# Introduction

---

The Pearson Edexcel International GCSE in Information and Communication Technology (ICT) is part of a suite of International GCSE qualifications offered by Pearson.

These sample assessment materials have been developed to support this qualification and will be used as the benchmark to develop the assessment students will take.

# General marking guidance

---

- All candidates must receive the same treatment. Examiners must mark the last candidate in exactly the same way as they mark the first.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than be penalised for omissions.
- Examiners should mark according to the mark scheme – not according to their perception of where the grade boundaries may lie.
- All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.
- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification/indicative content will not be exhaustive. However different examples of responses will be provided at standardisation.
- When examiners are in doubt regarding the application of the mark scheme to a candidate's response, a senior examiner must be consulted before a mark is given.
- Crossed-out work should be marked **unless** the candidate has replaced it with an alternative response.

## Paper 1: Written paper

### Marking guidance for levels based mark schemes

#### How to award marks

The indicative content provides examples of how students will meet each skill assessed in the question. The levels descriptors and indicative content reflect the relative weighting of each skill within each mark band.

#### Finding the right level

The first stage is to decide which level the answer should be placed in. To do this, use a 'best-fit' approach, deciding which level most closely describes the quality of the answer. Answers can display characteristics from more than one level, and where this happens markers must use the guidance below and their professional judgement to decide which level is most appropriate.

#### Placing a mark within a level

After a level has been decided on, the next stage is to decide on the mark within the level. The instructions below tell you how to reward responses within a level. However, where a level has specific guidance about how to place an answer within a level, always follow that guidance. Statements relating to the treatment of students who do not fully meet the requirements of the question are also shown in the indicative content section of each levels based mark scheme. These statements should be considered alongside the levels descriptors.

Markers should be prepared to use the full range of marks available in a level and not restrict marks to the middle. Markers should start at the middle of the level (or the upper-middle mark if there is an even number of marks) and then move the mark up or down to find the best mark. To do this, they should take into account how far the answer meets the requirements of the level:

- If it meets the requirements fully, markers should be prepared to award full marks within the level. The top mark in the level is used for answers that are as good as can realistically be expected within that level
- If it only barely meets the requirements of the level, markers should consider awarding marks at the bottom of the level. The bottom mark in the level is used for answers that are the weakest that can be expected within that level
- The middle marks of the level are used for answers that have a reasonable match to the descriptor. This might represent a balance between some characteristics of the level that are fully met and others that are only barely met.

## Instructions to candidates

This paper consists of two sections. Each section contains several tasks.

Work through the tasks in order.

Spend approximately 90 minutes on each section.

For all tasks, you **MUST** enter the task number, your name, candidate number and centre number on each document **BEFORE PRINTING**.

This table shows the major software used, the marks available and the data files needed for each section.

Section	Marks	Data files needed
A Spreadsheet and presentation software	50	FINANCE, HOTEL, IMAGES folder
B Database and word processing software	50	AUGMTG1, AUGMTG2, AUGMTG3, RESTEASY, DRAFT
Total marks	100	

For each activity, you may also need to use other software.

House style

The house style for documents is a sans serif font.

Company documents have the logo in the bottom left-hand corner.

## SECTION A – Hotel group finances

You are advised to spend about 90 minutes on this section.

### Task A1

The spreadsheet **HOTEL** contains details of the hotels owned by the company.

It has two worksheets called **DETAIL** and **DISCOUNT**.

Open the spreadsheet **HOTEL**.

Open the worksheet **DETAIL**.

Enter **Task A1** and your name, candidate number and centre number in the footer.

### Task A1a

Jayesh has bought a new hotel.

The details for the new hotel are:

Code:	544SP
Hotel Name:	Malaga Resteasy
Location:	Spain
Grade:	5
Rooms:	75
Daily Room Rate:	66.45

Add these details to the worksheet.

(2)

### Task A1b

Format the **DETAIL** worksheet so that:

- currency values show the currency symbol (£, \$ or €) and two decimal places
- all of the data is visible.

(2)

### Task A1c

Sort the **DETAIL** worksheet into alphabetical order by hotel name within alphabetical order of location.

(3)

**SAVE** the spreadsheet as **TASK A1**.

**PRINT** the **DETAIL** worksheet on **one** side of A4, showing the **data**.

**(Total for Task A1 = 7 marks)**

## Task A2

Jayesh wants to use spreadsheet tools to analyse the data.

Open the worksheet **DETAIL**.

Enter **Task A2** and your name, candidate number and centre number in the footer.

### Task A2a

- (i) Enter a formula in cell **F32** to calculate the average **Daily Room Rate**. (2)

Jayesh estimates that 80% of the rooms in the hotels are occupied each day.

