

Mark Scheme (Results)

November 2024

Pearson Edexcel International GCSE
In Geography (4GE1)
Paper 02 Human Geography

Edexcel and BTEC Qualifications

Edexcel and BTEC qualifications are awarded by Pearson, the UK's largest awarding body. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information visit our qualifications websites at www.edexcel.com or www.btec.co.uk. Alternatively, you can get in touch with us using the details on our contact us page at www.edexcel.com/contactus.

Pearson: helping people progress, everywhere

Pearson aspires to be the world's leading learning company. Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. Find out more about how we can help you and your students at: www.pearson.com/uk

General Marking Guidance

- All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.
- Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.
- There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.
- All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.
- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.
- When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the team leader must be consulted.
- Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.

Marking guidance for levels-based mark schemes

How to award marks

The indicative content provides examples of how students will meet each skill assessed in the question. The levels descriptors and indicative content reflect the relative weighting of each skill within each mark band.

Finding the right level

The first stage is to decide which level the answer should be placed in. To do this, use a 'best-fit' approach, deciding which level most closely describes the quality of the answer. Answers can display characteristics from more than one level, and where this happens, markers must use the guidance below and their professional judgement to decide which level is most appropriate.

Placing a mark within a level

After a level has been decided on, the next stage is to decide on the mark within the level. The instructions below tell you how to reward responses within a level. However, where a level has specific guidance about how to place an answer within a level, always follow that guidance. Statements relating to the treatment of students who do not fully meet the requirements of the question are also shown in the indicative content section of each levels-based mark scheme. These statements should be considered alongside the levels descriptors.

Markers should be prepared to use the full range of marks available in a level and not restrict marks to the middle. Markers should start at the middle of the level (or the upper-middle mark if there is an even number of marks) and then move the mark up or down to find the best mark. To do this, they should take into account how far the answer meets the requirements of the level:

- if it meets the requirements fully, markers should be prepared to award full marks within the level. The top mark in the level is used for answers that are as good as can realistically be expected within that level
- if it only barely meets the requirements of the level, markers should consider awarding marks at the bottom of the level. The bottom mark in the level is used for answers that are the weakest that can be expected within that level
- the middle marks of the level are used for answers that have a reasonable match to the descriptor. This might represent a balance between some characteristics of the level that are fully met and others that are only barely met.

Question number	Answer	Mark
1(a)(i)	AO1 (1 mark) D wind (1) It cannot be A, B or C as these are not renewable energy sources.	(1)

Question number	Answer	Mark
1(a)(ii)	AO1 (1 mark) Award 1 mark for a suitable advantage: <ul style="list-style-type: none"> • reduced carbon emissions (1) • infinite supply of energy (1) • can support energy security (1) Accept any other appropriate response.	(1)

Question number	Answer	Mark
1(b)	AO1 (1 mark) B groundwater pollution The answer cannot be A, C or D as these are not disadvantages of using shale gas as an energy source.	(1)

Question number	Answer	Mark
1(c)	AO2 (1 mark) / AO3 (1 mark) Award 1 mark for basic evidence from the from the figure (AO3) and a further 1 mark for extension through explanation (AO2), up to a maximum of 2 marks. <ul style="list-style-type: none"> • The factory could filter the emissions (1) to try and not create air pollution for the residential area (1). • Reduce carbon emissions (1) by switching to renewable energy (1). • To reduce air pollution (1) could use more efficient technology (1) Accept any other appropriate response.	(2)

Question number	Answer	Mark
1(d)	<p style="text-align: center;">AO1 (1 mark)</p> <p>Award 1 mark for a suitable factor.</p> <ul style="list-style-type: none"> • Increased technology (1) • Industrialisation (1) • Urbanisation (1) • Increased living standards (1) • Increased population (1) <p>Accept any other reasonable response.</p>	(1)

Question number	Answer	Mark
1(e)	<p style="text-align: center;">AO2 (2+2)</p> <p>Award 1 mark for a human factor and 1 mark for a physical factor and a further expansion mark, up to a maximum of 2 marks each. Maximum 2 marks for either factor.</p> <p>Human:</p> <ul style="list-style-type: none"> • Labour supply (1) needed to farm the land/harvest crops (1). • Proximity to schools/universities (1) needed for training on different agricultural processes (1). • Transport connections/accessibility (1) to ensure fast routes to market for products (1). <p>Physical:</p> <ul style="list-style-type: none"> • Areas with flat land (1) are more suitable for growing crops (1). • Areas close to water supply (1) to support irrigation. • Availability of raw materials (1) such as coal deposits for mining (1). • Climate (1) as crops need different temperatures/levels of rainfall to grow (1). • Fertility of the soil (1) required to support growth of crops (1). <p>Accept any other appropriate response.</p>	(4)

