Answer ALL questions

1. Data can be entered into a computer in several ways.

(a) Complete the table for the following input methods:

Barcode reading, Keyboard, OCR, OMR.

The first one has been done for you.

Explanation	Input method
Keys are pressed to enter data	Keyboard
Text is scanned directly into the computer	
Pencil marks on a grid are scanned directly into the computer	
Black and white stripes on food packaging are scanned into the computer	

(3)

(b) State **one** other method of data input.

blank

2. Letters can be sent via e-mail or via the postal service.

(a) Give **two** benefits of using an e-mail service compared with the postal service.

Benefit 1

Benefit 2

(2)

It is possible to set up a video conference call where more than two people in different countries can discuss matters using a video link.

(b) Give **two** reasons for holding a conference in this way instead of a face-to-face meeting.

Reason 1

Reason 2

(2)

(c) A Webcam is one item of equipment that must be added to a pc to allow a video conference to take place. State **two** other pieces of equipment and state their use.

Equipment 1

Use

Equipment 2

Use

3. Data stored on tape takes more time to access than the same data stored on a CD-ROM.

(a) State why this is so.

..... (1)

(b) Give **one** example of where tape storage would be used in preference to CD-ROM storage.

..... (1)

The flow chart shows how file generations can be used to back up a file.

(c) Use the letters A to G to label the flow chart boxes. Letters can be used once, more than once, or not at all. The first one has been completed for you.

- A. Merge
- B. Son File
- C. Transaction File
- D. Father File
- E. Print File
- F. Customer File
- G. Grandfather File

4. A school library uses an information system to store details of books borrowed by students. Part of the student table is shown.

Stud_num	Name	Date due	ISBN	Tutor
OXZ3564	Hawkins	21/09/2008	0-7487-6367-8	PA
WRT1458	Singh	23/02/2008	0-7847-5747-3	DB
ASD5689	Smith	05/06/2008	0-6581-2543-9	MT
QWE1234	Ibell	14/05/2008	0-2591-2215-7	VG

Each book in the library has a bar code containing its ISBN.

- (a) When data is entered it is validated by software.

- (i) Choose a suitable validation check for the Stud_num field and describe how it would work.

Validation Check

How it works

(2)

- (ii) Choose a different suitable validation check for the Date due field and describe how it would work.

Validation Check

How it works

(2)

- (b) Explain, with an example from the table, why data which was found to be valid by this program might still be wrong.

5. A student is using the Internet to research information for a history project. Access is through a dial up modem.

(a) Before the student can use the Internet the student must register with an Internet Service Provider (ISP). State **three** services in addition to e-mail that could be provided by an ISP.

Service 1

Service 2

Service 3

(3)

The student has found some suitable information containing a video clip and several pages of text and pictures. The student starts to download the information and finds it is a slow process.

(b) State **two** reasons why the student should be careful about using information downloaded from the Internet.

Reason 1

.....

Reason 2

.....

(2)

(c) (i) State which part of the download is likely to be causing the problem.

.....

(1)

(ii) Explain what the problem could be and suggest how it can be overcome.

7. Peter runs a wholesale garden business. Peter uses a spreadsheet to help with the business accounts. Part of the spreadsheet he uses is shown.

	A	B	C	D	E
1	Sales – May 2009				
2					
3	Customer	Total Sales	Tax	Amount Due	
4	Flowers R Us	£4,392.00	£768.60	£5,160.60	
5	Red Roses Nursery	£8,752.00	£1,531.60	£10,283.60	
6	Bloomsbury	£3,325.00	£581.88	£3,906.88	
7	Garden Delights	£11,569.00	£2,024.58	£13,593.58	
8	Valley Gardening Services	£23,698.00	£4,147.15	£27,845.15	
9	Sensational Blooms	£5,000.00	£875.00	£5,875.00	
10	Flowers for All	£12,345.00	£2,160.38	£14,505.38	
11					

A cell reference consists of a letter and a number; for example, the word Customer is in cell A3.

- (a) State the cell reference for the customer “Red Roses Nursery”.

.....
(1)

Peter’s customers must pay a tax of 17.5% on all purchases.

- (b) Give a formula that could be used in cell C4 to calculate the amount of tax to be paid.

.....
(2)

- (c) Give a formula that could be used in cell D4 to calculate the Amount Due.

.....
(1)

- (d) Explain how this formula could be put into the cell range (D5: D10).

.....

(2)

Q11

12. All students at a college have to pay a fee of up to £150.00. The table forms part of the college's new administration system.

Student ID	Surname	Initials	Date of Birth	Fee (£)
AHM04025	Ahmed	S	21/09/93	35.00
FAC08036	Facciuto	L	01/08/91	129.00
LAN06031	Lanfear	MR	25/06/92	29.39
LAN06031	Langston	P	04/02/91	51.67
WIL08051	Wilson	JIF	30/07/92	119.25

(a) Suggest a suitable field type and size for each of the following.

(i) Student ID (1)

(ii) Date of Birth (1)

(iii) Fee (£) (1)

(b) The designer wishes to test the system with typical data, extreme data, and invalid data. Give **one** example of each form of test data for the Fee field.

Typical data

Extreme data

Invalid data (3)
