Teacher Assessor	<div></div>			

Proposed project title WILL BIO PRINTING BE A VIABLE MEDICAL ASSET IN THE FUTURE?

This form should be used to record the process of your project and be submitted as evidence with the final piece of work.

You may want to discuss:

- what you have done (eg, from one week to the next)
- if you are working in a group, what discussions you have had
- any changes that you have or will need to make to your plans
- what resources you have found or hope to find
- what problems you are encountering and how you are solving them
- what you are going to do next

October 2020 Week 1	For this week we discussed possible ideas for the project upcoming. We reviewed which ones could create a balanced argument and looked into which subjects this project would contain.
October 2020 Week 2	For this week we began to finalise our idea plans and started to begin our Project Proposal form. I took a while and was a little hard to understand but overall was ok.
October 2020 Week 3	This lesson was spent searching for suitable websites I can use information from. These Included The Scientist magazine and other websites I found on the topic.

October 2020 Week 4	Week 4 was spent with the introduction of the CRAVEN evaluation method. During this time we completed a CRAVEN worksheet and learned how to use the method.
November 2020 Week 5	In this time we wrote up craven as a form of literature review. This helped us use the methods to evaluate the websites we visited and write a detailed summary of their contents and reliability.
December 2020 Week 6	During this week we began to write up our introduction and were exposed to the full plan of the Extended Project write up.
January 2021 Week 7	This week we continued our EP write up. I created a plan for my project and began to map out the points I would make and the evidence I would use to back it up
January 2021 Week 8	As last week I continued the Live Extended Project write up, continuing from last week I finished my plans and started to write.
January 2021 Week 9	Though there were no eventful notes this week I continued to write up my EP making slow and steady progress towards my goal
February 2021 Week 10	In this section we returned to our CRAVEN evaluation to begin creating our literature reviews. We produced a paragraph for each paragraph detailing the information discovered in the search and tested the reliability of each with the CRAVEN evaluation method
February 2021 Week 11	This week we began to use our literature reviews to begin writing up our discussion points. It was mildly hard but was easy once got the hang of it

February 2021 Week 12	Throughout this week and many other bits of extra lessons, I continued to go through my Extended Project write up slowly tackling each section a lesson or two at a time.
February 2021 Week 13	Through this week I also continued my write up and though tough got another section and question answered.
March 2021 Week 14	During this week we began to begin transforming our EP write ups into a PowerPoint format with a word limit of 10 per slide. It was very hard to transform all the research to be so small.
April 2021 Week 15	This week was a simpler one, during this time we did a recap check on all work we had done and submitted our current work to be evaluated and checked.
April 2021	Completed our new Edexcel project proposal form and began to recap what we had done to write our activity logs.

Week 16	
April 2021	We completed our projects as well as our Activity logs and Project proposal forms
Week 17	

Pearson Edexcel Project Qualifications - Activity Log Issue 2 - December 2020