Question number	Answer	Mark
1(f)	<p style="text-align: center;">A01 (1 mark) / (A03) 2 marks</p> <p>Award 1 mark for a point related to the distribution shown, and a further 2 marks for extension through use of the resource, up to a maximum of 3 marks.</p> <ul style="list-style-type: none"> • Higher percentage in Central and Southern Africa (1) due to informal employment having a more prominent role in this region more generally (1) to provide household income (1). • There are high levels of informal employment for countries with low GDP (1) which could mean women have been unable to access sufficient education (1) so unable to access jobs in the informal sector (1). • There is no clear correlation between GDP and female informal employment (1) this could be due to informal employment being an important part of most economies globally (1) . • High percentage of informal work in Central and Southern Africa (1) as women are an important part of the workforce (1) as they need to provide for their families. <p>Accept any other appropriate response.</p>	(3)

Question number	Answer	Mark
1(g)	<p style="text-align: center;">A02 (2+2 marks)</p> <p>Award 1 mark for each initial idea, and a further expansion mark, up to a maximum of 2 marks each.</p> <ul style="list-style-type: none"> • Malthus was pessimistic about population and resources (1) he thought that increased food supply could only increase arithmetically (1). • Malthus suggested population growth is exponential (1) can lead to exponential growth if unchecked (1). • Malthus believed that population would exceed resources (1) until some sort of major event/point of crisis which would bring the population down (1). Can reach a point of crisis (1) due to population growing faster than resources (1). • Population growth faster than the increase in food supply (1) leading to not enough food to feed the population (1). <p>Accept any other appropriate response.</p>	(4)

Question number	Indicative content
1 (h)	<p style="text-align: center;">AO3 (4 marks)/AO4 (4 marks)</p> <p>Marking instructions Markers must apply the descriptors in line with the general marking guidance and the qualities outlined in the levels-based mark scheme below.</p> <p>Indicative content guidance The indicative content below is not prescriptive and candidates are not required to include all of it. Other relevant material not suggested below must also be credited. Relevant points may include:</p> <p>AO3</p> <ul style="list-style-type: none"> • Typically the employment structure of an economy will change as it developed, according to the Clark-Fisher model. • The Clark-Fisher model suggests that: <ul style="list-style-type: none"> ○ Pre-industrial economies will have high primary sector activity. ○ Industrial economies will have rising secondary and tertiary sector activities. ○ Post-industrial economies will have a high proportion of tertiary sector, and rising quaternary sector industries. • It is suggested that as a country develops the countries move from one stage to another, although the speed at which they do so and particular mix will be specific to each country. • There are also factors around the types of raw materials, agricultural land available that can affect the level of primary industry. There are issues around energy/labour supply that can affect the development of secondary industry. Availability of education and training can also affect the development of the tertiary/quaternary sector industries. • Some countries may not necessarily develop in the pattern suggested by the Clark-Fisher model. For example, if a developing/emerging country economy has a government that heavily invests in the tourism industry rather than manufacturing then there would be a significant rise in tertiary sector rather than secondary. <p>AO4</p> <ul style="list-style-type: none"> • Figure 1c shows how the selected countries have different employment structures. • Figure 1c shows that developing countries such as Burundi can have a high primary sector, and low tertiary sector. • Figure 1c shows how developed countries like Canada can have low proportion of primary sector, relatively low secondary sector and high proportion of tertiary/quaternary sector employment. • Figure 1c shows that the range in sector employment does vary between developing/emerging economies with Liberia and Nigeria having significantly different structures to Burundi.

