

Gregor

Component 2- Extract 2 Intentions

In the second extract I multi-role as Gregor and the Lodgers. During this extract, Gregor eventually dies from extreme hunger and isolation in his room. Here Gregor feels incredibly forgotten and abandoned by his family, and so his mental and physical health rapidly declines. To show my struggle I breath loudly, and speak slowly with a strained voice, with moments of anger where I raise my voice and speak in an accusational tone. My body movements remain similar to the first extract, except at times they are smaller and less energetic to highlight how trapped Gregor now feels. The Lodgers come to stay with the family in this extract. My movements are exaggerated and I hold my chin up, as though I am looking down on the family to show the Lodgers pretentious characters and superiority over them. I emphasis my words to show this superiority over the family as they are depending on the Lodgers stay for a source of income.
