

ACID RAIN

Paper: 2CR

Question: 3(b)

Example 1

Your mark

Crude oil fractions contain ~~sulphur~~ sulfur and this is a problem when using the fractions as fuels because when the fuels burn they release this sulfur into the air causing pollution. Sulfur is the main cause of acid rain and is very pollutant.

Example 2

Your mark

It combines with oxygen in the atmosphere to form sulphur dioxide which ~~is an~~ ~~ac~~ causes acid rain. Acid rain harms life on earth by damaging the trees.

Example 3

Your mark

* This is because sulfur is one of the greenhouse gas

* It mixes with H_2O and Oxygen to form acid rain.
