Research sheet three

I enjoyed using my artist eagle to do paintings. And I also always tried to link the topic 'hidden'. Furthermore, I prefer use sponge material to brush the painting and add more dark or light shadows at the same time. It can make the paint pieces more smooth as well. The advantage of using sponge is that highlights the effect of hidden then make them more harmonious. In addition, I used the big brush to draw the background background with the method of spit and it's able to mix other colour into the background. Finally, I also did the experiment with the prep sheet.

Final outcome total mark 37
