About this booklet

This booklet has been produced to support mathematics teachers delivering the new GCSE (9–1) Mathematics specification (first assessment summer 2017).

The booklet provides additional information on all the questions in the New Sample Assessment Materials, accredited by Ofqual in June 2015. It details the content references and Assessment Objectives being assessed in each question or question part, along with indicating if a question or question part is new to the Foundation tier, new to this specification, or a common question appearing in the respective paper for both tiers.

How to use this booklet

Callouts have been added to each question in the accredited New Sample Assessment Materials. In the callouts, the following information has been presented, as relevant to the question:

- **specification references** (in standard, underlined or bold type);
- **Assessment Objectives**, including elements and marks awarded for each element;
- **new to Foundation tier**, for any content previously assessed at Higher tier in 1MA0 or 2MB01;
- **new to 1MA1**, for any content not previously assessed in 1MA0 or 2MB01;
- **common question across both tiers**, for any question that appears in both tiers and is assessing performance at grades 4–5;
- **formula given with the question**: formulae will be provided for students with the relevant examination questions, rather than in a formulae sheet at the front of the examination paper (see Issue 2 of the specification).

Where content references or Assessment Objectives are being assessed across all the parts of a question, these are referred to by a single callout at the end of the question rather than by a callout for each question part.

The New Sample Assessment Materials, along with the two sets of specimen papers, are also available in the new GCSE (9–1) level on **Exam Wizard**, where you can search by topic or assessment objective and build your own practice papers.

20. Here are the first six terms of a Fibonacci sequence.

\[
\begin{array}{cccccc}
1 & 1 & 2 & 3 & 5 & 8 \\
\end{array}
\]

The rule to continue a Fibonacci sequence is, the next term in the sequence is the sum of the two previous terms.

(a) Find the 9th term of this sequence.

- **Common question across both tiers**
- **New to 1MA1**
- **New to Foundation tier**
- **recognise and use sequences of Fibonacci type sequences (A24)**
- **AO2**
- **2.3b – communicate information accurately (1 mark)**
**Issue 2 (August 2016)**

A few small errors have been picked up and corrected for Issue 2.

- p.44 – Paper 2F qu.24 is new to Foundation tier.
- p.65 – Paper 3F qu.18 is new to Foundation tier.
- p.70 – Paper 3F qu.24(a) – the last assessment objective is 2.3b, not 2.4a.
- p.134 – Paper 3H qu.17(b) – 1 mark for 1.3a and 1 mark for 3.1c, not 2 marks for 1.3a.
1. Write the following numbers in order of size. Start with the smallest number.

\[
\begin{array}{cccc}
0.61 & 0.1 & 0.16 & 0.106 \\
\end{array}
\]

order positive and negative integers, decimals and fractions (N1)

AO1
1.3a – accurately carry out routine procedures (1 mark)

(Total for Question 1 is 1 mark)

2. Write 0.037 as a fraction.

work interchangeably with terminating decimals and their corresponding fractions (N10)

AO1
1.3a – accurately carry out routine procedures (1 mark)

(Total for Question 2 is 1 mark)

3. Write down the 20th odd number.

use even and odd numbers (N4)

AO1
1.1 – Accurately recall facts, terminology and definitions (1 mark)

(Total for Question 3 is 1 mark)
4. Write down all the factors of 20

use the concepts and vocabulary of factors
(N4)

AO1
1.1 – Accurately recall facts, terminology and
definitions (1 mark)
1.3a – accurately carry out routine procedures
(1 mark)

(Total for Question 4 is 2 marks)

5. Tanya needs to buy chocolate bars for all the children in Year 7
Each of the 130 children get one chocolate bar.
There are 8 chocolate bars in each packet.

Work out the least number of chocolate bars that Tanya needs to buy.

apply the four operations to integers;
understand and use place value (N2)
round numbers and measures to an appropriate
degree of accuracy (N15)

AO1
1.3a – accurately carry out routine procedures
(1 mark)
AO3
3.1c – translate problems in non-mathematical
contexts into a mathematical process (1 mark)
3.3 – interpret results in the context of the
given problem (1 mark)

(Total for Question 5 is 3 marks)

(i) On the probability scale, mark with a cross (×) the probability that the dice will land on an odd number.

