Unit Name

The Higher Project Qualification

Unit number

P201

Project Title

To what extent has Old Norse culture affected Britain?

This form should be included in the candidates work which is submitted for moderation

What task/activity are you assessing?

A04-Oral Review

How has the task/activity met the requirements of the Specification?

The student provided a clear and logical presentation, with a pace and approach that was effective. A clear structure was followed and tracked the research process as well as development in knowledge. The student was confident when asked questions and started to handle more reflective questions in greater depth than first appears in his evaluation. Orally, the student shared what they would like to achieve in this research area in the future, with a particular interest in school curricular and why such topics such as these are not studied at secondary level.

The student was asked questions such as:

*What would you have liked to explore given more time and words?

*You refer to wanting to contact academics in your Activity Log, but it seems that you did not get the chance. How might these connections have strengthened your project?

*What was your biggest challenge?
