# Updates to Construction NVQ Consolidated Assessment Strategy

November 2017

All centres delivering Construction NVQ's are advised that the latest version of the CITB Consolidated Assessment Strategy is applicable from August 2017 and contains an update specifically on Assessor Competencies for the Thermal Insulation NVQ. This is listed on our website on the main Construction page together with this notice.

Currently there are three strategies centres will need to refer to, which can be found here: <http://www.citb.co.uk/qualifications-standards/qualification-framework/>

## Notes

For Plant Operations and Controlling Lifting Operations, centres should continue to apply the previous 'December 2016' Strategy until 1st Jan 2018, after which point new requirements for these occupations will apply.

From 1<sup>st</sup> January 2018, Plant and Lifting centres should start to use a new version from 2018 for these occupations. This is due to the introduction of new requirements for workplace evidence and skills tests for the experienced worker route. This is available on the above link through CITB but will be published on our qualifications pages when applicable.

All other centres, including those offering Thermal Insulation NVQ's should be using the general strategy applicable from 1st August 2017.
