, known as pathogens. People have been banned from cutting live corals to collect but now it's man's ignorance of plastic that is killing them.

Kelsey Ashe

Kelsey Ashe has a deep fascination with patterns and decoration

Kelsey Ashe Gaibhzi works across several disciplines in a style of decorative eastern designs. She is completing her PhD in Art, she lectures at Curtin University in Fashion Illustration, the History of Costume, Textile Design and Fashion Design and has appeared in Textile Visionaries book about today's up and coming designers

I like her bold simple designs based on the East best as it relates to my work and my culture. I want to work in softer colours though as black is too strong for my design and does not help to put across my view that the corals are fading away

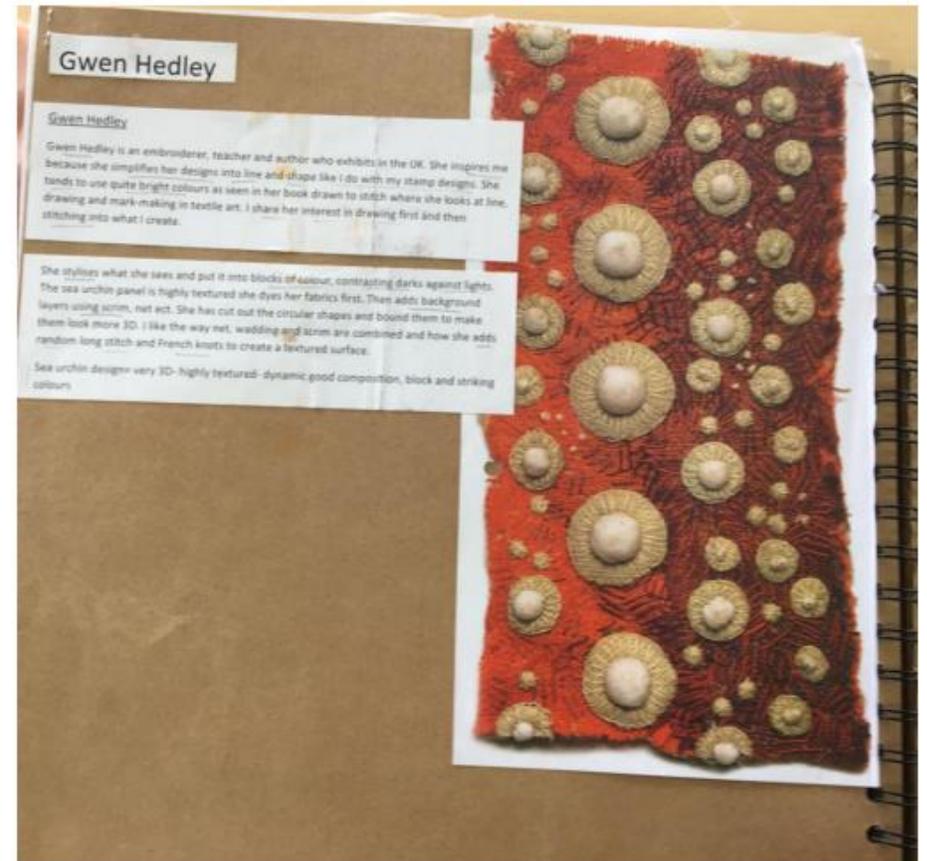

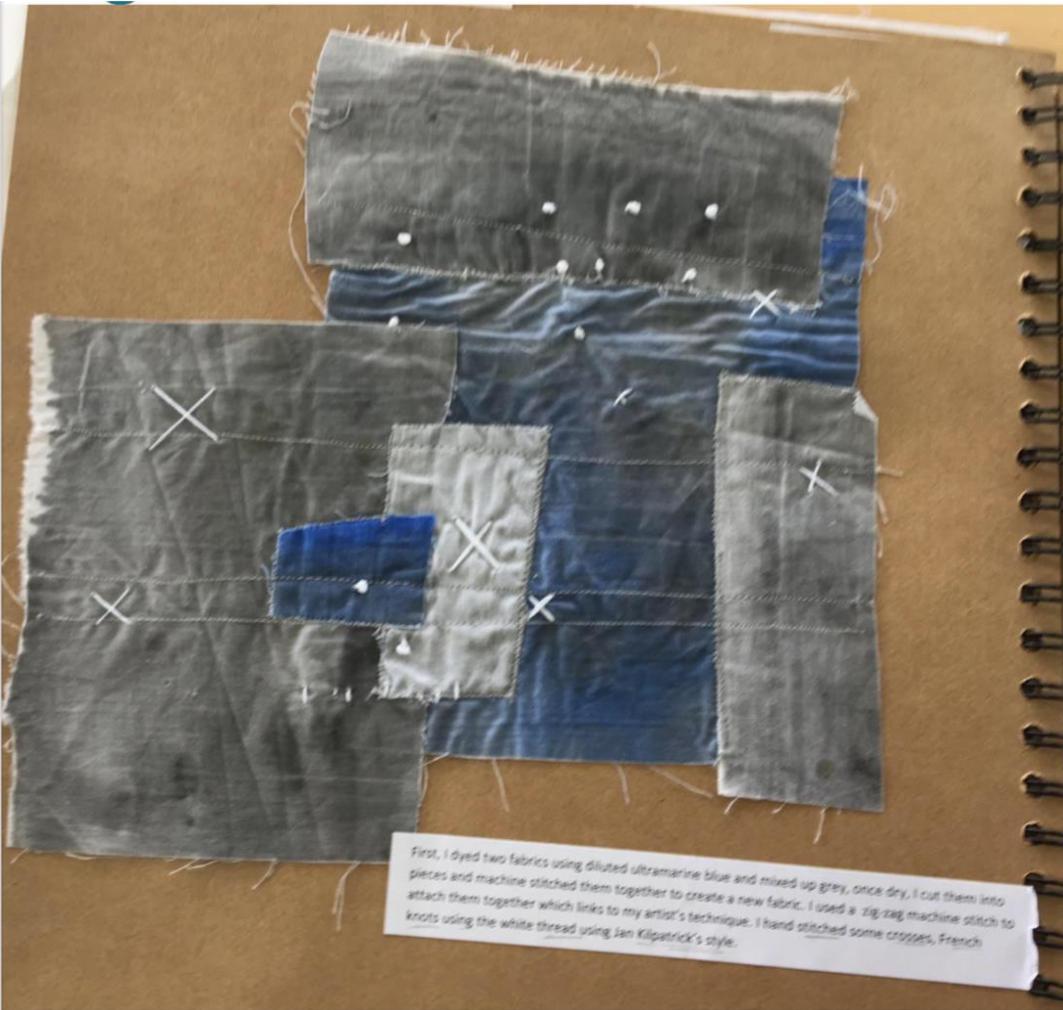

Kelsey Ashe

- Hand-printed fashion fibres designer
- She decorates or embellishes her work with motifs that about relationships between culture, humanity and the environment.
- She sources fabrics that are organically grown or produced using sustainable methods.
- She makes prints that address environmental themes, issues such as river pollution, urban litter, environment disasters and the destruction wrought by plagues. Sets a message about humankind's respect for the environment.
- "a closer look at the decorative detailing reveals hidden motifs showing litter, polluted water, deforestation and landfills acting as gentle prompts to cause consumers to contemplate how we treat the environment." I will use the stamp technique

final idea

First, I dyed two fabrics using diluted ultramarine blue and mixed up grey, once dry, I cut them into pieces and machine stitched them together to create a new fabric. I used a zig-zag machine stitch to attach them together which links to my artist's technique. I hand stitched some crosses, French knots using the white thread using Jan Kilpatrick's style.

Jan Kilpatrick

In response to my artist Jan Kilpatrick:
To be more experimental and link to my plaster octopus I wanted to include casts of actual shells and corals and link these to my ink drawings.

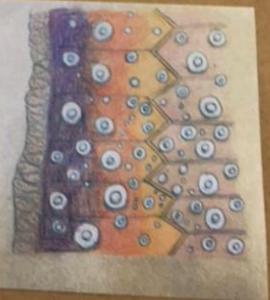

I like the process this textile artist uses. I find it interesting that this Scottish artist (born in Glasgow in 1963), actually trained in English and History and she is a self-taught textile artist and had a business in upholstery. She said her experience helps her textile ideas today.