(ii) On the probability scale, mark with a cross (×) the probability that the dice will land on a number less than 5

7. One day Sally earned £60.
She worked for 8 hours.

Work out Sally’s hourly rate of pay.
8. Work out 15% of 80

interpret fractions and percentages as operators (N12)

AO1
1.3a – accurately carry out routine procedures
(2 marks)

(Total for Question 8 is 2 marks)

9. There are 3 red beads and 1 blue bead in a jar.
A bead is taken at random from the jar.

What is the probability that the bead is blue?

relate relative expected frequencies to theoretical probability, using appropriate language and the 0-1 probability scale (P3)

AO1
1.3a – accurately carry out routine procedures
(1 mark)

(Total for Question 9 is 1 mark)

10. There are only black pens and green pens in a box.
The ratio of the number of black pens in the box to the number of green pens in the box is 2 : 5

What fraction of the pens are black?

relate ratios to fractions (R8)

AO1
1.3a – accurately carry out routine procedures
(1 mark)

(Total for Question 10 is 1 mark)
11 Sally has three tiles.
   Each tile has a different number on it.
   Sally puts the three tiles down to make a number.
   Each number is made with all three tiles.

   How many different numbers can Sally make?

<table>
<thead>
<tr>
<th>apply systematic listing strategies (N5)</th>
</tr>
</thead>
<tbody>
<tr>
<td>AO1</td>
</tr>
<tr>
<td>1.3a – accurately carry out routine procedures</td>
</tr>
<tr>
<td>(2 marks)</td>
</tr>
</tbody>
</table>

   (Total for Question 11 is 2 marks)
12. Here are the first three patterns in a sequence.
   The patterns are made from triangles and rectangles.

   pattern number 1   pattern number 2   pattern number 3

(a) How many triangles are there in pattern number 7?

   recognise and use simple arithmetic progressions (A24)
   AO1
   1.3a – accurately carry out routine procedures (1 mark)
   AO2
   2.3a – interpret information accurately (1 mark)

Charlie says
“There are 4 rectangles in pattern number 3 so there will be 8 rectangles in pattern number 6”

(b) Is Charlie right?
   Give a reason for your answer.

   generate terms of a sequence from either a term-to-term or a position-to-term rule (A23)
   AO2
   2.5a – assess the validity of an argument (1 mark)

(Total for Question 12 is 3 marks)
13. Paul organised an event for a charity.
   Each ticket for the event cost £19.95
   Paul sold 395 tickets.
   Paul paid costs of £6000
   He gave all money left to the charity.

(a) Work out an estimate for the amount of money Paul gave to the charity.

(b) Is your answer to (a) an underestimate or an overestimate?
   Give a reason for your answer.
14. The table shows information about the numbers of fruit trees in an orchard.

<table>
<thead>
<tr>
<th></th>
<th>Apple tree</th>
<th>Pear tree</th>
<th>Plum tree</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>45</td>
<td>20</td>
<td>25</td>
</tr>
</tbody>
</table>

(a) The pictogram shows this information.

Complete the key for the pictogram.

Key: \( \bigtriangleup \) represents \( \ldots \) trees

interpret and construct pictograms for categorical data (S2)

AO2
2.3a – interpret information accurately
(1 mark)
(b) There are 90 fruit in the orchard.

<table>
<thead>
<tr>
<th></th>
<th>Apple tree</th>
<th>Pear tree</th>
<th>Plum tree</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>45</td>
<td>20</td>
<td>25</td>
</tr>
</tbody>
</table>

Draw an accurate pie chart for this information.
15. Carpet tiles are going to be used to cover a floor.

The floor is a 1200 mm by 1000 mm rectangle.
Each carpet tile is a 40 cm by 30 cm rectangle.

Exactly 10 carpets tiles can be used to cover the floor completely.

Show in a labelled sketch how this can be done.
16. Sam buys 20 boxes of oranges. There are 25 oranges in each box.

Each box of oranges costs £7

Sam sells \(\frac{2}{5}\) of the oranges he bought. He sells each of these oranges for 40p.

He then sells all of the remaining oranges at 3 oranges for 50p.

Did Sam make a profit or did Sam make a loss?
You must show working to justify your answer.
17. 100 students had some homework.

42 of these students are boys.
8 of the 100 students did not do their homework.
53 of the girls did do their homework.

(a) Use this information to complete the frequency tree.

$$\begin{array}{c}
\text{boys} \\
\downarrow \\
\text{did not do homework} \\
\text{did do homework} \\
\downarrow \\
100 \\
\downarrow \\
\text{girls} \\
\downarrow \\
\text{did not do homework} \\
\text{did do homework} \\
\end{array}$$
One of the girls is chosen at random.

