# 1 Key dates

## 1.1 Entry deadlines and results

Please see the Key Dates section of this manual for the entry and results dates, and the certification and centre mark submission dates. The Key Dates section also includes details of when the entry submission facility on Edexcel Online is available.

## 1.2 Retention of certificates

It is not necessary to return uncollected certificates to us. They may be destroyed (in a confidential manner) after retention for a period of no less than 12 months from the date of issue. Centres that do not have a means of destroying certificates confidentially may return them to our Manchester office. A record of certificates that have been destroyed should be retained for four years from their date of destruction.

Centres must comply with any request from us to return a certificate. Certificates remain the property of the awarding bodies at all times.

# 2 Entry procedures

Support for entries and registrations can be found here .

## 2.1 Private candidates

Private candidates are candidates taking a qualification without being enrolled full time in a centre. They are responsible for their own entries, which must be made through an approved centre. Some qualifications are not available to private candidates. For a full list of qualifications and private candidate eligibility see our website.

## 2.2 Fees

Information about fees can be found here .

# 3 Exams Officer support

Further support and information can be found here .

# 4 International Advanced Level eligibility rules

It is not possible to use AS/A level units towards an International A Level (IAL) award. Only IAL units can be used to contribute to an International A Level award.

## 5 Resitting International Advanced Level units

Any unit can be resat by a candidate. The better of their two most recent non-absent attempts at an IAL unit will be available for aggregation to a qualification grade. The exception is the IAL Mathematics suite. Please see the document 'Aggregation Rules and Guidance' here .

## 6 Unit, option and cash-in codes and availability

Included in this manual is an alphabetical list of subjects stating the availability by unit, option and cash-in code. Further information about all the IAL qualifications can also be found at qualifications.pearson.com/ial

Candidates intending to cash in their unit scores for a subject grade must enter the appropriate cash-in codes.

Units taken on previous occasions should not be entered unless the candidate wishes to enter for the unit again to improve their results.

XPM01 cannot be awarded in the same exam series as XMA01. Units that contribute to XPM01 cannot be reused for XMA01.

YMA01 cannot be awarded in the same exam series as YPM01. Units that contribute to YMA01 cannot be reused for YPM01.

YPM01 cannot be awarded in the same exam series as YMA01. Units that contribute to YPM01 cannot be reused for YMA01.

The units candidates must take to be eligible for a cash-in (award) are outlined below. They can be taken in the same exam series, or can be banked under the candidate's UCI if taken in a number of series. No grade can be issued unless the appropriate cash in code is entered.

Once a candidate certificates a Mathematics subject, the units that have been used to generate the award are 'locked' to that title (even if the candidate retakes them). Units 'locked' to a subject title through a previous certification may be 'unlocked' by re-entering for that same title. For example, if a candidate who has already certificated AS Mathematics wishes to resit one of these units they should be entered for that unit and AS Mathematics to ensure the other units that contribute to AS Mathematics are available for certification.

Mathematics subjects certificated before the end of a course should be re-certificated at the end of the course. For example, if a candidate who has already certificated A level Mathematics takes three more units and certificates AS Further Mathematics without re-entering A level Mathematics, the grade for AS Further Mathematics will be generated from those three units. Re-entering A level Mathematics ensures that all units are available for re-use and that the grades for both titles are based on the optimum combination of units.