She says: "Much of my work is born of the fragility of domestic life as lived on the edge of a wilderness landscape and is interwoven with the themes and motifs to be found in my own poetry... I work with recycled, found and natural materials"

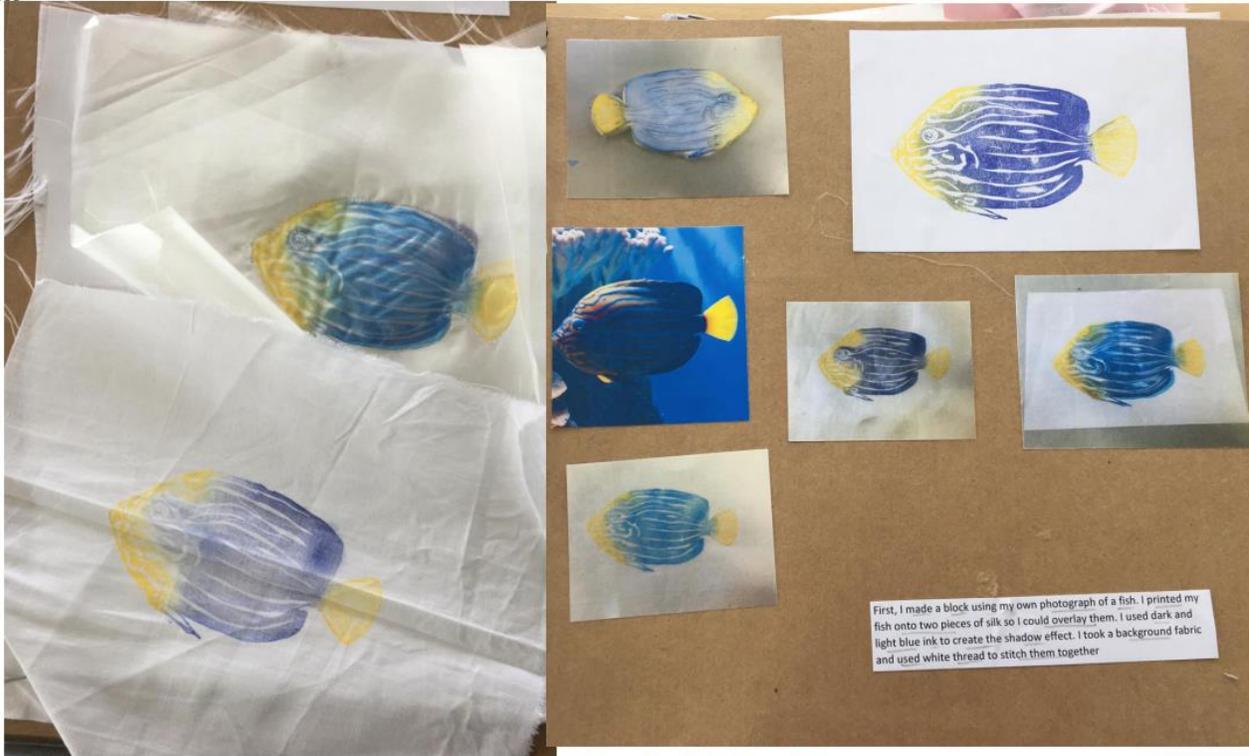

She inspires me so I feel I would like to use this idea of fragility in relation to my coursework of sea life and how endangered it all is. The horrors of plastic and how it is hurting our sea animals and creatures. The bleeding of the coral reefs and loss of beautiful underwater life. I like the way she uses the colours, words and recycled natural materials, so I will try to use this too but make it unique to me. I prefer using soft pastel shades like Jan Kilpatrick uses.

Looks like it viewed from above (like a Birds-eye view) peering down below the water near the shoreline. She has used different fabrics that are translucent, it softens the textile piece using delicate colours. In the foreground or top view we see the shells, then we have a sense of the life that could be hidden below the water, she uses fragments of material that are overlaid in a random appearance, similar to the reflected surface of water.

The colours are soft, cool blue, greys, and this contrast with the shells soft brown and peach colours where the light reflects. I particularly like the mussel shell as the colour appear dripped and speckled, giving it texture and form. I think she may have used stump work technique like I did in my coursework. This raises the surface, giving it a semi relief effect.