(b) Work out the probability that this girl did **not** do her homework.

<table>

(Total for Question 17 is 5 marks)

18. (a) Work out \( \frac{2}{7} + \frac{1}{5} \)

18. (b) Work out \( \frac{2}{3} \div \frac{3}{4} \)

(Total for Question 18 is 4 marks)
19 Solve \(4x + 5 = x + 26\)

- solve linear equations in one unknown algebraically, including those with the unknown on both sides of the equation (A17)
- 1.3b – accurately carry out set tasks requiring multi-step solutions (2 marks)

(Total for Question 19 is 2 marks)

20 In a sale, normal prices are reduced by 20%.
The normal price of a coat is reduced by £15

Work out the normal price of the coat.

- New to Foundation tier
- solve problems involving percentage change (R9)
- AO1 1.3a – accurately carry out routine procedures (2 marks)

(Total for Question 20 is 2 marks)

21. Work out \(6.34 \times 5.2\)

- Common question across both tiers
- apply the four operations, including formal written methods, to decimals; understand and use place value (N2)
- AO1 1.3a – accurately carry out routine procedures (3 marks)

(Total for Question 21 is 3 marks)
22. Expand and simplify \((m + 7)(m + 3)\)

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

AO2

2.1a – make deductions to draw conclusions from mathematical information (3 marks)

(Total for Question 23 is 3 marks)
24. Gary drove from London to Sheffield.
   It took him 3 hours at an average speed of 80 km/h.

   Lyn drove from London to Sheffield.
   She took 5 hours.

   Assuming that Lyn
   drove along the same roads as Gary
   and did not take a break,

   (a) work out Lyn’s average speed from London to Sheffield.

   (b) If Lyn did not drive along the same roads as Gary, explain how this could affect your
   answer to part (a).
25. In a company, the ratio of the number of men to the number of women is 3 : 2

40% of the men are under the age of 25
10% of the women are under the age of 25

What percentage of all the people in the company are under the age of 25?

<table>
<thead>
<tr>
<th>Common question across both tiers</th>

</tbody>
</table>

(Total for Question 28 is 5 marks)
Describe fully the single transformation that maps triangle A onto triangle B.

identify, describe and construct congruent and similar shapes, including on coordinate axes, by considering rotation, reflection, translation and enlargement (G7)

AO2
2.3b – communicate information accurately (2 marks)

(Total for Question 29 is 2 marks)
30. \( \mathbf{a} = \begin{pmatrix} 3 \\ -7 \end{pmatrix}, \quad \mathbf{b} = \begin{pmatrix} 4 \\ 2 \end{pmatrix} \)

Work out \( \mathbf{b} - 2\mathbf{a} \) as a column vector.

New to Foundation tier

apply addition and subtraction of vectors, multiplication of vectors by a scalar, and diagrammatic and column representations of vectors (G25)

AO1

1.2 – Use and interpret notation correctly (1 mark)
1.3a – accurately carry out routine procedures (1 mark)

(Total for Question 30 is 2 marks)

TOTAL FOR PAPER IS 80 MARKS
1. Write down the value of the 3 in the number 4376

   understand and use place value (N2)

   AO2
   1.2 – Use and interpret notation correctly
   (1 mark)

   (Total for Question 1 is 1 mark)

2. Write $\frac{7}{16}$ as a decimal.

   work interchangeably with terminating decimals and their corresponding fractions
   (N10)

   AO1
   1.3a – accurately carry out routine procedures
   (1 mark)

   (Total for Question 2 is 1 mark)

3. Here is a list of numbers

   4  7  9  25  27  31  64

   From the numbers in the list, write down a cube number.

   use positive integer powers and associated real roots, recognise powers of 2, 3, 4, 5 (N6)

   AO1
   1.1 – Accurately recall facts, terminology and definitions (1 mark)

   (Total for Question 3 is 1 mark)
4. Find the value of \((2.8 - 0.45)^2 + \sqrt{5.832}\)

   calculate with roots, and with integer indices (N7)

   AO1
   1.3a – accurately carry out routine procedures (2 marks)

   (Total for Question 4 is 2 marks)

5. There are some boys and girls in a classroom.

   The probability of picking at random a boy is \(\frac{1}{3}\)

   What is the probability of picking a girl?

   apply the property that the probabilities of an exhaustive set of mutually exclusive events sum to one (P4)

   AO1
   1.3a – accurately carry out routine procedures (1 mark)

   (Total for Question 5 is 1 mark)
6. Jan writes down

one multiple of 9
and two different factors of 40

Jan adds together her three numbers.
Her answer is greater than 20 but less than 30

Find three numbers that Jan could have written down.

