Using this specification

This specification gives teachers guidance and encourages effective delivery of the qualification. The following information will help you get the most out of the content and guidance.

Compulsory content: as a minimum, all four key ideas (including all the detailed content) in each of the chosen topics must be taught.

Assessments: teachers should deliver the qualification using a good range of examples to support the assessment of the content.

Depth and breadth of content: teachers should use the full range of content and all the assessment objectives given in the subject content section.

Qualification aims and objectives

The aims and objectives of this qualification are to enable students to:

- develop knowledge and understanding of the history, culture, geography and economics of Pakistan, and engage with questions in relation to contemporary and historical issues within Pakistan
- develop the ability to construct well-argued, well-informed, balanced and structured written arguments, demonstrating their depth and breadth of understanding of Pakistan studies
- develop an understanding of the influence of factors previously and currently affecting individuals, communities and societies
- reflect on and develop their understanding of what they have learned and how this contributes to their preparation for adult life in a global community.
Why choose Edexcel qualifications?

**Pearson – the world’s largest education company**

Edexcel academic qualifications are from Pearson, the UK’s largest awarding organisation. With over 3.4 million students studying our academic and vocational qualifications worldwide, we offer internationally recognised qualifications to schools, colleges and employers globally.

Pearson is recognised as the world’s largest education company, allowing us to drive innovation and provide comprehensive support for Edexcel students in acquiring the knowledge and skills they need for progression in study, work and life.

**A heritage you can trust**

The background to Pearson becoming the UK’s largest awarding organisation began in 1836, when a royal charter gave the University of London its first powers to conduct exams and confer degrees on its students. With over 150 years of international education experience, Edexcel qualifications have a firm academic foundation, built on the traditions and rigour associated with Britain’s educational system.

To find out more about our Edexcel heritage please visit our website: qualifications.pearson.com/en/about-us/about-pearson/our-history

**Results you can trust**

Pearson’s leading online marking technology has been shown to produce exceptionally reliable results, demonstrating that at every stage, Edexcel qualifications maintain the highest standards.

**Developed to Pearson’s world-class qualifications standards**

Pearson’s world-class standards mean that all Edexcel qualifications are developed to be rigorous, demanding, inclusive and empowering. We work collaboratively with a panel of educational thought-leaders and assessment experts to ensure that Edexcel qualifications are globally relevant, represent world-class best practice and maintain a consistent standard.

For more information on the world-class qualification process and principles, please go to Appendix 2 or visit our website: uk.pearson.com/world-class-qualifications.
Why choose the Pearson Edexcel International GCSE in Pakistan Studies?

We have listened to feedback from all parts of the international subject community. Based on that feedback, we have made changes that will engage students and give them opportunities to gain skills that will support progression to further study and enhance their educational or employment prospects. This qualification enables students to explore the world, the challenges it faces and their own place in it, and to help prepare them to succeed in their chosen pathway.

The content and assessment approach for this qualification has been designed to meet students’ needs in the following ways.

**Two-paper assessment** – a two-paper model allows students to focus on the history and culture of Pakistan, as well as its geography and economy. The qualification will test knowledge and understanding, as well as analytical and evaluation skills.

**Flexible approach in teaching choice** – we have designed the qualification to enable students to study periods throughout the history of Pakistan. To ensure that students study the emergence of Pakistan (1927–1971) in depth, we have made the first topic compulsory. Then, to give centres greater flexibility to choose areas of study that they will enjoy teaching, there is a choice of topics in Sections B and C, allowing them to choose topics appropriate for their students.

**Clear and straightforward question papers** – our question papers are clear and accessible for students of all ability ranges and learning styles. Command words are used consistently to assess particular skills, making it clear the type of response required. Our mark schemes are explicit about the type of response and skills required, so that assessment requirements are straightforward.

**Broad and deep development of students’ skills** – the design of the revised International GCSE in Pakistan Studies aims to extend students’ knowledge and understanding by broadening and deepening skills, for example students will:

- develop knowledge, understanding, analysis and evaluation of the history, culture, geography and economics of Pakistan
- assess both historical and geographical concepts, giving them skills to interpret past events and explain change and the interrelationships between people, places, environments and processes
- understand the influence of factors previously and currently affecting individuals, communities and societies
- reflect on and develop their understanding of what they have learned, and contribute to preparation for adult life in a global community.

**Progression to A Level** – International GCSEs enable successful progression to A Level and beyond, particularly history, geography and other humanities subjects, as well as economics, business studies and politics. Through our world-class qualification development process, we have consulted teachers, university professors and subject experts to validate the appropriateness of this qualification for progression, including its content, opportunities for skills development and assessment structure.

Externally assessed

Content description

The paper has three sections of content.

Section A: The Physical Environment
Students will study topics related to the physical geography of Pakistan, including location, relief, geology, drainage, climate, erosion and associated resources and hazards. Along with the skill of evaluating the relative importance of different physical factors, influences, resources and hazards, students will gain knowledge and understanding of key physical features, processes, issues and management approaches.

