Question 5

An adventure travel company runs expeditions for groups of 20 people.

The company provides all the food and equipment for these expeditions.

The manager of the company wants to trial a new sports drink to see if it is better than the usual sports drink.

He decides on the following plan.

- **Before the expedition each of the 20 people will complete a questionnaire about their fitness and energy levels.**
- **The 20 people will be divided into two groups of 10 people, a test group and a control group.**
- **The test group will be given the new sports drink during the expedition.**
- **The control group will be given the usual sports drink during the expedition.**
- **After the expedition each of the 20 people will again complete a questionnaire about their fitness and energy levels.**
- **The energy levels of the two groups after the expedition will be compared.**
