

Language Learning for the Future

Learning a language helps you build on, and develop new skills beyond the classroom. Explore our selection of free resources to see where learning a language can take you in the future as well as the new relationships you can build with different people and cultures.

Videos

Conversations with Eric Dier

We've teamed up with England and Tottenham footballer, Eric Dier, to show the next generation the countless benefits language learning can have on their future lives.

In support of our 'More than words' campaign, Eric Dier spoke with students at Regent High School in London about the impact language learning had on his life and the doors it can open for others.

Student and teacher perspectives on language learning

As part of our work with Eric Dier, we spoke to students and teachers at Regent High School in London to learn about the reasons behind their decisions to study or teach languages and how they think it can impact their futures lives and careers.

Permission to Speak: Amplifying Marginalised Voices Through Languages

As part of our work to shine a light on the complete and often complicated history behind the growth of languages, we've partnered with leading language educators and leaders through the Association for Language Learning Decolonise Secondary MFL Special Interest Group to address 'diversifying the MFL curriculum' and to create a new series that aims to illuminate the hidden stories of marginalised people and cultures.

We've created a resource for each area of focus that includes background information into the topic, key discussion questions, and an activity for students to complete.