Level	Mark	Descriptor
	0	No rewardable material.
Level 1	1–3	<ul style="list-style-type: none"> Attempts to apply understanding to deconstruct information but understanding and connections are flawed. An unbalanced or incomplete argument that provides limited synthesis of understanding. Judgements that are supported by limited evidence. (AO3) Uses some geographical skills to obtain information with limited relevance and accuracy, which supports few aspects of the argument. (AO4)
Level 2	4–6	<ul style="list-style-type: none"> Applies understanding to deconstruct information and provide some logical connections between concepts. An imbalanced argument that synthesises mostly relevant understanding, but not entirely coherently, leading to judgements that are supported by evidence occasionally. (AO3) Uses geographical skills to obtain accurate information that supports some aspects of the argument. (AO4)
Level 3	7–8	<ul style="list-style-type: none"> Applies understanding to deconstruct information and provide logical connections between concepts throughout. A balanced, well-developed argument that synthesises relevant understanding coherently leading to judgements that are supported by evidence throughout. (AO3) Uses geographical skills to obtain accurate information that supports all aspects of the argument. (AO4)

Question number	Answer	Mark
2(a)(i)	<p style="text-align: center;">AO1 (1 mark)</p> <p>A high inputs (1)</p> <p>The answer cannot be B, C or D as these are not characteristic of intensive farming.</p>	(1)

Question number	Answer	Mark
2(a)(ii)	<p style="text-align: center;">AO1 (1 mark)</p> <p>Award 1 mark for suitable benefit.</p> <ul style="list-style-type: none"> • Higher yields/more predictable yields (1) • More resistant to pests/disease (1) • More resilient to changes in climate (1). • Can be modified to have higher nutritional content (1) <p>Accept any other appropriate responses.</p>	(1)

Question number	Answer	Mark
2(b)	<p style="text-align: center;">AO1 (1 mark)</p> <p>C opening a farm shop (1)</p> <p>The answer cannot be A, B or D as they are not farm diversification activities.</p>	(1)

Question number	Answer	Mark
2(c)	<p style="text-align: center;">AO2 (1 mark) / AO3 (1 mark)</p> <p>Award 1 mark for initial characteristics (AO2) and a further 1 mark for extension for description linked to the resource (AO3), up to a maximum of 2 marks.</p> <ul style="list-style-type: none"> • Vast areas of open land (1) which can be used for different types of farming (1). • Sparse population (1) with only a few buildings presents (1). • Relatively remote (1) with limited buildings/transport routes (1). • Dominated by agricultural activity (1) which has altered the landscape through creation of fields (1). <p>Accept any other appropriate response.</p>	(2)

Question number	Answer	Mark
2(d)	<p style="text-align: center;">AO1 (1 mark)</p> <p>Award 1 mark for a suitable strategy.</p> <ul style="list-style-type: none"> • Install new/more efficient irrigation systems (1). • Store rainwater (1). • Reduce water usage at the household/farm level (1). • Reuse wastewater (1). <p>Accept any other appropriate response.</p>	(1)

Question number	Answer	Mark
2(e)	<p style="text-align: center;">AO2 (2+2 marks)</p> <p>Award 1 mark for identification each initial idea of how tourism can have a negative impact on rural areas, and a further expansion mark, up to a maximum of 2 marks each.</p> <ul style="list-style-type: none"> • Traffic congestion (1) as many tourists will travel by private vehicles/come in large numbers on coaches (1). • Damage to habitats (1) as tourists may walk through areas used by animals as homes (1). • Visual pollution (1) as tourists may leave litter (1). • Can push property prices for local residents to be higher (1) as properties are used for tourist accommodation (1). • Damage natural beauty (1) as new buildings services are built to accommodate their needs (1). <p>Do not credit pollution without type of pollution provided or what is being polluted (e.g. lake/river)</p> <p>Accept any other appropriate response.</p>	(4)

Question number	Answer	Mark
2(f)	<p style="text-align: center;">AO1 (1 mark) / (AO3) 2 marks</p> <p>Award 1 mark for an initial idea and a further 2 marks for extension through explanation or description with reference to the resource, up to a maximum of 3 marks.</p> <ul style="list-style-type: none"> • The level of rainfall will affect the type of plants that can grow (1) as some biomes like tropical rainforest need high levels of rainfall as part of their ecosystem (1) ranging from around 230mm to over 400mm (1). • Most plant species will have an optimum growing temperature (1) those that require low temperatures for example such as tundra (1) which typically can be found just above 0°C down to nearly -10°C (1). • Warm temperatures/high rainfall can support tropical rainforest (1) above 20°C/2500mm (1) leading to high biodiversity (1). • Tropical rainforests have high rainfall (1) supporting a variety of wildlife (1). This compares to deserts which can be too dry for a lot of wildlife (1). <p>Accept any other appropriate response.</p>	(3)