<table>
<thead>

**AO2**

2.5b – critically evaluate a given way of presenting information (3 marks)

*(Total for Question 8 is 3 marks)*
9. Here is a list of numbers

12  19  12  15  11  15  12  13  17

Find the median.

interpret, analyse and compare the distributions of data sets from univariate empirical distributions through appropriate measures of central tendency (S4)

AO1
1.1 – Accurately recall facts, terminology and definitions (1 mark)
1.3a – accurately carry out routine procedures (1 mark)

(Total for Question 9 is 2 marks)

10. (a) Rob buys \( p \) packets of plain crisps and \( c \) packets of cheese crisps.

Write down an expression for the total number of packets of crisps Rob buys.

translate simple situations or procedures into algebraic expressions or formulae; derive an equation, solve the equation(s) and interpret the solution (A21)

AO1
1.3a – accurately carry out routine procedures (1 mark)

(1)

(b) Solve \( 3x - 5 = 9 \)

solve linear equations in one unknown algebraically (A17)

AO1
1.3b – accurately carry out set tasks requiring multi-step solutions (2 marks)

(2)

(Total for Question 10 is 3 marks)
11. Adam says,

“When you multiply an even number by an odd number
the answer is always an odd number.”

(a) Write down an example to show Adam is wrong.

Betty says,

“When you multiply two prime numbers together
the answer is always an odd number.”

(b) Betty is wrong.
Explain why.
12. You can use the information in the table to convert between kilometres and miles.

<table>
<thead>
<tr>
<th>miles</th>
<th>0</th>
<th>5</th>
<th>20</th>
<th>40</th>
</tr>
</thead>
<tbody>
<tr>
<td>kilometres</td>
<td>0</td>
<td>8</td>
<td>32</td>
<td>64</td>
</tr>
</tbody>
</table>

(a) Use this information to draw a conversion graph.

plot and interpret graphs and graphs of non-standard functions in real contexts to find approximate solutions to problems such as simple kinematic problems involving distance, speed and acceleration (A14)

AO2
2.3b – communicate information accurately (3 marks)
(b) Which is further, 20 kilometres or 15 miles? You must show how you got your answer.

plot and interpret graphs and graphs of non-standard functions in real contexts to find approximate solutions to problems such as simple kinematic problems involving distance, speed and acceleration (A14)
change freely between related standard units in numerical contexts (R1)

AO2
2.1a – make deductions to draw conclusions from mathematical information (1 mark)
2.3a – interpret information accurately (1 mark)

(Total for Question 12 is 5 marks)
13. 

$ABE$ and $CBD$ are straight lines.

Show that triangle $ABC$ is an isosceles triangle. 
Give a reason for each stage of your working.

- Use conventional terms and notation (G1)
- Apply the properties vertically opposite angles; understand and use alternate and corresponding angles on parallel lines; derive and use the sum of angles in a triangle (G3)
- Derive and apply the properties and definitions of triangles using appropriate language (G4)

AO1
1.3b – accurately carry out set tasks requiring multi-step solutions (1 mark)
AO2
2.2 – construct chains of reasoning to achieve a given result (2 marks)
2.4a – present arguments (1 mark)

(Total for Question 13 is 4 marks)
14. The diagram shows a tank in the shape of a cuboid. It also shows a container in the shape of a cuboid.

The tank is full of oil.
The container is empty

35% of the oil from the tank is spilled.
The rest of the oil from the tank is put into the container.

Work out the height of the oil in the container.
Give your answer to an appropriate degree of accuracy.
15. The diagram below represents two towns on a map.

![Diagram accurately drawn](image)

Towey  ×  Worsley

Scale: 1 cm represents 3 kilometres.

Work out the distance, in kilometres, between Towey and Worsley.

use scale factors, scale diagrams and maps (R2)

AO1  1.3b – accurately carry out set tasks requiring multi-step solutions (1 mark)

AO2  2.3a – interpret information accurately (1 mark)

(Total for Question 15 is 2 marks)

16. Find the Highest Common Factor (HCF) of 24 and 60

use the concepts and vocabulary of highest common factor (N4)

AO1  1.3a – accurately carry out routine procedures (1 mark)

(Total for Question 16 is 2 marks)
17. Soap powder is sold in three sizes of box.

