

Psychology  
PAPER 2

Thursday 23 May 2024 – Afternoon

Time: 1 hour 20 minutes

Diagram Booklet

THIS DIAGRAM BOOKLET MUST BE RETURNED WITH THE QUESTION PAPER AT THE END OF THE EXAMINATION.

In the boxes below, write your name, centre number and candidate number.

Surname					
Other names					
Centre Number					
Candidate Number					

## **INSTRUCTIONS**

**There may be spare copies of some diagrams in case you need them.**

## **CONTENTS**

### **Page**

**3      Question 4(c)**

**4      Question 5(b)**

**5      Question 5(d)**

**6      Question 6**

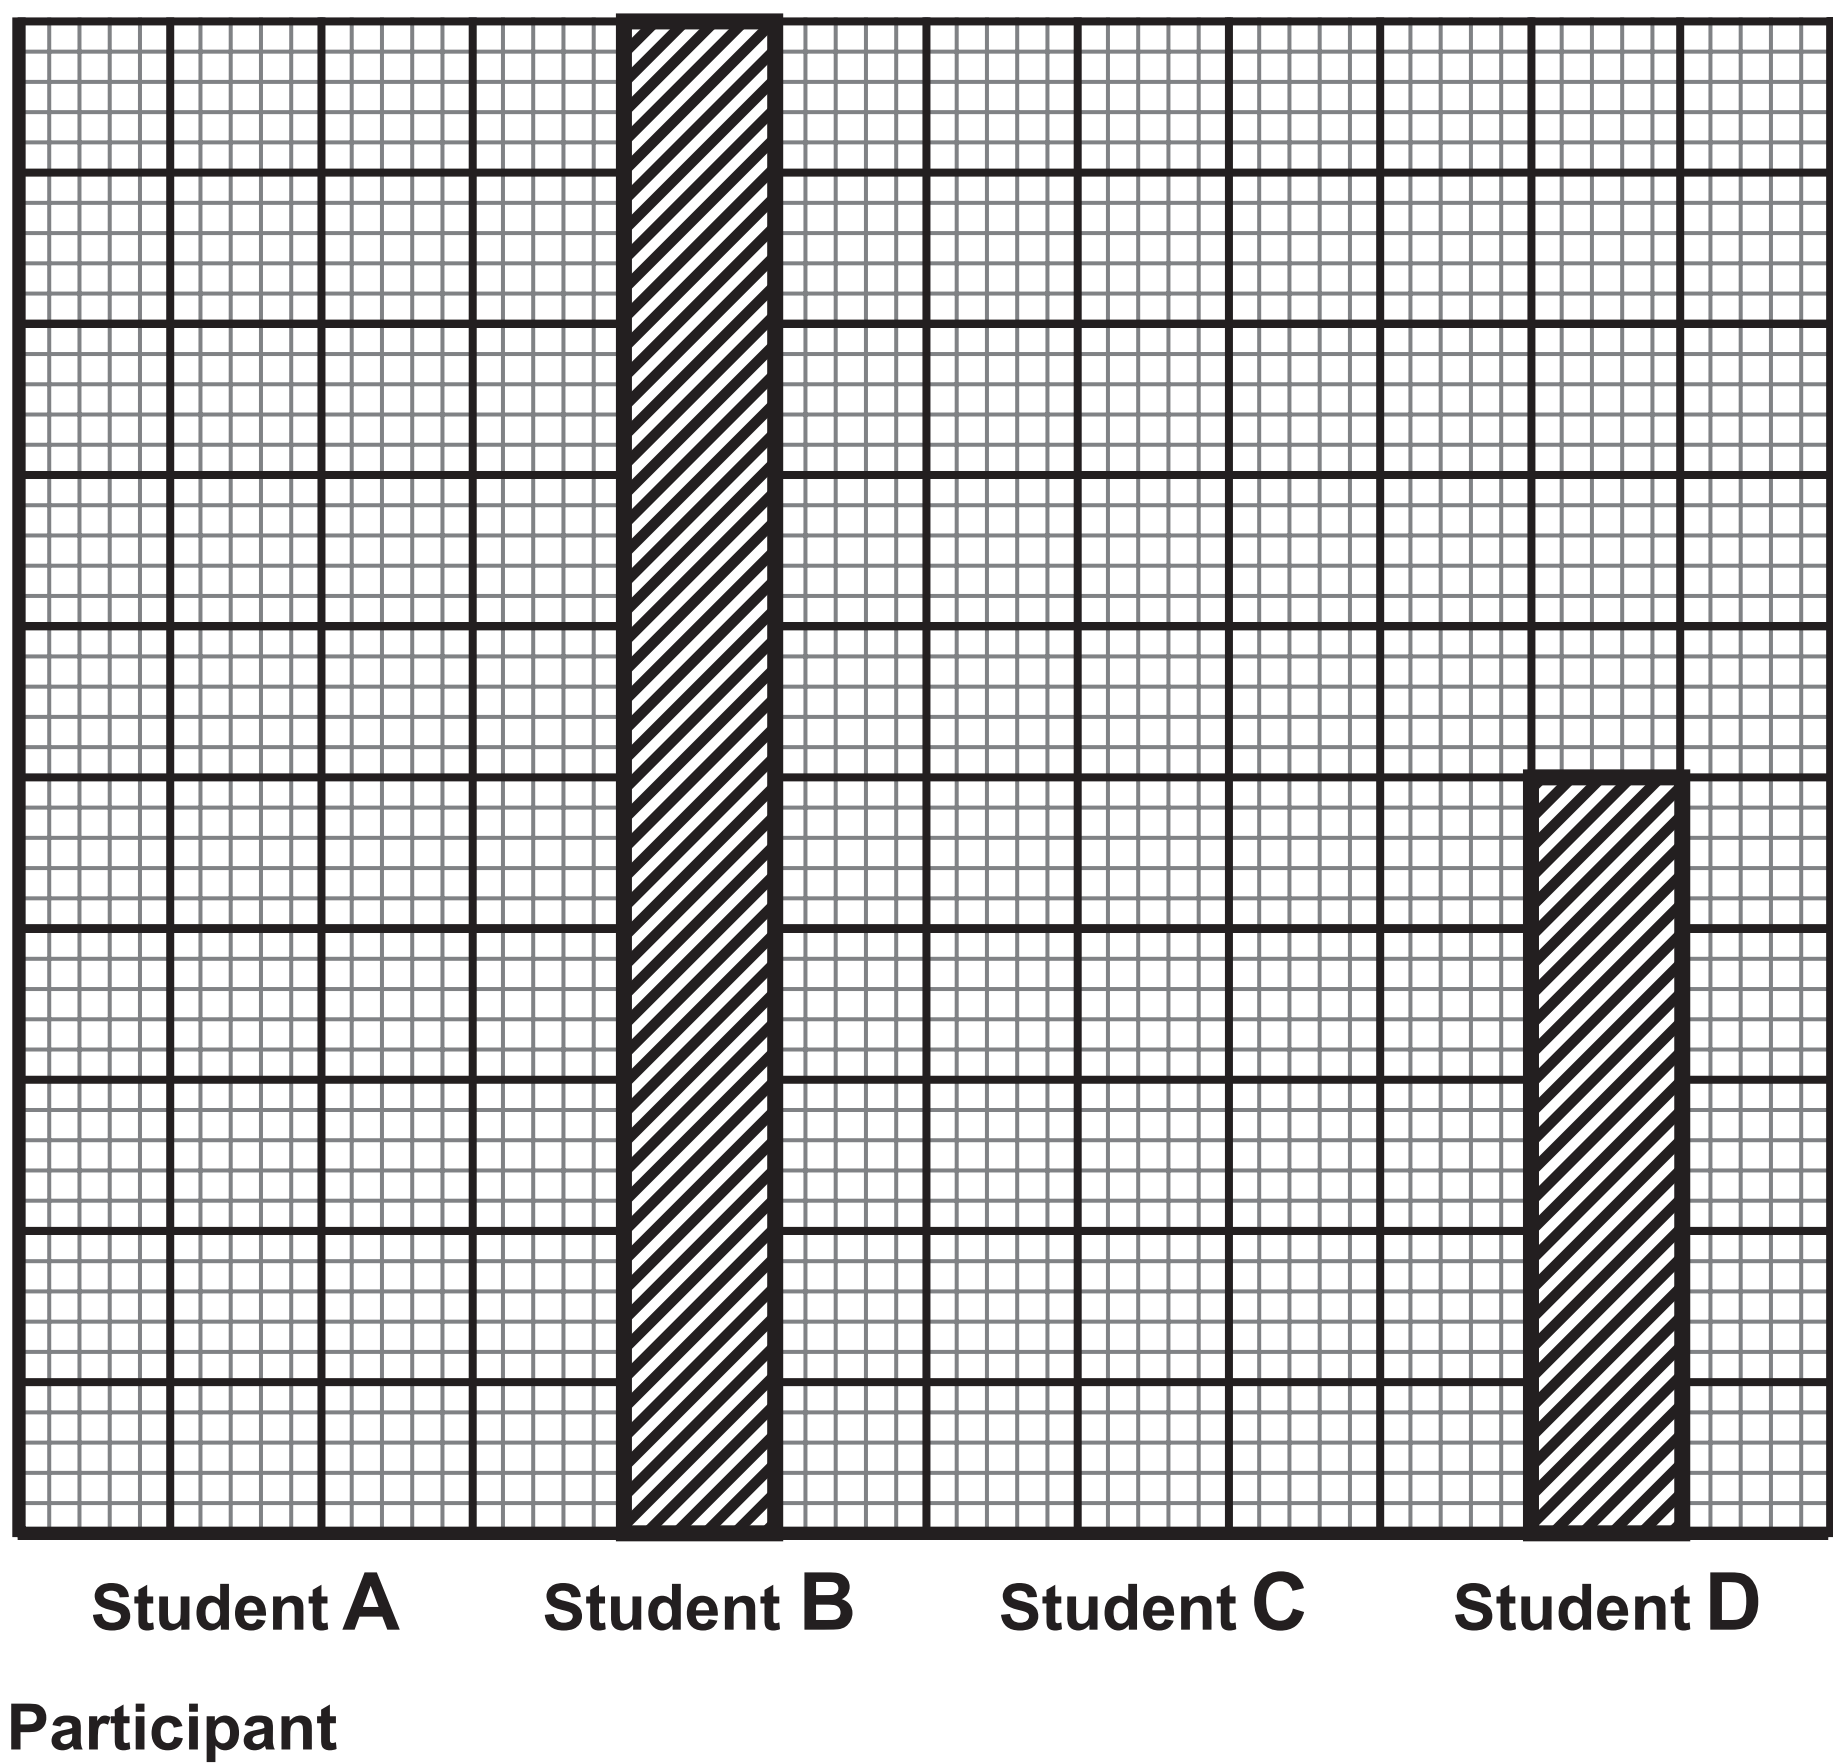

**7      Question 40**

### **Spare Copies**

**8      Question 4(c)**

Question 4(c)

A bar chart to show the number of typical objects recalled by the students