011

Final
Dea

background
Bottle dyes of
coral with machine
embroidery into
it. pink and
purple hues

possibly
blue and
grey background

changed background
to more harmonious
colour

10 hours

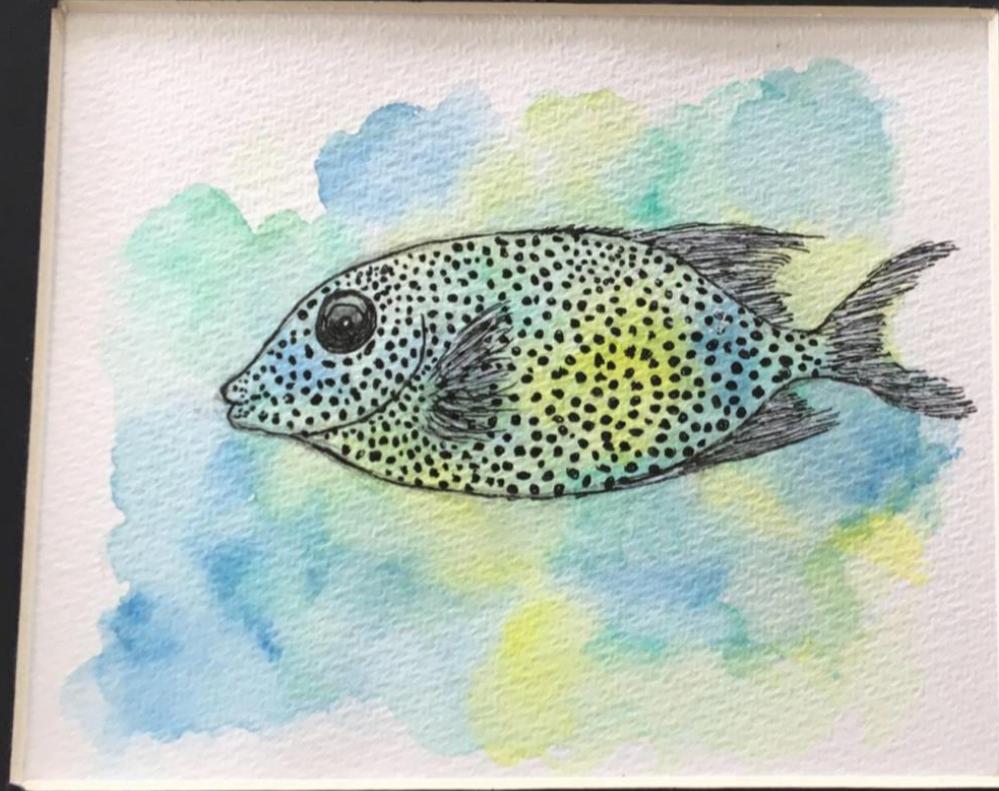

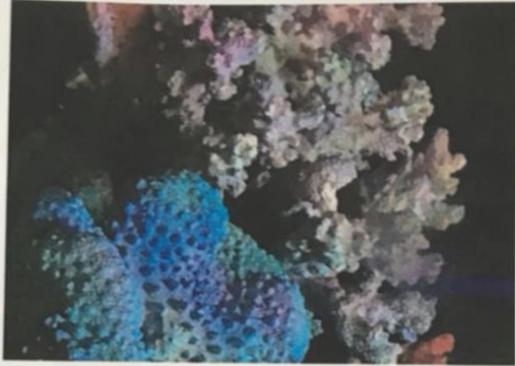

block of sea life
and machine into it

Before Exam

1. Cut out the shape of fabrics, batik it with a sponge and dye it using pink and purple fabric dyes, wait for it to dry and iron the wax out.
2. Mix Fine casting powder and put it into a bottom-shape mold and wait it dry, take them out and hand sand it and add wooden.

10 hours

1. Machine and work into the background to create coral effect.
2. Take two pieces of fabrics and dye the colour using (pink and purple ~~purple and orange~~) like Jan Kilpatrick in style but not the colour. Cut the fabric and machine stitch into it a create a new fabric, background colour is pink to my piece.
3. Make a stamp of sea life and print it onto the fabric I will make.
4. Machine embroidery into it to add more interest.
5. Machine the design onto the coral background.
6. Hand stitch and attach plaster octopus bottom/sea urchin shape

