GCSE MFL Practice Activities for Independent Learning

We have designed these activities as resources your Year 10 or 11 students could use whilst continuing their studies independently in their homes. Each pack provides a range of 20 minute activities that students can complete in order to enhance their language learning.

We identified the following areas as aspects of the GCSE course students could continue to develop and improve with the support of these resources:

- Developing and learning a wider range of **vocabulary**
- Preparing for the **picture based activity** in the Speaking paper
- Preparing for the **conversation** in the Speaking paper.

The packs include:

- An Activities PowerPoint per topic, with audio instructions where appropriate
- Vocabulary spreadsheets
- Language and Complex structures helpsheets
- A small selection of Foundation paper Picture based cards taken from the SAMs
- ‘Describing the picture’ resource (could be translated into TL by teacher before providing to students)
- A record sheet.

These packs have been produced only in English, so all students and parents can follow the instructions whilst at home. We have included resources produced for French, German and Spanish, but have indicated where these resources can be found by any of our teachers/students delivering our other GCSE languages.

We have also recently unlocked the ‘Translations’ and ‘Literary text’ student booklets available on our websites, for you to provide to your students whilst studying at home.

We hope you find these packs supportive in continuing to deliver the GCSE curriculum to your students.