A 2 kg box of soap powder costs £1.89
A 5 kg box of soap powder costs £4.30
A 9 kg box of soap powder costs £8.46

Which size of box of soap powder is the best value for money?
You must show how you get your answer.

18. \( f = 5x + 2y \)
\( x = 3 \) and \( y = -2 \)

Find the value of \( f \).
19. Jane made some almond biscuits which she sold at a fete.

She had:
5 kg of flour
3 kg of butter
2.5 kg of icing sugar
320 g of almonds

Here is the list of ingredients for making 24 almond biscuits.

<table>
<thead>
<tr>
<th>Ingredients for 24 almond biscuits</th>
</tr>
</thead>
<tbody>
<tr>
<td>150 g flour</td>
</tr>
<tr>
<td>100 g butter</td>
</tr>
<tr>
<td>75 g icing sugar</td>
</tr>
<tr>
<td>10 g almonds</td>
</tr>
</tbody>
</table>

Jane made as many almonds biscuits as she could, using the ingredients she had.

Work out how many almond biscuits she made.
20. (a) Factorise $3f + 9$

simplify and manipulate algebraic expressions by taking out common factors (A4)

AO1
1.3a – accurately carry out routine procedures
(1 mark)

(b) Factorise $x^2 - 2x - 15$

New to Foundation tier

simplify and manipulate algebraic expressions by factorising quadratic expressions of the form $x^2 + bx + c$ (A4)

AO1
1.3a – accurately carry out routine procedures
(2 marks)

(Total for Question 20 is 3 marks)

21. $q = \frac{p}{r} + s$

Make $p$ the subject of this formula.

understand and use standard mathematical formulae; rearrange formulae to change the subject (A5)

AO1
1.3a – accurately carry out routine procedures
(2 marks)

(Total for Question 21 is 2 marks)
22. A tin of varnish costs £15

A rectangular floor has dimensions 6 m by 11 m. The floor is going to be covered in varnish.

Helen assumes that each tin of this varnish covers an area of 12 m².

(a) Using Helen’s assumption, work out the cost of buying the varnish for this floor.

Helen finds that each tin of varnish covers less than 12 m².

(b) Explain how this might affect the number of tins she needs to buy.

(Total for Question 22 is 5 marks)
23. Frank, Mary and Seth shared some sweets in the ratio 4 : 5 : 7
Seth got 18 more sweets than Frank.

Work out the total number of sweets they shared.

<table>
<thead>
<tr>
<th>Common question across both tiers</th>
</tr>
</thead>
<tbody>
<tr>
<td>use ratio notation (R4)</td>

Bhavna made some mistakes when she drew a histogram for this information.

Write down two mistakes Bhavna made.

(Total for Question 22 is 2 marks)
23. Show that \( \frac{1}{1 + \frac{1}{\sqrt{2}}} \) can be written as \( 2 - \sqrt{2} \)

calculate exactly with fractions and surds; simplify surd expressions involving squares and rationalise denominators (N8)

AO2
2.2 – construct chains of reasoning to achieve a given result (3 marks)

(Total for Question 23 is 3 marks)

24. John has an empty box.
He puts some red counters and some blue counters into the box.

The ratio of the number of red counters to the number of blue counters is 1 : 4

Linda takes at random 2 counters from the box.
The probability that she takes 2 red counters is \( \frac{6}{155} \)

How many red counters did John put into the box?

calculate and interpret conditional probabilities (P9)
translate simple situations or procedures into algebraic expressions or formulae; derive an equation, solve the equation(s) and interpret the solution (A21)
relate ratios to fractions and to linear functions (R8)

AO1
1.3b – accurately carry out set tasks requiring multi-step solutions (1 mark)

AO3
3.1d – translate problems in non-mathematical contexts into a series of mathematical processes (2 marks)
3.2 – Make and use connections between different parts of mathematics (1 mark)

(Total for Question 24 is 4 marks)
25. $A(-2, 1), \ B(6, 5),$ and $C(4, k)$ are the vertices of a right-angled triangle $ABC$.

Angle $ABC$ is the right angle.

Find an equation of the line that passes through $A$ and $C$.

Give your answer in the form $ay + bx = c$ where $a, b$ and $c$ are integers.

| AO1 | 1.3b – accurately carry out set tasks requiring multi-step solutions (1 mark) |
| AO3 | 3.1b – translate problems in mathematical contexts into a series of processes (4 marks) |

(Total for Question 25 is 5 marks)
1. Frank, Mary and Seth shared some sweets in the ratio $4 : 5 : 7$
Seth got 18 more sweets than Frank.

