Basic Rigging
Annotated Instructor’s Guide

Module Overview

This module introduces the uses of slings and common rigging hardware. Trainees will learn basic inspection techniques, hitch configurations, and load-handling safety practices, as well as how to use American Society of Mechanical Engineers hand signals.

Objectives

Upon completion of this module, the trainee will be able to do the following:

1. Identify and describe the use of slings and common rigging hardware.
2. Describe basic inspection techniques and rejection criteria used for slings and hardware.
3. Describe basic hitch configurations and their proper connections.
4. Describe basic load-handling safety practices.
5. Demonstrate proper use of American Society of Mechanical Engineers (ASME) hand signals.

Performance Tasks

Under the supervision of the instructor, the trainee should be able to do the following:

1. Select and inspect appropriate slings for a lift.
2. Given various loads, determine the proper hitch to be used.
3. Select and inspect appropriate hardware and/or lifting equipment.
4. Demonstrate and/or simulate the proper techniques for connecting hitches.
5. Demonstrate the proper use of all hand signals according to ASME B30.2 and B30.5.
6. Describe or demonstrate pre-lift safety checks.
7. Demonstrate and/or simulate how to lift the load level.
8. Describe and/or demonstrate safety precautions for attaching and disconnecting a load.

Materials and Equipment

- Multimedia projector and screen
- Basic Rigger / Intermediate Rigger / Advanced Rigger
  - PowerPoint® Presentation Slides
- Computer
- Whiteboard/chalkboard
- Markers/chalk
- Pencils and scratch paper
- Copies of your local code
- Anchor shackles and chain shackles
- Various types of pins, including:
  - Screw pin shackle
  - Round pin or straight pin shackle
  - Safety shackle
- Damaged shackles and pins
- Damaged and undamaged eyebolts
- Undamaged lifting clamps
- Rusty or corroded lifting clamps
- Damaged and undamaged rigging hooks
- Damaged slings or photos of damaged slings
- Trade Terms Quiz*
- Module Examinations**
- Performance Profile Sheets**

* Located at the back of the Trainee Guide module
** Single-module AIG purchases include the printed exam and performance task sheet. If you have purchased the perfect-bound version of this title, download these materials from the IRC using your access code.
Safety Considerations

Ensure that the trainees are equipped with appropriate personal protective equipment. Always work in a clean, well-lit, and appropriate work area.

Note

Due to liability issues, trainees under the age of 18 should not perform hoisting maneuvers; therefore, trainees under 18 should not perform the demonstration aspect of Performance Task numbers 4, 7, and 8. The instructor may choose to have trainees simulate the concepts underlying the tasks by using alternative methods.

If you do not have access to rigging hardware or equipment, there are many resources available to you including local contractors, rigging equipment manufacturers, or even your local Training Program.

Additional Resources

This module presents thorough resources for task training. The following resource material is suggested for further study.

Teaching Time for this Module

An outline for use in developing your lesson plan is presented below. Note that each Roman numeral in the outline equates to one session of instruction. Each session has a suggested time period of 2½ hours. This includes 10 minutes at the beginning of each session for administrative tasks and one 10-minute break during the session. Approximately 15 hours are suggested to cover Basic Rigging. You will need to adjust the time required for hands-on activity and testing based on your class size and resources. Because laboratories often correspond to Performance Tasks, the proficiency of the trainees may be noted during these exercises for Performance Testing purposes.

Session III. Rigging Hardware
   A. Shackles
   B. Eyebolts
   C. Lifting Clamps
   D. Rigging Hooks
   E. Laboratory
      Have trainees practice selecting and inspecting appropriate hardware and/or
      lifting equipment. This laboratory corresponds to Performance Task 3.

Session IV. Sling Stress and Hoists
   A. Sling Stress
   B. Operation of Chain Hoists
   C. Hoist Safety and Maintenance

Session V. Rigging Operations and Practices
   A. Rated Capacity
   B. Sling Attachment
   C. Hardware Attachment
   D. Load Control
   E. Laboratory
      Have trainees practice demonstrating proper use of all hand signals and
      completing pre-lift safety checks. These laboratories correspond to
      Performance Tasks 5 and 6.

Session VI. Review and Testing
   A. Review
   B. Module Examination
      1. Trainees must score 70 percent or higher to receive recognition from the
         NCCER.
      2. Record the testing results on Training Report Form 200, and submit the results
         to the Training Program Sponsor.
   C. Performance Testing
      1. Trainees must perform each task to the satisfaction of the instructor to receive
         recognition from NCCER. If applicable, proficiency noted during laboratory
         exercises can be used to satisfy the Performance Testing requirements.
      2. Record the testing results on Training Report Form 200, and submit the results
         to the Training Program Sponsor.
Module Overview

This module covers how to inspect and use common rigging hardware, slings, and tag lines. It also explains how to select, inspect, use, and maintain special rigging equipment, including block and tackle, chain hoists, ratchet-lever hoists, jacks, and base-mounted drum hoists (tuggers).

Prerequisites

Prior to training with this module, it is recommended that the trainee shall have successfully completed Basic Rigger, Module 00106-09.

Objectives

Upon completion of this module, the trainee will be able to do the following:

1. Identify and describe the uses of common rigging hardware and equipment.
2. Perform a safety inspection on hooks, slings, and other rigging equipment.
3. Describe common slings and determine sling capacities and angles.
4. Select, inspect, use, and maintain special rigging equipment, including:
   • Block and tackle (bull rigging)
   • Chain hoists
   • Ratchet-lever hoists
   • Jacks
   • Base-mounted drum hoists (tuggers)
5. Inspect heavy rigging hardware.
6. Tie knots used in rigging.

