Fine Art Limited

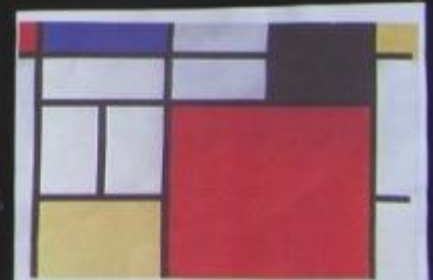

Minimal

Research sheet one

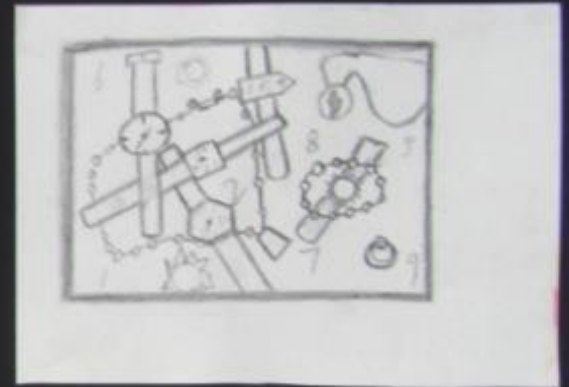

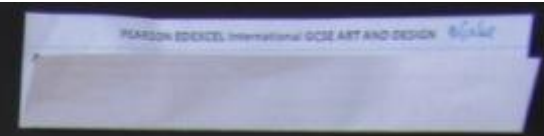

I want to draw my computer, watch and necklace because the computer is my learning tool, watches have many features and the necklace is very delicate.

Mondrian is very good artist. His work is abstract and unique, unique in design and influential in many fields. I like his bold colors and simple designs, so I chose him as my artist.

Research sheet two

I think of there is only a mesh and a machine, it is too minuscule, so I put a wide range of sketches and necklaces in a random way on the screen display. I do some figures in the other spaces to make the picture more abstract.

Research sheet three

I would like to draw these using graphic design with the back ground a variety of color box designs. But I think that if the computer is limited, the black screen is used monochromatically, so I would like to draw the watch and neck lace on the computer screen, so as to enhance the form!