- (ii) Enter formulae in suitable cells to calculate:
- the daily income for each hotel if 80% of the rooms are occupied
  - the total daily income.
- (4)

**SAVE** the spreadsheet as **TASK A2**.

**DO NOT PRINT** at this stage.

### Task A2b

Jayesh wants to calculate the impact of giving a discount that depends on the grade of the hotel.

He has stored discount percentage rates in the **DISCOUNT** worksheet.

- (i) Use a spreadsheet function and the information in the **DISCOUNT** worksheet to display the percentage discount rate for each hotel. (2)

He estimates that 85% of rooms will be occupied each day as a result of giving a discount.

- (ii) Enter formulae in suitable cells to calculate:
- the revised daily room rate for each hotel
  - the revised daily income for each hotel
  - the revised total daily income.
- (5)

**RESAVE TASK A2**.

**DO NOT PRINT** at this stage.

### Task A2c

- (i) Enter suitable labels for each column in which you have entered formulae in **Task A2a** and **Task A2b**. (1)
- (ii) Hide columns **B, C, D** and **E**. (1)

#### **RESAVE TASK A2.**

**PRINT** the **DETAIL** worksheet on one side of A4, showing the **data**.

Display the **DETAIL** worksheet in formula view.

Make sure columns containing formulae are wide enough to display the complete formulae.

Make sure the row and column headings are showing.

**PRINT** the **DETAIL** worksheet on **one** side of A4, showing the **formulae**.

**(Total for Task A2 = 15 marks)**

### Task A3

Jayesh wants a chart that displays the original daily income and the revised daily income for the hotels in Sri Lanka.

The chart must:

- identify each hotel by name
- be fit for purpose
- have a suitable title and axis labels.

Create the chart as a separate worksheet.

Enter **Task A3** and your name, candidate number and centre number in the footer.

**SAVE** the spreadsheet as **TASK A3**.

**PRINT** the chart to fill **one** A4 sheet, landscape.

**(Total for Task A3 = 5 marks)**

Jayesh holds regular meetings of the hotel management board.

He wants to create a presentation about the hotel group finances for the next meeting.

### Task A4

Jayesh wants a new logo to be used in the presentation.

Open a new word-processing document.

Enter **Task A4**, your name, candidate number and centre number in the footer.

**SAVE** the document as **TASK A4**.

### Task A4a

Create the logo.

The logo must be fit for purpose and include:

- the letters **SREH**
- **one** suitable image from the **IMAGES** folder.

(3)

**SAVE** the logo as **SREH LOGO**.

Insert a copy of the logo into the document **TASK A4**.

**DO NOT PRINT** at this stage.

### Task A4b

Answer this question on the document **TASK A4**.

Explain why the **type** of image you chose from the **IMAGES** folder is suitable for use in a logo.

(2)

**SAVE TASK A4**.

**PRINT TASK A4** on **one** side of A4.

**(Total for Task A4 = 5 marks)**

### Task A5

Jayesh wants a slide master for the presentation.

Open a new word-processing document.

Enter **Task A5** and your name, candidate number and centre number in the footer.

**SAVE** the document as **TASK A5**.

### Task A5a

Create the slide master for the presentation.

The master slide must:

- use the house style described on page 3
- use dark blue text on a pale yellow background
- include the logo you have saved as **SREH LOGO**
- include placeholders for a slide title, text and an image
- include a footer with your candidate details.

Display the slide master on the screen.

Take a screenshot of the slide master.

(3)

**SAVE** the presentation as **MASTER**.

Paste the screenshot of the slide master into the document **TASK A5**.

**RESAVE TASK A5**.

**DO NOT PRINT** at this stage.

### Task A5b

Answer this question on the document **TASK A5**.

Explain why organisations use house styles for digital products.

(2)

**RESAVE TASK A5**.

**PRINT TASK A5** on **one** side of A4.

**(Total for Task A5 = 5 marks)**

## Task A6

Jayesh wants the presentation for the management board meeting.

The presentation must:

- use the slide master you produced in **Task A5a**
- have a title slide and five other slides
- be fit for purpose.

### Task A6a

Create the first **five** slides (the title slide and four other slides) for the presentation using:

- the slide master you produced in **Task A5a**
- text selected from the file **FINANCE**
- appropriate images from the **IMAGES** folder.

(5)

**SAVE** the presentation as **TASK A6**.

**DO NOT PRINT** at this stage.

### Task A6b

Create slide 6.

It must include:

- the chart you created in **Task A3**
- an explanation of what the chart shows.

(3)

**RESAVE TASK A6**.

**DO NOT PRINT** at this stage.

### Task A6c

Print a 'handouts' copy of the presentation with **two** slides on each A4 sheet.

(1)

**(Total for Task A6 = 9 marks)**

## Task A7

Open a new word-processing document.