Performance Tasks

Under the supervision of the instructor, the trainee should be able to do the following:

1. Perform a safety inspection on hooks, slings, and other rigging equipment.
2. Select, inspect, and use special rigging equipment, including:
   • Block and tackle (bull rigging)
   • Chain hoists
   • Ratchet-lever hoists
   • Jacks
   • Base-mounted drum hoists (tuggers)
3. Tie knots in rigging.

Sample loads for lifting
Spur-gear chain hoist
Electric chain hoist
Ratchet-lever hoist or come-along
Ratchet jack

Screw jack
Hydraulic jack
Base-mounted drum hoists (tuggers)
Module Examinations*
Performance Profile Sheets*

* Single-module AIG purchases include the printed exam and performance task sheet. If you have purchased the perfect-bound version of this title, download these materials from the IRC using your access code.

Safety Considerations

Ensure that the trainees are equipped with appropriate personal protective equipment and know how to use it properly. This module requires trainees to use various types of hoists, jacks, and base-mounted drum hoists. Ensure that all trainees are briefed on lifting safely and any other shop safety procedures. This module may require that the trainees visit job sites. Ensure that trainees are briefed on site safety policies prior to any site visits.

Additional Resources

This module presents thorough resources for task training. The following resource material is suggested for further study.

Teaching Time for This Module

An outline for use in developing your lesson plan is presented below. Note that each Roman numeral in the outline equates to one session of instruction. Each session has a suggested time period of 2½ hours. This includes 10 minutes at the beginning of each session for administrative tasks and one 10-minute break during the session. Approximately 10 hours are suggested to cover Rigging Equipment. You will need to adjust the time required for testing based on your class size and resources. Because laboratories often correspond to Performance Tasks, the proficiency of the trainees may be noted during these exercises for Performance Testing purposes.

Session II. Slings; Tag Lines

A. Slings
   1. Sling Capacity
   2. Sling Care and Storage
   3. Chain Slings

B. Laboratory
   Have trainees practice performing a safety inspection on hooks, slings, and other rigging equipment. This laboratory corresponds to Performance Task 1.

C. Tag Lines

D. Laboratory
   Have trainees practice tying knots used in rigging. This laboratory corresponds to Performance Task 3.

Session III. Block and Tackle; Chain Hoists; Ratchet-Lever Hoists and Come-Along; Jacks; Base-Mounted Drum Hoists

A. Block and Tackle (Bull Rigging)

B. Chain Hoists
   1. Spur-Geared Chain Hoists
   2. Electric Chain Hoists
   3. Care of Chain Hoists

C. Ratchet-Lever Hoists and Come-Alongs

D. Jacks
   1. Ratchet Jacks
   2. Screw Jacks
   3. Hydraulic Jacks
   4. Inspecting and Using Jacks

E. Base-Mounted Drum Hoists (Tuggers)

F. Laboratory
   Have trainees practice selecting, inspecting, and using special rigging equipment. This laboratory corresponds to Performance Task 2.

Session IV. Review and Testing

A. Review

B. Module Examination
   1. Trainees must score 70 percent or higher to receive recognition from NCCER.
   2. Record the testing results on Training Report Form 200, and submit the results to the Training Program Sponsor.

C. Performance Testing
   1. Trainees must perform each task to the satisfaction of the instructor to receive recognition from NCCER. If applicable, proficiency noted during laboratory exercises can be used to satisfy the Performance Testing requirements.
   2. Record the testing results on Training Report Form 200, and submit the results to the Training Program Sponsor.
Module Overview

This module covers communications, basic rigging safety precautions, lift planning, and load and sling calculations. It also covers load charts and load balancing.

Prerequisites

Prior to training with this module, it is recommended that the trainee shall have successfully completed Basic Rigger, Modules 00106-09 and 38101-11.

Objectives

Upon completion of this module, the trainee will be able to do the following:

1. Identify and use the correct ASME hand signals to guide a crane operator.
2. Identify basic rigging and crane safety procedures and determine the center of gravity of a load.
3. Identify the pinch points of a crane and explain how to avoid them.
4. Identify site and environmental hazards associated with rigging.
5. Properly attach rigging hardware for routine lifts and pipe lifts.
6. Explain the importance of sling tension calculations.

Performance Tasks

Under the supervision of the instructor, the trainee should be able to do the following:

1. Use and interpret hand signals.
2. Determine the center of gravity of a load.
3. Properly attach rigging hardware for routine lifts and pipe lifts.

Materials and Equipment

- Multimedia projector and screen
- Computer
- Whiteboard/chalkboard
- Markers/chalk
- Pencils and scratch paper
- Appropriate personal protective equipment
- Walkie-talkies
- Throat microphone
- Hardwired communication system
- ASME B30.5 Consensus Standard 29 CFR 1926.550
- Completed lift plan
- Crane manufacturer’s literature
- Typical teeter-totter and weights
- Various lifting eyebolts
- Rigging hardware
- Module Examinations*
- Performance Profile Sheets*

* Single-module AIG purchases include the printed exam and performance task sheet. If you have purchased the perfect-bound version of this title, download these materials from the IRC using your access code

Safety Considerations

Ensure that the trainees are equipped with appropriate personal protective equipment and know how to use it properly. This module may require that the trainees visit job sites. Ensure that trainees are briefed on site safety policies prior to any site visits.
