The Shetland Islands are part of Scotland. Shetland College is the only Further Education college located in the Shetland Islands. It was privatised in August 2021. The managers at the college claim privatisation will improve educational and training opportunities on the Shetland Islands.

Critics claim it could negatively impact staff contracts and working conditions. It may reduce the number of courses available to students and allow managers at the college to award themselves much higher levels of pay.

Wind power became Spain's main energy source in 2021. Renewable energy sources such as wind and solar contributed to almost 47% of the country's energy, compared to 30% in 2011. This has helped to reduce Spain's use of fossil fuels.

"Wind power is going to dominate the Spanish electricity supply for a long time. Spain has it all: we have more wind and more sun than practically any other European country," says Francisco Valverde, an energy consultant.

The Spanish Government is giving €6.9bn in subsidies for renewable energy between 2022 and 2023. These subsidies will help create over 280,000 jobs in the Spanish economy. Over 60% of solar and 90% of wind energy equipment is manufactured in Spain.