Work out the total number of sweets they shared.

Common question across both tiers

- use ratio notation, including reduction to simplest form (R4)
- apply ratio to real contexts and problems (R5)

AO1

- 1.3b – accurately carry out set tasks requiring multi-step solutions (1 mark)

AO3

- 3.1d – translate problems in non-mathematical contexts into a series of mathematical processes (2 marks)

(Total for Question 1 is 3 marks)

2. $PQR$ is a right-angled triangle

Work out the size of the angle marked $x$.
Give your answer correct to 1 decimal place.

Common question across both tiers

- know the formulae for the trigonometric ratios; apply them to find angles and lengths in right-angled triangles (G20)

AO1

- 1.1 – Accurately recall facts, terminology and definitions (1 mark)
- 1.3a – accurately carry out routine procedures (1 mark)

(Total for Question 2 is 2 marks)
3. Here are the first four terms of an arithmetic sequence.

6 10 14 18

(a) Write an expression, in terms of \(n\), for the \(n\)th term of this sequence.

(b) Is 108 a term of this sequence?
   Show how you get your answer.
4. Axel and Lethna are driving along a motorway.

They see a road sign.
The road sign shows the distance to Junction 8
It also shows the average time drivers take to get to Junction 8

<table>
<thead>
<tr>
<th>To Junction 8</th>
</tr>
</thead>
<tbody>
<tr>
<td>30 miles</td>
</tr>
<tr>
<td>26 minutes</td>
</tr>
</tbody>
</table>

The speed limit on the motorway is 70 mph.

Lethna says

“We will have to drive faster than the speed limit to drive 30 miles in 26 minutes.”

Is Lethna right?
You must show how you get your answer.

Common question across both tiers
change freely between related standard units and compound units in numerical contexts (R1)
use compound units such as speed (R11)

AO1
1.1 – Accurately recall facts, terminology and definitions (1 mark)

AO3
3.1d – translate problems in non-mathematical contexts into a series of mathematical processes (1 mark)
3.3 – Interpret results in the context of the given problem (1 mark)

(Total for Question 4 is 3 marks)
5. The table shows some information about the foot lengths of 40 adults.

<table>
<thead>
<tr>
<th>Foot length (f cm)</th>
<th>Number of adults</th>
</tr>
</thead>
<tbody>
<tr>
<td>$16 \leq f &lt; 18$</td>
<td>3</td>

(Total for Question 6 is 4 marks)
7. The graph of \( y = f(x) \) is drawn on the grid.

(a) Write down the coordinates of the turning point of the graph.

(b) Write down the roots of \( f(x) = 2 \)

(c) Write down the value of \( f(0.5) \)

(Total for Question 7 is 3 marks)
8. In a box of pens, there are

three times as many red pens as green pens
and two times as many green pens as blue pens.

For the pens in the box, write down
the ratio of the number of red pens to the number of green pens to the number of blue pens.

Express a multiplicative relationship between
two quantities as a ratio or a fraction (R6)

AO2
2.3a – interpret information accurately
(1 mark)
2.3b – communicate information accurately
(1 mark)

(Total for Question 8 is 2 marks)
9. \(ABCD\) is a rectangle.
\(EFGH\) is a trapezium.

All measurements are in centimetres.
The perimeters of these two shapes are the same.

Work out the area of the rectangle.

The account pays compound interest at an annual rate of

2.5\% for the first year

x \% for the second year

x \% for the third year

There is a total amount of £2124.46 in the savings account at the end of 3 years.

(a) Work out the rate of interest in the second year.
Katy goes to work by train.

The cost of her weekly train ticket increases by 12.5% to £225

(b) Work out the cost of her weekly train ticket before this increase.

interpret fractions and percentages as operators (N12)
interpret percentages and percentage changes as a fraction or a decimal, and interpret these multiplicatively; solve problems involving percentage change, including percentage increase/decrease and original value problems, and simple interest including in financial mathematics (R9)

AO1
1.3a – accurately carry out routine procedures (2 marks)

(2)

(Total for Question 10 is 6 marks)
11.

S and T are points on the circumference of a circle, centre O.
PT is a tangent to the circle.
SOP is a straight line.
Angle \( OPT = 32^\circ \)

Work out the size of the angle marked \( x \).
You must give a reason for each stage of your working.

\[
\text{apply and prove the standard circle theorems concerning angles, radii, tangents and chords, and use them to prove related results (G10)}
\]

\[
\text{AO2}
2.1a – make deductions to draw conclusions from mathematical information (2 marks)

(Total for Question 11 is 4 marks)
A and B are two sets of traffic lights on a road.

