

Q How can I develop Maths and English Skills in Learners who are not ready for GCSE?

Employability skills are vital for everyone. An individual's skills are central to gaining employment, being successful at work and making a career.

Pearson recognises learners' English and Maths skills as being absolutely central to their employability. Therefore we have English and Maths courses that are suitable for learners of all ages.

Functional Skills

Functional Skills allows learners to study Maths & English in a contextualised way and they can be applied to everyday life and work which better helps learners seeking employment. Learners are able to apply their knowledge and understanding in a range of familiar and unfamiliar situations which makes Functional Skills more accessible than GCSE.

ESOL

A bespoke programme of recognised qualifications can be built for learners to develop their skills ready for further education or the workplace. Schools and Colleges will also be meeting their Ofsted requirements in providing a progression route to further study for learners who are unable to access the current curriculum. Through our Awards, learners' can develop their skills at a level suited to their differentiated needs

Other Skills Provision

Many of our other programmes including Workskills and BTEC Introductory are well suited to embedding functional skills and ESOL qualifications as well as supporting learners with their general literacy and numeracy needs.