WIREWOOD TREE SCULPTURES

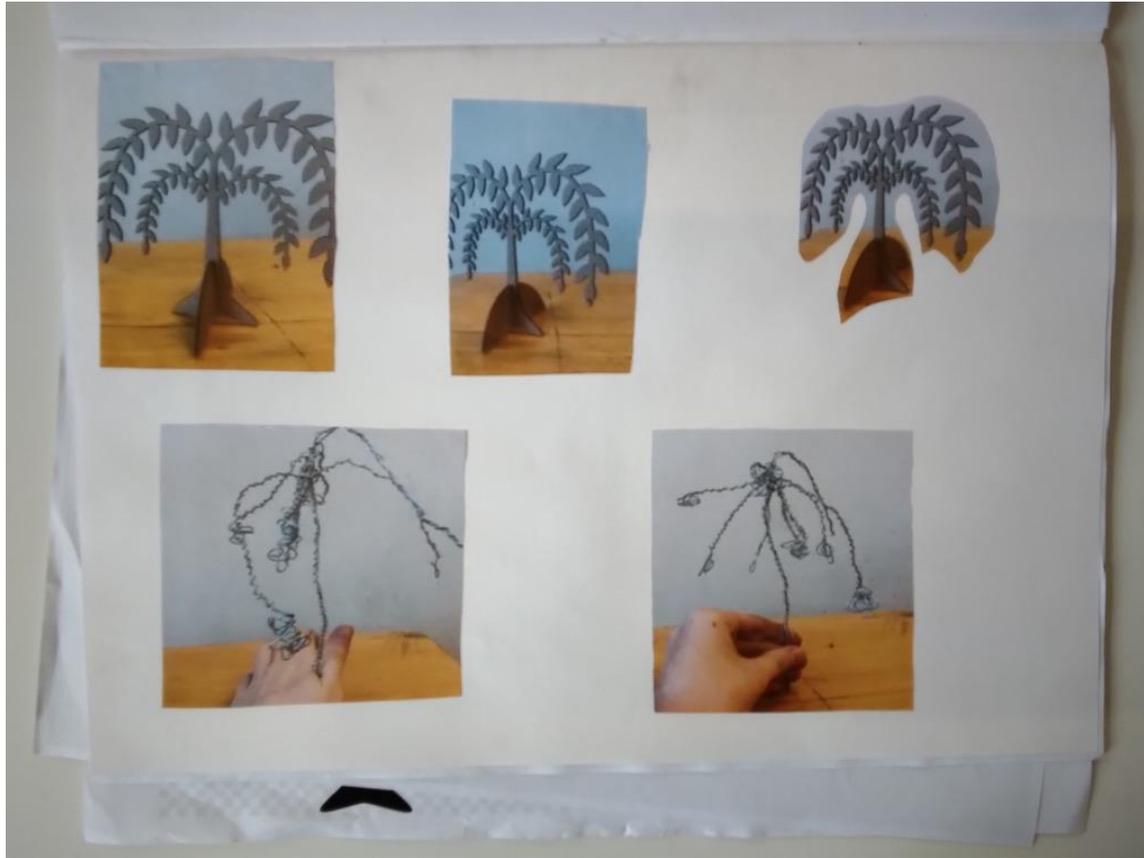

I like this Alice because of her love for nature my daughter quite soon her is -
 For as long as I can remember I've had a relationship with trees
 Most of us wouldn't notice how much of an impact trees have on our daily lives. It's something I have become acutely aware of in recent years following the start of my creative journey with wire tree sculptures!
 her journey of creative wire tree sculpting is interesting and inspiring in a way.

My work has taken a lot of inspiration and reference from the bonsai and weeping willows trees
 The main body is inspired by the bonsai tree and the long vine like extremities with the representing elements strange from the vines are reference to the weeping willow. The loss of the piece is a day wide plant but I did a sort of Japanese still design with my own style as I did with the way I weaved the wire together to make the body of the tree.

