

Free teacher support materials notice

We are working hard to develop free teacher support materials for our new International GCSE Sinhala (9-1) specification.

We are working on a Getting Started Guide, which will identify areas of change in the new qualification, as well as providing support on the new content and assessment.

We will also be publishing a Course Planner and Scheme of Work, which will be editable and will provide support on planning for the new course.

We will upload these documents to the website as soon as they become available.