Enter **Task A7** and your name, candidate number and centre number in the footer.

**SAVE** the document as **TASK A7**.

Jayesh wants to include a hyperlink to the spreadsheet **TASK A3** on slide 6.

- (i) Insert a hyperlink to **TASK A3** at a suitable point on slide 6.

Display slide 6 with the hyperlink visible.

Take a screenshot of slide 6.

(2)

Paste the screenshot into document **TASK A7**.

**RESAVE TASK A7**.

**DO NOT PRINT** at this stage.

- (ii) Display the dialog box you used to set up the hyperlink.

Take a screenshot of the dialog box.

(2)

Paste the screenshot into document **TASK A7**.

**RESAVE TASK A7**.

**PRINT TASK A7** on **one** side of A4.

**(Total for Task A7 = 4 marks)**

---

**TOTAL FOR SECTION A = 50 MARKS**

## SECTION B – Hotel reservations

**You are advised to spend about 90 minutes on this section.**

Jayesh has collected information about the hotels and their customers.

He has saved the information in the database **RESTEASY**.

The **CUSTOMER** table contains details of customers from a region in England.

### Task B1

Open the **RESTEASY** database.

Open the **CUSTOMER** table.

The structure of the **CUSTOMER** table is:

Field name	Data type	Description
CUSTOMERID	Autonumber	Unique code for each customer
TITLE	Text	Title of customer (Mr or Ms or Dr)
FNAME	Text	First name of customer
LNAME	Text	Last name of customer
ADDR1	Text	First line of customer address
ADDR2	Text	Second line of customer address
EMAIL	Text	Email address of customer
MOBILE	Text	Mobile telephone number of customer
BIRTHDATE	Date/Time	Date of birth of customer (dd/mm/yyyy)

Open a new document using word-processing software.

Set the orientation to landscape.

Enter **Task B1** and your name, candidate number and centre number in the footer.

**SAVE** the word-processed document as **TASK B1**.

### Task B1a

Jayesh wants to add a new customer to the **CUSTOMER** table.

Add these details to the **CUSTOMER** table:

Customer ID	autonumber
Title	Mr
First name	Rachit
Last name	Aganwa
Line 1 of address	14 Hillhead Close
Line 2 of address	Whicham
Email	agarac@linktome.org.eu
Mobile phone number	07700 900584
Date of birth	3 August 1967

(2)

### Task B1b

Sort the **CUSTOMER** table into alphabetical order by **FNAME** within alphabetical order of **LNAME**.

(2)

**SAVE** the **CUSTOMER** table.

Paste a copy of the sorted **CUSTOMER** table into document **TASK B1**.

Make sure that all the data is displayed on one side of A4 and is easy to read.

**RESAVE TASK B1.**

**DO NOT PRINT** at this stage.

### Task B1c

In document **TASK B1**, explain why the **CUSTOMER** table stores the dates of birth of customers rather than their ages.

(2)

**RESAVE TASK B1.**

**PRINT TASK B1.**

**(Total for Task B1 = 6 marks)**

## Task B2

Open a new document using word-processing software.

Enter **Task B2** and your name, candidate number and centre number in the footer.

**SAVE** the word-processed document as **TASK B2**.

### Task B2a

Jayesh wants a list of customers who have **Dr** as a title.

He wants all fields displayed.

Create a query on the **CUSTOMER** table to find this information.

**SAVE** the query as **B2a**.

Display the results of the query.

(2)

Paste a copy of the results of your query into document **TASK B2**.

**RESAVE TASK B2**.

**DO NOT PRINT** at this stage.

### Task B2b

The **PLACE** table stores details of the hotels in the group.

Open the **PLACE** table.

Jayesh wants a list of hotels that are less than grade 5 and have 100 or more rooms.

The list should show only the fields **LOCATION, HNAME, ROOMS, GRADE, MANAGER** and **PHONE** in this order.

Create a query on the **PLACE** table to produce this list.

**SAVE** the query as **B2b**.

Display the results of the query.

(4)

Paste a copy of the results of your query into document **TASK B2**.

**RESAVE TASK B2**.

**PRINT TASK B2**.

**(Total for Task B2 = 6 marks)**

### Task B3

Open a new document using word-processing software.

Enter **Task B3** and your name, candidate number and centre number in the footer.

**SAVE** the word-processed document as **TASK B3**.

The database has linked tables.

The **CUSTOMER** table is linked to the **STAY** table.

The **PLACE** table is linked to the **STAY** table.

Display the relationships between the tables.

Make sure all the field names are displayed.

Take a screenshot of the relationships.

Paste the screenshot into document **TASK B3**.

