#### **El peso de la presión social**

Entre la gente joven, la mayoría pertenece a grupos fijos en el colegio donde la presión social influye en la personalidad de una forma positiva o negativa. A veces lleva al individuo a sentirse incómodo consigo mismo y quizás, emprender actos o plantearse ideas que no había considerado antes.

Las actitudes de los adolescentes dependen de su aprendizaje y el entorno en el que han vivido. Por eso suelen ceder fácilmente a la presión aquellos jóvenes cuyos padres les han inculcado reglas rígidas, generando inseguridad, baja autoestima y rebeldía.

Limitar el consumo de proteína animal contribuye a atenuar el riesgo de enfermedades cardiovasculares, diabetes u obesidad. Con «Lunes Verdes» promovemos una mayor presencia de proteína vegetal, algo clave en la relación entre alimentación y salud».

#### El reciclaje de botellas en Ecuador

Los desechos plásticos son considerados los principales contaminantes del ambiente, pero los de vidrio no se quedan atrás. El reciclaje de botellas de vidrio presenta obstáculos: no son fáciles de transportar y no es rentable reciclar este tipo de botella. Para fabricarlas se necesita más energía y son desechadas después de un solo uso.

Existen varios tipos de plástico: reciclable y no reciclable. Las botellas de plástico que no se pueden reciclar van a la basura. Las reciclables reingresan al sistema, pero son utilizadas para crear productos de menor calidad.
