

Can the Organic farming business be our future?

HPQ Project

Table of contents

01

Conclusions

02

Were my project
objectives achieved?

03

What I learnt during
the project

04

What would I do
differently next time?

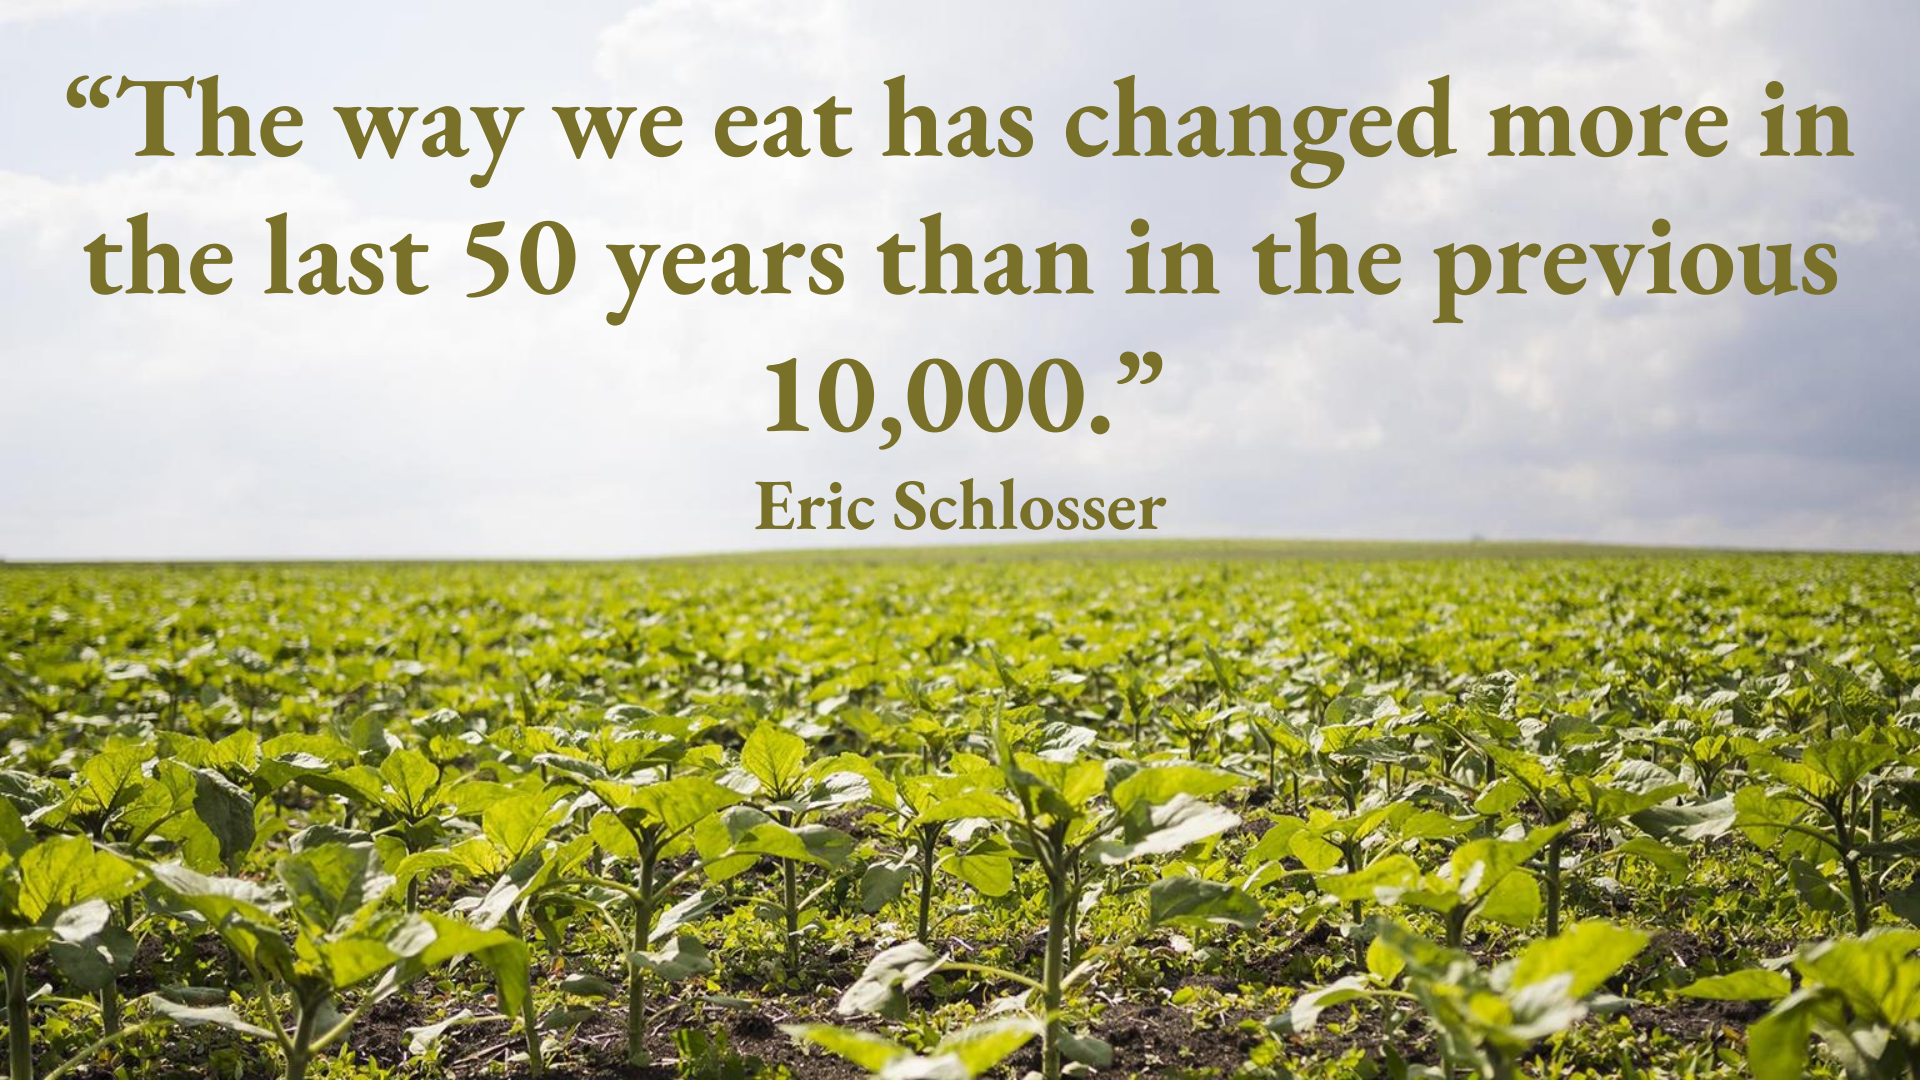

05

How well did I
perform?

06

What can we do
next?

A wide-angle photograph of a lush green field filled with young plants, likely a crop field, stretching to the horizon under a bright, cloudy sky. The plants are densely packed and appear to be in the early stages of growth.

**“The way we eat has changed more in
the last 50 years than in the previous
10,000.”**

Eric Schlosser

01 Conclusions

My Conclusion

Organic food can be seen to provide a more ethical pathway to the future due to it contributing less to global warming in addition being increasingly accessible in online markets

However, at this point in time they will not be able to sustain the early for a fully stable and organic future

02

Were my project
objectives
achieved?

What were my objectives?

- I want to find out what organic farming is
- I want to research how reliable organic farming is
- I want to explore whether not becoming more environmentally friendly helps or hinders a business