Question number	Answer	Mark
2(g)	<p style="text-align: center;">AO2 (4 marks)</p> <p>Award 1 mark for an initial point about a way natural ecosystems provide goods, and an additional 1 mark for development through further explanation or exemplification, up to a maximum of 2 marks for each.</p> <ul style="list-style-type: none"> • Natural ecosystems can provide raw materials like timber (1) which can be used in manufacturing/construction (1). • Natural ecosystems can provide food (1) such as fish from oceans (1). • Ecosystems such as rainforests are known to have a wide range of plants that have healing qualities (1) which can be used to produce medicines/help develop new medicines (1). • Ecosystems provide fresh water (1) that can be used for drinking/irrigation/industry (1). <p>Accept any other appropriate response.</p>	(4)

Question number	Indicative content
2 (h)	<p style="text-align: center;">AO3 (4 marks)/AO4 (4 marks)</p> <p>Marking instructions Markers must apply the descriptors in line with the general marking guidance and the qualities outlined in the levels-based mark scheme below.</p> <p>Indicative content guidance The indicative content below is not prescriptive and candidates are not required to include all of it. Other relevant material not suggested below must also be credited. Relevant points may include:</p> <p>AO3</p> <ul style="list-style-type: none"> • The negative multiplier effect is a process of downward decline in an area. In a rural environment this can be prompted by a decline in employment, which leads to greater rural-urban migration, which leads to less investment in rural areas due to lower populations which exacerbates the decline of the area. • In many developed countries rural populations can tend to have a higher proportion of older age groups as younger people tend to move away to urban areas for education and work opportunities. Older age groups tend to sometimes move back to more rural areas when they can afford larger properties or want a more rural environment (with less air pollution etc). • The population structure is largely affected by the need for jobs which explains why there tends to be lower proportions of 18-40 age groups. • The negative multiplier effect can lead to this being more pronounced as more people are likely to move away, and others may not move into the area if it has experienced significant decline or lacks sufficient services/amenities associated with a high quality of life. <p>AO4</p> <ul style="list-style-type: none"> • Figure 2c shows the how the population structure for the rural area in the UK is dominated by largely older age groups. • Figure 2c shows how there tends to be a slightly larger proportion of older females than males, particularly age 85 and above. • Figure 2c shows how there are generally very low levels of young people living in the area, although there is a slightly larger proportion of age 10-14 males. • Figure 2 shows there is relatively low levels of aged 9 and under living in the area.

Question number	Answer	Mark
3(a) (i)	<p style="text-align: center;">AO1 (1 mark)</p> <p>A - counter-urbanisation (1)</p> <p>The answer cannot be B, C or D as these do not slow down the rate of counter-urbanisation.</p>	(1)

Question number	Answer	Mark
3(a)(ii)	<p style="text-align: center;">AO1 (1 mark)</p> <p>Award 1 mark for a suitable cause:</p> <ul style="list-style-type: none"> • Rural-urban migration (1) • Job opportunities (1) • Natural increase (1) • Perceived improved quality of life (1) • Potential for better access to health/education services (1) • Better access to clean water/sanitation/electricity supplies (1) <p>Accept any other appropriate response.</p>	(1)

Question number	Answer	Mark
3(b)	<p style="text-align: center;">AO1 (1 mark)</p> <p>C Southeast Asia (1)</p> <p>The answer cannot be A, B or D as these regions of the world did not have the highest rate of urbanisation during the 2020s.</p>	(1)

Question number	Answer	Mark
3(c)	<p style="text-align: center;">AO2 (1 mark) / AO3 (1 mark)</p> <p>Award 1 mark for suitable reason (AO2) and a further 1 mark for extension using evidence from the resource (AO3), up to a maximum of 2 marks.</p> <ul style="list-style-type: none"> • Congestion (1) as high usage levels of private transports can cause delays in moving around the city (1). • High volumes of traffic (1) can contribute to air pollution/decreased air quality (1). • Creates air pollution (1) due to high volumes of traffic (1). <p>Accept any other appropriate response.</p>	(2)

