General Marking Guidance

- All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.
- Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.
- There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.
- All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.
- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.
- When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the team leader must be consulted.
- Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.

Placing a mark within a level mark band

- The instructions below tell you how to reward responses within a level. Follow these unless there is an instruction given within a level. However, where a level has specific guidance about how to place an answer within a level, **always** follow that guidance.
- **2 mark bands**
Start with the presumption that the mark will be the higher of the two.
An answer which is poorly supported gets the lower mark.
- **3 mark bands**
Start with a presumption that the mark will be the middle of the three.
An answer which is poorly supported gets the lower mark.
An answer which is well supported gets the higher mark.
- **4 mark bands**
Start with a presumption that the mark will be the upper middle mark of the four.
An answer which is poorly supported gets a lower mark.
An answer which is well supported and shows depth or breadth of coverage gets the higher mark.

- Mark schemes will indicate within the table where, and which strands of QWC, are being assessed. The strands are as follows:

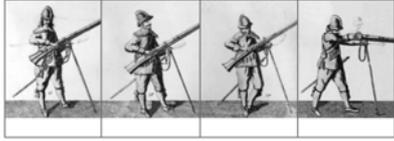

i) ensure that text is legible and that spelling, punctuation and grammar are accurate so that meaning is clear

ii) select and use a form and style of writing appropriate to purpose and to complex subject matter

iii) organise information clearly and coherently, using specialist vocabulary when appropriate.

Unit 1: Schools History Project Development Study

Option 1C: The changing nature of warfare

Question Number		
1		<p>What can you learn from Sources A and B about changes in the use of firearms? Explain your answer, using these sources.</p> <div style="display: flex; justify-content: space-between;"> <div style="border: 1px solid black; padding: 5px; width: 45%;"> <p>Source A: A drawing from the seventeenth century. It shows some of the stages involved in loading and firing a musket at the time of the English Civil War.</p>  </div> <div style="border: 1px solid black; padding: 5px; width: 45%;"> <p>Source B : From <i>With a machine gun to Cambrai</i> by George Coppard, published in 1969. Here he is talking about his work as part of a Vickers machine gun crew in 1916.</p> <p>At early dusk, the two of us crept out to a shell hole and set the gun up on its tripod. I opened fire. The gun whipped through its first ammunition belt in less than half a minute. I reloaded, gave the gun a check-up and continued. Our firing was more or less continuous</p> </div> </div> <p>Target: Inference; analysis of change (AO3 : 4 marks)</p>
Level	Mark	Descriptor
	0	No rewardable material
1	1-2	<p>Simple statement</p> <p>Student provides generalised unsupported comment about change or identifies relevant details from the sources.</p> <p><i>Eg guns became more effective; guns were complicated/slow to use in the seventeenth century; guns could keep up sustained fire by the time of the 1st WW</i></p> <p>Award 1 mark for each relevant detail.</p>
2	3-4	<p>Developed statement</p> <p>An inference about change is made and supported, based on the use of both sources.</p> <p><i>Eg guns at the time of the Civil War were cumbersome / slow to use but by the 1st WW they were more manoeuvrable / quicker to fire; Soldiers had to be trained to carry out a complicated drill for each shot in the ECW but by the 1st WW they could just insert the belt of ammunition and fire almost continuously.</i></p>

Question Number		
2		<p>The boxes below show two aspects of transport in warfare.</p> <p>Choose one and explain why it was so important in the movement of troops and supplies during a military campaign.</p> <div style="display: flex; justify-content: space-around; align-items: center;"> <div style="border: 1px solid black; padding: 5px; width: 40%;"> <p>The use of ships and trains during the nineteenth century.</p> </div> <div style="border: 1px solid black; padding: 5px; width: 40%;"> <p>The use of aircraft since 1900.</p> </div> </div> <p>Target: Recall; analysis of importance (AO 1 & 2 : 9 marks)</p>

2	4-6	<p>Relevant details are offered but the link to the question is left implicit.</p> <p>Answer provides information about the transport of men and supplies.</p> <p><i>Eg describes the role of ships/trains in the foreign campaigns of the nineteenth century - can transport large quantities, arrange to meet troops at a specific point, quicker and less open to interception than normal land transport.</i> <i>shows that planes /helicopters can be used to bring supplies and troops speedily to inaccessible areas.</i></p>
3	7-9	<p>Analysis, supported by relevant and accurate detail.</p> <p>Answer explains the importance of transport within the context of warfare in that the period.</p> <p><i>Eg shows that during the 19th century extended campaigns / mechanised nature of warfare/ limited ability to care for the wounded during foreign campaigns meant that victory depended on transport for reinforcements to the troops /continual supplies of weapons & food etc.</i> <i>shows that aircraft meets the needs of modern warfare (including reinforcements, supplies & the removal of the wounded) relies on speed, manoeuvrability and precision.</i></p>