Section B: The Human Environment
Students will study topics related to the human geography of Pakistan, including population distribution and growth, social diversity, economic inequality and economic activity (agriculture, manufacturing, services and infrastructure/transport). Students will further develop an ability to evaluate patterns and trends, and to assess the relative significance of their different causes and consequences. They will gain knowledge and understanding of a range of important demographic and socio-economic changes, issues and management approaches.

Section C: Challenges for Pakistan
Students will study contemporary geographical challenges for Pakistan. These include changes linked with globalisation, economic development and urbanisation. The threat posed by climate change is also explored in some detail. Students will evaluate the severity and significance of these different challenges, alongside the availability of different management approaches and attempts to mitigate risks. They will gain knowledge and understanding of the causes of the varied challenges and issues on which this section is focused.
Assessment information

- First assessment: June 2019.
- The assessment is 1 hour and 30 minutes.
- The assessment is out of 75 marks.
- The assessment consists of three sections.
- Students must answer all questions.
- Each question is worth 25 marks.
- The paper may include multiple-choice, short-open, data-response and extended-response questions.

Administration and general information

Entries

Details of how to enter students for the examinations for this qualification can be found in our International Information Manual. A copy is made available to all examinations officers and is available on our website.

Students should be advised that, if they take two qualifications in the same subject, colleges, universities and employers are very likely to take the view that they have achieved only one of the two GCSE/International GCSE qualifications. Students or their advisers who have any doubts about subject combinations should check with the institution to which they wish to progress before embarking on their programmes.

Access arrangements, reasonable adjustments, special consideration and malpractice

Equality and fairness are central to our work. Our Equality Policy requires all students to have equal opportunity to access our qualifications and assessments, and our qualifications to be awarded in a way that is fair to every student.

We are committed to making sure that:

- students with a protected characteristic (as defined by the UK Equality Act 2010) are not, when they are undertaking one of our qualifications, disadvantaged in comparison to students who do not share that characteristic
- all students achieve the recognition they deserve for undertaking a qualification and that this achievement can be compared fairly to the achievement of their peers.

Language of assessment

Assessment of this qualification will be available in English only. All student work must be in English.

We recommend that students are able to read and write in English at Level B2 of the Common European Framework of Reference for Languages.

Access arrangements

Access arrangements are agreed before an assessment. They allow students with special educational needs, disabilities or temporary injuries to:

- access the assessment
- show what they know and can do without changing the demands of the assessment.

The intention behind an access arrangement is to meet the particular needs of an individual student with a disability without affecting the integrity of the assessment. Access arrangements are the principal way in which awarding bodies comply with the duty under the Equality Act 2010 to make ‘reasonable adjustments’.

Access arrangements should always be processed at the start of the course. Students will then know what is available and have the access arrangement(s) in place for assessment.
Reasonable adjustments

The Equality Act 2010 requires an awarding organisation to make reasonable adjustments where a student with a disability would be at a substantial disadvantage in undertaking an assessment. The awarding organisation is required to take reasonable steps to overcome that disadvantage.

A reasonable adjustment for a particular student may be unique to that individual and therefore might not be in the list of available access arrangements.

Whether an adjustment will be considered reasonable will depend on a number of factors, including:
- the needs of the student with the disability
- the effectiveness of the adjustment
- the cost of the adjustment: and
- the likely impact of the adjustment on the student with the disability and other students.

An adjustment will not be approved if it involves unreasonable costs to the awarding organisation, timeframes or affects the security or integrity of the assessment. This is because the adjustment is not ‘reasonable’.

Special consideration

Special consideration is a post-examination adjustment to a student’s mark or grade to reflect temporary injury, illness or other indisposition at the time of the examination/assessment, which has had, or is reasonably likely to have had, a material effect on a candidate’s ability to take an assessment or demonstrate their level of attainment in an assessment.

Further information

Please see our website for further information about how to apply for access arrangements and special consideration.

For further information about access arrangements, reasonable adjustments and special consideration please refer to the JCQ website: www.jcq.org.uk.

Candidate malpractice

Candidate malpractice refers to any act by a candidate that compromises or seeks to compromise the process of assessment or which undermines the integrity of the qualifications or the validity of results/certificates.

Candidate malpractice in examinations must be reported to Pearson using a JCQ Form M1 (available at www.jcq.org.uk/exams-office/malpractice). The form can be emailed to pqsmalpractice@pearson.com or posted to: Investigations Team, Pearson, 190 High Holborn, London, WC1V 7BH. Please provide as much information and supporting documentation as possible. Note that the final decision regarding appropriate sanctions lies with Pearson.

Failure to report malpractice constitutes staff or centre malpractice.
Staff/centre malpractice

Staff and centre malpractice includes both deliberate malpractice and maladministration of our qualifications. As with candidate malpractice, staff and centre malpractice is any act that compromises or seeks to compromise the process of assessment or which undermines the integrity of the qualifications or the validity of results/certificates.