The probability that a car is stopped by lights A is 0.4

If a car is stopped by lights A, then the probability that the car is *not* stopped by lights B is 0.7

If a car is *not* stopped by lights A, then the probability that the car is *not* stopped by lights B is 0.2

(a) Complete the probability tree diagram for this information.

---

**AO2**

2.3a – interpret information accurately (1 mark)

2.3b – communicate information accurately (1 mark)
Mark drove along this road.
He was stopped by just one of the sets of traffic lights.

(b) Is it more likely that he stopped by lights A or by lights B?
You must show your working.
13. $d$ is inversely proportional to $c$

When $c = 280$, $d = 25$

Find the value of $d$ when $c = 350$

14. Prove algebraically that

$$(2n + 1)^2 - (2n + 1)$$

is an even number for all positive integer values of $n$. 

---

**AO1**
1.3b – accurately carry out set tasks requiring multi-step solutions (3 marks)

(Total for Question 13 is 3 marks)

**AO2**
2.4b – present proofs (2 marks)

(Total for Question 14 is 3 marks)
15. Prove algebraically that the recurring decimal $0.25\overline{25}$ has the value $\frac{23}{90}$.

16. Show that $\frac{1}{6x^2 + 7x - 5} + \frac{1}{4x^2 - 1}$ simplifies to $\frac{ax + b}{cx + d}$ where $a, b, c$ and $d$ are integers.
17. The diagram shows a sector of a circle of radius 7 cm.

Work out the length of arc $AB$.
Give your answer correct to 3 significant figures.

\[ m = \sqrt{\frac{s}{t}} \]

$s = 3.47$ correct to 3 significant figures

$t = 8.132$ correct to 4 significant figures

By considering bounds, work out the value of $m$ to a suitable degree of accuracy.
Give a reason for your answer.
19. The graph of $y = f(x)$ is shown on both grids below.

(a) On the grid above, sketch the graph of $y = f(-x)$.

(1)
(b) On this grid, sketch the graph of \( y = -f(x) + 3 \)

recognise, sketch and interpret graphs of quadratic functions (A12)
sketch translations and reflections of a given function (A13)

AO2
2.3b – communicate information accurately (2 marks)

(1)

(Total for Question 19 is 2 marks)

20 Solve algebraically the simultaneous equations

\[
\begin{align*}
x^2 + y^2 &= 25 \\
y - 2x &= 5
\end{align*}
\]

solve two simultaneous equations in two variables (linear/linear or linear/quadratic) algebraically (A19)

AO1
1.3b – accurately carry out set tasks requiring multi-step solutions (4 marks)
AO2
2.3b – communicate information accurately (1 mark)

(Total for Question 20 is 5 marks)
21. In triangle $RPQ$,

$RP = 8.7$ cm  
$PQ = 5.2$ cm  
Angle $PRQ = 32^\circ$

(a) Assuming that angle $PQR$ is an acute angle, calculate the area of triangle $RPQ$.
Give your answer correct to 3 significant figures.

(b) If you did not know that angle $PQR$ is an acute angle, what effect would this have on your calculation of the area of triangle $RPQ$?
A frustum is made by removing a small cone from a large cone as shown in the diagram.

The frustum is made from glass.
The glass has a density of 2.5 g/cm³

Work out the mass of the frustum.
Give your answer to an appropriate degree of accuracy.

Formula given with the question

Know the formulae: volume of spheres, pyramids, cones and composite solids (G17)
Apply the concepts of congruence and similarity, including the relationships between lengths, areas and volumes in similar figures (G19)
Round numbers and measures to an appropriate degree of accuracy (N15)
Use compound units such as speed, rates of pay, unit pricing, density and pressure (R11)

AO1

2. Asif is going on holiday to Turkey.
The exchange rate is £1 = 3.5601 lira.
Asif changes £550 to lira.

(a) Work out how many lira he should get.
Give your answer to the nearest lira.

(b) Use £2 = 7 lira to show that the approximate cost of the shoes is £60
(c) Is using £2 = 7 lira instead of using £1 = 3.5601 lira a sensible start to Asif’s method to work out the cost of the shoes in pounds? You must give a reason for your answer.