Some acceptable & inappropriate uses highlighted in the Pearson AI Guidance

ACCEPTABLE

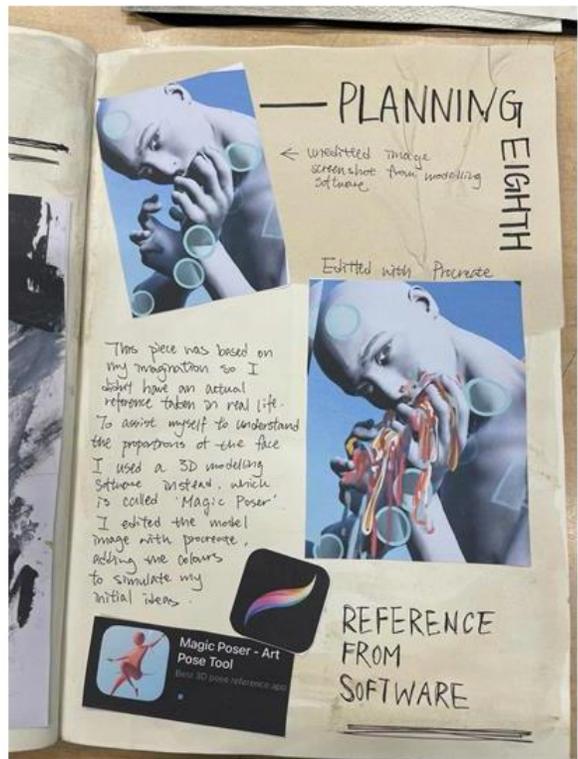

If students use AI tools for Art and Design, it must be clearly referenced in their submissions. Teachers must acknowledge and recognise this when applying the assessment criteria. AI tools may be used appropriately as part of students' research and/or as a means of exploring techniques and processes

INAPPROPRIATE

The [JCQ AI Use in Assessments](#) guidance states that 'all work submitted for qualification assessments must be the students' own.' This means ensuring that the final product/outcome is their own work, and isn't copied, paraphrased or heavily derived from another source, including content generated by AI. **Within a creative assessment, this means that learners must independently develop work beyond any AI input to evidence their own skills and knowledge.**

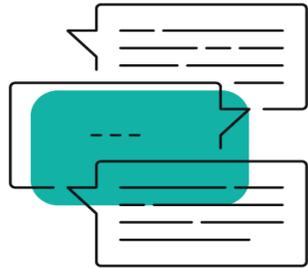

A student will have committed malpractice if they use AI tools without making appropriate references and in such a way that the work they submit is not their own. Where teachers have doubts about the authenticity of the work they must investigate and take appropriate action. Guidance for what centres should do in instances of candidate malpractice can be found here [Malpractice: Candidates \(pearson.com\)](#).

Some student examples : Fine Art (GCSE)

Subject Advisor Support

Our subject advisors are experts in their fields and are here to support you throughout the year.

Questions and Answers

Frequently asked questions

- Can you clarify what best fit approach means on the marking grid?
- Do I always have to use the GCSE taxonomy to mark work?
- When searching online for exemplars , what should I do if I can't find a standard marked exemplar that is the same title as the one I do in my centre?
- Can/should I give a student full marks 72/72?
- Please can you clarify if I can use grade boundaries to help me establish whether I have given a student the correct mark?
- How important is it for internal standardisation to be completed in my department?

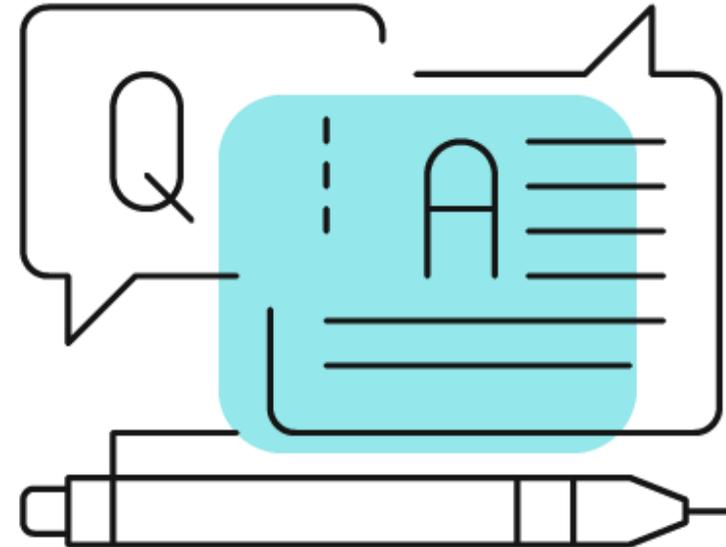

Frequently asked questions

- How many projects, briefs, tasks or themes should there be in component 1 in order for it to be a credible body of evidence?
- Do students have to use sketchbooks, or can they mount work on boards?
- Please can you explain how I should approach selecting work for component 1.
- Can students submit a 100% digital portfolio for all titles?
- How do I submit work for moderation as an International centre?
- What is the deadline for submitting marks?
- When does my moderator contact me to arrange a visit?
- What is the difference between Art, Craft and Design and the endorsed titles?

Frequently asked questions

- My centre switched from DT to Art and Design – how can I deliver this successfully in art?
- What can students prepare prior to the 10 hours period of sustained focus?

Any other questions?