Question number	Answer	Mark
3(d)	<p style="text-align: center;">AO1 (1 mark)</p> <p>Award 1 mark for a suitable food related challenge:</p> <ul style="list-style-type: none"> • Food deserts (1) • Poor access to nutritious food (1) • High cost of food (1) • Excess of fast-food restaurants (1) • Cost of living crisis (1) • Malnutrition (1) <p>Accept any other appropriate response.</p>	(1)

Question number	Answer	Mark
3(e)	<p style="text-align: center;">AO2 (2+2 marks)</p> <p>Award 1 mark for each advantage, with a further mark for expansion mark, up to a maximum of 2 marks each.</p> <ul style="list-style-type: none"> • Usually on the edge of cities with large amounts of land available (1) so there is the potential to expand in the future (1). • Sites can usually be more attractive/be surrounded by scenic beauty (1) which may help attract/retain skilled workers (1). • Potentially lower land values/cheaper in than in the city centre (1) because there is no need to clear away old buildings/infrastructure (1). <p>Accept any other appropriate response.</p>	(4)

Question number	Answer	Mark
3(f)	<p style="text-align: center;">A01 (1 mark) / (A03) 2 marks</p> <p>Award 1 mark for an identification of a change shown and a further 2 marks for extension through explanation or description, up to a maximum of 3 marks.</p> <ul style="list-style-type: none"> • There will be a significant increase in the recycling of waste (1) which means that less needs to go to landfill (1) which means reduced environmental impact (1). • Increase in recycling (1) from about 24% to 55% (1) which can lead to less litter around the city (1). • There will be a greater focus on prevention of waste (1) which will mean greater efforts to reduce/reuse/recycle (1) which can reduce individual carbon footprints (1). • A significant reduction in the amount of waste going to landfill (1) which lead to less greenhouse gas emissions (1) or risk of land contamination (1). • Increase in recycling (1) leads to less air pollution (1) as less waste reaches landfill/is burnt (1). <p>Accept any other appropriate response.</p>	(3)

Question number	Answer	Mark
3(g)	<p style="text-align: center;">A02 (4 marks)</p> <p>Award 1 mark for initial explanation and an additional 1 mark for development through further explanation or exemplification. Maximum of 2 marks when no named developed.</p> <ul style="list-style-type: none"> • Planners: <ul style="list-style-type: none"> ○ Can ensure new developments have sufficient green spaces (1) to ensure those in high rise housing have access to green spaces for leisure/wellbeing (1). ○ Can include plans for sufficient services such as health and education (1) so residents do not have to travel long distances and incur high costs for doing so (1). ○ Can identify community issues (1) to target projects such as increased affordable housing (1). • Property developers: <ul style="list-style-type: none"> ○ Can include options for affordable housing (1) to ensure that people are not excluded from areas (1). ○ Can include renewable energy options in properties (1) to reduce household energy costs (1). <p>Accept any other appropriate response.</p>	(4)

Question number	Indicative content	
3 (h)	<p style="text-align: center;">A03 (4 marks)/A04 (4 marks)</p> <p>Marking instructions Markers must apply the descriptors in line with the general marking guidance and the qualities outlined in the levels-based mark scheme below.</p> <p>Indicative content guidance The indicative content below is not prescriptive and candidates are not required to include all of it. Other relevant material not suggested below must also be credited. Relevant points may include:</p> <p>A03</p> <ul style="list-style-type: none"> • Land use changes across a city in part due to land values and therefore who can access the land as well as the purpose of the area of the city. • Typically land values are very high in the CBD and in areas where there is a need for commercial organisations. Such high land values tend to mean there are fewer residential properties. • Typically closer to the city centre will be a greater proportion of flats to accommodate higher volumes of people, and also because property prices are higher they tend to be smaller. • Proximity to the CBD is often a key factor in determining land use. Often the areas furthest from the CBD have a greater proportion of residential land use. <p>A04</p> <ul style="list-style-type: none"> • Figure 3c shows land use changes significantly as you move away from the central business district. • Figure 3c shows how the commercial land value is high in the centre of the city but also in some high points in residential areas, but generally declines in value as you move away from the CBD. • Figure 3c shows multifamily residential properties have high land use values closer to the CBD and lower away from the CBD.