(Total for Question 2 is 5 marks)
3. Here are the first six terms of a Fibonacci sequence.

\[1 \quad 1 \quad 2 \quad 3 \quad 5 \quad 8\]

The rule to continue a Fibonacci sequence is,
the next term in the sequence is the sum of the two previous terms.

(a) Find the 9th term of this sequence.

(b) Show that the 6th term of this sequence is \(3a + 5b\)
Given that the 3rd term is 7 and the 6th term is 29,
(c) find the value of $a$ and the value of $b$.

</tr>
<tr>
<td>0 &lt; m ≤ 50</td>
<td>74</td>
</tr>
<tr>
<td>0 &lt; m ≤ 60</td>
<td>80</td>
</tr>
</tbody>
</table>

(a) On the grid, plot a cumulative frequency graph for this information.
(b) Find the median mark.

Students either pass the test or fail the test. The pass mark is set so that 3 times as many students fail the test as pass the test.

(c) Find an estimate for the lowest possible pass mark.
8. Write 0.000068 in standard form.

9. (a) Factorise \( y^2 + 7y + 6 \)

(b) Solve \( 6x + 4 > x + 17 \)

(c) \( n \) is an integer with \(-5 < 2n \leq 6\)

Write down all the values of \( n \)
10. The function \( f \) is such that
\[ f(x) = 4x - 1 \]
(a) Find \( f^{-1}(x) \)

The function \( g \) is such that
\[ g(x) = kx^2 \] where \( k \) is a constant.

Given that \( fg(2) = 12 \)
(b) work out the value of \( k \)

11. Solve \( x^2 - 5x + 3 = 0 \)
Give your solutions correct to 3 significant figures.
12. Sami asked 50 people which drinks they liked from tea, coffee and milk.

All 50 people like at least one of the drinks.
19 people like all three drinks.
16 people like tea and coffee but do not like milk.
21 people like coffee and milk.
24 people like tea and milk.
40 people like coffee.
1 person likes only milk.

Sami selects at random one of the 50 people.

(a) Work out the probability that this person likes tea.

(b) Given that the person selected at random from the 50 people likes tea, find the probability that this person also likes exactly one other drink.

(Total for Question 12 is 6 marks)
13. $ABCD$ is a rhombus.

$M$ and $N$ are points on $BD$ such that $DN = MB$.

Prove that triangle $DNC$ is congruent to triangle $BMC$.
14. (a) Show that the equation \( x^3 + 4x = 1 \) has a solution between \( x = 0 \) and \( x = 1 \)

(b) Show that the equation \( x^3 + 4x = 1 \) can be arranged to give \( x = \frac{1}{4} - \frac{x^3}{4} \)

(c) Starting with \( x_0 = 0 \), use the iteration formula \( x_{n+1} = \frac{1}{4} - \frac{x_n^3}{4} \) twice, to find an estimate for the solution of \( x^3 + 4x = 1 \)

(Total for Question 14 is 6 marks)
15. There are 17 men and 26 women in a choir.
The choir is going to sing at a concert.

One of the men and one of the women are going to be chosen to make a pair to sing the first song.

(a) Work out the number of different pairs that can be chosen.

(b) Who is correct, Ben or Mark?

Give a reason for your answer.

(Total for Question 15 is 3 marks)
16. \( VABCD \) is a solid pyramid.

\( ABCD \) is a square of side 20 cm.

The angle between any sloping edge and the plane \( ABCD \) is \( 55^\circ \)

Calculate the surface area of the pyramid.
Give your answer correct to 2 significant figures.
17. Louis and Robert are investigating the growth in the population of a type of bacteria. They have two flasks A and B.

At the start of day 1, there are 1000 bacteria in flask A. The population of bacteria grows exponentially at the rate of 50% per day.

(a) Show that the population of bacteria in flask A at the start of each day forms a geometric progression.

(b) Find the value of $k$.

(c) Sketch a graph to compare the size of the population of bacteria in flask A and in flask B.
18. 

$\overrightarrow{OA} = 6\mathbf{a}$  
$\overrightarrow{OB} = 6\mathbf{b}$  
$\overrightarrow{ON} = k\mathbf{b}$  
where $k$ is a scalar quantity.

Given that $MNC$ is a straight line, find the value of $k$.

apply addition and subtraction of vectors; multiplication of vectors by a scalar; use vectors to construct geometric arguments and proofs (G25)
simplify and manipulate algebraic expressions by:
- collecting like terms
- multiplying a single term over a bracket
- taking out common factors (A4)

AO1
