INSTRUCTIONS

Answer ALL questions.

Without sufficient working, correct answers may be awarded no marks.

Answer the questions in the spaces provided in this Question Paper or on the separate diagrams – there may be more space than you need.

CALCULATORS MAY BE USED.

You must NOT write anything on the Formulae Pages. Anything you write on the Formulae Pages will gain NO credit.

INFORMATION

The total mark for this paper is 100

The marks for EACH question are shown in brackets – use this as a guide as to how much time to spend on each question.

There may be spare copies of some diagrams in case you need them.

ADVICE

Read each question carefully before you start to answer it.

Check your answers if you have time at the end.

Turn over

5

Answer ALL TWENTY FOUR questions.

Write your answers in the spaces provided.

You must write down all the stages in your working.

1. Below are six integers where

$$w < x < y < z$$

w x y z z z

The mode of the integers is 9

The median of the integers is 8

The range of the integers is 4

Work out the value of **w**, the value of **x**, the value of **y** and the value of **z**

5. Look at the diagram for Question 5 in the Diagram Booklet.

It is NOT accurately drawn.

It shows an 8-sided shape

ABCDEFGH

HG = 28 cm

AH = FG = 12 cm

AB = EF = 5 cm

The height of the shape is **20 cm**

CD is parallel to **HG**

AH is parallel to **FG**

All the marked angles are right angles.