All cases of suspected staff malpractice and maladministration must be reported immediately, before any investigation is undertaken by the centre, to Pearson on a JCQ Form M2(a) (available at www.jcq.org.uk/exams-office/malpractice).

The form, supporting documentation and as much information as possible can be emailed to pqsmalpractice@pearson.com or posted to: Investigations Team, Pearson, 190 High Holborn, London, WC1V 7BH. Note that the final decision regarding appropriate sanctions lies with Pearson.

Failure to report malpractice itself constitutes malpractice.

More-detailed guidance on malpractice can be found in the latest version of the document JCQ General and vocational qualifications Suspected Malpractice in Examinations and Assessments, available at www.jcq.org.uk/exams-office/malpractice.

Awarding and reporting

The International GCSE qualification will be graded and certificated on a nine-grade scale from 9 to 1 using the total subject mark where 9 is the highest grade. Individual papers are not graded. The first certification opportunity for the Pearson Edexcel International GCSE in Pakistan Studies will be in August 2019. Students whose level of achievement is below the minimum judged by Pearson to be of sufficient standard to be recorded on a certificate will receive an unclassified U result.

Student recruitment and progression

Pearson follows the JCQ policy concerning recruitment to our qualifications in that:

• they must be available to anyone who is capable of reaching the required standard
• they must be free from barriers that restrict access and progression
• equal opportunities exist for all students.

Prior learning and other requirements

There are no prior learning or other requirements for this qualification.

Progression

Students can progress from this qualification to:

• AS, A Level and IAL qualifications in Geography, History and other humanities related subjects, Business Studies, Politics and Economics
• further study in other areas where an understanding of Pakistan studies is recognised
• further training or employment where Pakistan studies and knowledge are required.

Appendix 2: Pearson World-Class Qualification design principles

Pearson’s World Class Qualification design principles mean that all Edexcel qualifications are developed to be **rigorous, demanding, inclusive and empowering**.

We work collaboratively to gain approval from an external panel of educational thought-leaders and assessment experts from across the globe. This is to ensure that Edexcel qualifications are globally relevant, represent world-class best practice in qualification and assessment design, maintain a consistent standard and support learner progression in today’s fast-changing world.

Pearson’s Expert Panel for World-Class Qualifications is chaired by Sir Michael Barber, a leading authority on education systems and reform. He is joined by a wide range of key influencers with expertise in education and employability.

“I’m excited to be in a position to work with the global leaders in curriculum and assessment to take a fresh look at what young people need to know and be able to do in the 21st century, and to consider how we can give them the opportunity to access that sort of education.” Sir Michael Barber.
Endorsement from Pearson’s Expert Panel for World Class Qualifications for the International GCSE development process

December 2015

“We were chosen, either because of our expertise in the UK education system, or because of our experience in reforming qualifications in other systems around the world as diverse as Singapore, Hong Kong, Australia and a number of countries across Europe.

We have guided Pearson through what we judge to be a rigorous world class qualification development process that has included, where appropriate:

- extensive international comparability of subject content against the highest-performing jurisdictions in the world
- benchmarking assessments against UK and overseas providers to ensure that they are at the right level of demand
- establishing External Subject Advisory Groups, drawing on independent subject-specific expertise to challenge and validate our qualifications.

Importantly, we have worked to ensure that the content and learning is future oriented, and that the design has been guided by Pearson’s Efficacy Framework. This is a structured, evidenced process which means that learner outcomes have been at the heart of this development throughout.

We understand that ultimately it is excellent teaching that is the key factor to a learner’s success in education but as a result of our work as a panel we are confident that we have supported the development of Edexcel International GCSE qualifications that are outstanding for their coherence, thoroughness and attention to detail and can be regarded as representing world-class best practice.”

Appendix 3: Transferable skills

The need for transferable skills

In recent years, higher-education institutions and employers have consistently flagged the need for students to develop a range of transferable skills to enable them to respond with confidence to the demands of undergraduate study and the world of work.

The Organisation for Economic Co-operation and Development (OECD) defines skills, or competencies, as ‘the bundle of knowledge, attributes and capacities that can be learned and that enable individuals to successfully and consistently perform an activity or task and can be built upon and extended through learning.’[1]

To support the design of our qualifications, the Pearson Research Team selected and evaluated seven global 21st-century skills frameworks. Following on from this process, we identified the National Research Council’s (NRC) framework [2] as the most evidence-based and robust skills framework, and have used this as a basis for our adapted skills framework.

The framework includes cognitive, intrapersonal skills and interpersonal skills.

The skills have been interpreted for this specification to ensure they are appropriate for the subject. All of the skills listed are evident or accessible in the teaching, learning and/or assessment of the qualification. Some skills are directly assessed. Pearson materials will support you in identifying these skills and developing these skills in students.

The table overleaf sets out the framework and gives an indication of the skills that can be found in the Pearson Edexcel International GCSE in Pakistan Studies and indicates the interpretation of the skill in this area. A full subject interpretation of each skill, with mapping to show opportunities for student development is given on the subject pages of our website: qualifications.pearson.com
