

Communication about changes to International GCSE IT - 4IT1/02

We are sorry that this change has come at such short notice to you and to the candidates that you support. The changes represent an improvement to the qualification going forward. We will supply exemplar past papers to support you as you guide your students toward this year's assessment window. Exemplar past papers can be found [here](#).

Candidates will no longer be required or permitted to print out their work and centres will no longer be required to scan it for submission to Pearson during the examination.

Centres will upload candidates' work electronically using the Digital Learner Work platform as instructed in the Instructions of Conduct of Examinations which can be found [here](#).

As before centres must set up an examination folder for each candidate but now the digital evidence will be used for assessment, candidates must save their files to their examination folder. Please see the Instructions of Conduct of Examinations which can be found [here](#) for further information.
