Section One: About the project

Title or working title of project (in the form of a question):

How many takeaways for information at the college.

Project objectives (eg, what is the question you want to answer? What do you want to learn how to do? What do you want find out?)

Getting the information, learn about all the different takeaways.

Find out what types of foods they sell.

Form of project outcomes (eg report, performance, design, artefact)

I will make my own design around food with pictures of the foods that they sell.

If it is a group project, what will your role or responsibilities be?

Section Two: Reasons for choosing this project

Reasons for choosing the project (eg links to other subjects you are studying, personal interest, future plans, knowledge/skills you want to improve, importance of topic):

Information to college students on where to get hot or cold foods from.

Level 1 and 2 exemplar Project Proposal Form. This form is for reference only. Please refer to the Edexcel website to download a copy of this form.

Section Three: Activities	
<p>Activities to be carried out during the project:</p> <p style="font-size: 1.2em;">Finding the information, Pictures. Designing the website. Writing about my website and a Evaluation</p>	
<p>Milestone one:</p> <p>Target date (set by tutor-assessor):</p> <p>Milestone two:</p> <p>Target date (set by tutor-assessor):</p>	
Section Four: Resources	
<p>What resources will you need and what will you use them for? (eg libraries and research resources, physical resources, technology and equipment)</p> <p style="font-size: 1.2em;">Research of the internet. Information from the takeaways. Research out of Books on Food Places</p>	
Comments and agreement from tutor-assessor	
<p>Is the learner taking this project as part of a Diploma? Yes/No</p> <p>If yes, which Diploma are they taking? <u>Higher ICT</u></p> <p>Comments (optional):</p> <p>I confirm that the project is appropriate.</p> <p>Agreed: _____ (name) _____ (date) <u>8/12/09</u></p>	
Comments and agreement from proposal checker	
<p>Comments (optional):</p> <p>I confirm that the project is appropriate.</p> <p>Agreed: _____ (name) _____ (date) <u>5/1/09</u></p>	

Project proposal

Objectives of my project

My project is about takeaways in Hearnor. I will be finding information out on what kinds of foods they sell and putting the information on my power point presentation then I will be producing it into a website. I will also be finding photographs of the places to put on the slides. This will provide information for the public.

For example new people who come to visit the college and people who are at the age 16 – 19 years old that are in education. There are also 2 sixth forms and an FE college which will provide them with this information.

Scope of my project

In my project I will be making presentation then turning it into website to show what types of eating places there are and where they are. I will be putting the information on about 8 slides. The first slide will have the different types of takeaways and you will have to click on the one you want and it will link you to the information on the place. I will then make links to all the slides so more information is on the pages that hyperlink together.

Deliverables

My project is based on takeaways in Hearnor and it will provide information about the place like what kind of foods they provide. The slides will have all the information needed on also with a few pictures of the foods that they do. On the 8 slides that I will produce will be all about the different types of takeaways there are in Hearnor. The website will also provide information on the opening times and days they are open etc... In which I already have these skills already.

Stakeholders

I will be the one who's producing this project and it will be provided for students and teachers in my college for information on what to eat on lunch times. This will affect the businesses that are in Hearnor because the business will increase and the money that comes into the business will increase.

Equipment needed to make my project

The equipment that I might need is the internet to find the information out for the takeaways that I am producing, Photographs of the businesses so I would need a camera to do this, power point on my computer so I could produce my website. Information on how long the companies have been around for and how could there services are. I may also need to ask permission to take the photographs.

Evaluation/success criteria

I will know that my project has been successful because I will ask some students in my college and ask them to write some comments of what they think of the website. I will also look through the comments and change anything they don't like etc...

Timescale

Start – 9th December 2008

Finish – 17th February 2009

Potential risks

The only risk to my project would if I had a day of when my lesson was meant to be I would become behind on my project. Or the teacher could be ill and no one to cover the lesson we would be behind.

I think this will never happen because I will always be here and hopefully the teacher will be here every lesson also.
But if it does I have access to the learning centre and could do some work outside of lessons to catch up.

My Alternative design and why I didn't pick this design

The design that I did first was a leaflet to give people from colleges and schools information didn't succeed because I didn't think this would be the best way of giving the information across to 16 – 19 years old that are still in education.

I decided to do a website on the information of the takeaways of Heanor because younger people would rather look on the internet than read a leaflet.

This would make it easier to have a website because they would be able to look and understand more about the place to eat than on a leaflet, where would they get the leaflet from? Would they read it?