- I want to learn how business can link to the geography of our earth

03

What I learnt during the project

What I learnt during the project

How to assess
the reliability of
sources

How to plan and
structure an
essay

How to manage
my time well

Ways organic
farming can
help/hinder the
environment

How to pinpoint
necessary
information I
need

04 What I would do different next time

What I would do next time

Start my project earlier

Use different research methods in my project

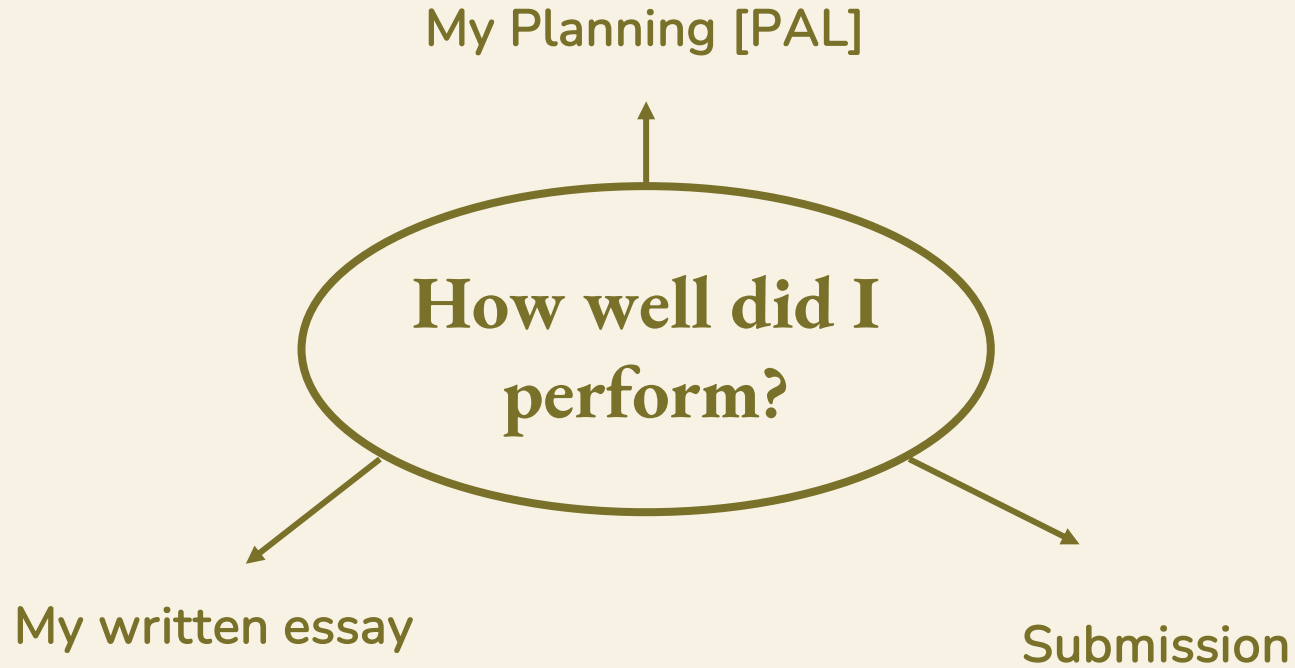

Proofread and edit my writing more regularly

05

How well did I perform?

06

What can we do next?

What follow up ideas could I achieve in this field?

- Non-organic food business might ask/require more funding in order to help the planet by transforming some of their sectors to being organic
- There could be greater research into the the advantages of organic food on the environment and how it compares to the success of the business
- Organic food may be promoted more online and physically in public spaces
- The price of organic may also be forced to decrease in order to provide for lower income families

THANK YOU