**RESAVE TASK B3**.

**DO NOT PRINT** at this stage.

- (i) In the document **TASK B3**, identify the primary key in **one** of the relationships. (1)
- (ii) In the document **TASK B3**, explain why a one-to-many relationship is used between the **PLACE** and **STAY** tables. (2)
- (iii) In the document **TASK B3**, explain why it is preferable to split the information into separate tables rather than storing all the information in one table. (2)

**RESAVE TASK B3**.

**PRINT TASK B3**.

**(Total for Task B3 = 5 marks)**

## Task B4

Jayesh wants a list of customers who have stayed at hotels in Sri Lanka between 1 April 2016 and 30 April 2016.

The list should:

- show only the fields **FNAME, LNAME, HNAME** and **STAYDATE** in this order
- be sorted in ascending order of **STAYDATE** within ascending order of **HNAME**.

Create a query to find this information from the linked tables.

**SAVE** the query as **B4**.

Jayesh wants to produce a database report from the results of the query **B4**.

Create a database report to display the results.

The database report must:

- have a suitable title
- include the logo **SREH LOGO** you created in **Task A4a**
- show only the required fields
- show the records sorted as required.

Make sure the column headings are easy to understand.

Enter **Task B4** and your name, candidate number and centre number in the page footer.

Check that the layout and content of the report is fit for purpose.

Make sure that the database report fits onto **one** side of A4.

**SAVE** the database report as **TASK B4**.

**PRINT** the database report.

**(Total for Task B4 = 8 marks)**

## Task B5

Jayesh wants to send a letter to customers who stayed in one of the hotels on 30 May 2016.

A list of these customers is stored in the **MAY30** table in the **RESTEASY** database.

Jayesh has saved the content of the letter in the file **DRAFT**.

Open the document **DRAFT**.

The footer contains the contact details of the company.

Enter **Task B5** and your name, candidate number and centre number in the header.

**SAVE** the file as **TASK B5**.

## Task B5a

The letter needs to be edited before it is merged with the database.

Edit the document by:

- inserting the **SREH LOGO** you created in **Task A4a**
- inserting today's date in a suitable location
- including a suitable complimentary close
- inserting the name and role of the sender of the letter, making sure you leave enough space for the signature.

(4)

**RESAVE TASK B5.**

**DO NOT PRINT** at this stage.

### Task B5b

The customer details are stored in the **MAY30** table of the **RESTEASY** database.

Add appropriate merge fields to the letter, replacing the text in brackets with appropriate information from the database.

(3)

**RESAVE TASK B5.**

**PRINT TASK B5** on **one** side of A4, showing the **merge fields**.

#### Note

You may be using software that does not allow you to show the merge fields in a printout of a standard letter.

If so, you should produce a screenshot of the letter showing the merge fields.

Ensure that the screenshot shows all of the information, including the header and the footer.

Paste the screenshot into a new word-processed document.

**SAVE** the document as **TASK B5b**.

**PRINT TASK B5b.**

Ensure that all of the information can be read.

### Task B5c

Jayesh wants to check and sign the letters before they are posted.

(i) Produce the merged letters using **TASK B5** and the **MAY30** table.

Do not make any other changes to the letters.

(2)

**SAVE** the merged letters as **TASK B5c**.

(ii) **PRINT one** of the merged letters on **one** side of A4.

(1)

**(Total for Task B5 = 10 marks)**

## Task B6

Jayesh is preparing a report for the August meeting of the hotel management board.

He has saved notes for the report in files called **AUGMTG1**, **AUGMTG2** and **AUGMTG3**.

Open a new document using word-processing software.

Enter **Task B6** and your name, candidate number and centre number in the footer.

**SAVE** the word-processed document as **TASK B6**.

### Task B6a

Produce the report bringing together text and images.

(i) The report must include:

- the **SREH LOGO** that you created in **Task A4a**
- a suitable title
- the text from the notes in **AUGMTG1**, **AUGMTG2** and **AUGMTG3**.

(3)

**RESAVE TASK B6.**

**DO NOT PRINT** at this stage.

(ii) The report must also include:

- the total income and total revised income you calculated in **Task A2a** and **Task A2b**
- a recommendation about whether to introduce the discount.

Justify your recommendation.

(3)

**RESAVE TASK B6.**

**DO NOT PRINT** at this stage.

### Task B6b

Format the report so that:

- it fits on **one** side of A4
- is well organised and fit for purpose.

(4)

**RESAVE TASK B6.**

**PRINT TASK B6.**

**(Total for Task B6 = 10 marks)**

### Task B7

Open a new document using word-processing software.

Enter **Task B7** and your name, candidate number and centre number in the footer.

**SAVE** the word processed document as **TASK B7**.

#### Task B7a

In document **TASK B7**, identify one formatting technique you have used in this examination.

State where you used the technique and describe how it improved the document.
