Escuchar música, un placer que nos ayuda

Escuchar música es una de las elecciones más placenteras que podemos disfrutar en nuestro tiempo libre. Al escuchar música nos divertimos sintiendo una gama de emociones. Aparte de eso, fomenta la creatividad e incluso nos ayuda a conectar mejor con los demás.

Aunque a veces escuchamos por escuchar, en realidad nos puede ayudar más de lo que pensamos. A veces es beneficioso escuchar música mientras trabajamos, ya que nuestro rendimiento puede aumentar. Además, nos ayuda a no distraernos con otros agentes externos que pueden hacernos perder el tiempo.

La natalidad en España

La tasa de natalidad de España sigue sufriendo las consecuencias de la crisis financiera. Menos nacimientos implican un número menor de trabajadores en años futuros, y un aumento del porcentaje de los de mayor edad. Además, con el tiempo, esto podría poner a prueba los sistemas públicos de pensiones y de bienestar social.

Los expertos en demografía han pronosticado una caída continua en el número de bebés, ampliando la brecha entre pobres y ricos y demostrando que los ingresos siguen siendo un factor importante en la tasa de natalidad.

El deporte no tiene género

En México es innegable el empuje de las mujeres en el deporte, pero hubo una época donde practicar deporte era visto como lo opuesto a la feminidad. Se argumentaban supuestas deficiencias físicas en comparación con los hombres, y hasta se les sugería a las mujeres la posibilidad de daños a sus capacidades reproductivas.

“Afortunadamente, hoy estamos lejos de esos tiempos, pero aún hay distancia con el deporte masculino en cuanto a condiciones y salarios. Por eso hay que seguir poniendo el tema sobre la mesa”, dice Mónica, una joven futbolista.

El ruido excesivo y nuestra salud

España es uno de los países más ruidosos del mundo, y hay estudios que evidencian que estar constantemente en un entorno ruidoso afecta a la salud, produciendo estrés y alteraciones en el sueño. Además, los problemas de sordera aparecen a edades cada vez más tempranas.

Sigue incrementándose el número de jóvenes con problemas auditivos, debido a la utilización de dispositivos electrónicos para escuchar música, y por los altos niveles de decibelios en discotecas y clubs de noche. Todo eso causa lesiones irreversibles en el oído interno.

El Corredor Seco

El Corredor Seco de Centroamérica lleva dos décadas sufriendo los efectos del cambio climático. Ha habido largos períodos de sequía y temporales de lluvia que castigan las cosechas, además de llevar a las migraciones internas y transnacionales y la falta de recursos.

La situación se agravó por una intensa temporada ciclónica que incluyó el paso de los devastadores huracanes Iota y Eta a finales del 2020. Los organismos de ayuda humanitaria indican que más del 80 % de sus habitantes sufren de una severa crisis alimentaria y la pobreza extrema.