**Question 5(b)****TABLE 2**

<b>Month</b>	<b>Total alcohol consumption in units</b>
<b>March</b>	<b>298</b>
<b>April</b>	<b>221</b>
<b>May</b>	<b>181</b>
<b>June</b>	<b>140</b>
<b>July</b>	<b>99</b>
<b>August</b>	<b>59</b>

Question 5(d)

TABLE 3

Week	Total alcohol consumption in units
March Week 1	79
March Week 2	77
March Week 3	72
March Week 4	70
April Week 1	79
April Week 2	63
April Week 3	45
April Week 4	34

## Question 6

**Rosenhan (1973) studied the way in which patients were treated in mental health hospitals. Eight confederate observers were able to get themselves admitted to different psychiatric wards in different hospitals using fake symptoms of mental health. They then conducted participant observations on the hospital wards.**

**The confederate observers took part in the daily activities on the ward to fit in with the actual patient routines. They also watched how the staff interacted with patients, making detailed notes in diaries of the events they observed. These notes included examples about patient behaviours that had been misinterpreted by the staff. They also recorded how little time the nurses and doctors spent on the ward interacting with patients.**

**None of the staff or patients on the wards were aware that the observations were taking place. When the confederate observers were taking notes and writing in their diaries in public, their behaviour was interpreted as part of their mental health condition. Only the other patients on the ward showed any suspicion about the notes being taken by the confederate observers.**

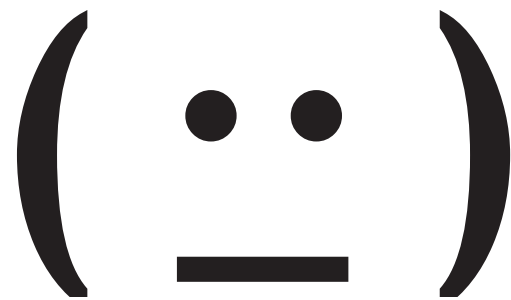

## Question 40

FIGURE 1
